

## **INTRODUCTION**

The skin is the largest and perhaps the most magnificent organ of the body. It is simultaneously sensitive AND requires special attention and care to maintain its health, elasticity, colour and vibrancy.

The study of the skin, its structure, functions, diseases and treatments is called **DERMATOLOGY**. It is important for you to have a basic understanding of the skin and the skin care services offered in a salon.

**The skin is the largest organ of the body, it covers the entire body and protects the body**

# **Skin Theory**

- **Skin Theory**
- **Skin Disorders**
- **Skin Care**

### **1. Dermatology**

The study of skin, **its structures, functions, diseases** and **treatment**.

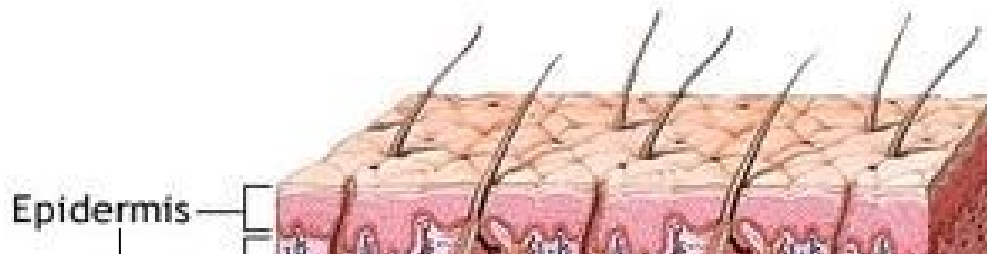

## 2. Seven Functions of Skin

1. Protection
2. Regulation (hot, cold)
3. Absorption
4. Hydration
5. Excretion (toxins)
6. Respiration
7. Sensation (touch)

## 3. Epidermis

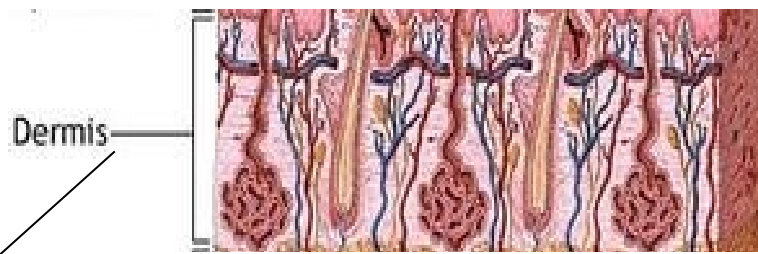

- Outermost layer of the skin/ **Buitenste lag van die vel**

Also referred to as the **cuticle**

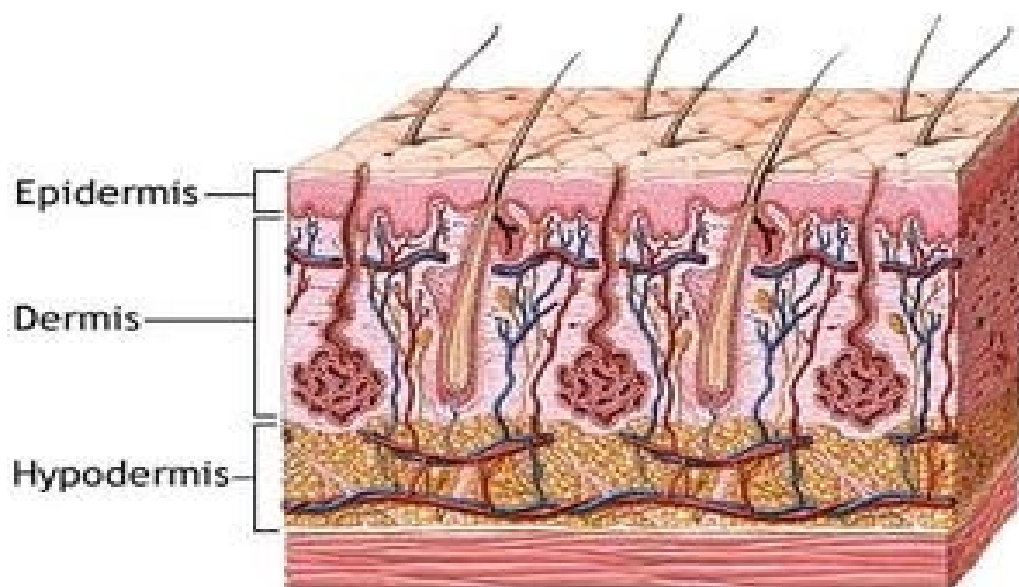

## 4. Dermis

- The underlying, or inner, layer of the skin.
- Contains **collagen** and **elastin fibres**; supports epidermis.

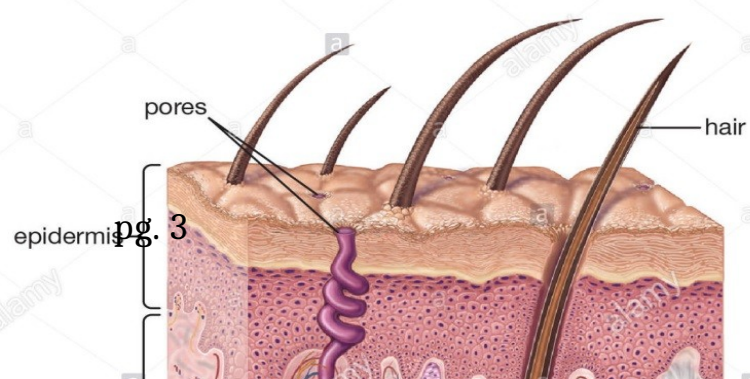

Also referred to as the **true skin**

## THE THREE (3) LAYERS OF THE SKIN

### 5. Sudoriferous Glands

#### Sweat Glands /

## Sweat Klierie

- Regulate body Temperature
- Excrete waste

## Sudoriferous gland

## 6. Sebaceous Glands

### Sebaceous Glands

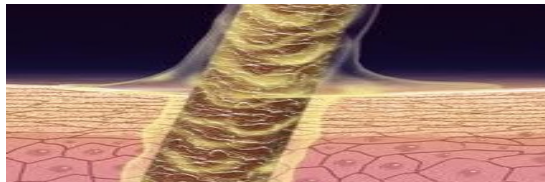

- Oil Glands/
- Sac-like glands attached to hair follicle that produce sebum

### Sebaceous Gland

## 7. Sebum

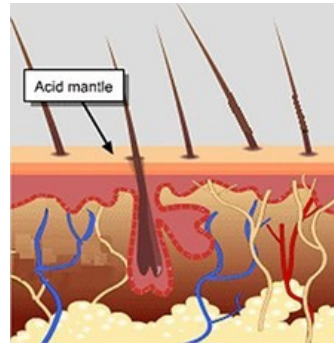

- Secretion of high fatty, oily substances\

## 8. Acid Mantle

### Acid Mantle

- Keeps skin smooth, Prevents dirt and grime from entering

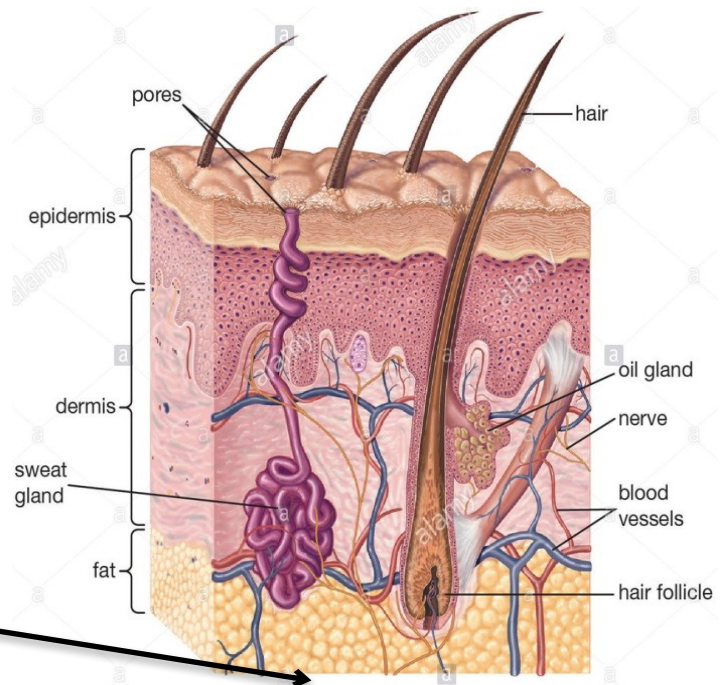

## 9. Subcutaneous Tissue

### Subcutaneous Tissue

- It shapes your body body/
- Acts as a shock absorber to protect bones/

### Subcutaneous Tissue

# Different skin types

## Different skin types:

### 1. Dry Skin

- Peeling and flaking
- Chaps easily
- Tight feeling
- Has fewer blemishes
- Not prone to acne

### 2. Oily Skin

- Overall shiny look
- Rough texture with blackheads and enlarged pores
- Prone to acne

### 3. Combination Skin

- Most common skin type
- Recognized by shiny “Tzone” (Oily forehead, nose and chin)/  
“T-Zone”
- Dryness in cheek, jaw line & hairline areas

### 4. Normal Skin

- Rare & beautiful
- Fresh and healthy colour
- No blackheads/blemishes
- Does not appear oily

# Skin conditions

## Sensitive Skin

The skin flushes very easily, becomes red, has patches & dilated capillaries.

- Dry skin tends to be sensitive.

## Dehydrated skin

Dehydrated skin lacks moisture, looks dull and parched. It may feel tight and itchy

- Dry skin is dehydrated but any skin type may suffer temporary dehydration if not properly protected or taken care of.

## Mature Skin

Mature skin has lost the firmness and suppleness of youth. It has lines due to the loss of muscle tone

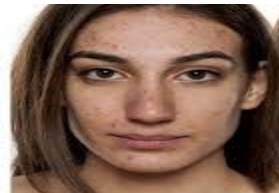

- All skin types will eventually be mature as aging signs become more established on the skin

## Problematic skin

Congestion can be felt and seen

- The pores become blocked and waste accumulates beneath the upper layer of the skin
- The texture is coarse and lumpy
- White heads and blackheads are present?
- The skin has pimples (pustules) and can be painful

### Blemished Skin

Has irregular colour or texture in patches

- Pustules (pimples) can cause blemishes if not treated correctly

**LESSON:**

**DATE:** \_\_\_\_\_

Question 1:

1.1 The Dermis is also referred to as the \_\_\_\_\_

1.2 The Epidermis is also referred to as the \_\_\_\_\_

Question 2:

Name the functions of the following.

2.1 Name the three (3) functions of the subcutaneous tissue

---

---

---

2.2 Name the two (2) functions of the sebaceous glands

---

---

2.3 Name the three (3) functions of the sweat glands

---

---

---

Question 3:

Name the four (4) different skin types.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_

Question 4

Find pictures of the four different skintypes and lable the pictures accordingly.

## SELECTING SKIN CARE PRODUCTS

DATE: \_\_\_\_\_

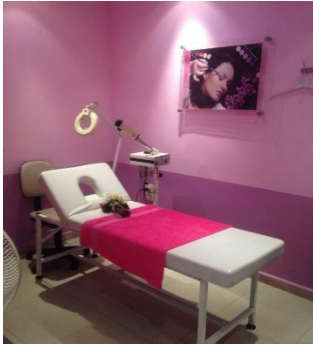

The first step towards good skincare is selecting the correct products for the relevant skin type. Salon skin-care products provide for every skin type and include preparations for treating specific skin conditions.

| Products                                                                                                                                                                                                                             | Type of Products                                                                                                                                                                                                                                                                                                                                                                                                    |

**Question 1:**

Name all the facial products that will be used during a facial

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_
5. \_\_\_\_\_
6. \_\_\_\_\_

**Question 2:**

Find 4 pictures of facial equipment

Date : \_\_\_\_\_

## **PREPARING FOR A FACIAL**

The working area must be well organised to avoid wasting time during the treatment. Make sure your client fills out a client card.

## **PREPARING THE TREATMENT AREA**

A facial is always given with the client lying down, or in a semi-reclining position, and the therapist works from behind the client. This helps to promote total relaxation which is very important for the success of the treatment. Make sure that the atmosphere

- Is free from noise
- The room is warm and there is no draughts
- The lighting is subdued (the magnifying lamp will be used for close work)
- Make sure there are pillows for the clients comfort (support the client under the knee and back)
- Make sure that the trolley is set up with everything required for a facial

## **PREPARING THE TROLLEY**

The trolley should be clean, tidy and well stocked. The products should be arranged logically in order so that you can go straight to them without searching.

### You need:

1. A selection of skin-care products
2. A jar of prepared sterilising liquid
3. A clean spatula
4. Cotton pads
5. Cotton tips
6. Tissues
7. Bowls (for waste, for clients jewellery)
8. Kidney bowl
9. Head band
10. Mask brush and mixing bowl
11. Facial sponges
12. Hot compressor
13. Record card and pen
14. Hand mirror

## **Therapist – preparation**

- ✓ Always look your best when working with clients
- ✓ Remove your own jewellery
- ✓ Draw clients card and scan details
- ✓ Wash hands with soap and water
- ✓ Dry hands with paper towel
- ✓ Always be informed and prepared for the treatment

## **BASIC FACIAL SEQUENCE / BASIESE GESIGBEHANDELING**

### **1. EYE MAKE UP REMOVER**

- Dip cotton wool into water
- Dry it with your hot compressor
- Separate the cotton wool
- Apply eye make-up remover
  
- Support your clients eye
- Wipe gently from the inside of the eye to the outside of the eye
- Wipe brows and lips if there is lipstick

### **2. CLEANSING**

**REFER TO SEQUENCE BELOW.**

### **3. TONING**

- Using two pieces of damp cotton wool with toner
- Stroke left to right starting from the forehead, to the cheek, to the chin to the neck and décolleté
- Avoid the eye are
- Pat your clients face with facial tissue to remove excess toner.

### **4. SKIN ANALYSIS**

- Using magnify lamp analyse your clients skin.

### **5. EXFOLIATION**

- Apply exfoliation on to damp hand, rub your hands together then apply on to client's skin.
- Effleurage x 4
- Circular movements x 4
- Effleurage x 4
- Remove exfoliation with damp sponges

### **FOR A DEEP CLEANSING FACIAL**

- Use exfoliation with steamer

- Steaming is done for 3-10 minutes depending on the type and condition of the skin, the steamer keeps the skin warm so that sebum is softened from the follicle.

#### **ADJUSTING THE DISTANCE OF THE STEAM OUTLET FROM THE FACE ACCORDING TO THE SKIN TYPE**

|                  |       |
|------------------|-------|
| Dry, mature skin | 40 cm |
| Normal skin      | 30 cm |
| Oily skin        | 20 cm |

#### **6. MASK**

- Information will be provided by the manufacturer regarding the mixing and preparation of the mask, your choice of mask will be influenced by the needs of the clients skin.

#### **PREPARATION**

1. Tuck a facial tissue under the edge of the headband to prevent it from becoming soiled.
2. Decide upon the basic ingredients required for the mask.
3. Prepare the mask ingredients according to manufacturer's instructions.
4. Explain to the client
  - Which mask you are using
  - What are the benefits of the mask
  - How it will feel when applied
  - The normal skin reaction to the mask
  - How long the mask is going to be left on the skin.

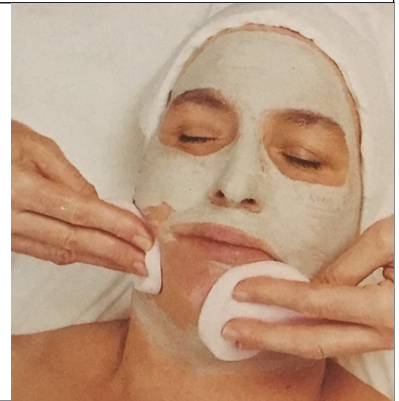

- Apply mask and allow it to sit for 10 minutes
- Remove mask with facial sponges

1.Mask application

2.Eyes covered with cotton wool pads

3. Removing the mask

## 7. MASSAGE

- Effleurage x 4
- Kneading the jaw line x 3
- Effleurage x 1
- Circular movements
- Rest on the temples with circular movements x 3
- Stroking starting from the forehead, lift and pinch the brows x 3
- Rest on the temples with circular movements
- Stroking starting from the forehead, to the cheek, stroking the chin, from left to right kneading the jaw line, stroking the chin up to the forehead x 3
- Effleurage x 4
- Remove excess oil

## 8. Moisturise

# Facial Massage Techniques

## Facial Massage Techniques:

- 1. Effleurage**
  - Movement –Stroking
  - Effect –Soothing
- 2. Petrissage**
  - Movement –Kneading
  - Effect –Stimulates nerves
- 3. Tapotement**
  - Movement –Tapping
  - Effect –Increases blood flow
- 4. Friction**
  - Movement –Circular without gliding
  - Effect -Stimulating
- 5. Vibration**
  - Movement – Shaking
  - Effect – Very stimulating
