

Creative Arts

Year 2

Term 2

Teacher Book

Logo's in the Fashion world

Name and Surname: _____

Class: _____

Visual Arts

Visual Literacy

Logo's in the world of fashion

Elements of Art

There are 7 elements of art. They are line, shape, form, space, texture, value and colour.

Use your visual diary to complete the following activity.

Teachers Notes:

Hand out visual diaries.

Provide each student with the template required for activity 1.

Template must be copied, cut and paste into the visual diary.

Lead discussion on logos and all the elements of art the students can identify.

It is important that the students identify the elements on their own. Teacher should only aid the students in identifying the elements of art as the need arises.

Encourage the discussion and motivate learners to take part.

By the end of this activity learners will be able to:

- Name famous logos and the art elements that are present in each logo design.

Activity 1

- Have a look at the following logo's used in the fashion world:
- See how many you can correctly identify.
- When you have identified the logo correctly, discuss the elements of art that you are able to identify in the logo.
- Write down or draw the element in the block provided.

Logo	Name	Elements of art
		
		
		
		
		

Reflection (Use your visual diary for reflection)

1. What logo is your favourite? Why?
2. Does this logo fit with the product it is selling e.g. jewellery, clothing, shoes etc?

Teachers Notes:

Hand out visual diaries.

Lead the discussion and help learners to identify and come to conclusions as part of their own discovery. This is a class discussion, but should the students feel the need to take notes in their visual diaries they can do so.

Activity 2

By the end of this activity learners should be able to:

- Discuss and compare different logos of the same company.
- Have a look at the development/ evolution of the Versace logo.
- Which one do you like best?
- Why do you think it appeals to you?
- Do you think it has anything to do with the elements of art that we learned about?

1000Logo

The next logos are all from Armani.

They look different because they target a different market. What do you think?

All Logos

Visual Literacy

Principles of design

The principles of design are the way an artist chooses to use or arrange the elements of art in his or her artwork.

There are 7 design principles.

Contrast/ Emphasis, Proportion, Balance, Pattern, Movement, Rhythm and Unity/ Variety.

By the end of the following lesson learners will be able to:

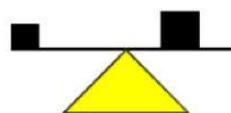

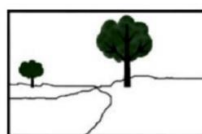

- Identify and use Balance in images and their own artwork.
- Make drawings of different types of balance.

Balance

To understand balance, we must first think of a 3D work of art. If the object were not physically balanced it would fall over.

For images created on a flat surface the same applies. However, instead of having actual balance, the artist needs to create an illusion of balance, referred to as visual balance.

Symmetrical Balance

I place things evenly on both sides of the mid-line.

Asymmetrical Balance

Variety of images, NOT placed evenly from the mid-line.

Activity 3

- Make your own drawing of Symmetrical balance and Asymmetrical balance.
- Use the page that your teacher will provide and complete activity 3.
- Use your visual diary for this activity.

Teachers Notes:

Hand out visual diaries.

Provide each student with the template required for activity 3.

Template must be copied and handed out to each student.

Students will complete, cut and paste in their visual diaries.

Activity 3 - Template

Symmetrical Balance

--

Asymmetrical Balance

--

Pattern

Pattern is created when we take an element of art and repeat it in an **orderly** manner.

Teachers Guide:

Provide each student with the template required for activity 4.

Template must be copied and handed to each student.

Student will complete, cut and paste into their visual diaries.

By the end of this activity the learner will be able to:

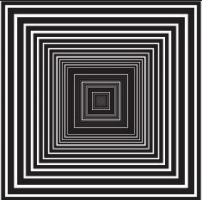

- Identify Pattern in different images, also identify pattern that is create by elements of art.

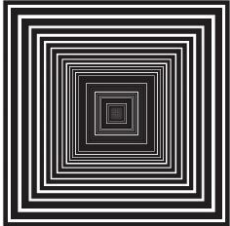

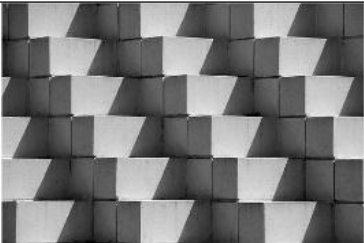

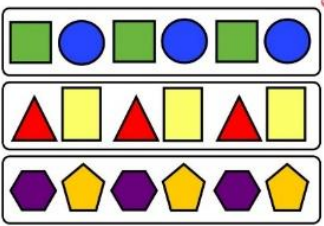

Activity 4

Look at the following patterns and identify what elements of art were used to create pattern.

Some of these images use more than one element of art, please indicate all the element you can see with an x.

	Line	Shape	Colour	Texture	Form	Space	Value
	X Multiple lines	X 2D Squares	X Black and white repetition	-	-	X The illusion of depth	- Some may see a colour gradient

	Line	Shape	Colour	Texture	Form	Space	Tone Value
							
							
							
							

Create in 2D

Logo for your own fashion product

Assessment 1 Formal activity

Start Date: _____

End date: _____

By the end of this lesson learners will be able to:

- Design a logo for your own fashion product.
- Explore a variety of drawing / colour media and techniques.
- Use all art elements in you design process.
- Use design principles: Balance, pattern, emphasis and contrast.

Teachers Notes:

Hand out visual diaries.

Refer to all the work done this term regarding pattern and balance. Use as reference. Students should brainstorm in their visual diaries and use as a resource for activities that follow.

Resources

A3 page

Learners is free to use any medium.

Instructions

Design a logo for your own fashion product. It may be anything. Incorporate the elements of art and the 4 new design principles you have learned about. (contrast, emphasis, balance and pattern)

How to design a logo.

A great logo is more than images and words, a good logo tells a story about your company - who you are, what you do and what you stand for. That's a lot to ask of one piece of art, which is why it's important that you take the time to do it right.

Step 1

- Use your visual diary.
- Determine the primary function of your logo. A logo represents your brand using shape, fonts, colour and images.

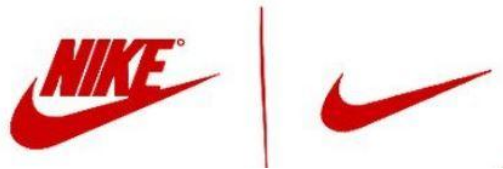

Step 2

- Think about your target market. It's important to be clear on who your client is and customize the look of your logo to appeal to those who will be using your services.
- Little girls will not like the same logo as businessmen.

Step 3

- Decide if you want to put your company's name into the logo. Of course, you want to build name recognition for your business, but making the name part of your logo design may not always be a good idea.

Step 4

- Follow the company's colour scheme. If your company have set colours e.g. Coca Cola uses red, make sure your colours are reflected in your logo.

Step 5

- Be inspired by but **don't copy** successful logos. While it might be tempting to create something that looks like your favourite logo, it will tell people that you're lazy and uninspired. Be creative, you can defiantly make an amazing logo.

Step 6

- Keep it simple. Designing a logo is an exercise in restraint. You may want to put as many images and ideas into your logo as possible but, trying to do too much will sabotage the success of your logo.

All images sourced from wiki how

✓ **Rubric**

Assessment criteria	Marks allocated	Marks received
Elements of Art:		
1. Evidence that learner used at least 3 elements of art (3-1, 5-2, 7-3)	3	
Design Principles:		
1. Emphasis and Contrast: Successful implementation and use.	3	
2. Balance: Successful implementation and use.	3	
3. Pattern: Successful implementation and use.	3	
Execution:		
This a logo or just a drawing.	2	
It meets with/fit the target audience.	2	
Technique: Is the finished image neat and present as uncomplicated.	3	
Originality: Is this original or a copy of an existing logo.	3	
Time management: Task completed on time and workstation clean and tidy after completing the task.	2	
Attitude: Works well with others, share and shows interest in activity.	1	
TOTAL	25	

Reflection (Use your visual diary for reflection)

1. Have a look at your friends' logo's, would you say your logo was successful?
2. What would you change, if anything, about your logo?
3. Did you enjoy this activity?

Create in 3D

Creating a fashion product

Assessment 2 Formal activity

Start Date: _____

End date: _____

By the end of this activity learners will be able to:

- Display skills and techniques like pasting, cutting, wrapping, tying, joining various recyclable materials in designing a fashion product with a logo.
- Art elements and design principles.
- Network with other workshops.
- Refer to 2D logo and use visual diary as guidance.
- Spatial awareness: use space consciously e.g. front, back sides of object.
- Use tools appropriately and enhance safety measures.

Resources

Recyclable materials

All medium available to learners in class or from home.

Instructions

Create a fashionable product e.g. hat shoes etc. that will enhance the logo you created in the 2D assignment.

Refer to your visual diary and do all your brainstorming.

Teachers Notes:

The below activity is an example of an object that your students can make.

Students are not required to do the activity this way. They have creative freedom to reach the outcome however they see fit.

Teachers should facilitate to each student's need.

Teachers should provide students with appropriate materials, should a student wish to use something else they must bring it from home.

Example

Step 1

- Trace the outline of your foot onto a piece of paper.
- Do not focus on individual toes.

wikihow.com

Step 2

- Cut out the outline of your traced foot.

wikihow.com

Step 3

- Place your traced/ cut out foot onto a piece of durable fabric, foam, plastic - the base of your shoe.
- Cut this out as well.

wikihow.com

Step 4

- Place your foot onto the cut out and mark where your big toe and second toe meet.
- Also, mark on the side and inside of your foot, about halfway from the top of your shoe.
- This is where the straps that keep the shoe to your foot will be placed so mark according to your need.
- Punch a hole into your base in the marked location.

Step 5

- Take 2 pieces of ribbon or string and knot them together.
- Thread the 2 pieces through the toe hole with the knot to the bottom.
- Next, thread one side through the right-side hole and the other through the left side.
- Make a knot to prevent the string from pulling out.

wikihow.com

Step 6

- Place your foot in the shoe, adjust as needed.
- Decorate and add your finishing touches e.g. placing your logo.
-

wikihow.com

Step 7

- Display the finished product in class, give and receive constructive feedback from your peers and teacher.

✓ Rubric

Art and Culture - Visual Art Assessment				
Project/ Topic	3D Product design			
	Excellent	Good	Average	Poor
	4	3	2	1
Composition and design - Is the final product interesting and well thought out?	4	3	2	1
Growth and progress - How does the work compare with the draft idea? Is it an improvement from the original idea?	4	3	2	1
Impact - Is the design creative? Is it memorable and different?	4	3	2	1
The problem - Does your design show elements of design?	4	3	2	1
Care /Effort - Does your work show care, neatness and attention to details?	4	3	2	1
Work habit - Did you use your time efficiently, asking questions, experimenting with ideas?	4	3	2	1
Comments:				

Teachers Notes:

Hand out visual diaries.

Reflection must be done in the visual diary.

Reflection will contribute one mark towards the final assessment mark.

Reflection (Use your visual diary for reflection)

(1)

1. Did you enjoy this activity? Why?
2. When you were giving and receiving feedback, did you learn something new?
3. If yes, what?
4. If not, why not?

MARK: 25

Teachers resource

How to make paper clay

1. **Gather your supplies.** To make paper clay, you'll need toilet paper as well as a few supplies you can find at the hardware store. This recipe results in a smooth, malleable clay you can mould over any type of prepared form. It dries into a hard surface to which you can apply paint or varnish. Here's what you need:
 - 1 roll of single ply toilet paper (not the kind with lotion, scent or colour added)
 - 1 cup premixed joint compound (do not buy it in powdered form; get "regular")
 - 3/4 cup PVA glue (white school glue)
 - 2 tablespoons mineral oil
 - 1/2 cup white flour
 - 2 large bowls
 - Electric mixer
 - Measuring cups
2. **Remove the toilet paper from the roll.** It's less messy to slip the entire roll of paper off of the cardboard roll at once, rather than unwinding the paper entirely. Place the toilet paper in one of the bowls.
3. **Fill the bowl with water.** Pour it over the toilet paper until it's completely saturated. Push the toilet paper down into the water to make sure it all gets wet.
4. **Squeeze out the toilet paper and place the pulp in a separate bowl.** Tear it off in smaller chunks (1 inch or less) so you can squeeze out as much water as possible. Place the pulpy chunks in a separate bowl so you can mix them with the other ingredients. Keep going until you've squeezed out all the toilet paper.
5. **Measure 1 1/2 cups of toilet paper pulp.** One roll of plain toilet paper typically equals a cup and a half of pulp. If your brand of toilet paper makes very small or large rolls, you might end up with less or more pulp than you need. Make more toilet paper pulp or discard the excess as needed, so you have 1 1/2 cups of pulp in the bowl.
6. **Add the remaining ingredients.** To the bowl with the pulp, add a cup of premixed joint compound, 3/4 cup white school glue, 2 tablespoons mineral oil, and 1/2 cup white flour.
 - Do not substitute these ingredients. Different types of glue, oil, flour, and so on will change the consistency of the paper clay and may not produce the results you want.
7. **Mix up the clay until smooth.** Use your electric mixer to beat the clay at a high speed. The paper fibres will break down and blend with the joint compound, glue, oil and flour until it takes on a smooth, dough-like consistency.
 - If you want a thicker clay, mix in an extra half cup of flour.
 - For a thinner consistency, add an extra half cup of glue.

How to make clay

Flour and Salt Clay

- 4 cups (480g) of all-purpose flour
 - 1.5 cups (417g) of salt
 - 1.5 cups (350ml) of water
1. **Mix 4 cups (480 g) of flour and 1.5 cups (417 g) of salt in a large bowl.** Add both dry ingredients to a large mixing bowl. Then, use a big plastic or wooden spoon to stir the dry ingredients until they are thoroughly mixed.
 - Make sure the flour and salt are **mixed well before you add the water** because it will be harder to redistribute one of the ingredients once the clay starts to form.
 2. **Add 1.5 cups (350 mL) of water gradually as you stir the mixture.** Pour small amounts of water into the bowl at a time, stirring between pours. Blend the mixture as well as you can before you add more water. By the time all of the water is added to the bowl, your clay should be forming a ball.
 - It should get harder to stir each time you add more water.
 3. **Knead the clay until it reaches an even consistency.** Take your clay out of the bowl and place it on a flat surface, like the kitchen counter. Use your hands to push and pull the clay to work it into a nice consistency.
 - You can also pick up your clay and throw it down on the counter to work out any air bubbles that might be present. This will help your clay stay moist longer.
 4. **Sculpt the clay as you desire.** Now that your clay is ready, you can mould it into a figure, create ornaments, or just play around. Use it as you would use a store-bought clay.
 - This kind of clay can make great keepsakes. For example, press your child's foot or hand into the dough until there is an imprint, then let the mould harden to make a gift.

Tip: Use cookie cutters or a glass to cut out shapes, if you like. Start by rolling your clay out flat using a rolling pin. Then, cut your clay into shapes using a cookie cutter or a drinking glass, which can make circles for ornaments. If you wish to hang the shapes as ornaments, poke a hole near the top of the shape using a drinking straw or a toothpick.

5. **Allow the clay to air dry for 2 days to preserve your model.** If you want to create a sculpture or keepsake, you'll need to let your clay dry. This kind of clay dries out quickly, but it's best to leave it untouched for at least 2 days to make sure it's fully dry.

Variation: If you need to speed up the drying process, bake your clay at 100 °C for 3 hours. If it still feels soft after 3 hours, you can put it back in the oven for up to 2 more hours.

6. **Store unused clay in an airtight container.** You can preserve your clay for a few weeks by keeping it in an airtight container. Make sure you leave the clay in the container

whenever you're not playing with it, as it will dry a little bit whenever it's exposed to the air.

- For instance, you can use a plastic bag with a zipper or a Tupperware container. For extra longevity, place the clay in the refrigerator.

The teacher is expected to draw from term one's work in order to conduct other process in dance and movement.

Interpret and Perform

YEAR TWO TERM TWO

This term will be working towards an ensemble. A lot of focus will be in dance and music; therefore, a Dance Drama will be the end product. You are expected to choreograph your dance.

Ensemble is a combination of performers and performing arts genres put together as one production.

FACT about choreography

Choreography is the art of developing or designing a sequence of movement using your body to create a particular form or shape in a three-dimensional way.

The choreography is the art of movement and choreographer is the person making the movement.

Refer to the images below and study the form (3D shape) created by the dancers. In pairs you can discuss the form that presented by each visual.

Sources: Google Images

Source: Google Image

Choreography elements are very important for the creation and improvise process.

Elements of Choreography

These are the three elements of choreography:

1. Time refers to the rhythm and speed the movement is taking place
2. Energy relates to the quality of movement
3. Space is the performing stage the dancer uses. Space also focus on level and direction.

Levels can be categorised as:

- Low levels are the floor movements
- Medium levels are movements created when standing'
- High levels are leaping and lifting moves.

When all the three elements are put out together, they create a variation of image or even movement sentence.

A movement sentences

- Are a number of movement pieces that are intended to create a pattern of movement.
- Pictures can also help you to create movement sentence or the sentence can assist one in coming up with a movement sentence.
- An example of a movement sentence: "The magic cart with Cinderella"

The six dancers created a cart as their form. There are variations are created through time, as the rhythm of movement is flowing and progressive. The levels (space) of the dance are high.

Source: Vue website

i Refer to term one's work for the types of Rhythm. This reference will enable you to answer the questions on time for the next activity.

i Dance Drama is a combination of drama and dance together, the process of dance drama is driven by sentence movement in order to create a dance drama narrative.

Informal Activity

Study the images below and analyse time (rhythm) and the space as elements of choreography.

Visual Image	Elements of Choreography		
	Time focusing on rhythm	Space Levels	Discuss the form and provide a movement sentence
 Source : Google Images from keshearts	Random rhythm – everyone is doing their own thing	Low floor movement and medium standing up	Struggle/ sense for survival; freedom – everyone is pulling and looking at their own direction. <u>Note : learners can provide other suggestions from their perceptive.</u>
 Source: Google Images	Alternative rhythm	High level – leaping and medium level – standing up	Bow and arrow/victory

A black female ballet dancer. Photo credit: Pinterest

Regular Rhythm

Low Level – movement on the floor

Peacock / an umbrella downward

Source : google Images

Random Rhythm

Medium levels standing up

Inkundla (The man is the focal point if the ladies were to close off the circle. It will become a 'meeting place.'

Create Movement

Use the following movement sentence to create your own movement sequence. Ensure that your dance has form and uses space through the levels of movement.

She mirrored the **movement**, feeding meat to Jack as she ate

A **movement** behind caught her attention and she stopped.

Warm Up and Play

Sentence movement Creation Practical

KNOW MY SIGNATURE MOVE

Learners must be vigilant and must remember the other learners' moves as they would need to remember them later in the game.

- In a circle learner standing
- First learner makes a movement and sound as their signature
- Every learner must make the signature move by going in the centre of the circle
- In the second round the learners must enter the circle with another learner's move other than their own.
- Learners are not allowed to repeat the movement once it has been presented by another learner

Create and Improvise

Machine Creation

- Learners need to have a garden tool or a machine in mind.
- Each learner will create the tool using body and sound of the tool at the centre of the circle.
- The other learner will also join one by one with their tools to the centre
- Learners need to find a connection from the other tools at the centre where they can connect their tool.
- The tool or machine will eventually have every learner connected.
- The tools must be brought to life through every learner making the movement of their tool and sound.
- At some point the tool must be separated into parts where a smaller group will be created.

Refer to the pictures to gain some idea of the tools you can become.

Source: Google Images

After learners are broken into their smaller groups; learners need to create the movement sentence inspired by their tools.

Formal task must be given prior the date of performance.

Previous lesson with form part of the production process.

Interpret and Perform

Formal Activity Dance Drama

Marks : 50b

Instructions

- In groups of not more than six learners
- Create a dance sequence that present the element of choreography (Time, space, energy)
- Ensure that your dance has form.
- Develop a movement sentence as a frame for choreographing
- Dance must reflect on the movement sentence.

Mark allocation

Process	Criteria	Mark Allocation
Pre-production	Machine Creation	10
Production	Elements of Time, space, energy)	15
	Dance form from movement sentence	15
Post-production	Reflection	10

A rubric will used for assessment.
