1 SECTION 1: INTRODUCTION TO THE CURRICULUM AND ASSESSMENT POLICY STATEMENT GRADES R TO 5 FOR LEARNERS WITH SEVERE INTELLECTUAL DISABILITY

1.1 Background

The South African Constitution, Act 108 of 1996, enshrines the right of every child to access quality basic education without there being any form of discrimination. The Convention on the Rights of Persons with Disabilities, ratified by the Parliament of South Africa in 2007 (Article 24) requires Government to ensure that children with disabilities are able to access an inclusive, quality primary, compulsory education and secondary education on an equal basis with others in the communities in which they live and that persons with disabilities are not excluded from the general education.

There are learners participating in the General Education and Training Band who have an aptitude and interest in applied knowledge and vocational skills for whom the National Curriculum Statement, Grades R to 12 (NCS) needs to be differentiated to make it fully accessible. This would include learners with moderate to severe intellectual disability and learning difficulties. Knowledge and skills should be presented at a more functional level and at reduced depth and breadth, whilst a number of occupational subjects are also made available. They should be given an opportunity to receive an endorsed statement of achievement that is related to learning within their interest and aptitude.

This Learning Programme has been developed to respond more effectively to the needs of these learners who have been identified and assessed through the protocols outlined in the Policy on Screening, Identification, Assessment and Support of 2014. They will benefit from curriculum content that is aligned to the Foundation and Intermediate Phase of the National Curriculum Statement at a more applied and functional level in accordance with their age, interest and aptitude.

It is critical, that through flexibility and differentiated methodologies, learners enrolled for these differentiated subjects will be able to progress with regard to applied competencies, even where they might not be able to attain the minimum requirements set for the different grades. There should always be high expectations for all learners and the necessary scaffolding and learning support to master foundational competencies relevant to the specific subject. They should be in a position to demonstrate the values and practical competencies

that they have mastered which will make it possible for them to progress to either the Technical Occupational pathway or the world of work.

The learning programme is structured in such a way that it makes provision for a wide spectrum of learners with moderate to severe intellectual disability and learning difficulties across the age span. It is aimed at the full development of their human potential and sense of dignity and self-worth. It also allows for the development of their personality, talents and creativity, as well as their mental and physical abilities, cultural, social, environmental and economic competencies to their fullest potential with a view to enabling them to participate effectively and independently in a free society as adults (Convention on the Rights of Persons with Disabilities, 2006 and the White Paper on the Rights of Persons with Disabilities, 2015).

The learning programme for CSPID should be consulted in cases where a learner enters the CAPS Grades R – 5 for learners with Severe Intellectual Disability (SID) programme at a level where they require bridging to join the appropriate grade. The CSPID learning programme will provide a framework for educators to design down to ensure that there is a smooth transition into the SID learning programme.

The introduction of this Learning Programme within the National Curriculum Statement is aimed at strengthening of respect for human rights, fundamental freedoms and human diversity. It will provide learners in ordinary and in special schools across the range of competencies and aptitudes with conditions that ensure dignity, promote self-reliance and facilitate active participation in the school and in the community and offer the opportunity to obtain a recognised and accredited statement of achievement.

1.2 Overview

Through the policy document the Minister of Basic Education will be able to prescribe the minimum norms and standards for differentiated education in the General Education and Training band.

The following legal framework will be adhered to:

- (i) The United Nations Convention on the Rights of People with Disabilities adopted by the United Nation general Assembly on 13 December 2006 and ratified by the South African parliament on 5 June 2007;
- (ii) The White Paper on the Rights of Persons with Disabilities (2015);
- (iii) The National Education Policy Act (Act 27 of 1996);
- (iv) The South African Schools Act (Act 84 of 1996);

- (v) The National Curriculum Statement, Grades R to 12 (2011);
- (vi) The South African National Curriculum Framework for Children from Birth to Four (2015);
- (vii) National Early Learning and Development Standards for Children Birth to Four Years (NELDS) (2009);
- (viii) Section 11 of the Children's Act (Act 31 of 2005);
- (ix) Chapter 5, section 76 of the Children's Act as amended (2007);
- (x) Education White Paper 6 on Special Needs Education: Building an Inclusive Education and Training System (2001);
- (xi) Continuing Education and Training Act (2006 as amended by Act No 3 of 2012 and Act No 1 of 2013);
- (xii) Standards and Quality Assurance for General and Further Education and Training (June 2008, Revised April 2013);
- (xiii) Umalusi's Quality Assurance of Assessment: Directives, Guidelines and Requirements;
- (xiv) Guidelines to Ensure Quality Education and Support in Special Schools and Special School Resource Centres (2014);
- (xv) Policy on Screening, Identification, Assessment and Support (SIAS) (2014);
- (xvi) Guidelines for Responding to Diversity in the Classroom (2012);
- (xvii) National Protocol on Assessment (2011), specifically Chapter 9;
- (xviii) National Policy Pertaining to Promotion and Progression Requirements (2011);
- (xix) Learning Programme for Children with Severe to Profound Intellectual Disability.

1.3 General aims of the Curriculum and Assessment Policy Statement Grades R to 5 for learners with Severe Intellectual Disability

- (a) The National Curriculum Statement Grades R to 9 gives expression to the knowledge, skills, values and attitudes worth learning in South African schools. This curriculum aims at removing the barriers that make it difficult for learners with moderate to severe intellectual disability and learning difficulties to access the curriculum. It will enable them to acquire and apply knowledge and skills in ways that are meaningful to their own lives. In this regard, the curriculum promotes knowledge in local contexts, while being sensitive to global imperatives.
- (b) The Curriculum and Assessment Policy Statement (CAPS) Grades R to 5 for learners with Severe Intellectual Disability serves the purpose of:

- Equipping learners, irrespective of their socio-economic background, race, gender, physical ability or intellectual ability, with the knowledge, skills and values necessary for self-fulfilment, and meaningful participation in society as citizens of a free country;
 - Facilitating the transition of learners from education institutions to either protective or open employment;
 - Providing employers with a sufficient profile of a learner's competences;
 - Being sensitive to issues of diversity such as poverty, inequality, race, gender, language, age, and other factors;
 - Valuing indigenous knowledge systems: acknowledging the rich history and heritage of this country as important contributors to nurturing the values contained in the Constitution; and
 - Credibility, quality and efficiency: providing an education that is comparable in quality, breadth and depth to those of other countries.
- (c) The curriculum is based on the following principles:
- Social transformation: ensuring that the educational imbalances of the past are redressed, and that equal educational opportunities are provided for all sections of the population;
 - Active learning: encouraging an active approach to multi-sensory learning;
 - Attainment of realistic, but high knowledge and skills levels: the minimum standards of knowledge and skills to be achieved at each grade are specified and set high, achievable standards in all subjects;
 - Progression: content and context of each grade shows progression from simple to complex;
 - Human rights, inclusivity, environmental and social justice: infusing the principles and practices of social and environmental justice and human rights as defined in the Constitution of the Republic of South Africa.
- (d) Inclusivity should become a central part of the organisation's planning and teaching at each school. All teachers should have a sound understanding of how to recognise and address severe intellectual barriers to learning, and how to plan for diversity. The key to managing inclusivity is ensuring that barriers are identified and addressed by all the relevant support structures within the school community, including teachers, District-Based Support Teams, School-based Support Teams, parents and Special Schools as Resource Centres. To address barriers in the classroom, teachers should use various curriculum differentiation strategies such as those included in the Department of Basic Education's Guidelines for Responding to Learner Diversity in the Classroom (2011).

1.3.1 The aims of the Curriculum and Assessment Policy Statement Grades R to 5 for learners with severe intellectual disability

The specific aims of the CAPS Grades R to 5 for learners with Severe Intellectual Disability are to:

- Give recognition to learners who would follow the curriculum, irrespective if they meet the requirements and achieve the competencies as specified in the learning programmes;
- Provide a foundation of quality, standardised general education which will suit the needs of these learners and help prepare them to be more independent and better equipped for life after school. It may also enable the learners to enter a Technical Occupational curriculum;
- Promote Lifelong learning to enable learners to continue with further learning and skills development in sheltered or open employment;
- Prepare learners to function better in a fully inclusive society and employment; and
- Provide employers with a profile of the learner's competence.

1.3.1.1 Learners successfully completing the curriculum will be able to:

- Identify, select, understand and apply knowledge to the intended purpose and identify solutions to problems in the field of study;
- Demonstrate the necessary applied knowledge and skills identified for competence in a subject, as specified in the curriculum;
- Demonstrate knowledge and skills gained for purpose of formal communication and basic numerical operations;
- Use technology effectively and
- Demonstrate entrepreneurial skills that will enable them to create their own work in the contexts in which they live.

1.4 Subjects and time allocation

Instructional time for the Learning Programmes is 27½ hours in a five day cycle;

Subjects		Time

2 SECTION 2: INTRODUCTION TO HAIRDRESSING.

2.1 What is Hairdressing and Beauty Care?

Hairdressing and Beauty Care is a profession of creative skills. It is all about a person's appearance through the combination of qualities such as shape, colouring, cutting and different techniques and services.

Hairdressing and Beauty Care, and the content embedded in the skills, are taught over 2 years in grade 4 and 3 years in grade 5. The educator is allowed to adapt the difficulty level of the skills to the ability of the learner.

The learner will be able to assist or to follow instructions of a qualified hair and beauty technician. A release form must be filled in for each client before a practical performance is done, to release the school, educator, learner and any representatives of claims arising due to their actions, whether as a result of negligence or otherwise.

Hairdressing bargaining council may also assist the educator regarding the knowledge of the specific skill.

The knowledge of Hairdressing and Beauty Care is an essential element for the development of the skill and to achieve the specific outcomes.

2.2 Specific Aims:

In Hairdressing and Beauty Care learners will study:

- Provide reception and communication skills and offer tea and coffee
- Demonstrate importance of image, explain career opportunities, maintain personal hygiene and sanitation and understand what health and safety entail.
- Understand the basic content of HIV/AIDS
- Perform shampoo, conditioner and head massage
- Perform roller set, blow dry and styling
- Perform assistance in colour, permanent wave and haircut services
- Perform nails and make-up

2.3 Topics to be studied in Hairdressing and Beauty Care include:

- Reception and communication skills
- Sanitation, Hygiene, Safety and Professional Image
- HIV/AIDS

- Shampoo, Conditioner and head massage
- Roller set, Blow dry and styling
- Colour, Permanent wave and Haircut
- Nails and make-up

2.4 Requirements for Hairdressing and Beauty Care as a subject:

2.4.1 Time Allocation

The compulsory instructional time for the Vocational Learning Programme for learners experiencing severe intellectual disabilities amounts to 8 hours per 5-day cycle. Schools may offer either three (3) or four (4) vocational subjects, depending on the number of learners in the school and the resources available. The compulsory instructional time for **Hairdressing and Beauty Care** is either:

- 2 hours per 5-day cycle plus three (3) other vocational subjects or
- 2,5 hours per 5-day cycle plus two (2) other vocational subjects.

Twenty percent (20%) of the above mentioned time is utilized to teach subject content which should be embedded in teaching the learners to execute the skills. This implies that theoretical lessons should not be instructed in isolation, but during the teacher's demonstration that takes place before the learners practise the skills. The learners are required to utilize eighty percent (80%) of the time to practise the various skills in the classroom.

2.4.2 Resources

2.4.2.1. Human resources

An appropriately qualified teacher registered with SACE in line with National Education Policy Act 27 of 1998 section 7.4.

An appropriately qualified and registered hairdressing teacher

2.4.2.2. Uniforms

Learners should wear a full body apron to protect their clothes.

2.4.2.3. Learner Resources:

Hairdressing and Beauty magazines, Wall posters, Text Books, and
You tube videos

2.4.2.4. Infrastructure and equipment:

It is important to have the necessary infrastructure and equipment for quality teaching and learning.

Infrastructure:

- Sufficient electrical outlets.

- Non slippery floor surface.
- Mirrors on the walls or loose units with mirrors.
- Basins with hot and cold water
- Enough lighting and ventilation
- The centre/classroom with ample floor space should contain the following furniture and equipment for approximately 15 learners.

Centrum/Classroom		
Fixtures and Furniture	Consumable Products	Consumable Equipment
4 x Wall unit dryers	Cleaning products (all-embracing)	2 x Brooms, mop and bucket, dustpan
Fixed work stations	Coffee and tea (Practice purposes)	Kettle, mugs and teaspoons

	Hairspray	Hand held dryers

2.4.2.5. Finances

The subject may not be offered without the necessary finances provided by the school.

- An annual budget should be available to purchase consumable products and equipment for weekly practical tasks.
- Maintenance and purchasing of new equipment should be added to the budget.

2.4.2.6. Stock control

- The educator is responsible for the stock and equipment and will keep it locked at all times.
- The educator will only use the necessary equipment for the specific topic.
- The educator must check the equipment daily.
- A stock inventory must be maintained by the educator on a regular basis and verified by the HOD.

2.6 Career opportunities

Learners can:

- Cleaner at a salon
- Assistant receptionist: walk-in clients and telephone bookings
- Wash basin operator (shampoo, conditioner and head massage)

- Assistant hairdresser (colour, perm and cut)
- Assistant stylist
- Assistant in nails and make-up

3 SECTION 3: OVERVIEW OF TOPICS PER TERM AND ANNUAL TEACHING PLANS

Each week has a compulsory contact time of 2 to 2,5 hours (depending on the number of vocational subjects offered at school) for the subject Hairdressing and Beauty Care.

3.1 Content overview

The content is embedded in the skills and the learners should execute the skills in a simulated working environment recreated in the classroom/centre. The table below indicates the topics and content in the **Hairdressing and Beauty Care** learning programme in grade 4 and 5 .

	Topic	Grade 4 The learner must be able to:	Grade 5 The learner must be able to:
1	Reception and communication skills	• Communicate with clients • Perform basic reception skills – receive telephone calls and client's information • Role play reception skills • Consult with clients in a professional manner • Identify salon equipment • Predict hairdressing occupations	• Communicate and consult with clients • Perform reception skills – receive and make telephone calls and client's information • Make appointments and keep clients record cards: - Name and Surname - Telephone Number - All previous functions done • Assist with till procedures • Consult and prepare clients for service in a professional manner • List salon equipment • Name hairdressing occupations

			• Explain Nail anatomy - Nail plate - Nail bed - White half moon - Nail matrix - Cuticle
--	--	--	---

3.2 Annual teaching plans

Each term comprises of ten (10) weeks and a minimum of nine (9) **practical sessions** are compulsory. The sequence within the term is not compulsory and the teacher may cover the learning content and skills in any appropriate sequence. Learners spend two years in grade 4 with differentiation, and therefore different activities are included for the first and second year in grade 4.

The Occupational Health and Safety (OHS) Act 85 of 1993 requires the teacher to comply with the safety regulations when issuing equipment and tools to the learners and the teacher may not leave learners unattended during Hairdressing and Beauty Care instructional time. A group discussion on the safety precautions that must be followed during all the instructional time is compulsory. Learners with a severe intellectual disability are not always able to make abstract judgments, and they are often not able to apply learned knowledge from one topic to the next. Impulsive behavior as well as the inability to make fast decisions can easily lead to learners finding themselves in, or being exposed to dangerous situation

3.3 Grade 4 1st and 2nd year Term 1

Grade 4 Term 1			
Week	Topic	Content The learner must be able to:	Teaching tips, techniques, activities and resources.
1-2	Sanitation, Hygiene, Safety and Professional Image	Grade 4 1st year. - Understand the subject name and field - Outline health and safety rules - Identify protective clothing	Grade 4 1st year The teacher : - Introduces the subject and provides a general overview - Discusses the benefit of the subject to the learner - Points out safety hazards The learners complete the following activities: Activity 1: Dress in protective clothing Activity 2: Create a poster of people with a professional image
		Grade 4 2nd year - Practise safety routines - Practise safe handling and use of equipment - Report faulty equipment - Explain the importance of cleaning hands before and after each client - Understand that professional image reflects your behaviour inside and outside the workplace	Grade 4 2nd year The teacher: - Discusses safety routines with the learners - Shows relevant movies, slides, magazines, books, worksheets and poster to learners The learners complete the following activities: Activity 1: Participate cleaning activities within the centre and practice safety routines Activity 2: Identify defective or faulty equipment in the centre

Grade 5 Term 3			
Week	Topic	Content The learner is able to:	Teaching tips, techniques, activities and resources.
		consisting of: - Foundation application - Eye brow plucking - Applying lip stick and lip liner - Applying mascara • Know the steps and perform eye brow plucking/shaping • Apply eye make-up on the following eye types: - Small eyes - Flat/no eyelids - Droop/puffy eyelids • Explain nail anatomy: - Nail plate, White half-moon, - Nail bed, Nail matrix, Cuticle	• Demonstrates a full make-up procedure • Explains the steps and equipment needed to perform eye brow plucking • Discusses the application of eye shadow on different eyes • Shows images or video clips to illustrate examples • Explains what nail anatomy entails The learners complete the following activities: Activity 1: Practise eye make-up on different eyes and/or a full make-up service Activity 2: Demonstrate the procedure to follow during eye brow plucking/shaping Activity 3: Complete a worksheet on nail anatomy

Assessment: Term 3 - Practical

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported.

Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

The learner must be able to:

Week	Grade 5 1 st year	Grade 5 2 nd year	Grade 5 3 rd year
1	1. Practise to use electrical equipment safely 2. Explain how to execute electrical safety in the salon	1. Draw safety rule signs 2. Design a 3-dimensional first aid toolkit box	1. Practise emergency procedures to demonstrate salon safety 2. Demonstrate how to assist a person with a minor wound
2-3	1. Practise to apply colour	1. Practise how to mix colours for a desired outcome	1. Practise highlights with a highlight cap and pin
4-5	1. Demonstrate sections and sub-section 2. Display all perm equipment	1. Prepare hair for perm service 2. Demonstrate correct winding technique	1. Perform a half head perm service 2. Practise block formation
6-7	1. Consult a client (fellow learner) on a specific haircut	1. Prepare client for a haircut	2. Perform a ladies one length haircut
8	1. Display all the necessary products and equipment needed to perform a blow dry	1. Practise a blow dry procedure on short hair 2. Perform a blow dry service on long hair	1. Practise to use different size round brushes on different length of hair 2. Perform a blow dry service on short and long hair
9	1. Demonstrate the application of foundation on a face 2. Practise to apply nail varnish	1. Perform a manicure procedure 2. Perform a pedicure procedure	1. Practise eye make-up on different eyes 2. Demonstrate the procedure of eye brow shaping

Assessment: Term 3 - Theoretical

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on.

The following serves as suggestions of theoretical activities to report on.

The learner must be able to:

Week	Grade 5 1st year	Grade 5 2nd year	Grade 5 3rd year
1	Explain the danger when floors and surfaces are slippery	Describe the emergency procedure in the centre	Name the content in a first aid toolkit
2-3	Name the primary and secondary colours in a colour wheel Know the equipment used for colouring	Explain the procedure to perform highlights Explain the primary and secondary colours in a colour wheel	Understand how to mix colours (colours + activator) Explain what high lights entails
4-5	Outline the reasons why consultation with a client is very important Identify perm equipment	Understand the first and second phase of permanent wave Describe the correct winding technique	Outline the importance of block formation Explain the different equipment used to perform a perm service
6-7	Explain how to consult a client for the desired haircut Identify the combs used during a haircut	Identify the parts of a cutting scissor Explain the preparation method for a client	Explain what a guide line is Know how to use an electric clipper
8	Identify the products and equipment used for a blow dry service	Explain why hair should be blow dried from the roots to the ends	Complete a questionnaire on safety rules when working with electricity
9	Describe a few weak features of different face shapes	Name and explain five components a nail consist of	Explain nail anatomy

3.10 Grade 5 : 1st, 2nd and 3rd - Term 4.

Grade 5 Term 4			
Week	Topic	Content.	Teaching tips, techniques, activities and resources.
1	Shampoo and Conditioner	Grade 5 1st year. • Explain the basic purpose of shampoo and conditioner • List the principles of conditioner • Perform a full shampoo and conditioner service • Perform a full head and neck massage at the basin Grade 5 2nd year. • Understand when a neck or scalp massage can or cannot be done due to injury or medical condition • Display a basic understanding of hygiene and safety practises while doing shampoo, conditioner and scalp massage • Perform a shampoo and conditioner, neck and scalp massage service	Grade 5 1st year. The teacher: • Revises the shampoo and conditioner service • Demonstrates a full shampoo and conditioner service The learners complete the following activities: Activity 1: Practise a shampoo and conditioner service Activity 2: Practise a head and neck massage Grade 5 2nd year. The teacher: • Discusses the advantages and types of massages • Demonstrates different massage movements • Shows video clips of different massage movements The learners complete the following activities: Activity 1: Perform a full scalp and neck massage Activity 2: Perform a full shampoo and conditioner service Activity 3: Discuss in groups about hygiene and safety practises while doing shampoo procedure. Report back to the teacher

Grade 5 Term 4			
Week	Topic	Content.	Teaching tips, techniques, activities and resources.
		Grade 5 3rd year. - Explain what shampooing and conditioning, scalp and neck massage entails - Perform a full shampoo procedure	Grade 5 3rd year. The teacher: - Reflects back on the important aspects of shampoo and conditioner - Revises on the full shampoo and conditioner service and also on the scalp and neck massage procedure The learners complete the following activities: Activity 1: Demonstrate/practise how to perform a scalp massage Activity 2: Write what you like most about a shampoo service
2-3	Colour	Grade 5 1st year. - Describe the difference between primary and secondary colours - Explain the application method of a colour - Practise colour application on a mannequin - Use the correct equipment to perform a colour service Grade 5 2nd year.	Grade 5 1st year. The teacher: - Discusses a colour wheel - Demonstrates the application method - Displays the equipment needed for a colour service - Explains preparation methods The learners complete the following activities: Activity 1: Perform a colour service and apply conditioner Activity 2: Watch video clips on how to prepare a client for a colour service. Ask questions and demonstrate the preparation steps. Grade 5 2nd year.

Grade 5 Term 4			
Week	Topic	Content.	Teaching tips, techniques, activities and resources.
4-5	Permanent wave	- Draw a colour wheel with the primary and secondary colours - Perform a colour application and use the necessary equipment - Practise high lights with a cap and pin - Understand how to set the timer for the development time	The teacher: - Discusses all the aspects a colour wheel entails - Demonstrates colour application - Shows how to perform a high light service with a high light cap and pin - Explains why a timer is necessary for a colour development The learners complete the following activities: Activity 1: Perform a full head colour Activity 2: Practise a high light service with conditioner
		Grade 5 3rd year. - Assist and observe while the teacher mixes the colour and activator - Perform a colour application service - Practise high lights through a high light cap and apply bleach powder Grade 5 1st year. - List permanent wave equipment	Grade 5 3rd year. The teacher: - Revises practical demonstrations of colour - Demonstrates the applications of colour - Demonstrates how to use a high light cap The learners complete the following activities: Activity 1: Perform a full head colour or a full high light service Grade 5 1st year. The teacher:

Grade 5 Term 4			
Week	Topic	Content.	Teaching tips, techniques, activities and resources.
		• Practise the division of block formation and sub-sections for each roller • Demonstrate the correct winding technique Grade 5 2nd year. • Practise a full head permanent wave with one size rollers • Demonstrate the correct winding technique and roller placement • Identify the use of end papers • Understand the first and second phase of permanent wave Grade 5 3rd year. • Explain the use of end papers • Distinguish between the first and second	• Demonstrates and describes division of block formation and sub-sections as well as winding techniques • Explains preparation methods The learners complete the following activities: Activity 1: Practise to divide hair into desired sections for specific size roller Activity 2: Watch video clips on how to prepare a client for a perm service. Ask questions and demonstrate the preparation steps. Grade 5 2nd year. The teacher: • Demonstrates the winding technique and roller placement • Discusses the use of end papers and what the first and second phase entails • Outlines the importance of the two phases in permanent waving The learners complete the following activities: Activity 1: Perform a full head permanent wave with one size rollers Activity 2: Practice to use the end papers on sub-sections Grade 5 3rd year. The teacher: • Revises practical demonstrations of permanent waving

Grade 5 Term 4			
Week	Topic	Content.	Teaching tips, techniques, activities and resources.
6-7	Haircut	phase of the perm process - Describe the result of an unsuccessful perm in the following causes: - Overlapping ends - Sections too thick or too wide - Winding too tight - Prepare the hair for a permanent wave service - Perform a full head permanent wave service Grade 5 1st year. - Prepare a client for a desired haircut - Understand the consultation process - Know the different equipment	- Discusses the importance of the first and second phase of a permanent wave service - Discusses the results and causes of unsuccessful perms The learners complete the following activities: Activity 1: Group discussion and/or video's on results and causes of unsuccessful perms Activity 2: Perform a full head permanent wave procedure Grade 5 1st year. The teacher: - Explains preparation methods - Demonstrates the consultation process - Displays and explains all the equipment The learners complete the following activities: Activity 1: Watch video clips on how to prepare a client for a haircut. Ask questions and demonstrate the preparation steps Activity 2: Roll-play and perform a full consultation process on fellow learners

Grade 5 Term 4			
Week	Topic	Content.	Teaching tips, techniques, activities and resources.
		Grade 5 2nd year. • Explain the importance of a guide line • Practise a ladies one length haircut • Explain how to use an electric clipper Grade 5 3rd year. • Prepare and consult client for desired haircut • Identify the equipment and combs used for a haircut • Know the parts of a cutting scissor • Perform a ladies one length haircut • Explain a guide line • Perform a gents full head haircut with an electric clipper	Grade 5 2nd year. The teacher: • Demonstrates the importance of a guide line through the performance of a ladies one length haircut • Explains and shows how to use an electric clipper The learners complete the following activities: Activity 1: Perform a one length haircut Activity 2: Draw and name the parts of a cutting scissor Activity 3: Perform a one length haircut Activity 4: Draw and name the parts of a cutting scissor Grade 5 3rd year. The teacher: • Revises practical demonstrations of a haircut • Explains and demonstrates how to use an electric clipper and how to perform a gents haircut • Discusses the importance of a guide line • Displays and explains the cutting equipment The learners complete the following activities: Activity 1: Demonstrate how to cut a one length style with the use of a guide line Activity 2:

Grade 5 Term 4			
Week	Topic	Content.	Teaching tips, techniques, activities and resources.
			Demonstrate a gents cut with an electric clipper
8-9	Roller set	Grade 5 1st year. • Understand why setting lotions are used before roller set • Use a tail comb to make sections and sub-sections • Use and place rollers correctly and understand the winding technique • Understand the use of white plastic pins • Perform a full head roller set procedure Grade 5 2nd year. • Explain why setting lotions are used before roller set • Practise roller control and roller placement • Practise with a tail comb to make sections and sub-sections • Use different size rollers and white plastic pins and perform a full head roller set service • Demonstrate how to take the rollers out and finish off the style	Grade 5 1st year. The teacher: • Discusses what roller set is all about • Displays all equipment and products used for roller set • Shows and explains winding technique • Demonstrates roller set procedure • Explains the use of the white plastic pins The learners complete the following activities: Activity 1: Practise roller set procedure using the appropriate equipment and products Grade 5 2nd year. The teacher: • Discusses the important facts of roller set • Shows and explains the equipment to be used for roller set • Revises on the demonstration of roller set • Explains how to finish off the style The learners complete the following activities: Activity 1: Perform a full head roller set service working towards a specific style for example: starting off with a pivot point Activity 2:

Grade 5 Term 4			
Week	Topic	Content.	Teaching tips, techniques, activities and resources.
		Grade 5 3rd year. • Explain a few advantages of roller set • Perform roller control and roller placement • Understand and know the winding technique • Use different size rollers and white pins for different length of hair • Identify and use all necessary equipment and products for a full roller set service • Perform a roller set procedure and make use of a wall unit dry	Practise to finish off a style using a tease comb and finishing off products after rollers is taken out Grade 5 3rd year. The teacher: • Revises on a full head roller set procedure • Discusses difficulties and ask questions • Demonstrates a full roller set service The learners complete the following activities: Activity 1: Practise only the winding technique and correct roller placement with different size rollers Activity 2: Perform a full head roller set service and to finish off a style

Assessment: Term 4 - Practical

Assessment is formally recorded during four (4) practical sessions with a minimum of four (4) skills reported.

Learners, regardless of abilities, shall be assessed on the same skill. The following serves as suggestion of skills to record and report on.

The learner must be able to:

Week	Grade 5 1 st year	Grade 5 2 nd year	Grade 5 3 rd year
1	1. Practise a shampoo and conditioner service 2. Practise a head and neck massage	1. Perform a full scalp and neck massage 2. Discuss in a group hygiene and safety practises while doing shampoo procedure	1. Perform a full shampoo procedure 2. Perform a full conditioner service with a scalp massage
2-3	1. Perform a colour service done with conditioner	1. Perform a full head colour 2. Practise a high light service with conditioner	1. Perform a full highlight service 2. Perform a colour application service
4-5	1. Divide hair into different sections for specific size roller 2. Practise the correct winding technique	1. Demonstrate the correct winding techniques 2. Practise perm roller placement	1. Perform a half head permanent wave procedure 2. Perform a full head permanent wave service with different size perm rollers
6-7	1. Demonstrate the preparation steps for a haircut client 2. Perform a consultation with a fellow learner on a desired haircut	1. Draw the parts of a cutting scissor 2. Practise ladies one length haircut	1. Demonstrate a gents cut with an electric clipper 2. Perform a ladies one length haircut
8-9	1. Practise roller set procedure 2. Use a tail comb and make sections and sub-sections	1. Practise roller control and roller placement 2. Demonstrate how to take rollers out and finish off the style	1. Practise the winding technique 2. Perform a roller set service and make use of a wall unit dryer

Assessment: Term 4 - Theoretical

Four theoretical activities are assessed and recorded, however, a minimum of 1 theoretical activity is reported on.

The following serves as suggestions of theoretical activities to report on.

The learner must be able to:

Week	Grade 5 1st year	Grade 5 2nd year	Grade 5 3rd year
1	List the principles to apply conditioner	Define hygiene and safety practises	Explain what shampoo, conditioner, scalp and neck massage entails
2-3	Name the correct equipment to perform a colour service Understand the difference between primary and secondary colours	Explain the difference between primary and secondary colours Understand how to set the timer for the development time	Describe how to mix colour and activator Explain what bleach powder is and when to use it
4-5	List permanent wave equipment Explain the importance of the correct winding technique	Identify the use of end papers Understand the first and second phase of permanent wave	Describe different causes and results of unsuccessful perms Explain the use of end papers
6-7	Explain how to prepare a client for a haircut Know how to consult a client for a desired haircut	Explain the importance of a guideline Know the parts of a cutting scissor	Know the parts of a cutting scissor Explain how to use an electric clipper
8-9	Explain the use of white plastic pins in a roller set Understand why setting lotions are used before roller set	Outline the importance of setting lotion before roller set Discuss how to finish off a style after roller set	State a few advantages of roller set Explain the importance of the use of different size rollers for different lengths of hair

4 SECTION 4: ASSESSMENT

4.1 Introduction

This section on assessment *standardises* the recording and reporting processes for the CAPS Grades R to 5 for learners with Severe Intellectual Disability. It also provides a policy framework for the management of School Based Assessment (SBA) and School Assessment Records.

It is required of teachers to offer a differentiated form of assessment, as learners with moderate to severe intellectual disability and learning difficulties also have diverse learning styles and support needs. Since a learner or learners may be functioning on different levels, the assessment / recording / reporting system must make provision for reflecting the level(s) of each individual learner. These different levels should be outlined in the Individual Support Plan which should be developed at the beginning of the year in accordance with the procedures contained in the *Policy on Screening, Identification, Assessment and Support* (SIAS). Each learner, regardless of his/her number of years in the school, must have access to various forms of assessment best suited to his/her competences, learning styles, strengths and needs. The targets set for each learner in terms of attainment of knowledge and skills outlined in each Subject Statement will always strive to take a learner to the next level and should never set a ceiling on learning potential. Individualised adaptation is required in terms of content, methods of presentation, classroom pedagogy, pacing of instruction and accommodations in assessment. The principle is to have high expectations for each learner, to identify and address barriers to learning so as to ensure fairness in assessment (See Chapter 9 of the National Protocol for Assessment, 2011).

Assessment does not imply that after every lesson the learners must complete a worksheet/assignment or project, but will be based on observation and recording of progress steps attained during the lesson or a series of lessons. Formal assessment can be done in a format which would be suitable for each learner, e.g. through written or oral assessments, or by making use of a range of accommodations measures, e.g. a reader and a scribe. The main aim is to be able to develop a report which is based on definable attainment (even through the smallest of steps) as prescribed in each subject and can be shared with parents and care-givers on at least a quarterly basis so as to elicit their participation and co-operation in the support programme of the learner. At the end of the year a Statement of Achievement/Report card must be made available on which the Individual Support Plan for the following year will be based. There will be no learner retention, as the Individual Support

Plan and the Curriculum Schedule (see SIAS Form 124) will indicate at which grade level learners are working in each subject.

4.2 Assessment principles

4.2.1 Definition

Assessment is a continuous planned process of identifying, gathering and interpreting information about the performance of learners, using various forms of assessment. It involves four steps: generating and collecting evidence of achievement; evaluating this evidence; recording the findings and using this information to understand and thereby assist the learner's development in order to improve the process of learning and teaching. Assessment should be both informal (Assessment for Learning) and formal (Assessment of Learning). In both cases regular feedback should be provided to learners to enhance the learning experience.

Assessment is a process that measures individual learners' attainment of knowledge (content and concepts) and skills by collecting, analysing and interpreting the data and information obtained from this process to:

- enable the teacher to assess a learner's progress in a reliable way.
- inform learners of their strengths, areas to be developed and progress.
- assist teachers, parents and other stakeholders in making decisions about the learning process, the progress of learners and the planning for their individualised support.

Assessment should be mapped against the content, skills, intended goals and topics specified in the learning programme. In both informal and formal assessments it is important to ensure that in the course of a school year:

- all of the topics and content are covered.
- the full range of skills is included.
- a variety of different forms of assessment are used.

4.2.2 Informal Assessment or Daily Assessment

Assessment **for** learning has the purpose of continuously collecting information on a learner's achievement that can be used to improve their learning. Informal assessment is a daily monitoring of learners' progress. This is done through observations, discussions, practical demonstrations, learner-teacher conferences, informal classroom interactions, etc. Informal assessment may be as simple as stopping during the lesson to observe learners or to discuss with learners how learning is progressing. Informal assessment should be used to

provide feedback to the learners and to inform planning for teaching but need not be recorded. It should not be seen as separate from learning activities taking place in the classroom.

Learners or teachers can assess their performance in the tasks. Self-assessment and peer assessment actively involves learners in assessment. This is important as it allows learners to learn from and reflect on their own performance. The results of all the informal daily assessment tasks may be recorded based on assessment instruments used such as rubrics and checklists. This may serve to give feedback to the learners, their parents and the school management team.

Informal, on-going assessments should be used to scaffold the acquisition of knowledge and skills and should be the stepping stones leading up to formal assessment.

4.2.3 Formal Assessment

All assessment tasks that make up a formal programme of assessment for the year are regarded as formal assessment. Formal assessment tasks are marked and results are formally recorded by the teacher. All formal assessment tasks are subject to internal moderation for the purpose of quality assurance and to ensure that appropriate standards are maintained in the school. Assessment tasks should always set high expectations for learners.

To implement formal assessment the teacher should:

- Ensure that the formal assessment task coincides with the practical skills and theoretical work embedded in the practical skill corresponding with the tasks performed on that day or within the previous week;
- Explain the task to guide the learner, show an example of the completed task in order for the learner to know exactly what to do and what is expected;
- Divide the class, according to abilities, in more than one group and give a task with similar content, but differentiated in terms of level of difficulty, abstractness or method of questioning, to all the learners. The way in which the assessment task is set should be in reach of the learners' level of development whilst also setting targets for the next step of development;
- Written tests could be set to assess theoretical knowledge within a set time, allowing for assessment accommodations in line with learners' individual needs;
- Write the date of expected completion of the task in the learner's book;

- Compile a suitable assessment tool; and
- Formal assessment should reflect 20 % theoretical knowledge embedded in practical work. Eighty percent (80%) should be practical work.

The formal assessment requirements are indicated in the formal School-Based Assessments table. In the three core subjects, the ratio may be adapted to the needs of the learners. The focus however must be on practical skills and not on the written tasks.

Formal School-Based Assessments			
Term 1	Term 2	Term 3	Term 4
Minimum of 1 worksheet/test/activity per term in order for 20 % of rating codes to reflect on theoretical knowledge	Minimum of 1 worksheet/test/activity per term in order for 20 % of rating codes to reflect on theoretical knowledge	Minimum of 1 worksheet/test/activity per term in order for 20 % of rating codes to reflect on theoretical knowledge	Minimum of 1 worksheet/test/activity per term in order for 20 % of rating codes to reflect on theoretical knowledge
Minimum of 4 practical assessment tasks or activities in order for 80% of rating codes to reflect on different practical skills	Minimum of 4 practical assessment tasks or activities in order for 80% of rating codes to reflect on different practical skills	Minimum of 4 practical assessment tasks or activities in order for 80% of rating codes to reflect on different practical skills	Minimum of 4 practical assessment tasks or activities in order for 80% of rating codes to reflect on different practical skills

In Creative Arts and Art and Crafts, the above table is not applicable. In these two subjects, a minimum of 4 practical assessment tasks should be completed. Theoretical content will not be assessed. Refer to the learning programme for assessment requirements.

In Physical Education assessment, the above tables does not apply. Refer to the learning programme for assessment.

Assessment in the CAPS Grades R to 5 for learners with Severe Intellectual Disability is underpinned by the objectives of the National Qualifications Framework (NQF). These objectives are to:

- Create an integrated national framework for learning achievements;
- Facilitate access to and progression within education, training and career paths;
- Enhance the quality of education and training;
- Redress unfair discrimination and past imbalances and thereby accelerate employment opportunities;

- Contribute to the holistic development of the learner and preparation for the world of work by addressing:
 - social adjustment and responsibility;
 - moral accountability and ethical work orientation;
 - resilience and adaptability;
 - economic participation and entrepreneurial skills; and
 - nation-building.

The principles that drive these objectives are:

- ***Integration***

To adopt a unified approach to education and training that will strengthen the capacity of learners to adapt to the requirements of the workplace.

- ***Relevance***

To be dynamic and responsive to workplace needs and a range of employment fields.

- ***Credibility***

To demonstrate national and international values and recognition of qualification and acquired competencies and skills.

- ***Coherence***

To work within a consistent framework of principles.

- ***Flexibility***

To allow for creativity and resourcefulness when achieving skills to cater for different learning styles and use a range of assessment methods, instruments and techniques.

- ***Participation***

To enable stakeholders to participate in setting standards and co-ordinating the achievement of the qualification.

- ***Access***

To address barriers to learning at each level to facilitate learners' progress.

- ***Progression***

To ensure that the qualification framework permits individuals to move through the levels of the national qualification via different, appropriate combinations of the components of the delivery system.

- ***Articulation***

To allow for vertical and horizontal mobility in the education system when accredited pre-requisites have been successfully completed.

- ***Validity of assessments***

To ensure assessment covers a broad range of knowledge, skills, values and attitudes to demonstrate applied competency. This is achieved through:

- clearly stating the skill to be assessed;
- selecting the appropriate or suitable evidence;
- matching the evidence with a compatible or appropriate method of assessment; and
- selecting and constructing an instrument(s) of assessment.

- **Reliability**

To assure assessment practices are consistent so that the same result or judgment is arrived at if the assessment is replicated in the same context. This demands consistency in the interpretation of evidence; therefore, careful monitoring of assessment is vital.

- **Fairness and transparency**

To verify that no assessment process or method(s) hinders or unfairly advantages any learner. The following could constitute unfairness in assessment:

- Inequality of opportunities, resources or teaching and learning approaches
- Bias based on ethnicity, race, gender, age, disability or social class
- Lack of clarity regarding topic, content or skill being assessed
- Comparison of learners' work with that of other learners, without taking into account differences in learning styles, language and culture.

- **Practicability and cost-effectiveness**

To integrate assessment practices within the teaching and learning process and strive for cost and time-effective assessment.

4.3 Managing assessment

4.3.1 Types of Assessment

Assessment benefits the learner and the teacher. It informs learners about their progress and helps teachers make informed decisions at different stages of the learning process. Depending on the intended purpose, different types of assessment can be used.

- **Baseline assessment:** At the beginning of a year or learning experience, baseline assessment establishes the knowledge, skills, values and attitudes that learners bring to the classroom. This knowledge assists teachers to plan learning programmes and learning activities flexibly enough to accommodate a wide range of learning styles and learning needs. This assessment should be done at three levels, namely to determine:

Progress with the curriculum

- Are learner learning what they were taught?
- Are they at the right entry point to 'grasp' the content worked on in the classroom?
- Are they practicing and performing as expected?

- Are they applying the facts, concepts and/or skills being learned?

Interests

- Are learners engaged in the lessons and activities?
- Are they showing interest in a new topic or area of study?
- Are they sharing their interests with others?

Characteristics

- What are their preferred learning styles (e.g., whole class teaching or pair work)?
- What are their responses to the content?
- What are their responses to the difficulty level of instruction?
- What are their responses to the pacing of instruction?
- What are their responses to the environment?
- **Diagnostic assessment:** This assessment diagnoses the nature and causes of learning barriers experienced by specific learners. It is followed by guidance, appropriate support and intervention strategies. This type of assessment is useful to make referrals for learners requiring specialist assistance.
- **Formative assessment (Informal Assessment):** This assessment monitors and supports teaching and learning. It determines learners' strengths and areas to be addressed and provides feedback on progress. It determines if a learner is ready for summative assessment.
- **Summative assessment (Formal Assessment):** This type of assessment gives an overall picture of the learner's progress at a given time.

4.3.2 Planning Assessment

An assessment plan should cover three main processes:

- **Collecting evidence:** The assessment plan indicates which learning programme topics, content and skills will be assessed, what assessment method or activity will be used and when this assessment will be conducted.

The assessment tasks may be broken down (designed down) into smaller, achievable steps and support may gradually be withdrawn as the learner master the content/skills. Thus, designing down means to look at the assessment goal and dividing this into smaller components which are spread over a longer period.

Two or more grades may be straddled, in other words the evidence may be collected over more than one grade within a subject. But straddling should be carefully recorded and monitored through Form 125 of the SIAS Protocol.

- **Recording:** The process of recording refers to the assessment instruments or tools with which the assessment will be captured or recorded. Therefore, appropriate assessment instruments must be developed or adapted.
- **Reporting:** All the evidence is put together in a report to deliver a decision for the subject. Reporting must reflect the straddling that has been applied and should provide guidance to parents through meaningful descriptive paragraphs on what has been achieved and what the next expected outcomes are.

4.3.3 Methods of Assessment

Methods of assessment refer to who carries out the assessment and includes teacher assessment, self-assessment, peer assessment and group assessment.

TEACHER ASSESSMENT	The teacher assesses learners' performance against given criteria in different contexts, such as individual work, group work, etc.
SELF-ASSESSMENT	Learners assess their own performance against given criteria in different contexts, such as individual work, group work, etc.
PEER ASSESSMENT	Learners assess another learner or group of learners' performance against given criteria in different contexts, such as individual work, group work, etc.
GROUP ASSESSMENT	Learners assess the individual performance of other learners within a group or the overall performance of a group of students against given criteria.

4.3.4 Assessment tools/instruments to execute assessment

An assessment tool is the instrument the teacher utilizes to execute the assessment. When choosing an assessment tool ensure that the tool:

- is appropriate for the selected assessment method;
- provides the most valid and reliable information on the learners' performances;
- measures the objectives of the lesson.

Examples of assessment tools are checklist, rubrics, questionnaires, worksheets and video recordings.

A **rubric** serves as an objective assessment tool that provides, at varying levels, clear descriptions of the characteristics of the tasks. The descriptions or criteria in the rubric

enables learners to understand what the teacher expects from them and complete the task accordingly. Rubrics are either holistic or analytic.

Rubrics should explain the competence level descriptors for the skills, knowledge, values and attitudes (SKVAs) a learners must demonstrate to achieve each level of the rating scale. The relevant content must be used to create the rubric to assess the task or question. The descriptions must clearly indicate the minimum level of attainment for each category on the rating scale.

Analytical descriptive rubrics focus on elements of the product or performances. Descriptive sentences are formulated for each of the seven rating codes, with the best performance reflected with a score of 7 and the poorest with a score of 1. This is the most reliable and trustworthy assessment tool.

Task lists and **checklists** are examples of a holistic rubric and show the learners what needs to be done. They consist of short statements describing the expected performance in a particular task. The statements on the checklist can be ticked off when the learner has adequately achieved the criterion. Checklists and task lists are useful in peer or group assessment activities.

Learners must do a minimum of 5 activities/projects/worksheets/tests per term 1 to 4. The teacher compiles the activities/worksheets/tests and these should consist of activities that require the learner to:

- Identify the correct answer/picture/object – the question as well as the answer may consist of images/objects, e.g. Boardmaker or clip art images;
- Match column A to B and both columns may consist of pictures/objects;
- Fill in the missing words. The missing words may be available to the learners (on a separate sheet or printed on the worksheet) and they can copy the words, or write the words on the dotted lines provided by the teacher;
- Perform a skill other than writing, e.g. to colour, to cut and paste in specified groups, to find pictures in a magazine and cut and paste in book; or
- Provide answers.

The following should at least be included in the Teacher's Assessment or Planning and Assessment File:

- Programme of Assessment for the grade

- The tools (rubric, checklist, etc.) used for each assessment task
- A mark sheet/record sheet for each assessment task

The learners Evidence must at least include:

- Classwork book
- Worksheet file

Evidence of learner performance must be available for quality assurance. This may be in the form of a Portfolio of Evidence (POE) which will include the learners' classwork books and the Support Needs Analysis (SNA).

4.4 School Assessment Programme

The **Programme of Assessment** takes place continuously and should commence in the second week of each term. The programme of assessment should include a minimum of five (5) assessment goals per subject. The programme of assessment should be recorded in the Teacher's assessment file or planning file (which may serve a dual purpose).

The following should at least be included in the Teacher's Assessment or Planning and Assessment File:

- A contents page
- The assessment goals for each subject
- The tools used for each assessment task
- A mark sheet/record sheet and report for each assessment task
- Recording instrument(s) for each assessment task
- A mark sheet and report for each assessment task

The learners Portfolio of Evidence must at least include:

- A contents page
- The assessment tasks according to the assessment programme as indicated below
- The assessment tools or instruments for the task
- A record of the rating code (and comments) achieved for each task.

Eighty to hundred percent (80% - 100%) of formal assessment should consist of **practical tasks/activities/skills**. Each learner should do a variety of practical tasks and activities during each term as indicated in the learning programmes.

4.5 Recording and Reporting

Recording is a process in which the teacher documents the level of a learner's performance in a specific assessment task. It indicates learner progress towards the achievement of the knowledge and skill. Records of learner performance should provide evidence of the learner's progression. Records of learner performance should also be used to verify the progress made by teachers and learners in the teaching and learning process.

Reporting is a process of communicating learner performance to learners, parents, schools, and other stakeholders. Learner performance can be reported in a number of ways. These include report cards, parents' meetings, school visitation days, parent-teacher conferences, phone calls, letters, class or school newsletters, etc.

Good record keeping is essential in all assessment, particularly in continuous assessment. A record book or file must be kept up to date by each teacher. It should contain:

- learners' names;
- dates of assessment;
- name and description of the assessment activity;
- the results of assessment activities, according to Subject;
- comments for support purposes.

Teachers in all grades issue formal report cards quarterly indicating the competence level of the learner and as stated above also provide explanatory notes on what the learner has achieved per subject and what could be done by the parents at home to provide further stimulation.

The report cards may either be in narrative form that states the theory embedded in the skills and skill performed, or in a rating code as follows:

Rating code	Description of competence
7	Outstanding achievement
6	Meritorious achievement
5	Substantial achievement
4	Adequate achievement
3	Moderate achievement
2	Elementary achievement
1	Not achieved

The reports should always be a combination of both the narrative form and rating codes. All records must be accessible, easy to interpret, securely kept, confidential and helpful in the teaching and reporting process. The school assessment policy determines the details of how record books must be completed. Schools are required to provide quarterly feedback to parents, using a formal reporting tool, such as a report card. The schedule and the report card should indicate the overall level of performance of a learner.

NOTE:

Criterion referencing is best used to describe learner's performance in a skill. Teachers must make use of suitable analytical descriptive rubrics when assessing a learner's competence for a specific skill using practical demonstrations.

4.6 Moderation of Assessment

Moderation refers to the process that ensures that the assessment tasks are fair, valid and reliable. Moderation must be implemented at school as required. Comprehensive and appropriate moderation practices must be in place for the quality assurance of all subject assessments. The formal School-Based Assessment and the practical assessment tasks should be moderated internally and if necessary by the relevant subject specialists at the district.

4.6.1 Moderation serves five purposes:

- It must ascertain whether subject content and skills have been sufficiently covered.
- The moderator must ensure that the correct balance of cognitive demands are reflected in the assessments.
- The assessments and marking are of an acceptable standard and consistency.
- The moderator must make judgements about the comparability of learner performance across schools; whilst recognising that teachers teach in different ways.
- The subject specialist/moderator must identify areas in which a teacher may need development and support and must ensure that this support is provided.

4.6.2 Internal moderation

Assessment must be moderated according to the internal moderation policy of the School, Provincial and National Departments. Moderation is a continuous process. The moderator's involvement starts with the planning of assessment methods and instruments and follows with continuous collaboration with and support to the assessor. Internal moderation creates

common understanding of topics and skills and maintains these across the learning programmes.

Moderation is therefore an on-going process and not a once-off end-of-year event.
