

# ANNUAL TEACHING PLAN

## HOSPITALITY STUDIES

### GRADE 5 YEAR 1-3

ALearners are three years in Grade 5, and therefore 3 suggested recipes are provided to allow the learners to perform the second and third suggested recipes during their second and third year in grade 5. It is not advisable to repeat the same recipes more than once as this will not provide the learner the opportunity to learn additional skills.

### 2.1.1 Grade 5 Term 1

| Grade 5 Term 1 |                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## Assessment

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported. Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

**The assessment goals for Grade 5, first, second and third year are the same, the dishes are however more advanced.**

|          |                                                                     |                                                             |
|----------|---------------------------------------------------------------------|-------------------------------------------------------------|
| Week 2:  | Keep work surface neat and clean                                    | Dress correctly in disposable cap and cover hair with cap   |
| Week 3:  | Identify correct equipment to use                                   | Measure dry ingredients correctly                           |
| Week 4:  | Measure liquids correctly                                           | Sterilize bottle correctly and safely                       |
| Week 5:  | Place bread tins/cake tins/baking sheet on the middle shelf in oven | Prepare bread tins/cake tins/baking sheets to bake products |
| Week 6:  | Switch stove plate off before removing pot from stove plate         | Prepare food with clean hands and short nails               |
| Week 7:  | Use oven gloves safely                                              | Wash dishes thoroughly                                      |
| Week 8:  | Use oven safely                                                     | Measure bigger quantities dry ingredients correctly         |
| Week 10: | Clean cupboards thoroughly                                          | Clean floors thoroughly                                     |

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on. The following serves as suggestions of theoretical activities to report on.

|         |                                                                                                   |                                                  |                                                            |
|---------|---------------------------------------------------------------------------------------------------|--------------------------------------------------|------------------------------------------------------------|
| Week 2: | Know how to conform to personal hygiene practises in the Hospitality Studies centre               | List what you may not do during food preparation | Tell how my hair should be covered during food preparation |
| Week 3: | Identify frozen desserts on the SA Food Guide Pyramid                                             | Identify examples of frozen desserts             | Describe why desserts are not healthy                      |
| Week 4: | Indicate the nutritional value of fruit on the SA Food pyramid and how many portions to eat daily | List different methods to preserve food          | List the uses of fruit on the menu                         |

|          |                                                                                           |                                                                                            |                                                            |
|----------|-------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|------------------------------------------------------------|
| Week 5:  | Mark/list the characteristics of baked products                                           | Describe how to prepare baking sheets, cake tins and bread tins to bake products           | List the characteristics of baked products                 |
| Week 6:  | Mark/identify eggs and bread on the SA Food Pyramid and how many portions to eat per week | Name the cooking methods for French toast and Window eggs                                  | Describe the differences between shallow frying and baking |
| Week 7:  | Identify desserts on the SA food pyramid and the number of portions to eat daily          | Group hot desserts in groups as baked, boiled and fried and/or poached, steamed and stewed | List examples of custard and cream desserts                |
| Week 8:  | Organise the steps to make choux pastry in the correct order                              | Identify the shapes used to produce choux pastry products                                  | Describe how to present and/or store choux pastry products |
| Week 10: | Colour/mark/write the cleaning material to use to clean a kitchen                         | Mark how to store crockery and cutlery                                                     | Identify where not to dispose of waste                     |

## 2.1.2 Grade 5 Term

## Assessment

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported. Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

**The assessment goals for Grade 5, first, second and third year are the same, the dishes are however more advanced.**

|          |                                                          |                                                                   |
|----------|----------------------------------------------------------|-------------------------------------------------------------------|
| Week 2:  | Measure big quantities dry ingredients correctly         | Use whisk to stir in the shape of an eight                        |
| Week 3:  | Measure small quantities of dry ingredients correctly    | Measure liquids correctly                                         |
| Week 4:  | Remember to switch oven off after being used             | Move beater in mixing bowl to beat cake batter                    |
| Week 5:  | Scrape batter from mixing bowl into cake tins            | Use oven gloves to put cake tin into oven and to remove from oven |
| Week 6:  | Cream margarine and sugar successfully                   | Shape scones correctly                                            |
| Week 7:  | Waitering skills: Take an order independently            | Chef skills: Prepare dish independently                           |
| Week 8:  | Waitering skills: Take ordered food to the correct guest | Chef skills: Able to “multiply” ingredients correctly             |
| Week 10: | Clean stove thoroughly                                   | Clean fridge thoroughly                                           |

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on. The following serves as suggestions of theoretical activities to report on.

|      |                                                    |                                               |                                               |
|------|----------------------------------------------------|-----------------------------------------------|-----------------------------------------------|
| Week | Select/identify/write the portion size of porridge | Identify and list products that are made from | List the accompaniments for breakfast cereals |
|------|----------------------------------------------------|-----------------------------------------------|-----------------------------------------------|

|      |                                                   |                                                    |                                                    |
|------|---------------------------------------------------|----------------------------------------------------|----------------------------------------------------|
| 2:   | and the number of portions to eat                 | maize                                              | and porridge                                       |
| Week | Colour/mark/ write how to cook rice               | Group rice according to types                      | Describe the effect of heat on rice                |
| 3:   |                                                   |                                                    |                                                    |
| Week | Indicate the nutritional value of cakes and       | Identify and name the rising agent used for cakes  | Identify and name the cooking method used for      |
| 4:   | biscuits on the SA Food pyramid                   | and biscuits                                       | cakes and biscuits                                 |
| Week | Select/write the correct answers to describe      | Select/write the correct answers to describe       | Describe how to prepare cake tins                  |
| 5:   | successfully baked cakes                          | successfully baked cakes                           |                                                    |
| Week | Mark/write how a well baked biscuit looks         | Identify and distinguish between the different     | Identify and list the characteristics of baked     |
| 6:   |                                                   | types of biscuits                                  | products that are ready to take out of the oven    |
| Week | Colour/mark/list your task in the restaurant      | Write 3 or more steps to complete your task in     | Write 5 or more steps to complete your task in     |
| 7:   |                                                   | the restaurant                                     | the restaurant                                     |
| Week | Colour/mark a breakfast place setting for one     | Colour/mark a breakfast place setting for two      | Colour/mark a breakfast place setting for four     |
| 8:   | person                                            | persons                                            | persons                                            |
| Week | Colour/mark/write the cleaning material to use to | Describe the steps to clean floors in public areas | Identify equipment that is available on the market |
| 10:  | clean floors in public areas                      |                                                    | to clean floors in public areas                    |

### 2.1.3 Grade 5 Term 3

| Grade 5 Term 3 |                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                |

## Assessment

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported. Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

**The assessment goals for Grade 5, first, second and third year are the same, the dishes are however more advanced.**

|          |                                               |                                                                  |
|----------|-----------------------------------------------|------------------------------------------------------------------|
| Week 2:  | Dish up and serve soup safely                 | Maintenance of hygienic standards: Clean and dry sink thoroughly |
| Week 3:  | Perform the rub-in and creaming mixing method | Prepare food with clean hands and short clean nails              |
| Week 4:  | Poach/ fry products correctly                 | Clean stove top thoroughly                                       |
| Week 5:  | Grill/fry correctly                           | Identify most suitable equipment to prepare product              |
| Week 6:  | Stew correctly                                | Prepare food with neatly tied hair                               |
| Week 7:  | Waitering skills: Collect correct order       | Chef skills: Prepare dish independently                          |
| Week 8:  | Waitering skills: Clear table correctly       | Chef skills: Efficient use of time                               |
| Week 10: | Clean toilets thoroughly                      | Clean doors thoroughly                                           |

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on. The following serves as suggestions of theoretical activities to report on.

|         |                                                   |                                                                                                                   |                                                                                    |
|---------|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| Week 2: | Select/identify/write examples of dairy products  | Understand and identify the difference between thin, clear soups (consommé) and thick soup (cream and puree soup) | List the accompaniments for soup                                                   |
| Week 3: | Colour/mark the utensils you will use to a quiche | List the most important nutrient in milk and milk products, namely protein and calcium and list the               | Name types of pastry: short (plain, sweet), puff, and frozen (phyllo, puff, short) |

|          |                                                                              |                                                                                                   |                                                                              |
|----------|------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| Week 4:  | Identify/name the fresh water fish                                           | function of protein and calcium<br>Identify and list the factors to consider when purchasing fish | Identify and list the cooking methods to prepare fish                        |
| Week 5:  | Select/write the cooking methods to prepare a burger and meat stew           | Identify and list the types of poultry that we eat                                                | Identify food spoilage, food poisoning and food contamination                |
| Week 6:  | Mark/identify how to thaw chicken                                            | Identify and list the cooking methods to prepare poultry                                          | Identify and list the factors to consider when purchasing poultry            |
| Week 7:  | Select dishes for a 3 course menu.                                           | Identify dishes that are not suitable for a 3 course menu                                         | Draw up your own 3 course menu                                               |
| Week 8:  | Cut and paste the cutlery and crockery to set a 3 course dinner for 2 people | Cut and paste the cutlery and crockery to set a 3 course dinner for 4 people                      | Cut and paste the cutlery and crockery to set a 3 course dinner for 6 people |
| Week 10: | Colour/mark/match/write how to clean a bathroom                              | Colour/mark/match/write how to clean a hand basin in a bathroom                                   | Colour/mark/match/write how to clean a toilet                                |

## 2.1.4 Grade 5 Term 4

| Grade 5 Term 4 |                             |                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                            |

## Assessment

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported. Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

**The assessment goals for Grade 5, first, second and third year are the same, the dishes are however more advanced.**

|          |                                                          |                                              |
|----------|----------------------------------------------------------|----------------------------------------------|
| Week 2:  | Boil and drain pasta correctly                           | Clean and sort cutlery correctly             |
| Week 3:  | Practise safe knife skills                               | Switches stove plate off before removing pot |
| Week 4:  | Prepare bread tins correctly                             | Know when to take bread out of oven          |
| Week 5:  | Measure dry ingredients correctly                        | Wash dishes in warm, clean water and rinse   |
| Week 6:  | Handle hot liquids safely                                | Stir ingredients in the shape of an 8        |
| Week 7:  | Waitering skills: Serve dishes correctly                 | Chef skills: Work under pressure             |
| Week 8:  | Waitering skills: Treat guests politely and with respect | Chef skill: Maintain hygienic standards      |
| Week 10: | Dispose of waste hygienically                            | Clean an office space thoroughly             |

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on. The following serves as suggestions of theoretical activities to report on.

|         |                                                                              |                                                             |                                                                                                                                                                 |
|---------|------------------------------------------------------------------------------|-------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Week 2: | Select/mark the pasta food group on the SA Food Pyramid                      | List the most important nutrient in pasta, and the function | Group pasta according to the shapes (shells, screws and other), sheets (lasagne), ribbons (tagliatelle, fettuccine, spaghetti) and filled (cannelloni, ravioli) |
| Week 3: | Identify vegetable portion size and list the number of portions to eat daily | Identify the different types of vegetables                  | Identify the edible parts of the vegetable plant                                                                                                                |
| Week    | Identify/mark the ingredients to bake bread                                  | Identify bread portion size and list the number of          | List and name the ingredients to bake bread                                                                                                                     |

|      |                                                                                           |                                                                       |                                                                           |

| 4:   |                                                                                           | portions to eat daily                                                 |                                                                           |
| Week | Identify the different types of flour used to bake bread                                  | Identify the different cooking methods for yeast products             | Understand and identify the characteristics of a baked product            |
| 5:   |                                                                                           |                                                                       |                                                                           |
| Week | Select the dishes with gelatine as an ingredient                                          | Understand and practise how to prepare, set and un-mould jelly        | Describe what is gelatine                                                 |
| 6:   |                                                                                           |                                                                       |                                                                           |
| Week | Select dishes suitable for a birthday party for a 1 year old child                        | List the ingredients to prepare the birthday party                    | Compile a shopping list to buy the ingredients for the birthday party     |
| 7:   |                                                                                           |                                                                       |                                                                           |
| Week | Paste a picture of a novelty cake and list the ingredients you will need to bake the cake | List the steps to prepare the novelty cake                            | Create a theme for a birthday party for a 6 year old and compile a menu   |
| 8:   |                                                                                           |                                                                       |                                                                           |
| Week | Colour/mark/match/write how to clean the school's sick room                               | Colour/mark/match/write how to make the bed in the school's sick room | Colour/mark/match/write how to clean the mirror in the school's sick room |
| 10:  |                                                                                           |                                                                       |                                                                           |

This is the end of the document for schools instructing 4 skills subjects with 2 hours instruction time allocated to each skills subject. The following section of the document is applicable to schools instructing three skills subjects, with 2,5 hours instruction time.

The following section is a repeat of the practical content overview and teaching plans, however this section refers to 2,5 hours teaching time per five day cycle, whilst the previous section of the document refers to 2 hours teaching time per five day cycle. The recipes in the following section is slightly more advanced to ensure that the additional 30 minutes is used constructively to complete the recipes.

## 2.2 Term overview – 2,5 hours teaching time per five day cycle

| week | GRADE 4<br>1 <sup>st</sup> year<br>(2.5 hour periods)                                                                                                                                                                                                                                                                                                                                       | GRADE 4<br>2 <sup>nd</sup> year<br>(2.5 hour periods)               | GRADE 5<br>1 <sup>st</sup> year<br>(2.5 hour periods)                               | GRADE 5<br>2 <sup>nd</sup> year<br>(2.5 hour periods)                            | GRADE 5 3 <sup>rd</sup> year<br>(2.5 hour periods)                      |

### 2.3 Content outline per term

During every Hospitality studies lesson the following skills should be practised by the learner, namely to

- dress independently in apron and disposable cap
  - wash and dry hands independently
  - read the recipe (either “Boardmaker” or adapted word recipes) step by step (refer to addendum 8 in participant’s manual)
  - follow excellent hygiene practises
  - mise-en-place according to dishes prepared
  - prepare and eat dishes independently in groups of 2 learners (or with teacher assistance) with appropriate table manners, except during the three restaurant sessions during terms 2 – 4 when the learners prepare the recipes individually and work individually as waiters.
  - wash and dry dishes and put away in specified place
  - fold apron and put disposable cap away independently
- During each Hospitality studies lesson the teacher

should:

- Demonstrate the recipe during the first ten minutes of the period and share completed dish between learners that wish to enjoy a second portion after they have eaten the dish prepared by them, or send the dish to the class’ register teacher to enjoy. **The Hospitality studies teacher may not eat the demonstrated dish**
- Stand next to the learner when pouring boiling water, putting dishes in the oven and take dishes out

- Move between the learners and assist them should they need help. The teacher may at no circumstances leave the class during a practical session.

It is advisable that the teacher do not use deep frying as cooking method with learners with severe intellectual disability due to the safety risk involved with this cooking method.

Learners are three years in Grade 5, and therefore 3 suggested recipes are provided to allow the learners to perform the second and third suggested recipes during their second and third year in grade 5. It is not advisable to repeat the same recipes more than once as this will not provide the learner the opportunity to learn additional skills.

### 2.3.1 Grade 5 term 1

| Grade 5 Term 1 |                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Assessment

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported. Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

**The assessment goals for Grade 5, first, second and third year are the same, the dishes are however more advanced.**

|          |                                                                     |                                                             |
|----------|---------------------------------------------------------------------|-------------------------------------------------------------|
| Week 2:  | Keep work surface neat and clean                                    | Dress correctly in disposable cap and cover hair with cap   |
| Week 3:  | Identify correct equipment to use                                   | Measure dry ingredients correctly                           |
| Week 4:  | Measure liquids correctly                                           | Sterilize bottle correctly and safely                       |
| Week 5:  | Place bread tins/cake tins/baking sheet on the middle shelf in oven | Prepare bread tins/cake tins/baking sheets to bake products |
| Week 6:  | Switch stove plate off before removing pot from stove plate         | Prepare food with clean hands and short nails               |
| Week 7:  | Use oven gloves safely                                              | Wash dishes thoroughly                                      |
| Week 8:  | Use oven safely                                                     | Measure bigger quantities dry ingredients correctly         |
| Week 10: | Clean cupboards thoroughly                                          | Clean floors thoroughly                                     |

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on. The following serves as suggestions of theoretical activities to report on.

|         |                                                                                                   |                                                                                  |                                                            |
|---------|---------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|------------------------------------------------------------|
| Week 2: | Know how to conform to personal hygiene practises in the Hospitality Studies centre               | List what you may not do during food preparation                                 | Tell how my hair should be covered during food preparation |
| Week 3: | Identify frozen desserts on the SA Food Guide Pyramid                                             | Identify examples of frozen desserts                                             | Describe why desserts are not healthy                      |
| Week 4: | Indicate the nutritional value of fruit on the SA Food pyramid and how many portions to eat daily | List different methods to preserve food                                          | List the uses of fruit on the menu                         |
| Week 5: | Mark/list the characteristics of baked products                                                   | Describe how to prepare baking sheets, cake tins and bread tins to bake products | List the characteristics of baked products                 |
| Week 6: | Mark/identify eggs and bread on the SA Food Pyramid and how many portions to eat per week         | Name the cooking methods for French toast and Window eggs                        | Describe the differences between shallow frying and baking |

|          |                                                                                  |                                                                                            |                                                            |
|----------|----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|------------------------------------------------------------|
| Week 7:  | Identify desserts on the SA food pyramid and the number of portions to eat daily | Group hot desserts in groups as baked, boiled and fried and/or poached, steamed and stewed | List examples of custard and cream desserts                |
| Week 8:  | Organise the steps to make choux pastry in the correct order                     | Identify the shapes used to produce choux pastry products                                  | Describe how to present and/or store choux pastry products |
| Week 10: | Colour/mark/write the cleaning material to use to clean a kitchen                | Mark how to store crockery and cutlery                                                     | Identify where not to dispose of waste                     |

### 2.3.2 Grade 5 term 2

| Grade 5 Term 2 |                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                              |

## Assessment

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported. Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

**The assessment goals for Grade 5, first, second and third year are the same, the dishes are however more advanced.**

|          |                                                          |                                                                   |
|----------|----------------------------------------------------------|-------------------------------------------------------------------|
| Week 2:  | Measure big quantities dry ingredients correctly         | Use whisk to stir in the shape of an eight                        |
| Week 3:  | Measure small quantities of dry ingredients correctly    | Measure liquids correctly                                         |
| Week 4:  | Remember to switch oven off after being used             | Move beater in mixing bowl to beat cake batter                    |
| Week 5:  | Scrape batter from mixing bowl into cake tins            | Use oven gloves to put cake tin into oven and to remove from oven |
| Week 6:  | Cream margarine and sugar successfully                   | Shape scones correctly                                            |
| Week 7:  | Waitering skills: Take an order independently            | Chef skills: Prepare dish independently                           |
| Week 8:  | Waitering skills: Take ordered food to the correct guest | Chef skills: Able to “multiply” ingredients correctly             |
| Week 10: | Clean stove thoroughly                                   | Clean fridge thoroughly                                           |

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on. The following serves as suggestions of theoretical activities to report on.

|         |                                                                                      |                                                                       |                                                                  |
|---------|--------------------------------------------------------------------------------------|-----------------------------------------------------------------------|------------------------------------------------------------------|
| Week 2: | Select/identify/write the portion size of porridge and the number of portions to eat | Identify and list products that are made from maize                   | List the accompaniments for breakfast cereals and porridge       |
| Week 3: | Colour/mark/ write how to cook rice                                                  | Group rice according to types                                         | Describe the effect of heat on rice                              |
| Week 4: | Indicate the nutritional value of cakes and biscuits on the SA Food pyramid          | Identify and name the rising agent used for cakes and biscuits        | Identify and name the cooking method used for cakes and biscuits |
| Week 5: | Select/write the correct answers to describe successfully baked cakes                | Select/write the correct answers to describe successfully baked cakes | Describe how to prepare cake tins                                |
| Week 6: | Mark/write how a well baked biscuit looks                                            | Identify and distinguish between the different types of               | Identify and list the characteristics of baked                   |

|          |                                                                                |                                                               |                                                                                    |
|----------|--------------------------------------------------------------------------------|---------------------------------------------------------------|------------------------------------------------------------------------------------|
|          |                                                                                | biscuits                                                      | products that are ready to take out of the oven                                    |
| Week 7:  | Colour/mark/list your task in the restaurant                                   | Write 3 or more steps to complete your task in the restaurant | Write 5 or more steps to complete your task in the restaurant                      |
| Week 8:  | Colour/mark a breakfast place setting for one person                           | Colour/mark a breakfast place setting for two persons         | Colour/mark a breakfast place setting for four persons                             |
| Week 10: | Colour/mark/write the cleaning material to use to clean floors in public areas | Describe the steps to clean floors in public areas            | Identify equipment that is available on the market to clean floors in public areas |

### 2.3.3 Grade 5 term 3

## Assessment

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported. Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

**The assessment goals for Grade 5, first, second and third year are the same, the dishes are however more advanced.**

|          |                                               |                                                                                   |
|----------|-----------------------------------------------|-----------------------------------------------------------------------------------|
| Week 2:  | Dish up and serve soup safely                 | Maintenance of hygienic standards: Clean and dry sink thoroughly                  |
| Week 3:  | Perform the rub-in and creaming mixing method | Prepare food with clean hands and short clean nails                               |
| Week 4:  | Poach/ fry products correctly                 | Clean stove top thoroughly<br>Identify most suitable equipment to prepare product |
| Week 5:  | Grill/fry correctly                           | Prepare food with neatly tied hair                                                |
| Week 6:  | Stew correctly                                | Chef skills: Prepare dish independently                                           |
| Week 7:  | Waitering skills: Collect correct order       | Chef skills: Efficient use of time                                                |
| Week 8:  | Waitering skills: Clear table correctly       | Chef skills: Efficient use of time                                                |
| Week 10: | Clean toilets thoroughly                      | Clean doors thoroughly                                                            |

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on. The following serves as suggestions of theoretical activities to report on.

|         |                                                                    |                                                                                                                                     |                                                                                    |
|---------|--------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| Week 2: | Select/identify/write examples of dairy products                   | Understand and identify the difference between thin, clear soups (consommé) and thick soup (cream and puree soup)                   | List the accompaniments for soup                                                   |
| Week 3: | Colour/mark the utensils you will use to a quiche                  | List the most important nutrient in milk and milk products, namely protein and calcium and list the function of protein and calcium | Name types of pastry: short (plain, sweet), puff, and frozen (phyllo, puff, short) |
| Week 4: | Identify/name the fresh water fish                                 | Identify and list the factors to consider when purchasing fish                                                                      | Identify and list the cooking methods to prepare fish                              |
| Week 5: | Select/write the cooking methods to prepare a burger and meat stew | Identify and list the types of poultry that we eat                                                                                  | Identify food spoilage, food poisoning and food contamination                      |
| Week    | Mark/identify how to thaw                                          | Identify and list the cooking                                                                                                       | Identify and list the factors to                                                   |

|          |                                                                              |                                                                              |                                                                              |
|----------|------------------------------------------------------------------------------|------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| 6:       | chicken                                                                      | methods to prepare poultry                                                   | consider when purchasing poultry                                             |
| Week 7:  | Select dishes for a 3 course menu.                                           | Identify dishes that are not suitable for a 3 course menu                    | Draw up your own 3 course menu                                               |
| Week 8:  | Cut and paste the cutlery and crockery to set a 3 course dinner for 2 people | Cut and paste the cutlery and crockery to set a 3 course dinner for 4 people | Cut and paste the cutlery and crockery to set a 3 course dinner for 6 people |
| Week 10: | Colour/mark/match/write how to clean a bathroom                              | Colour/mark/match/write how to clean a hand basin in a bathroom              | Colour/mark/match/write how to clean a toilet                                |

## 2.3.4 Grade 5 term 4

| Grade 5 Term 4 |                  |                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                              |

## Assessment

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported. Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

**The assessment goals for Grade 5, first, second and third year are the same, the dishes are however more advanced.**

|          |                                                          |                                              |
|----------|----------------------------------------------------------|----------------------------------------------|
| Week 2:  | Boil and drain pasta correctly                           | Clean and sort cutlery correctly             |
| Week 3:  | Practise safe knife skills                               | Switches stove plate off before removing pot |
| Week 4:  | Prepare bread tins correctly                             | Know when to take bread out of oven          |
| Week 5:  | Measure dry ingredients correctly                        | Wash dishes in warm, clean water and rinse   |
| Week 6:  | Handle hot liquids safely                                | Stir ingredients in the shape of an 8        |
| Week 7:  | Waitering skills: Serve dishes correctly                 | Chef skills: Able to work under pressure     |
| Week 8:  | Waitering skills: Treat guests politely and with respect | Chef skill: Maintain hygienic standards      |
| Week 10: | Dispose of waste hygienically                            | Clean an office space thoroughly             |

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on. The following serves as suggestions of theoretical activities to report on.

|         |                                                                              |                                                                          |                                                                                                                                                                 |
|---------|------------------------------------------------------------------------------|--------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Week 2: | Select/mark the pasta food group on the SA Food Pyramid                      | List the most important nutrient in pasta, and the function              | Group pasta according to the shapes (shells, screws and other), sheets (lasagne), ribbons (tagliatelle, fettuccine, spaghetti) and filled (cannelloni, ravioli) |
| Week 3: | Identify vegetable portion size and list the number of portions to eat daily | Identify the different types of vegetables                               | Identify the edible parts of the vegetable plant                                                                                                                |
| Week 4: | Identify/mark the ingredients to bake bread                                  | Identify bread portion size and list the number of portions to eat daily | List and name the ingredients to bake bread                                                                                                                     |
| Week 5: | Identify the different types of flour used to bake bread                     | Identify the different cooking methods for yeast products                | Understand and identify the characteristics of a baked product                                                                                                  |
| Week 6: | Select the dishes with gelatine as an ingredient                             | Understand and practise how to prepare, set and un-mould jelly           | Describe what is gelatine                                                                                                                                       |

|          |                                                                                           |                                                                       |                                                                           |
|----------|-------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|---------------------------------------------------------------------------|
| Week 7:  | Select dishes suitable for a birthday party for a 1 year old child                        | List the ingredients to prepare the birthday party                    | Compile a shopping list to buy the ingredients for the birthday party     |
| Week 8:  | Paste a picture of a novelty cake and list the ingredients you will need to bake the cake | List the steps to prepare the novelty cake                            | Create a theme for a birthday party for a 6 year old and compile a menu   |
| Week 10: | Colour/mark/match/write how to clean the school's sick room                               | Colour/mark/match/write how to make the bed in the school's sick room | Colour/mark/match/write how to clean the mirror in the school's sick room |

**3.**
