

Show similar responses consistently during the toileting process											
Remember learned responses within a activity involving toileting											
Explores objects during toileting or nappy changing											
Engages in frequently repeated toileting procedures, within the same day											
Initiate the activity of going to the toilet or having their nappy changed											
Remembers when in the daily routine it is time to go to the toilet.											
Participate in routine toileting activities in a familiar context											
Follow 1 step instructions during the event of toileting											
Follow 2 or more step instructions during toileting											
Functional ability: tick learner's abilities ✓	Total dependance wrt nappy changing	Learner indicates when nappy is wet/soiled	In toilet training process	Independent in toileting			Toilet trained, need physical support due to diagnosis			Functional goal:	

Personal care								
Startle to sudden introduction of sensory stimuli								
Show momentary awareness to familiar people during personal care activities								
Begin to show interest to the familiar person and/ or personal care activity								
Shows similar responses consistently during the same personal care routine.								
Recognize familiar person, care events and/ or objects								
Explore personal care items								
Remember learned responses within the same day								
Apply known solutions to routine problems								
Remember learned responses from day to day								
Follow 1 step instructions during personal care activities								
Match personal care objects in terms of single features.								
Identify and/ or name some basic personal care items								
Follow 2 step instructions during familiar personal care activities								
Follow the sequence of routine activities in a familiar context								
Begin to match basic 3D objects to 2D representations								

3.2 LIFE SKILLS: CREATIVE ARTS

VISUAL ARTS

Startle to sudden introduction of sensory stimuli								
Show momentary awareness to familiar people, experiences and/ or 3D objects								
React intermittently to familiar people, experiences and/ or basic 3D objects								
React to familiar people, experiences and/ or 3D objects								

React to creative processes during co-active exploration of textured art material or activities									
Shared exploration of textured art materials and/ or art activities									
Explores materials with increasing complexity									
Remember learned responses within the same day									
Actively explores a variety of art materials with increasing complexity for longer periods									
Make marks intentionally on surfaces and repeat the action for a similar effect									
Apply familiar techniques to create an art product									
Uses tools, materials and actions intentionally to produce an art piece									

3.3 LIFE SKILLS: PHYSICAL EDUCATION

BALANCE AND COORDINATION

Startle to sudden introduction of sensory stimuli									
Show momentary awareness during experiences that involve moving the body through space									
React during co-active exploration of experiences involving movement									
Shows consistent response to specific activities that require balance and coordination									
Shared exploration during activities requiring balance and coordination									
Shows interest in the results of movements during balance and coordination activities.									
Remember learned responses within the same day									
Anticipates what to do when faced with a familiar activity related to movement/ balance/ coordination									
Explore different options when faced with a range of obstacles									
Copy and repeat simple, single actions									
Perform a increased range of actions, related to balance and coordination (on command)									
Changes actions in order to improve performance of activities									
Plans and executes a variety of coordinated movements required for balance and the controlled manipulation of apparatus
