What is office administration?

It covers a basic knowledge of administrative and client services, communication skills and competency in computer typing, crucial to the successful functioning of any office or business environment. Without it, the office will have no structure and balance. The person responsible has an important role in answering the phone, taking messages, typing email or agendas, taking minutes and keeping all the paperwork and files up to date.

Keyboard Care:

- Computer Keyboards can get dirty very easily. Cleaning the surface of a keyboard is very straight forward.
- Make sure your computer is turned off before you work on your keyboard.
- You can use compressed air to blow debris out of your keyboard, or turn it upside-down and shake it gently. **Do not disassemble it.**
- Cleaning materials such as pads or swabs that contain a cleaning liquid can be used on the keys and upper surface.
- To prevent a buildup of dust and dirt inside a keyboard, use a can of compressed air to blow it out. Although keyboards are inexpensive, you don't want to be wasting valuable time with a problematic keyboard

CD Care:

-
- The less handling that is done of the compact disk, the better. CD has the entire media area exposed, and thus vulnerable. This is one reason why CD systems that use caddies prolong the life of CDs--they in essence form a "jacket" for the CD that protects it. Handling CDs causes dirt and scratches that can eventually interfere with reading. CDs should be handled by the edge or the inner hub whenever possible.
- You should in general not put stickers, labels or tape on CDs, or write on them with regular pens
- CDs should always be cleaned radially, which means starting at the inside of the disk and moving outward, *not* by rubbing in circles.

**Printer Care:**

While printer care can vary greatly depending on the type of printer you are using, it is important to understand some general guidelines when dealing with any printer.

- Be careful with printer jams. Don't ram the paper out if you have a paper jam. This can damage the printer. Look at guides on the manufacturer site, if you don't have time to do that, remember that you want to get the paper out smoothly. Many printers have a hatch attached at the back that can be removed. You will then have access to the paper wheels, and you should be able to see the paper that is jammed in there. Remove the paper this way, and it is unlikely that you will damage the printer.
- Power down correctly. Turn your printer off when not in use. This can prevent drying of ink and also help keep the printer functioning at high quality. Remember to use the printers power button, and then remove at the plug if need be. Don't power off if you are in the middle of something. These will just cause problems for you.

**Mouse Care:**

This input device may quite possibly be the most used next to the keyboard, and therefore needs attention as well to keep it operating properly.

-

- To clean a mouse with a rubber ball on the bottom, use a can of compressed air and some alcohol wipes. Once a month, remove the mouse ball from the mouse and clean it with the alcohol wipes. Then use the compressed air to remove any dirt and debris that may have found its way into the mouse.
- If you have a different type of mouse, see the instructions that came with it.

Monitor Care:

There are a variety of monitors in use today, but all require attention to keep them functioning properly. It is important to understand what type of monitor you have (flat-panel versus non-flat panel) before performing any type of maintenance.

- Non-flat panel monitors: Most office products stores carry sprays or wipes for this equipment. ***Never spray directly onto the monitor itself***; spray onto a cloth and then wipe the cloth over the screen or monitor cabinet. Be sure your product is meant for your type of monitor.
- Flat panel monitors: These monitors usually have plastic screens and other components, and can be damaged by cleaning products that use chemicals (benzene, thinner, ammonia, acetone), abrasives, or compressed air.

Alice's Adventures in Wonderland

Alice had sat on the bank by her sister till she was tired. Once or twice she had looked at the book her sister held in her hand, but there were no pictures in it, "and what is the use of a book," thought Alice, "without pictures?" She asked herself as well as she could, for the hot day made her feel quite dull, if it would be worthwhile to get up and pick some daisies to make a chain. Just then a white rabbit with pink eyes ran close by her. That was not such a strange thing, nor did Alice think it so much out of the way to hear the Rabbit say, "Oh dear! Oh, dear! I shall be late!" But when the Rabbit took a watch out of its pocket, and looked at it and then ran on, Alice started to her feet, for she knew that was the first time she had seen a Rabbit with a watch. She jumped up and ran to get a look at it, and was just in time to see it pop down a large rabbit hole near the hedge.
