Still Life

Name and Surname: _____

Class: _____

Visual Art

Visual Literacy

Principles of design

By the end of this lesson learners will be able to:

- Observe and discuss Movement and Rhythm in images.
- Understand how it works and how to recreate it in your own artwork.

The principles of design are the way an artist chooses to use or arrange the elements of art in his or her artwork.

There are 7 design principles.

Contrast/ Emphasis, Proportion, Balance, Pattern, Movement, Rhythm and Unity/ Variety.

Teachers Notes:

Hand out visual diaries.

Students are encouraged to make notes on both principles (Movement and Rhythm)

These are difficult principles and teachers should take time to ensure that students understand.

They should make drawings to illustrate each principle and enforce the comprehension by doing.

Teachers are also strongly encouraged to plan for this lesson with poster, objects or extra activities to promote the learners' retention and understanding.

Movement

Using this principle, the artist can create the path our eyes will travel as we look at a work of art. For example, our attention is first captured by the main focal point and then it proceeds to move around the composition as one element after another catches our attention.

Movement can be created by action. Action can be indicated by the “freeze frame” effect of an object in motion.

Movement in this painting is created in several ways. You see it as your eye travels from the little girl on the blanket and moves up the stairs.

Source: Theresa Barnard

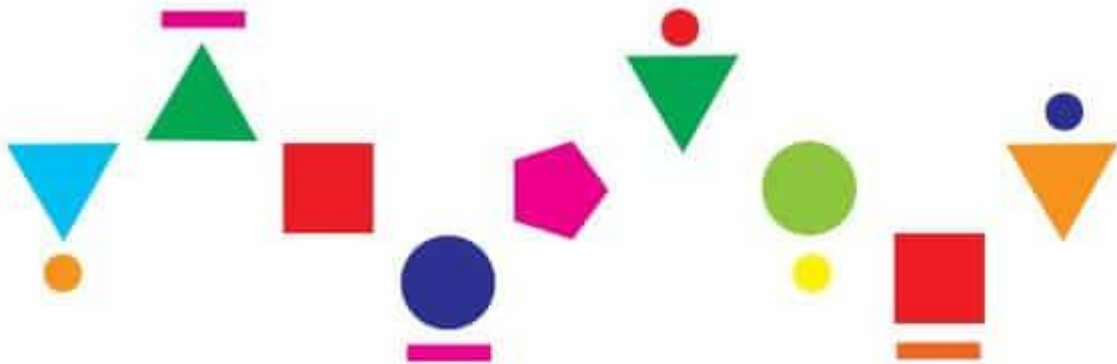

Repetition creates movement in this painting. The colour of the gowns is repeating, the pattern on the floor is repeating, and you also get the feeling of movement created by implied action, they are walking where?

Rhythm

Rhythm has slightly more complexity to it. Where repetition and pattern require the same design element to be repeated throughout the design in the same way, rhythm requires the repetition of a variety of design elements in a specific order.

As a result, individual design elements may not repeat or be the same at all points; rather, their repetition is adaptive and changes throughout the design.

The same shape repeats but in different colours and ways.

Source: Designator, photo by Unknown

Teachers Notes:

Hand out the student's visual diaries.

Provide students with the template required for activity 1.

Templates must be copied and handed out to each student.

Students will complete, cut and paste into their visual diaries.

Students need to look at the images and then identify and draw the fore mid and background of each image in the provided block.

Activity 1

By the end of this activity learners will be able to:

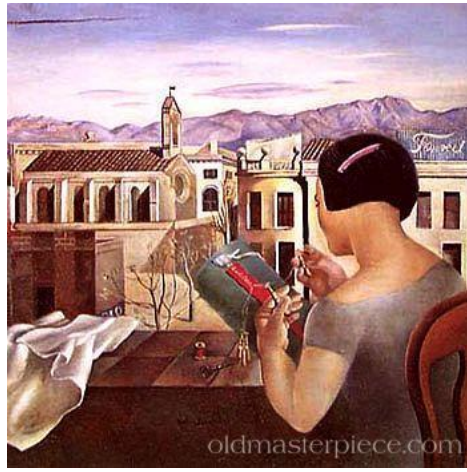

- Illustrate/ identify in a drawing fore, middle and background.

- Look at the 2 paintings below and identify the fore, mid and background in each painting.
- Then make a simple drawing illustrating each element.

Italian Landscape by Alexei Biryukoff

Foreground	Mid	Background

Woman at the Window by Salvador Dali

Foreground	Mid	Background

Still Life

By the end of this lesson learners will be able to:

- Will know what a still life drawing is.
- Identify contrast and proportion between objects in still life drawings.

A still life is a work of art depicting mostly inanimate (not alive) objects, normally it is everyday objects which are either natural (food, flowers, dead animals) or man-made glasses, books, jewellery).

Still Life

- Look at the following 9 images of different still life photographs, drawings and paintings.
- Have a look at contrast and proportions between the different objects in these images.

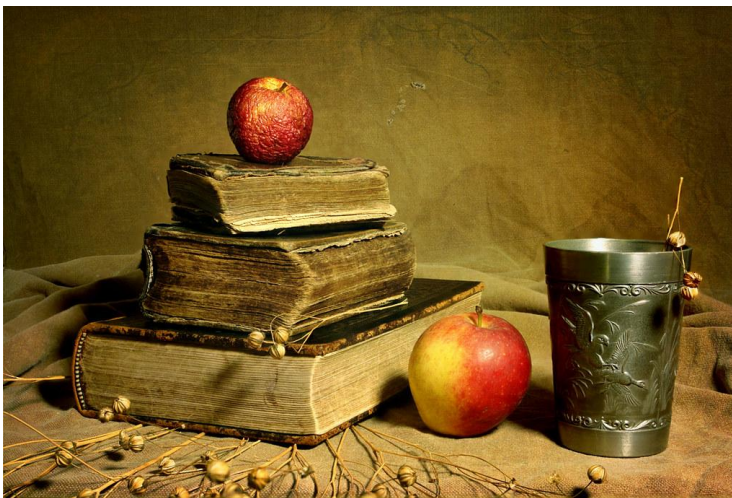

Teachers Notes:

Lead the class discussion and help learners in their discovery.

Provide students with their visual diaries and help them to take correct notes.

Name and identify contrast, proportion, fore mid and background in the images.

Still Life

Assessment 1 Formal activity

Start Date: _____

End date: _____

By the end of this activity learners will be able to:

- Use drawing and/or colour media to exploring a variety of media and techniques through creating a landscape or still life.
- Use art elements: Use related colour in own image.
- Use design principles: Reinforce use of contrast and proportion.
- Identify and create focal points in a landscape or still life must be taught as well as related colour usage, fore, mid and background.
- Use of contrasting colours must be implemented.

Resources

Visual stimuli.

2/3B pencils, charcoal, coloured inks, oil pastels, tempera paints or own your own choice in whatever you are comfortable with.

Teachers Notes:

Hand out the student's visual diaries for their practice work.

Go through the steps with your students, you could even do a practice drawing with them in their visual diaries.

Provide them with the materials they will need to complete this activity.

They may copy their drawing from a photograph or image, or you could take them outside to do a drawing of the world around them.

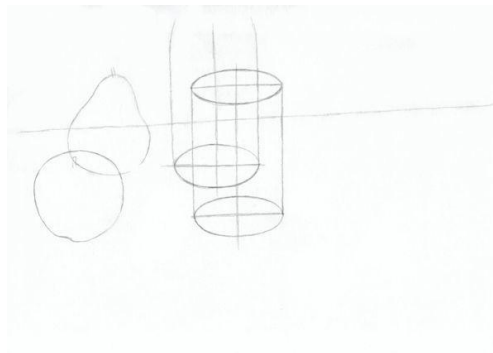

Instructions

- After looking at the photographs and images of landscapes you may decide which type of landscape/ still life you want to create.
- Create a focal point with colour.
- Use two colours on the colour wheel for the fore and mid-ground and a contrasting colour for the background.

Example

Step 1

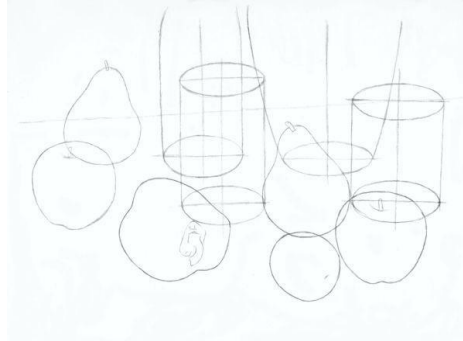

- Start your still life drawing
- In any still life, you should start drawing the objects as if they are transparent wire frames with visible lines. This helps you to be fully aware of the shape of each form and its position in relation to the other forms.
- It is important to sketch the object lightly so that you can erase and make changes without much effort.
- This see-through drawing technique uses vertical and horizontal lines (crosses) to help you to draw.

Still life by Artyfactory

Step 2

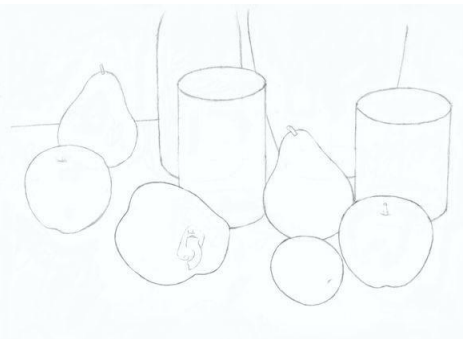

- Create an interesting composition.
- When you create a still life to draw, try to place things in an interesting way.
- You need to be aware of the art elements line, shape, tone, colour, pattern, texture and form.
- The see-through drawing technique helps you to easier see the shape, position and proportions of each object.

Still life by Artyfactory

Step 3

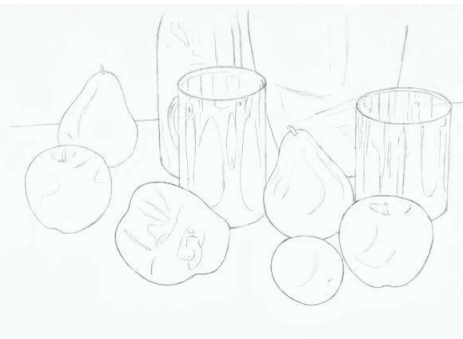

- When you are happy with the shape, position and composition of the drawing you can erase all the construction lines.
- This will leave you with an accurate outline of each form.
- You are now ready to work on the details of each object.

Still life by Artyfactory

Step 4

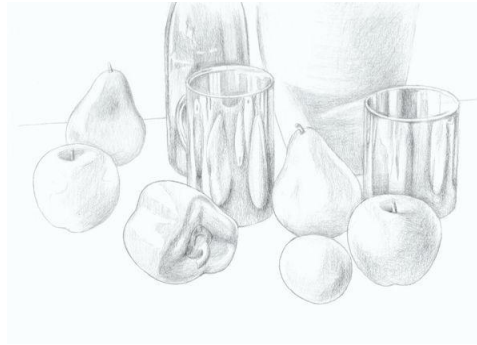

- Now, lightly sketch in the shapes of any shadows or reflections onto each object.
- The more care you take in this step the easier you will find the next step – shading and toning.

Still life by Artyfactory

Step 5

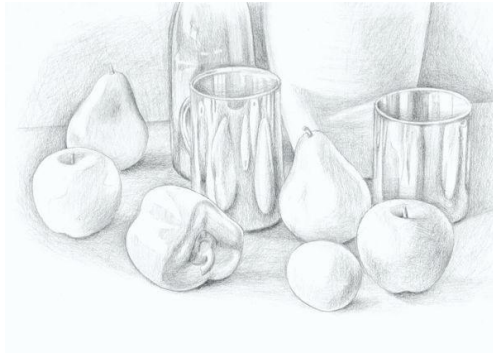

- Shading stage 1
- Focus on the outline of each object.
- In this stage some basic tones are lightly coloured in each object to help build up a basic 3D form.

Still life by Artyfactory

Step 6

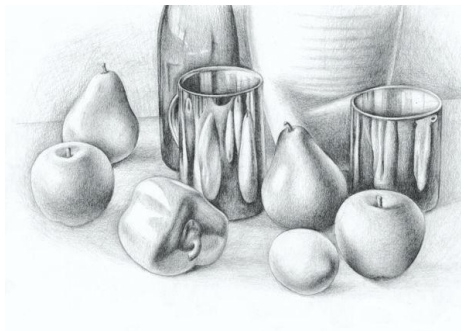

- Shading stage 2
- Focus on the spaces between and around objects.
- The shadows beneath and around the object are just as important as shading on the objects.

Still life by Artyfactory

Step 7

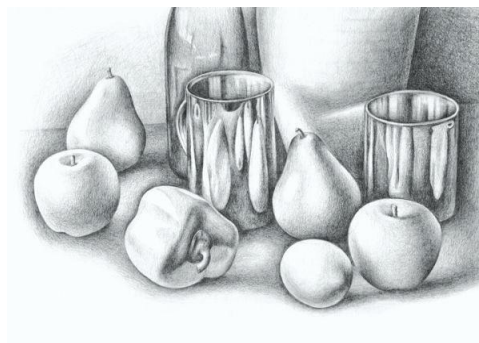

- Shading stage 3
- Now, you focus back onto the object.
- You deepen the tones and increase the contrast between areas of light and dark.
- Be careful to keep the range of your tones from light to dark, do not go too dark or too light.

Still life by Artyfactory

Step 8

- Shading stage 4
- Finally, you focus again on the space between the objects.
- Again, be careful to keep a range of tones, do not go too light or too dark.
- Your shadows are dark, and your light spots are light and everything in between.

Still life by Artyfactory

✓ **Rubric**

Assessment criteria	Marks allocated	Marks received
Elements of Art:		
1. 1. Colour: Identified two colours from the colour wheel for the main image.	3	
2. Colour: Identified one contrasting colour used for the background.	3	
3. Shadows and highlights show a range from dark to light.	3	
Principles of Design		
1. Contrast: Any form of contrast evident in the image.	3	
2. Proportion: Use of proportion is accurate.	3	
Focal point is created and evident.	3	
Fore, mid and background identified and well executed.	3	
Subject choice is appropriate for this activity (landscape or still life)	4	
TOTAL	25	

Reflection (Use your visual diary for reflection)

1. Do you think your still life/ landscape was successful?
2. What was the most difficult thing for you to do?
3. Where you able to overcome this? How?

Create in 3D

Still Life

Assessment 1 Formal activity

Start Date: _____

End date: _____

By the end of this activity learners will be able to:

- Use skills and techniques: Mix mediums.
- Use art elements: Texture, shape/form, and colour reinforced through drawing of a landscape/ still life e.g. tree leaves, pots etc.
- Use design principles: Reinforce conscious use and naming of contrast and proportion in own model.
- Spatial awareness: Reinforce conscious awareness of working in space e.g. model to be viewed from front, back and sides.
- Use tools appropriately and safety measures.

Resources

Mixed mediums.

Teachers Notes:

Visual diary will be used for planning – marks will be allocated.

Any medium is available to the student for this activity (discuss and plan with students in advance)

They either need to bring supplies from home or teacher should provide – dependant on the need.

Students need to make something, anything, from their still life/landscape drawings.

This object may also be an interpretation e.g. Landscape was the ocean – fish are in the ocean, make a fish.

Instructions

You will develop a 3D work based on your 2D work. You will develop a new object that you took from your original work.

e.g. You had a drawing of the ocean, now you will make a fish that can be found in the ocean.

You had trees, now you make a bird's nest.

You will be assessed on the planning you do in your visual diary.

Pay attention to proportions, textures and details.

Example

Coffee Filter Flowers

Step 1

- Place coffee filters into dye, if you would like colourful flowers.

If you want white flowers, skip this step.

- Pour about 3 tbs (44ml) of acrylic paint into a bowl and stir in $\frac{1}{2}$ cup (120ml) of water and mix well.
- Then stir in 2 cups (470ml) of water and submerge up to 20 coffee filters of any size in the water.
- Keep them in the dye for 2-3 minutes for pale flowers or up to 15 minutes for bright coloured flowers.
- The bigger your filters, the bigger your flowers will be.

Mix different colours of paint to create different colour flowers.

Step 2

- Remove the filters and dry them in a single layer.
- Allow the extra paint to drip off and place your filters on a wire rack.
- They will dry faster in a single layer so don't stack them.
- Filters should dry in 20-30 minutes.

Tissue Paper Flowers

Step 1

- Cut out 10 squares of tissue paper.
- The square may be as big as you would like but make them the size you want your flower to be.
- 8cm x8cm will be medium size flowers
- 10 squares will make one flower so if you want more than one flower cut enough squares.

For a fun effect, layer different colour paper in your stack of 10.

Step 2

- Stack the squares and staple the centre.
- Make sure the sides of your tissue paper are lined up before you staple them together.

Step 3

- Cut the tissue paper square into a circle.
- Cut a circle around the stapled centre, make the circle as big as you want your flower to be.

Step 4

- Separate each layer and pinch them up in the centre.

Step 3

- Take a filter and cut it into a spiral.
- Once you've cut the spiral, you will be able to stretch the ends of the filter to make a long skinny strip.

Step 4

- Cut a 30cm piece of tape and stick it to the centre of the spiral. (masking tape or washi tape)
- You should use the rounded end of the filter so it will become the middle of your flower.
- Consider using green tape to make the stem of the flower.

Step 5

- Pleat and gather the filter across the bottom half of the masking tape.
- To pleat: just fold the filter over onto itself so it ribbons.
- Press it down onto the bottom half of the tape so it gathers.
- Keep folding as you move down the tape.
- Leave space along the top of the tape so you'll be able to wrap and seal the stem of the flower.
- You will now have a ruffled strip of masking tape.

- You can be firm as you do this, each layer will make the textured ruffles of your flower petals.

Step 5

- Unfurl the petals to shape your tissue paper flower.
- Gently pull your layers apart so it fills out and looks like a round blossom.

Step 6

- Stick the end of the tape onto a straw and wrap the strip around the top.
- Press the top of the straw to the bottom end of the tape, that does not have the ruffles on it.
- Then roll up the straw and tape.
- This will form the ruffled flower.

Step 7

- Wrap the green tape around the straw.
- Wrap the tape downwards around the straw to make the stem of your flower.

Mix up the colours or add more than one filter per flower.

✓ Rubric

Reflection and planning in their visual diaries will count toward final mark.

Assessment criteria	Marks allocated	Marks received
Elements of Art:		
1. Texture: was created and is clear.	3	
2. Shape: 3D, interesting shape.	3	
3. Colour: Colour combination (primary, secondary, complementary, warm, cool) was chosen with intent and not just random or what was available.	3	
Principles of Design		
1. Contrast: Any form of contrast evident.	3	
2. Proportion: Use of proportion is accurate.	3	
Spatial awareness: Model is viewable from multiple angles and extends into space.	3	
Planning was done in the visual diary.	2	
Model resemble planning from visual diary.	1	
 Reflection (use visual diary for reflection)		
1. What is the name or title of your work?	1	
2. What material did you use?	1	
3. What was your favourite part of your model?	1	
4. What was the most difficult about making your model?	1	
TOTAL	25	

Teachers resource

How to make paper clay

1. **Gather your supplies.** To make paper clay, you'll need toilet paper as well as a few supplies you can find at the hardware store. This recipe results in a smooth, malleable clay you can mould over any type of prepared form. It dries into a hard surface to which you can apply paint or varnish. Here's what you need:
 - 1 roll of single ply toilet paper (not the kind with lotion, scent or colour added)
 - 1 cup premixed joint compound (do not buy it in powdered form; get "regular")
 - 3/4 cup PVA glue (white school glue)
 - 2 tablespoons mineral oil
 - 1/2 cup white flour
 - 2 large bowls
 - Electric mixer
 - Measuring cups
2. **Remove the toilet paper from the roll.** It's less messy to slip the entire roll of paper off of the cardboard roll at once, rather than unwinding the paper entirely. Place the toilet paper in one of the bowls.
3. **Fill the bowl with water.** Pour it over the toilet paper until it's completely saturated. Push the toilet paper down into the water to make sure it all gets wet.
4. **Squeeze out the toilet paper and place the pulp in a separate bowl.** Tear it off in smaller chunks (1 inch or less) so you can squeeze out as much water as possible. Place the pulpy chunks in a separate bowl so you can mix them with the other ingredients. Keep going until you've squeeze out all the toilet paper.
5. **Measure 1 1/2 cups of toilet paper pulp.** One roll of plain toilet paper typically equals a cup and a half of pulp. If your brand of toilet paper makes very small or large rolls, you might end up with less or more pulp than you need. Make more toilet paper pulp or discard the excess as needed, so you have 1 1/2 cups of pulp in the bowl.
6. **Add the remaining ingredients.** To the bowl with the pulp, add a cup of premixed joint compound, 3/4 cup white school glue, 2 tablespoons mineral oil, and 1/2 cup white flour.
 - Do not substitute these ingredients. Different types of glue, oil, flour, and so one will change the consistency of the paper clay and may not produce the results you want.
7. **Mix up the clay until smooth.** Use your electric mixer to beat the clay at a high speed. The paper fibres will break down and blend with the joint compound, glue, oil and flour until it takes on a smooth, dough-like consistency.
 - If you want a thicker clay, mix in an extra half cup of flour.
 - For a thinner consistency, add an extra half cup of glue.

How to make clay

Flour and Salt Clay

- 4 cups (480g) of all-purpose flour
 - 1.5 cups (417g) of salt
 - 1.5 cups (350ml) of water
1. **Mix 4 cups (480 g) of flour and 1.5 cups (417 g) of salt in a large bowl.** Add both dry ingredients to a large mixing bowl. Then, use a big plastic or wooden spoon to stir the dry ingredients until they are thoroughly mixed.
 - Make sure the flour and salt are **mixed well before you add the water** because it will be harder to redistribute one of the ingredients once the clay starts to form.
 2. **Add 1.5 cups (350 mL) of water gradually as you stir the mixture.** Pour small amounts of water into the bowl at a time, stirring between pours. Blend the mixture as well as you can before you add more water. By the time all of the water is added to the bowl, your clay should be forming a ball.
 - It should get harder to stir each time you add more water.
 3. **Knead the clay until it reaches an even consistency.** Take your clay out of the bowl and place it on a flat surface, like the kitchen counter. Use your hands to push and pull the clay to work it into a nice consistency.
 - You can also pick up your clay and throw it down on the counter to work out any air bubbles that might be present. This will help your clay stay moist longer.
 4. **Sculpt the clay as you desire.** Now that your clay is ready, you can mould it into a figure, create ornaments, or just play around. Use it as you would use a store-bought clay.
 - This kind of clay can make great keepsakes. For example, press your child's foot or hand into the dough until there is an imprint, then let the mould harden to make a gift.

Tip: Use cookie cutters or a glass to cut out shapes, if you like. Start by rolling your clay out flat using a rolling pin. Then, cut your clay into shapes using a cookie cutter or a drinking glass, which can make circles for ornaments. If you wish to hang the shapes as ornaments, poke a hole near the top of the shape using a drinking straw or a toothpick.

5. **Allow the clay to air dry for 2 days to preserve your model.** If you want to create a sculpture or keepsake, you'll need to let your clay dry. This kind of clay dries out quickly, but it's best to leave it untouched for at least 2 days to make sure it's fully dry.

Variation: If you need to speed up the drying process, bake your clay at 100 °C for 3 hours. If it still feels soft after 3 hours, you can put it back in the oven for up to 2 more hours.

- **Store unused clay in an airtight container.** You can preserve your clay for a few weeks by keeping it in an airtight container. Make sure you leave the clay in the container whenever you're not playing with it, as it will dry a little bit whenever it's exposed to the air.
- For instance, you can use a plastic bag with a zipper or a Tupperware container. For extra longevity, place the clay in the refrigerator.
