

TERM OVERVIEW GRADE 1

The following tables show the progression over the terms within GRADE 1 in the different content area:

GRADE 1 OVERVIEW WITH DIFFERENTIATION 1. NUMBER, OPERATIONS AND RELATIONSHIPS				
TOPICS	Term 1	Term 2	Term 3	Term 4
COUNTING WITH WHOLE NUMBERS				
1.1 Count objects	Number range: 1 to 10 - One to one correspondence - Count in ones - Clapping hands - Count concrete objects - Count body parts - Stamping feet - Practise rote counting using number rhymes and songs	Number range 1 to 13 - One to one correspondence - Count in ones - Clapping hands - Count concrete objects - Count body parts - Stamping feet - Practise rote counting using number rhymes and songs	Number range 1 to 15 - One to one correspondence - Count in ones - Clapping hands - Count concrete objects - Count body parts - Stamping feet - Practise rote counting using number rhymes and songs	Number range 1 to 20 - One to one correspondence - Count in ones - Clapping hands - Count concrete objects - Count body parts - Stamping feet - Practise rote counting using number rhymes and songs
1.2 Count forwards and backwards	Number range: 1 to 5 - Incidental counting using number rhymes and songs, concrete objects, counters, counting with body movements - Count in ones, forwards and backwards from any given number between 1-5	Number range: 1 to 7 - Incidental counting using number rhymes and songs, concrete objects counters, counting with body movements - Count in ones, forwards and backwards from any given number between 1-7	Number range: 1 to 8 - Incidental counting using number rhymes and songs, concrete objects counters, counting with body movements - Count in ones, forwards and backwards from any given number between 1-8	Number range: 1 to 10 - Incidental counting using number rhymes and songs, concrete objects counters, counting with body movements - Count in ones, forwards and backwards from any given number between 1-10

GRADE 1 OVERVIEW WITH DIFFERENTIATION 1. NUMBER, OPERATIONS AND RELATIONSHIPS				
TOPICS	Term 1	Term 2	Term 3	Term 4
NUMBER CONCEPT DEVELOPMENT: Represent whole numbers				
1.3 Number symbols and number names	Number range: 1 to 5 • Recognise, identify and read number symbols 1-5 • Reinforce the knowledge gained	Number range: 1 to 7 • Recognise, identify and read number symbols 1-7 • Reinforce the knowledge gained • Trace, colour, copy and write number symbols incidentally	Number range: 1 to 8 • Recognise, identify and read number symbols 1-8 • Reinforce the knowledge gained • Trace, colour, copy and write number symbols incidentally	Number range: 1 to 10 • Recognise, identify and read number symbols 1-10 • Reinforce the knowledge gained • Trace, colour, copy and write number symbols
NUMBER CONCEPT DEVELOPMENT: Describe, compare and order whole numbers				
1.4 Describe, compare and order numbers	Number range: 1 to 2 • Identify whole numbers • Compare which of the two given collection of objects are: - Small and big - More and less - Number rhymes and songs	Number range: 1 to 3 • Identify whole numbers • Compare which of the two given collection of objects are: - Small and big - More and less - Number rhymes and songs	Number range: 1 to 4 • Identify whole numbers • Compare which of the two given collection of objects are: - Small and big - Most and least - First to last - Equal □ Position objects from first to last in a line	Number range: 1 to 5 • Identify whole numbers • Compare which of the two given collection of objects are: - Small and big - Most and least - First to last - Equal - Many and few □ Position objects from first to tenth in a line

GRADE 1 OVERVIEW WITH DIFFERENTIATION 1. NUMBER, OPERATIONS AND RELATIONSHIPS				
TOPICS	Term 1	Term 2	Term 3	Term 4
SOLVE PROBLEMS IN CONTEXT				
1.6 Problem solving techniques	• Use the concrete apparatus e.g. Counters and physical number ladder or any concrete objects available in and outside the classroom • Practise doubling	• Use the concrete apparatus e.g. Counters and physical number ladder or any concrete objects available in and outside the classroom • Practise doubling and halving	• Use concrete apparatus e.g. Counters and physical number ladder • Practise doubling and halving	• Use concrete apparatus e.g. Counters and physical number ladder • Practise doubling and halving
1.7 Addition and subtraction	☐ Use concrete objects to solve problems involving addition and subtraction with answers up to 5	☐ Use concrete objects to solve problems involving addition and subtraction with answers up to 7	☐ Use concrete objects to solve problems involving addition and subtraction with answers up to 8	☐ Use concrete objects to solve problems involving addition and subtraction with answers up to 10
1.9 Grouping and sharing leading to division	☐ Solve problems practically involving sharing with concrete objects equally amongst the 4 learners	☐ Solve problems practically involving sharing with concrete objects equally amongst the 6 learners	• Solve problems practically involving sharing with concrete objects equally amongst the 8 learners • Solve problems practically involving grouping with concrete objects up to 8	• Solve problems practically involving sharing with concrete objects equally amongst the 10 learners • Solve problems practically involving grouping with concrete objects up to 10
1.10 Sharing leading to fractions	☐ Introduction to half using concrete objects	☐ Introduction to half using concrete objects	☐ Introduction to half using concrete objects	☐ Introduction to half using concrete objects
1.11		☐ Recognise of South African	☐ Recognise of South African	☐ Recognise of South African

**GRADE 1 OVERVIEW WITH DIFFERENTIATION 1.
NUMBER, OPERATIONS AND RELATIONSHIPS**

TOPICS	Term 1	Term 2	Term 3	Term 4
Money		Rand., R1, R2, R5 □ Identify similarities and differences between coins e.g. sort play money according to amount	RandR1, R2, R5 □ Identify similarities and differences between coins e.g. sort play money according to amount	Rand, R1, R2, R5, R10 □ Identify similarities and differences between coins e.g. sort play money according to amount
CONTEXT FREE CALCULATIONS:				
1.12 Techniques and methods	□ Use concrete apparatus e.g. counters	• Use concrete apparatus e.g. counters • Practise doubling	• Use concrete apparatus e.g. counters • Practise doubling and halving • Use number lines	• Use concrete apparatus e.g. counters • Practise doubling and halving • Use number lines • Use 100 chart
1.13 Addition and subtraction	• Solve addition problems with answers up to 5 • Solve subtraction problems with answers up to 5	• Solve addition problems with answers up to 7 • Solve subtraction problems with answers up to 7	• Solve addition problems with answers up to 8 • Solve subtraction problems with answers up to 8	• Solve addition problems with answers up to 10 • Solve subtraction problems with answers up to 10
1.14 Repeated addition leading to multiplication	□ Add the same number repeatedly up to 4	□ Add the same number repeatedly up to 6	□ Add the same number repeatedly up to 8	□ Add the same number repeatedly up to 10
1.16 Mental Mathematics	□ Count everyday objects forwards up to 10	• Count everyday objects forwards up to 10 • Say number names of up to 10	• Count everyday objects forwards up to 10 • Say number names of up to 10	• Number Concepts: Ordinal counting up to 10 • Count everyday objects
GRADE 1 OVERVIEW WITH DIFFERENTIATION				

L. NUMBER, OPERATIONS AND RELATIONSHIPS				
TOPICS	Term 1	Term 2	Term 3	Term 4
		daily	daily	forwards up to 10. • Say number names of up to 10 daily • Compare numbers and say which is more and less

GRADE 1 OVERVIEW WITH DIFFERENTIATION 2. PATTERNS, FUNCTIONS AND ALGEBRA				
TOPICS	TERM 1	TERM 2	TERM 3	TERM 4
2.1 Geometric patterns	- Identify patterns in clothes, objects and the environment - Copy patterns using body percussion	- Identify patterns in clothes, objects and the environment - Copy patterns using body percussion	- Identify patterns in clothes, objects and the environment - Copy patterns using concrete objects	- Identify patterns in clothes, objects and the environment - Copy patterns using concrete objects

GRADE 1 OVERVIEW WITH DIFFERENTIATION 3. SPACE AND SHAPE(GEOMETRY)				
TOPIC	TERM 1	TERM 2	TERM 3	TERM 4

3.1 Position, orientation and views	Language of position • Understand the position of one object in relation to another e.g. on top of, in front of, behind, up, down, next to • Position and directions • Follow directions to move around the classroom	Language of position • Understand the position of one object in relation to another e.g. on top of, in front of, behind, up, down, next to • Position and directions • Follow directions to move around the classroom • Follow instructions to place one object in relation to another	Language of position • Understand the position of one object in relation to another e.g. on top of, in front of, behind, up, down, next to • Position and views • Understand the position of one object in relation to the other e.g. top and bottom	Language of position • Understand the position of one object in relation to another e.g. on top of, in front of, behind, up, down, next to • Position and views • Understand the position of one object in relation to the other e.g. top and bottom
3.2 3D objects	Range of objects ☐ Recognise and identify 3D objects in the classroom e.g. box and ball shapes	Range of objects ☐ Recognise and identify 3D objects in the classroom e.g. box and ball shapes	Range of objects ☐ Recognise and identify 3D objects in the classroom e.g. box and ball shapes	Range of objects ☐ Recognise and identify 3D objects in the classroom e.g. box and ball shapes
3.3 2D shapes	☐ Recognise, identify and name two-dimensional shapes in the classroom and in pictures including: Class name Learners Symbols	☐ Recognise, identify and name two-dimensional shapes in the classroom and in pictures including: Learner Symbols Class name	☐ Recognise, identify and name two-dimensional shapes in the classroom and in pictures including: Learner Symbols Class name	☐ Recognise, identify and name two-dimensional shapes in the classroom and in pictures including: Learner Symbols Class name
GRADE 1 OVERVIEW WITH DIFFERENTIATION 3. SPACE AND SHAPE(GEOMETRY)				
TOPIC	TERM 1	TERM 2	TERM 3	TERM 4

	Figure ground perception Recognise of 2D shapes e.g. circle	Figure ground perception Recognise of 2D shapes e.g. circle, triangle	Figure ground perception Recognise of 2D shapes e.g. circle, triangle and rectangle	Figure ground perception Recognise of 2D shapes e.g. circle triangle and rectangle
3.4 Symmetry	Symmetry ☐ Recognise symmetry in own body	Symmetry ☐ Recognise symmetry in own body	Symmetry ☐ Recognise symmetry in body and shapes	Symmetry ☐ Recognise symmetry in own body and shapes

GRADE 1 OVERVIEW WITH DIFFERENTIATION
4. MEASUREMENT

TOPIC	TERM 1	TERM 2	TERM 3	TERM 4
4.1 Time	Passing of time • Talk about things that happen during day and night • Understand class outline • Use weather chart • Use birthday chart • Use season chart • Know age	Passing of time • Talk about things that happen during day and night • Understand class outline • Use weather chart • Use birthday chart • Use season chart • Know age	Passing of time • Talk about things that happen during day and night • Understand class outline • Use weather chart • Use birthday chart • Use season chart • Know age	Passing of time • Talk about things that happen during day and night • Understand class outline • Use weather chart • Use birthday chart • Use season chart • Know age
4.2 Length	Informal measuring □ Compare and order objects according to length: - Short and long	Informal measuring □ Compare and order objects according to length: - Short and long • Introduce the concept of height: short, tall • Introduce height chart	Informal measuring □ Compare and order objects according to length: - Short and long • Introduce the concept of height: short, tall • Introduce height chart • Introduce the concept of width: wide and narrow	Informal measuring □ Compare and order objects according to length: - Short and long • Introduce the concept of height: short, tall • Introduce height chart Introduce the concept of width: wide and narrow
4.3 Mass	Informal measuring □ Introduce the concept of mass by comparing the masses of different objects by feeling them	Informal measuring Introduce the concept of mass by comparing the masses of different objects by feeling them	Informal measuring Introduce the concept of mass by comparing the masses of different objects by feeling them	Informal measuring □ Introduce the concept of mass by comparing the masses of different objects by feeling them

GRADE 1 OVERVIEW WITH DIFFERENTIATION 4. MEASUREMENT				
TOPIC	TERM 1	TERM 2	TERM 3	TERM 4
4.4 Capacity/volume	Informal measuring • Fill cups, bottles, buckets with water • Use vocabulary e.g. full, empty	Informal measuring □ Fill cups, bottles, buckets with water - Use vocabulary e.g. full, empty	Informal measuring □ Fill cups, bottles, buckets with water - Use vocabulary e.g. full, empty	Informal measuring • Fill cups, bottles, buckets with water • Use vocabulary e.g. full, empty

GRADE 1 OVERVIEW WITH DIFFERENTIATION 5. DATAHANDLING				
TOPIC	TERM 1	TERM 2	TERM 3	TERM 4
5.1 Collect and sort objects	□ Collect and sort everyday concrete objects	□ Collect and sort objects according to different attributes e.g. size, shape, colour		□ Collect and sort objects according to different attributes e.g. size , shape, colour
5.2 Represent sorted collections of objects			□ Collect and sort at least 5 objects according to size and colour	
5.5 Represent data			□ Use concrete objects to represent data on a graph
