Subject: Mathematics	Grade:1	Term:1	Week:3-4
Topic: Time	Content:	Time allocation:	Date started:
			Date completed:
Prior content knowledge: Learners must have prior knowledge of counting numbers and number symbols.	Lesson objectives: The learners must be able to: - Differentiate between day and night - Learners must be able to know their age - Learners must be able to count 1 to 13, forward and backwards - Order numbers from 1 to 13 - Compare numbers from 1 up to 10 using big, small, more, less and equal to.	Vocabulary/ important words:	Teaching strategies: - Demonstration - Observation - Question and answer - discussion

Resources: • video • pictures • chalkboard • worksheet	TEACHER ACTIVITY • Teacher will talk about things that happen during the day and at night • Use of class routine daily will help learners to recognize time of doing things • Teacher will use season chart to explain change of times, in summer it is hot , in winter it is cold, time changes. • Birthday chart will show different days , weeks , months and years • Weather chart will show different times from the morning till at night	LEARNER'S ACTIVITIES • Learners will talk about things that happen during the day and at night • Learners will do their class routine to be able to tell what time it is according to what they do at specific times • Learners will say their birth dates as the teacher will say the dates. • Learners will say the four seasons of the year as they learn about seasons.	Assessment goal: • Learner is able to identify and read number symbols • Learner can recognize same patterns • Learner can complete the continuing pattern Assessment strategy: Informal X Formal
Differentiation (Enrichment opportunities/ addressing barriers)			Practical task • Assessment tool: Rubric
Teacher reflection: HOD Input:			Name of Teacher: I Mudzunga Name of HOD: W. Manthata
