Warmup and Play

- Roll up and down the spine and side bends.

Do floor work, including rounding and lengthening the spine and stretching, sitting and lying down.

Improvise & create

Do movement responses to different types of music, exploring how mood of music informs mood of movement, and vice versa.

Interpret & perform

- Create songs to improve ability to sing in tune.

Relate character of the chosen songs to suit characters in the drama.

Warmup and Play

- Use body part isolations in warm-ups as part of imaginative experience (e.g. flexing/pointing feet and hands, raising/lowering head).
- Perform action songs (doing actions related to the specific rhythms of the song).
- Do voice warm-ups (e.g. humming, yawning and sighing).

Participate in call and response games (in speaking, singing and movement).

Improvise & create

- Do movement sequences exploring verbal dynamics in words such as action words, directional words (words conveying a straight, turning or broken movement), contrasting words (big/small, wide/narrow, expand/contract; stretch/shrink), and word sequences.

Build a drama from a stimulus: Characters, using props as stimulus. (Ask: "Who would use this prop? How would they use it? Why would they use it?") Consider body language, posture and gesture.

Interpret & perform

- Perform songs to improve ability to sing in tune. Relate character of the chosen songs to suit characters in the drama.

Create sound pictures using instruments (body percussion, self-made, found, traditional) to create a soundtrack for the drama and to introduce characters (considering dynamics, pitch, timbre and tempo).

In this section the teacher is expected to guide learners in developing a storyline and characters for a drama performance to be completed in term 4

Warmup and Play

YEAR TWO TERM THREE

Dear Educator

In this term you will be expected to help and assist learners to learn and develop skills on how to develop a storyline and characters in drama which they will in turn be expected to perform in the term to follow.

In this segment the teacher must re-emphasize the importance and value of warming up before a drama, dance or music performance and that this can be targeted at certain body parts or organs, e.g.

breathing exercises will help with the development of breath control and thus help in terms of resonance; articulation exercises help in terms of diction or audibility and stretches help in terms of increasing flexibility just to mention a few.

You may use the PowerPoint presentation linked to teach more on the concept of warmups:

https://cdn3.sportngin.com/attachments/document/aab3-1811157/Stretch-Warmup-Agility-Strength__1_.pptx

Stretch-Warmup-Ag
ility-Strength__1_.ppt

Please direct learners to do a spine roll up and down exercise, side bends and floor work as guided in the following linked videos: <https://youtu.be/VpQ9SPwNPvY>

<https://youtu.be/kCda4DM3rQ>

<https://youtu.be/1tvmezJh5uY>

<https://youtu.be/h24yIM9ljbq>

<https://youtu.be/ZGFwcZs73dA>

You do not have to play the whole length of each of these videos above as learners can do so at home. It is therefore advisable that you download the videos and share with learners so they can watch at any convenient time either than at class time.

NB: It is important to emphasize to learners that warmup routine movements may seem boring but, are later the very building blocks of dance sequences when choreography happens.

Improvise and Create

In this segment the teacher must explain to learners the relationship between the mood of the music and movement. Some call this relationship creative movement which is basically communication through movement.

Ask learners to respond to musical and word prompts that describe mood as in the following linked video:

<https://youtu.be/8k32x-aYl4>

Allow learners to be creative in their responses to word and music prompts. It will be a good idea to challenge them to explain, describe their responses and those of others.

The teacher may use the following attached PowerPoint presentation to teach on creative movement:

creative_movement.
ppt

Ask learners to answer the following questions:

What constitutes creative movement?

- It is communication through movement and children move much better than they speak.
- It is movement in which the statement is more important than the technique.
- It is the language of expression using the body.
- It is a form of informal, structured play that is a process, not a product.

What are the benefits of creative movement?

- It simultaneously involves the inner being and the physical body.
- It teaches body awareness, and what their body can do.
- Develops coordination & control of movement.
- It is a discipline for dealing with self-image, self-awareness, and self-control.

- It fosters the expressive capacities and imagination.
- It stimulates creative and critical thinking.

Guidelines for creative movement

The following principles must be followed by the teacher when dealing with creative movement in class:

- Children love the familiar & repetition.
- Don't show them how. It restricts creativity.
- Have lots of room, bare feet.
- Say, "Use your whole self".
- "Move how it sounds or makes you feel".
- "Can you. . . ? Follow me!"
- Encourage each child to do it in a different way.
- Dance is emotion in motion
- It is important to note that emotions are not an add on but a building block of movement in dance

Have learners watch the videos herein linked or any music video and have them write a review of how it fulfils each of the following benefits about creative movement: <https://youtu.be/QtzbfIDjyM>

<https://youtu.be/FVNMRC5nP3Y>

<https://youtu.be/rPBzPzbuwc4>

- It simultaneously involves the inner being and the physical body.
- It teaches body awareness, and what their body can do.
- Develops coordination & control of movement.
- It is a discipline for dealing with self-image, self-awareness, and self-control.

- It fosters the expressive capacities and imagination.
- It stimulates creative and critical thinking.
- physical fitness - whole body
- mind/body coordination
- social engagement and cooperation
- memory, and whole brain exercise
- accessibility and diversity
- self-expression and artistic/creative outlet
- mental health

Interpret & perform
Improvise and create

Request learners to choose a ceremonial song such as a wedding song known from their culture and rehearse it with dance movements. Learners are to create a drama based on welcoming uMakoti in accordance to their culture. Watch the linked video excerpt from Isikizi and others for ideas and prompts:

https://youtu.be/4i6n8yM_esQ

<https://youtu.be/HVWD4S4jdX0>

<https://youtu.be/46YBrbc3cxQ>

<https://youtu.be/rcT6xeEsmSM>

Please also use the attached PowerPoint presentations to help you teach concepts in drama they will need to write their scripts.

intro drama part 2
ppt.ppt

Elements Of
DramaEDI.ppt

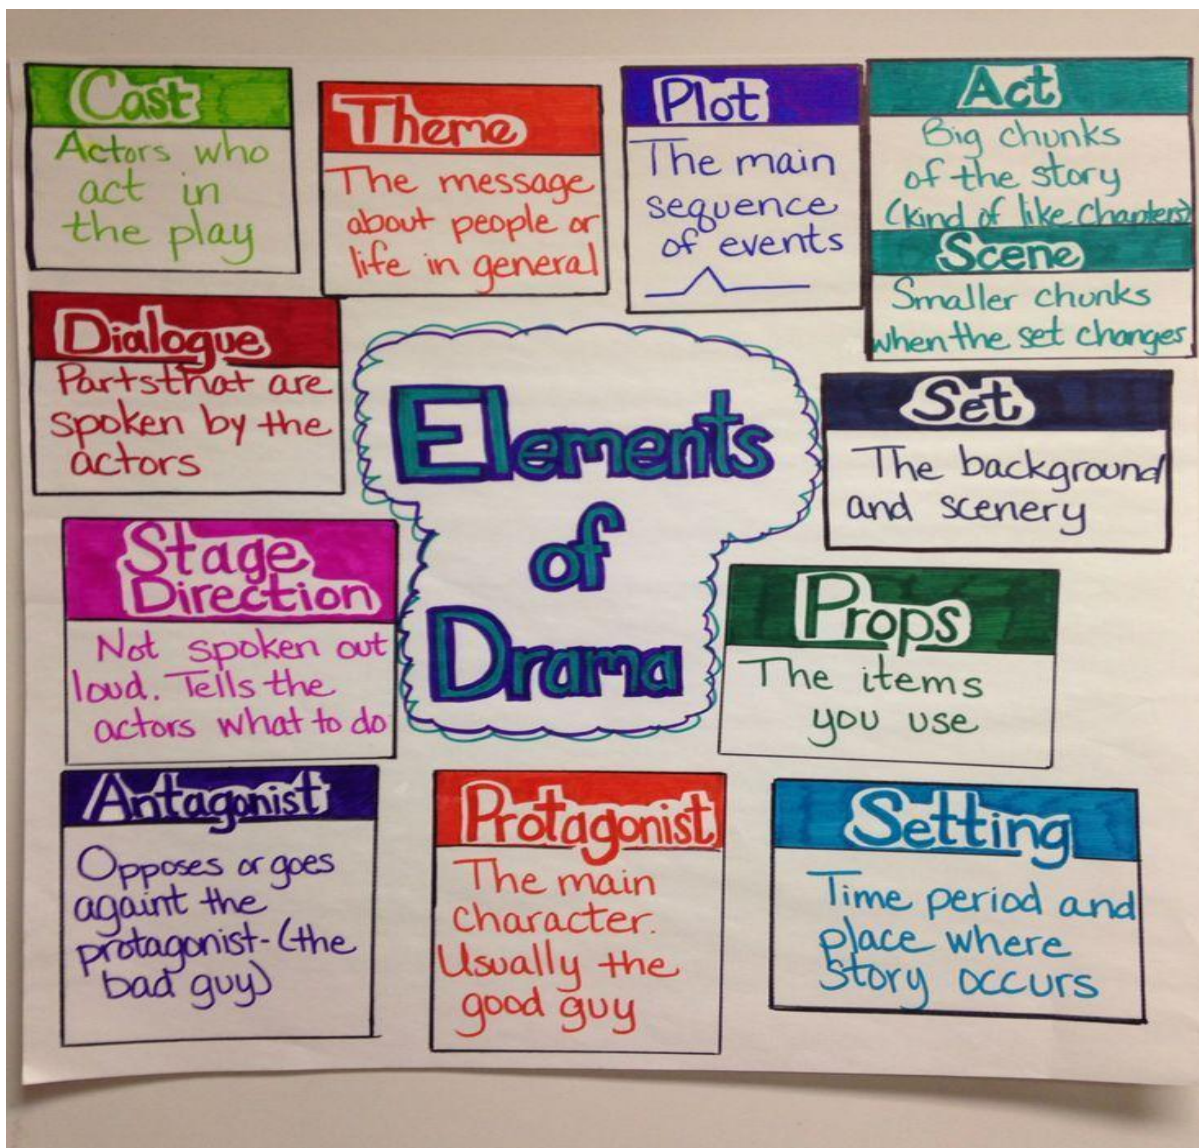

Informal Activity

Go through the following steps guiding learners on how to develop a drama:

1. Start with characters and plot. The best dramas are usually character driven with an interesting plot
2. Introduce conflict. All stories revolve around conflict, and this is especially true in drama.
3. Don't forget about comic relief. Unless you're writing a tragedy, there should be at least some amount of humour in your drama.
4. Generally, a good drama entails the involvement of interesting issues, the use of the right dialogue and monologue, knowledge of the main issues, the use of unique and interesting characters, a clear theme and an understandable yet interesting plot.

Let learners use the chart below as a guide to develop their drama production:

- Remind learners to also prepare for concentration and focus games. Do voice warm-ups e.g. humming, yawning, and sighing before a rehearsal and or performance.
- Here are just a few warmup games that can be used:

2 Truths, 1 Lie

Get to know the group by learning something about them and about how well they can lie!

About Me

Understand more about a group by discovering facts about them.

Catch My Name

Get to know everyone in the group by passing a ball or similar soft object.

Change Places If

Test the listening skills of your group whilst getting to know more about them.

Connect Me

Connect to different words to spark discussions or to delve into characters.

Hi John, You're Jolly

A descriptive name game with a group reaction.

Name Gesture

A common name game to encourage imagination, physical movement and mime when introducing yourself.

Personal Advert

Create a personal advert to highlight the best and worst of you or your characters personality.

Visual Arts

Visual Literacy

Teachers Notes:

Lead a class discussion, as a form of revision, on the 7 elements of art.

Encourage the students to take part in the discussion, lead them toward the correct answers.

Hand out visual diaries.

Encourage them to jot down notes and examples as a refresher and for future reference.

Teachers are also encouraged to prepare supporting material that will build and strengthen the lesson according to your class's individual needs.

In this lesson learners will review what you know and what you have learned about elements of art.

Elements of Art

The elements of art are sort of like the “building blocks” for creating something.

Let's have a look at the 7 elements of art, discuss them and refresh our memories.

1. Line
2. Shape
3. Form
4. Space
5. Texture
6. Value
7. Colour

Teachers Notes:

Lead a class discussion on the principles of design.

Encourage the students to take part in the discussion and help them to identify line and shape.

Hand out visual diaries.

Encourage them to jot down notes and examples for future reference.

Teachers are also encouraged to prepare supporting material that will build and strengthen the lesson according to your class's individual needs.

Principles of design

By the end of this lesson learners will start familiarising yourself with the design principles.

- Emphasis and contrast.
- Proportion.

The principles of design are the way an artist chooses to use or arrange the elements of art in his or her artwork.

The elements are simple to teach - colour, line, shape, value, space, form and texture are pretty straightforward to define and witness.

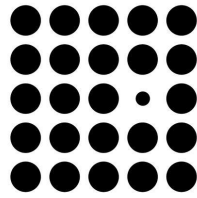

But the principles, they are a bit harder to nail down. The idea of how much variety or rhythm is pleasing in an artwork is a subjective. But knowing the vocabulary and the tools that are at your disposal as an artist can only benefit your creativity.

There are 7 design principles.

Balance, Contrast, Emphasis, Movement, Pattern, Rhythm, Unity/Variety

Contrast and Emphasis

Contrast refers to the differences in your use of the art elements where **emphasis** is when you create dominance or focus. We can use contrast to emphasis a centre of interest.

In the above image there is a difference in shape (element of art) created by **contrast**. This now creates focus on the smaller shape which we will call **emphasis**.

By the end of this activity you will be able to:

- Discuss contrast and emphasis in an image.

Activity 1

- Have a look at the picture below.
- Discuss as a class what the contrast and emphasis in this image is.
- Take your visual diary and copy this image into your book and make notes of your class discussion.

Teachers Notes:

Lead the class discussion and help learners in their discovery.

Provide students with their visual diaries and help them to take correct notes.

Refer to balance and emphasis notes.

Answers for this activity will be provided below.

The answers below are not set in stone, should one of your students have a different answer, and is able to motivate the answer, it should be considered.

Activity 1 – Template

Efil Turk

- There is contrast in shape, colour, value and texture and space and this creates emphasis on the coloured triangle in the middle of the page.
- Shape - Geometric shape -Triangle / Where the other shapes are more natural, and uneven.
- Colour - The triangle is in colour, warm colours / Other colours black and white, monochrome.
- Value - ALL the shapes in this image have a range of value, red at the bottom add more white (value-tint) until we get yellow at the top / Black at the bottom add more white (value-tint) until we get a light grey or white at the top.
- Texture - These shapes, all of them appear hard, sharp and smooth (implied texture- see not touch). Almost like glass shards or metal.
- Space - By placing the coloured triangle in the middle of the page we also naturally lead our eyes towards it. Emphasis is also placed on things in the middle.

By the end of this activity learners will be able to:

- Identify and explain contrast in different images.

Activity 2

- Look at the images in the table below.
- See if you can identify the contrast and the emphasis in each image.
- Write down or draw as many as you can identify.
- Use your visual diary to complete this activity.

Teachers Notes:

Provide each student with the template required for activity 2.

Template must be copied and handed out to each student.

Students will complete, cut and paste in their visual diaries. Teacher may request that students copy (pencil) the template into their visual diaries themselves.

Hand out visual diaries.

Should the teacher be so inclined, provide learners with more images and examples for them to complete in their visual diaries to solidify the new concept before moving on.

Template – Activity 2

Image	Contrast	Emphasis
 WallpaperStock	Blue background is in contrast with the red/orange/ yellow in the bird's beak. Contrasting colours, warm vs cool colours	
 Santiago Ba??n/Getty Images		
 Ximenes.Patrick.		

Proportion

This is the relationship between two objects or elements in an image and how they compare to one another with respect to size, colour, quantity, etc.

When drawing the human figure, proportion can refer to the size of the head compared to the rest of the body.

Theresa Barnard Oil Paintings

There is a real sense of proportion in the painting. Without the effective use of the principle of proportion you would not experience the majesty of the mountain in the background.

Theresa Barnard Oil Paintings

In this painting right proportion is instrumental in emphasizing the distance of the ship in the background.

By the end of this activity learners will be able to:

- Make a facial drawing with correct proportions.

Activity 3

Use the template that your teacher will provide.

Make a drawing of a face with the correct proportions.

Pay special attention to your proportions, draw in guideline to help you.

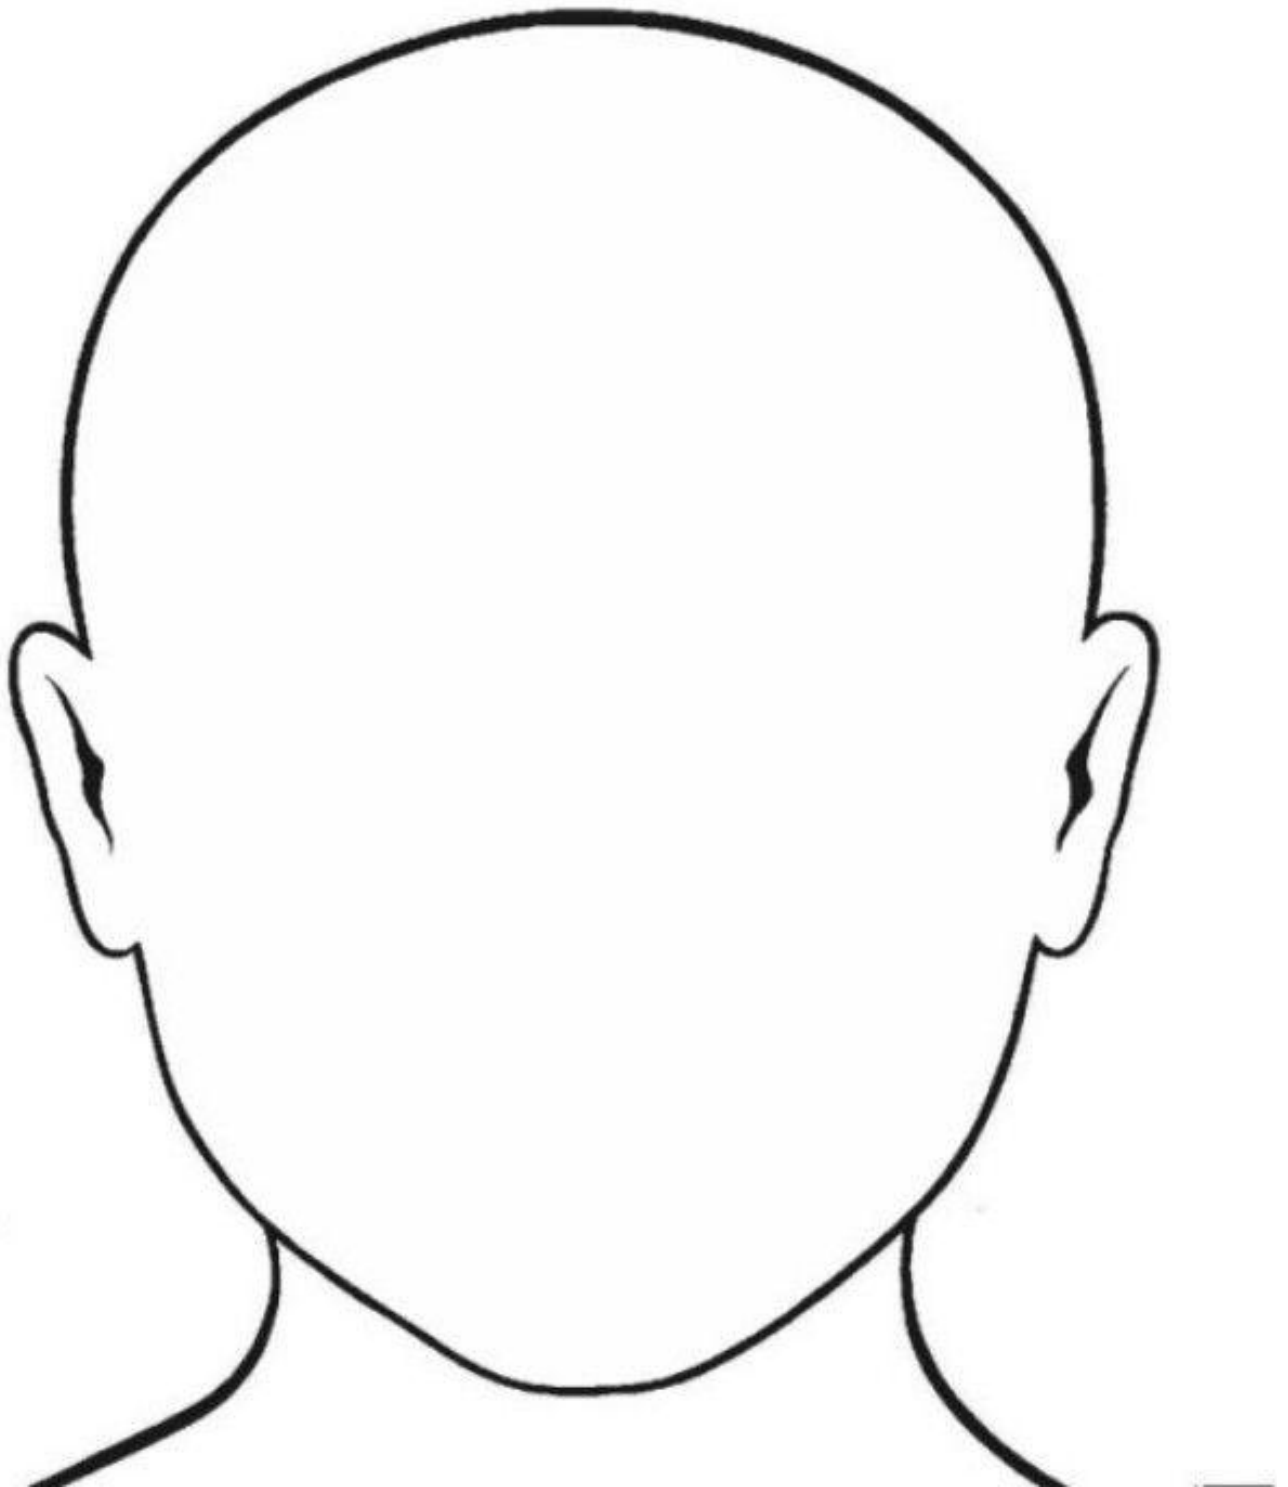

Teachers Notes:

Provide students with their visual diaries.

Provide them with the template to complete activity 3.

Students must complete, cut and paste in their visual diaries.

Emphasis the importance of proportion for this activity, perfectly beautiful faces are not the aim of this activity. Teachers are encouraged to research drawing facial proportions and help students to do this activity.

Create in 2D

Things that fly

Assessment 1 Formal activity

Start Date: _____

End date: _____

By the end of this activity learners will be able to:

- Create a fantasy collage of anything that lies. (Choose one)
- Use art elements: Primary and secondary colours, texture and value.
- Use design principles: Contrast and emphasis.
- Create a collage that shows contrast/ emphasis in colour, value or texture.

Resources

A3 paper (orientation of paper and orientation of how to use artwork)

Drawing medium that learners is comfortable with and any other mediums the learners wishes to use.

Teachers Notes:

Hand out visual diaries.

Students must make a collage. This may require the teacher to prepare/source additional resources for students to use.

Encourage the students to experiment with different media and art forms.

At the end of the activity, allow students the time to reflect on their activity in their visual diary.

Instructions

A collage is an image that you create, you may sometimes include magazine and newspaper clippings, ribbons, paint, bits of coloured or handmade papers, portions of other artwork or texts, photographs and other found objects, glued to a piece of paper or canvas. Use any art mediums that you are comfortable with or feel like experimenting with.

Example only - Students have creative freedom.

Nancy Standlee Fine Art

Lisa Morales

Susan Schenk

Step 1

- Decide on a theme. What one thing that flies would you like to use as inspiration for your collage. (choose only one)
- Use your visual diary for jotting down notes or coming up with inspiration.
- Remember you must create contrast/ emphasis with the use of colour, texture and value.

Step 2

- Take your A3 page.
- Draw an outline of the “thing that flies” onto your page OR place all your images onto your page to see your layout and design.

Step 3

- If you decide to paint your background or any part of your image do that first so that you have time for it to dry before you start working on it.
- Start pasting or drawing in the other parts of your image

Step 4

- Experiment and try to make your image as interesting as possible.
- Your finished image must not show any of the original white background.

✓ **Rubric**

Assessment criteria	Marks allocated	Marks received
Elements of Art:		
1. Colour: Primary and/ or secondary colours used with intent.	3	
2. Texture: Successful attempt made to create texture in your collage.	3	
3. Tone value: Incorporated into collage. Clear understanding of value and how to use it.	3	
Design Principles:		
1. Emphasis and Contrast: Successful implementation and use.	3	
Subject choice: Followed the brief and met all requirements	3	
Execution: Does this look like a collage and is all the white/ original page covered.	3	
Technique: Is the finished image neat and present well.	3	
Originality: Original work or copy of teacher or someone else.	2	
Time management: Task completed on time and workstation clean and tidy after completing the task.	2	
Attitude: Works well with others, share and shows interest in activity	1	
TOTAL	25	

Reflection (Use your visual diary for reflection)

1. What was the most challenging part of this activity?

2. What did you enjoy the most?
3. How would you rate this activity from 1- Terrible 10 - I will do this again! (Rate 1 – 10)

Create in 3D

Things that fly

Assessment 2 Formal activity

Start Date: _____

End date: _____

By the end of this activity learners will be able to:

- Create a 3D object with the focal point of a thing that flies.
- Use art elements: Texture, shape, form
- Use design principles: Contrast and emphasis.
- Spatial awareness: Front, back and sides.
- Use tools appropriately and consider safety measures.

Recourses

Any clay

Beads

Recycled materials

Things that learners are comfortable with.

Teachers Notes:

Hand out visual diaries.

Teachers are encouraged to make and provide students with clay or paper mache. There are multiple cheap and easy examples available on the internet. Students may also help to make the clay.

Encourage your students to experiment with different media and art forms.

The focal point of this art project is things that fly.

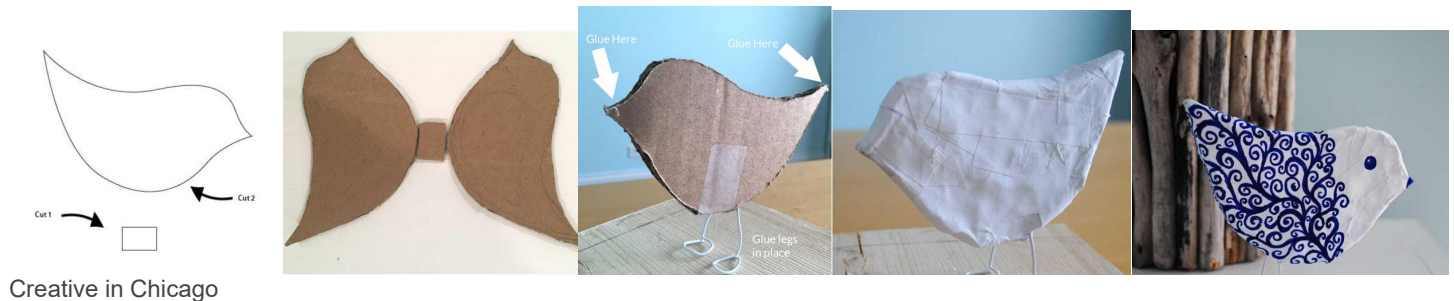

Allow students to work with their visual diaries and to reflect on the activity at the end.

The examples are for reference only. Students have creative freedom to reach the brief anyway they see fit.

Instructions

You may make anything with the focus on something that flies. Use your visual diary to brainstorm and come up with interesting ideas and designs.

Example only (Students have creative freedom)

Step 1

- Take a piece of thick box cardboard. (recycled chips, cold drink boxes)
- Trace the outline of a simple bird onto the cardboard (without legs, just the body), mirror this image opposite your first outline.

Step 2

- Cut out your two birds make sure they are connected to one another with a slim piece of cardboard where the two bird bodies meet.

Step 3

- Fold the two birds toward one another.
- They must look like they are standing up and be connected with the slim piece of cardboard between them.
- They should be able to stand on your desk without you holding them.
- Paste the two halves together.

Step 4

- Make legs for your bird.
- You may use whatever resource you have available to you.
- Pipe cleaners, wire, cardboard, paper etc.
- Also stick them to your bird.

Step 5

- Take your clay and build up the outside shape of your bird.
- This is to give shape to your bird you are not building a whole new bird.

Step 6

- Allow the clay time to dry.

Step 7

- Paint your bird.
- You may use bright colours or more realistic muted colours.
- You may even paint designs onto your bird that is not bird like at all.
- Have fun and be creative.

✓ **Rubric**

Assessment criteria:	Marks allocated	Marks received
Art Elements:		
1. Texture evident	3	
2. Shape is proportionate and correct for the subject choice.	3	
3. Form: 3D with dimension.	3	
Design Principles:		
1. Contrast and Emphasis: Attempt made to incorporate principles into finished product.	3	
Connect to previous lesson: Does the work show some reference to work done in 2D. (Connection made)	3	
Spatial awareness: Attention given to all sides of the 3D object.	3	
Skill: There is evidence of skill in working with the chosen medium.	3	
Effort taken to completing the object to the best of your ability.	4	
Total:	25	

Reflection (Use your visual diary for reflection)

1. Did you enjoy the medium you used?
2. Give a reason.

Teachers resource

How to make paper clay

1. **Gather your supplies.** To make paper clay, you'll need toilet paper as well as a few supplies you can find at the hardware store. This recipe results in a smooth, malleable clay you can mould over any type of prepared form. It dries into a hard surface to which you can apply paint or varnish. Here's what you need:^[1]
 - 1 roll of single ply toilet paper (not the kind with lotion, scent or colour added)
 - 1 cup premixed joint compound (do not buy it in powdered form; get "regular")
 - 3/4 cup PVA glue (white school glue)
 - 2 tablespoons mineral oil
 - 1/2 cup white flour
 - 2 large bowls
 - Electric mixer
 - Measuring cups
2. **Remove the toilet paper from the roll.** It's less messy to slip the entire roll of paper off of the cardboard roll at once, rather than unwinding the paper entirely. Place the toilet paper in one of the bowls.
3. **Fill the bowl with water.** Pour it over the toilet paper until it's completely saturated. Push the toilet paper down into the water to make sure it all gets wet.
4. **Squeeze out the toilet paper and place the pulp in a separate bowl.** Tear it off in smaller chunks (1 inch or less) so you can squeeze out as much water as possible. Place the pulpy chunks in a separate bowl so you can mix them with the other ingredients. Keep going until you've squeeze out all the toilet paper.
5. **Measure 1 1/2 cups of toilet paper pulp.** One roll of plain toilet paper typically equals a cup and a half of pulp. If your brand of toilet paper makes very small or large rolls, you might end up with less or more pulp than you need. Make more toilet paper pulp or discard the excess as needed, so you have 1 1/2 cups of pulp in the bowl.
6. **Add the remaining ingredients.** To the bowl with the pulp, add a cup of premixed joint compound, 3/4 cup white school glue, 2 tablespoons mineral oil, and 1/2 cup white flour.
 - Do not substitute these ingredients. Different types of glue, oil, flour, and so one will change the consistency of the paper clay and may not produce the results you want.
7. **Mix up the clay until smooth.** Use your electric mixer to beat the clay at a high speed. The paper fibres will break down and blend with the joint compound, glue, oil and flour until it takes on a smooth, dough-like consistency.
 - If you want a thicker clay, mix in an extra half cup of flour.
 - For a thinner consistency, add an extra half cup of glue.

How to make clay

Flour and Salt Clay

- 4 cups (480g) of all-purpose flour
 - 1.5 cups (417g) of salt
 - 1.5 cups (350ml) of water
1. **Mix 4 cups (480 g) of flour and 1.5 cups (417 g) of salt in a large bowl.** Add both dry ingredients to a large mixing bowl. Then, use a big plastic or wooden spoon to stir the dry ingredients until they are thoroughly mixed.
 - Make sure the flour and salt are **mixed well before you add the water** because it will be harder to redistribute one of the ingredients once the clay starts to form.
 2. **Add 1.5 cups (350 mL) of water gradually as you stir the mixture.** Pour small amounts of water into the bowl at a time, stirring between pours. Blend the mixture as well as you can before you add more water. By the time all of the water is added to the bowl, your clay should be forming a ball.
 - It should get harder to stir each time you add more water.
 3. **Knead the clay until it reaches an even consistency.** Take your clay out of the bowl and place it on a flat surface, like the kitchen counter. Use your hands to push and pull the clay to work it into a nice consistency.
 - You can also pick up your clay and throw it down on the counter to work out any air bubbles that might be present. This will help your clay stay moist longer.
 4. **Sculpt the clay as you desire.** Now that your clay is ready, you can mould it into a figure, create ornaments, or just play around. Use it as you would use a store-bought clay.
 - This kind of clay can make great keepsakes. For example, press your child's foot or hand into the dough until there is an imprint, then let the mould harden to make a gift.

Tip: Use cookie cutters or a glass to cut out shapes, if you like. Start by rolling your clay out flat using a rolling pin. Then, cut your clay into shapes using a cookie cutter or a drinking glass, which can make circles for ornaments. If you wish to hang the shapes as ornaments, poke a hole near the top of the shape using a drinking straw or a toothpick.

5. **Allow the clay to air dry for 2 days to preserve your model.** If you want to create a sculpture or keepsake, you'll need to let your clay dry. This kind of clay dries out quickly, but it's best to leave it untouched for at least 2 days to make sure it's fully dry.

Variation: If you need to speed up the drying process, bake your clay at 100 °C for 3 hours. If it still feels soft after 3 hours, you can put it back in the oven for up to 2 more hours.

- **Store unused clay in an airtight container.** You can preserve your clay for a few weeks by keeping it in an airtight container. Make sure you leave the clay in the container whenever you're not playing with it, as it will dry a little bit whenever it's exposed to the air.
- For instance, you can use a plastic bag with a zipper or a Tupperware container. For extra longevity, place the clay in the refrigerator.

Warm up and Play

The teacher must make the learners aware that there would need to tap from their knowledge of the previous year from time to time. The Warm up and Play topic allow the learners to explore concepts within performing arts practically. Rhythm has been extended from the previous year term one, with the cognitive level engaging with application.

Rhythm

Rhythm is central to the performing arts as it is about flow and progression of an artistic piece.

Introductory Game

Tell your partner three things about yourself – two of which are true and one of which is a lie

- Tell your partner three things about yourself – two of which are true and one of which is a lie. For example, you might tell your partner about your hobbies, your work, where you live, your family or where you have travelled.
- Afterwards, your partner tries to guess which was the lie. You might choose to tell three everyday facts or three more unusual things – but remember – only one of them should be a lie.

- Make sure each person listens carefully to what their partner says!
- Now introduce your partner to the rest of the group and see if they can guess which was the lie.
- Alternatively, tell your partner three true things about yourself and then swap over. Now the whole group makes a circle.
- Each partner introduces their friend to the group – they tell the group two of the true things and make up one lie about their partner.

Follow your nose

- A movement exercise for the whole group. Move around the room, filling up the space, changing pace, changing direction, being aware of other people but not touching them.
- Now become aware of your nose.
- Let your nose lead you around the room.
- Follow it wherever it goes!
- Develop this by focussing on different parts of the body, so that participants begin to discover new ways of moving.
- Very useful for dance or physical theatre, or simply for discovering movement ideas for characters.
- Try being led by your stomach, your little toe, your knee, your back and so on.

Random Sound Stories

- Work in small groups of 4 – 6.
- The groups are asked to come up with a selection of random sounds – with each member making one vocalised sound.
- Next, the group decides on a sequence in which these sounds are made and practices it.
- Each group performs its sound sequence in turn to the whole class.
- Now the groups are asked to make up a story in which these sounds occur – in the sequence already decided upon.
- The story can be narrated or acted.

Learner are also encouraged to use body percussion to compliment the vocalised sound.

Learners are expected to work with rhythm using music and dance in their creation process. The teacher must remind the learners about the loco-motor and non-locomotor moves.

The teacher will require song and radio to conduct music appreciation and explore variation in rhythm.

MUSIC SONGS (DIFFERENT GENRES and CD PLAYER)

Rhythm in Performing Arts

Rhythm is about the flow and movement of sound. Sound can be abstract suggesting the it is the sound representing something that does not have the actual sound. In drama and dance and visual arts is usually abstract as there would be no actual sound made .

Rhythm is used in all performing arts subjects, drama, music and dance and in visual arts. Rhythm is a bases for movement and it creates patterns.

Rhythm in music means:

The **sounds** and **silences that are put** together to form patterns of sound, which are repeated to create rhythm.

Types of rhythm

- **Random Rhythm.**

Think of falling snow, pebbles on a beach, traffic movements:

Source: Google Images

- **Regular Rhythm**

Like the beating of a heart, the regular rhythm follows the same intervals over and over again. The rhythm is monotone.

Source : Google Images

- **Alternating Rhythm.**

It is a repeat more than one element in a design. 1-2-1-2-1-2 pattern.

Source : Bing Images

- **Flowing Rhythm.**

This shows the repeated elements following bends, curves, and undulations

Source: Google Images

Progressive Rhythm.

- Progressive rhythm simply by changing one characteristic of a motif as we repeat it. rhythms surround us

Informal Activity: Music appreciation

Your teacher will play different kind of music. The song will be played twice, the first time is pure listening. The second time the song is played your need to determine the types of rhythms the song uses.

South African National Anthem has a regular rhythm which suggest that it is monotone, the beat is constant.

The learners will explore polyrhythm, the teacher must encourage learners to be innovative and always ensure a safe space, as some learners can do complex movements.

Improvise and Create

Polyrhythm

- The simultaneous use of two or more rhythms.

i You have studied locomotor (Walking or running, Jumping or hopping, Galloping or marching, Skipping) and non-locomotor movements (stretching, bending, pulling, pushing, swaying, twisting, log rolling and balancing) in your year one.

You are to choreograph your own dance and music based on a polyrhythm which incorporates a variety of music rhythms and dance multiple movements using locomotor and non-locomotor.

POLYRHYTHM 3:2 Sequence

x		x		x	
x			x		

i Where there is an X use create it for locomotor movement and where there is a blank square use it for both locomotor and non-locomotor

These are some of the visuals below where polyrhythm was used in dance. Notice the use of locomotor and non-locomotor movements.

Source: Step into dance company website

The learners will be doing puppetry and the learners will need to create the puppets in which they will use in their formal task as they will be working with puppetry.

Interpret and Perform

Puppetry

Puppetry is a performance that involves manipulation of puppets. A storyline is created using the puppets as the characters. The person who will make movement of the puppets in order to resemble an animal or a person is called a puppeteer. Once the story is ready to be performed and the puppets created, then a puppet show can take place. The puppet is made from a range of waste materials.

Types of Puppets

1. Sock Puppet – made from a sock or similar garments.

Source: Google Image

2. Hand Puppet

Source: wikihow

3. Marionette is puppet controlled by the strings by a marionettist from a hidden from audience.

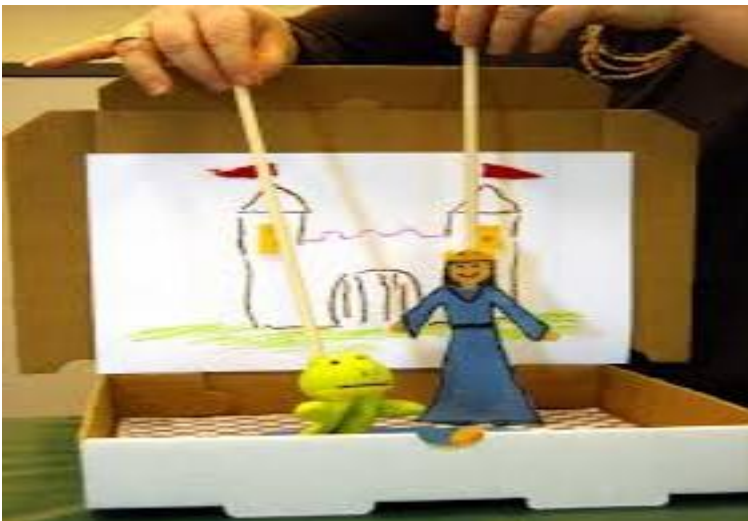

Source: wikihow

Staging of Puppets

These are some homemade examples of puppet stage below:

Source: Google Images

Source: Google Images (Pizza Box)

The stage can be made using waste material or any relevant material, like wood, glue cloth, etc.

Suggestion of how to make a puppet

Making a Simple Sock Puppet

1. Find a clean **sock** that's long enough to cover your arm. ...
2. Slip the **sock** over your hand. ...
3. Use a marker to **make** two dots above the seam for the eyes. ...
4. Take the **sock** off. ...
5. Glue some eyes onto the **sock**. ...
6. Glue a small pompom just above the seam for the nose. ...
7. Add some other decorations.

Create your own hand or sock puppet of your choice. You can use waste material to decorate your puppet. You can use the suggestion of provided previously. Note: This puppet will be incorporated in your formal task for the term.

Improvise and Create

Elements of Drama

Elements of drama are essential to drama as they underpin every playmaking process and are a guide for analysing meaning in text.

Aristotle's (Greek philosopher) elements of drama are six:

- **Plot:** What **happens** in the play, Sequence of events (Beginning, Middle and end)
Plot includes the conflict that will drive the story. It also displays the setting of the play (where and when)
- **Theme-** what the play means - the main ideas within the play.
- **Character:** the role played by the actors in the play. Characters can be animals or people or objects
- **Diction/ Language/ Dialogue:** the word choices made by the playwright and actors' delivery of lines
- **Music /Rhythm** – Sound, rhythm and melody of speech
- **Spectacle:** the visual elements of the production of a play; the scenery, the costume, lightning, and special effects in a play

We use drama elements for playmaking through a process called improvisation:

Improvisation is central to playmaking

Improvisation is to make up a play from a dramatic process which involves playing theatre games and using scenarios that assist in generating a storyline (plot) that is later scripted. A rehearsal of the scripted play is done, as to have a polished improvisation performance.

Improvisation process

- Working in with a scenario will introduce conflict.
- **Conflict** is central to every great story.
- Most **story tend to resolve conflict in a series of events**. Immediately a story is worked into a production seems to be a story, is then referred to as a play. Characters **are drivers of conflict; therefore, it is important that learner know their characters well**.
- A character biography is an essential guide that should be evident in learner books as part of the development of an improvised performance.

Improvisation Process	Element of Drama
Step 1: Using a scenario – learners must create dialogue	Theme used to create dialogue
Step 2: There must be developed characters (using character biography) and conflict must be evident improvisation in progress.	Characters
Step 3: Learners can add a song and or dance to enhance performance.	Music/Rhythm
Step 4: Scripting and Rehearsals	Plot
Step 5: Learners must decide on costume and make up for their characters to represent the information on character biography (in step 2). Props may be used to enhance appearance.	Spectacle

Some examples of Improvisation scenarios

1. You are witnessing an incident of bullying of your naughty classmate at the bus stop after school.
2. A friend stole a teacher's phone.
3. Entering at a best friend's birthday party.

4. Studying at the library and fell out the chair in front of someone you like
5. Lunch time before writing an exam.

The learners must be able to integrate elements of drama in their playmaking process. The teacher needs to make the learners aware that this process of improvisation is a building block to their formal activity.

Warm up and Play

i This game of status is to introduce another dimension into character development. Status influences the manner character interact on stage.

Status Game – Improvisation

- In pairs, create a still image where one of you has a higher status than the other.
- Show your image to the others and let them guess who is “high” and who is “low”.
- Discuss why there may be areas of disagreement.
- Make another image showing high and low status in a different way.
- Try to make an image where you have equal status and see if the onlookers agree!

Source: Drama Resource

Informal Activity: Playmaking (Build -Up)

In groups develop a 2-3-minute story which you incorporate the drama elements. Follow the process of improvisation for your play making. Use the puppet you created earlier in the term as your character.

The teacher must give the learners the task in advance and must mediate it so that the learner know what to expect for this term.

Formal Activity

YEAR TWO, TERM ONE

INSTRUCTIONS

- In your working groups, develop a story for your puppets

- Puppets must be complete before the performance
- Prepare a puppet performance stage using waste material
- A reflection of the process of creation must be written and submitted after the performance

Mark Allocation

Marks will be awarded for the following:

Process	Description	Mark Allocation
Pre-production	Puppet	15
	Stage Design	5
Production	Element of Drama	10
	Characterization (vocal & movement of the puppet)	10
	Usage of puppet stage	3
	Creativity	2
Post-Production	Reflection	5

A rubric will be used to assess your work.
