

Living and non living things

What is living and non living things?

What are living and non living things?

- Living things is anything that can move, reproduce, sense, breath, eat, excrete and grow.
- Non living things are objects or forces with the ability to influence, shape, alter a habit and impact its life.

What are the living and non living things?

LIFE PROCESSES

Life Processes		
M	Movement	All living things move, even plants
R	Respiration	Getting energy from food
S	Sensitivity	Detecting changes in the surroundings
G	Growth	All living things grow
R	Reproduction	Making more living things of the same type
E	Excretion	Getting rid of waste
N	Nutrition	Taking in and using food

Living and Nonliving Things

Living things share the following seven characteristics: movement, reproduction, respond to stimuli, take on nutrients, excrete waste, respire, and grow. Nonliving things cannot do all seven of these.

Circle the items that are living things:

Make a list of ten living things:

- | | |
|----------|-----------|
| 1. _____ | 6. _____ |
| 2. _____ | 7. _____ |
| 3. _____ | 8. _____ |
| 4. _____ | 9. _____ |
| 5. _____ | 10. _____ |

Make a list of ten nonliving things:

- | | |
|----------|-----------|
| 1. _____ | 6. _____ |
| 2. _____ | 7. _____ |
| 3. _____ | 8. _____ |
| 4. _____ | 9. _____ |
| 5. _____ | 10. _____ |

Did you know? Some scientists debate whether or not viruses are living things.
