

TERM 2

PHASES OF MATTER

WEEK 1-3

SOLIDS, LIQUIDS & GASES

SOLIDS

- Have a definite shape
 - Takes up a definite shape
 - Do not flow
 - E.g big boulders of rock are solids
- 

LIQUIDS

- Have no definite shape
 - Takes up a definite shape
 - Can flow
 - E.g water, milk, juice
- 
- A decorative orange wavy line at the bottom of the slide.

GASES

- Have no definite shape
 - Takes up all the available space
 - Can flow
 - E.g helium in balloons
- 
- A decorative orange wavy line with a gradient, transitioning from a lighter orange at the top to a darker orange at the bottom, located at the bottom of the slide.

ACTIVITY

Names: _____

States of Matter

List the solids, liquids, and gases in each picture.

Solids - _____

Liquids - _____

Gases - _____

Solids - _____

Liquids - _____

Gases - _____

Solids - _____

Liquids - _____

Gases - _____

STATE CHANGES

- A Substance can change from one state to another
 - For example a solid can change into a liquid...
 - Water can be a liquid in your glass or in the freezer water is ice
- 

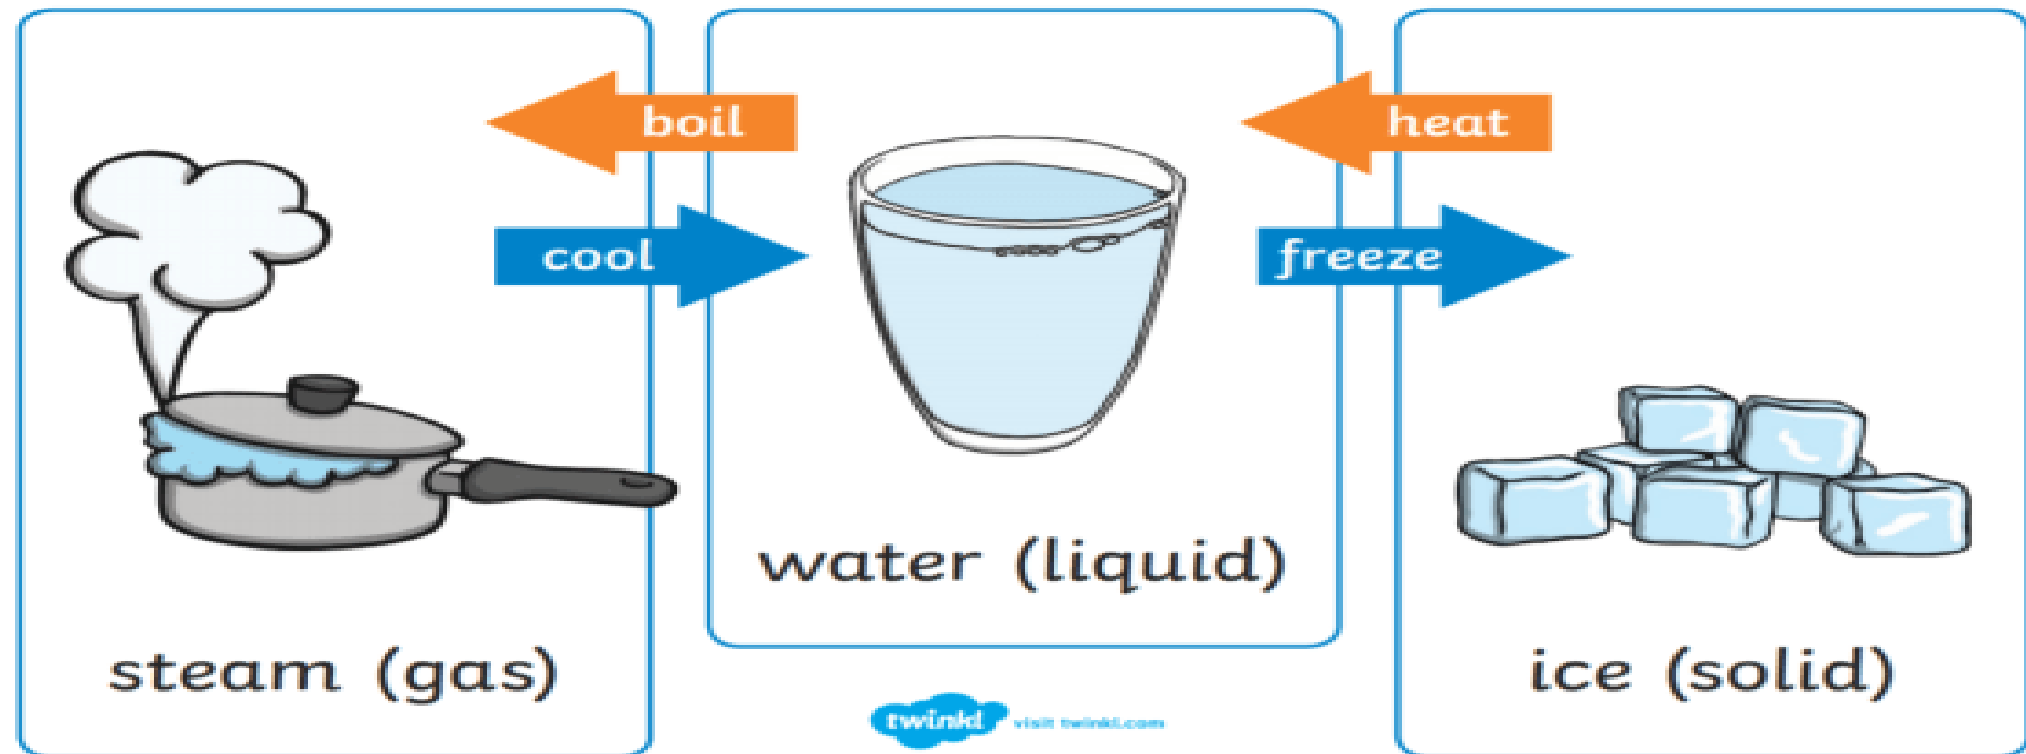

WHAT CAUSES A CHANGE IN STATE ?

- A change in state is caused by Adding or Removing heat
 - Heating or
 - Cooling
- 

Different State Changes

CHANGE OF STATE	HEATING OR COOLING	WE CALL THE PROCESS
SOLID TO A LIQUID	HEATING	MELTING
LIQUID TO A GAS	HEATING	EVAPORATING
GAS TO A LIQUID	COOLING	CONDENSING
LIQUID TO A SOLID	COOLING	FREEZING/ SOLIDIFYING

Changing State

ACTIVITY

Name: _____

CHANGING STATES OF MATTER REVIEW

Fill in the blanks in the sentences below using the word bank given.

solid	liquid	gas	melt	freeze
condensation	heat	evaporation		

1. The state of matter where the molecules are far apart and move around freely is called a _____.
2. The a state of matter where the molecules are tightly packed together and do not move is called a _____.
3. The state of matter where the molecules move around a little bit, and it takes the shape of its container is called a _____.
4. To make matter change states, you need to add or take away _____.
5. When you add heat to a solid it will _____ into a liquid.
6. When you take away heat from a liquid it will _____ into a solid.
7. When you add heat to a liquid it will turn into a gas; this is called _____.
8. When you take away heat from a gas, it will cause liquid to form; this is called _____.

Come up with an example of each type of matter change that happens in your every day life. Draw or describe each below.

SOLID TO LIQUID	LIQUID TO GAS	GAS TO LIQUID	LIQUID TO SOLID
