LEARNER NAME: _____

Neck and Shoulder massage

DATE: _____

Introduction

With fast-paced lives the tired mind and body tends to seek out for a stress buster. People pulled down by stress find it affecting not only their minds but their bodies as well.

Massage helps you eliminate stress to bring about a relaxed you. It is a relaxing experience by artistic hand strokes on the body to rejuvenate the mind, body and eliminate stress scientifically._

The 3 main benefits of massage therapy:

- Reduces Stress –Stress causes us to release the hormones of cortisol and adrenaline, our muscles tighten, and our blood pressure rises. Over time, it can cause serious medical issues.
- Reduces Pain – Pain can be caused by many factors, both internally and externally to the body.
- Releases Trauma – Many massages techniques help release painful trauma from injuries and car accidents

Massage oils and their benefits:

Many massage therapists will tell you that the most important tool they use is their massage oil.

The most natural carrier oils are chemical-free, cold-pressed, pure oils. Quality oils are often taken from fruit, plants, and nuts, provide healing and pain relief.

Using good quality, warm oils in the massage not only gives the smooth, gliding motions that are known to promote the deepest state of relaxation, but it is also great for nourishing the skin.

<u>OIL</u>	<u>PURPOSES OF DIFFERENT OILS</u>
Almond	Nourishes dry, itchy skin, anti-inflammatory, light and Contains Vitamins A, B1, B2, B6, and E
Apricot	All-purpose oil for all skin types. Absorbs into skin slowly. Great alternative to nut oils and is high in Vitamins A and E.
Arnica	This is olive oil with arnica extract. Anti-inflammatory, nice scent, great for pain, stiffness, bruises and sore muscles
Coconut	Heavy, thick oil often used on rough and dry skin. Usually has to be warmed before using, unless mixed with other high-quality massage oils
Emu	Great for sensitive skin, anti-inflammatory, anti-aging, speeds healing, great for clients who have eczema, burns, abrasions, and chronic skin conditions such as Psoriasis
Grapeseed	All natural and light with a smooth glide. Absorbs into skin easily and contains many vitamins and minerals.
Jojoba	Cold-press, pure and smooth with a silky glide. Rich in Vitamin E and resembles the body's own natural oil
Olive	Cold-press, pure with a silky glide. Warms easily and is great for soreness and stiffness
Sesame	Most often 100% pure and made of high-quality sesame seed. Rich in vitamins and minerals. Good for psoriasis, eczema, arthritis and as a skin softener

Different equipment and oils used for massage therapy

		<u>EQUIPMENT</u>	<u>FUNCTION</u>
1.		MASSAGE BED	Portable or stationary beds are used for massages.
2.		HOT STONES	Smooth, heated and flat stones placed on the major points of the body to draw out muscular aches and pains.
3.		STONE HEATER	Stone Heater that is filled with water, which is heated to 50-53 degrees Celsius. .
4.		MASSAGE OIL'S	Oils made from various parts of plants with specific purposes. They are applied to the skin during a massage for specific body conditions, friction, releasing tension, unclogging body energies, soothing and moisturizing skin.

Different massage techniques to be used when massaging the shoulders and back area:

Extreme knead
(knead down)

Kneads and relieves muscles deeply from the top to the bottom.

Rubbing

Massages just like gentle rubbing with palms.

Shiatsu

Relieves stiffness concentrated at one place.

Stretch

Massages just like stretching by pushing up from the bottom.

Wavelet

Fine movements of knead and tapping alleviate fatigue.

Knead up

Kneads and relieves muscles from bottom to top.

Neck and Shoulder massage

Lesson 1:

Date: _____

Question

Explain the following massage oils purposes.

1.1 Grapeseed oil

1.2 Almond oil

1.3 Arnica oil

1.4 Sesame oil

Question

Name the 3 main benefits of massage therapy in your learner books.

- ---

- ---

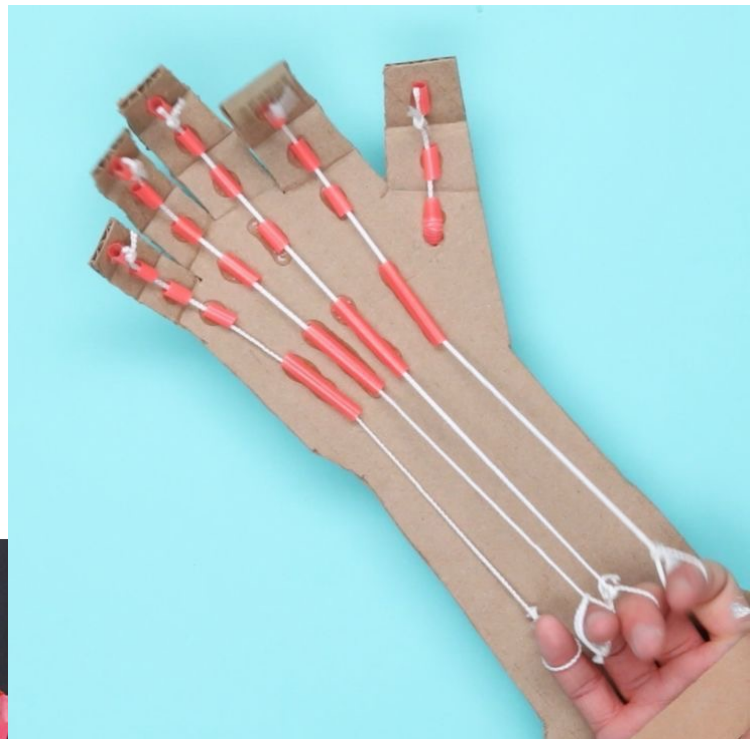

-

You need to make your own human hand out of cardboard and string to represent how your muscles work in your hand.

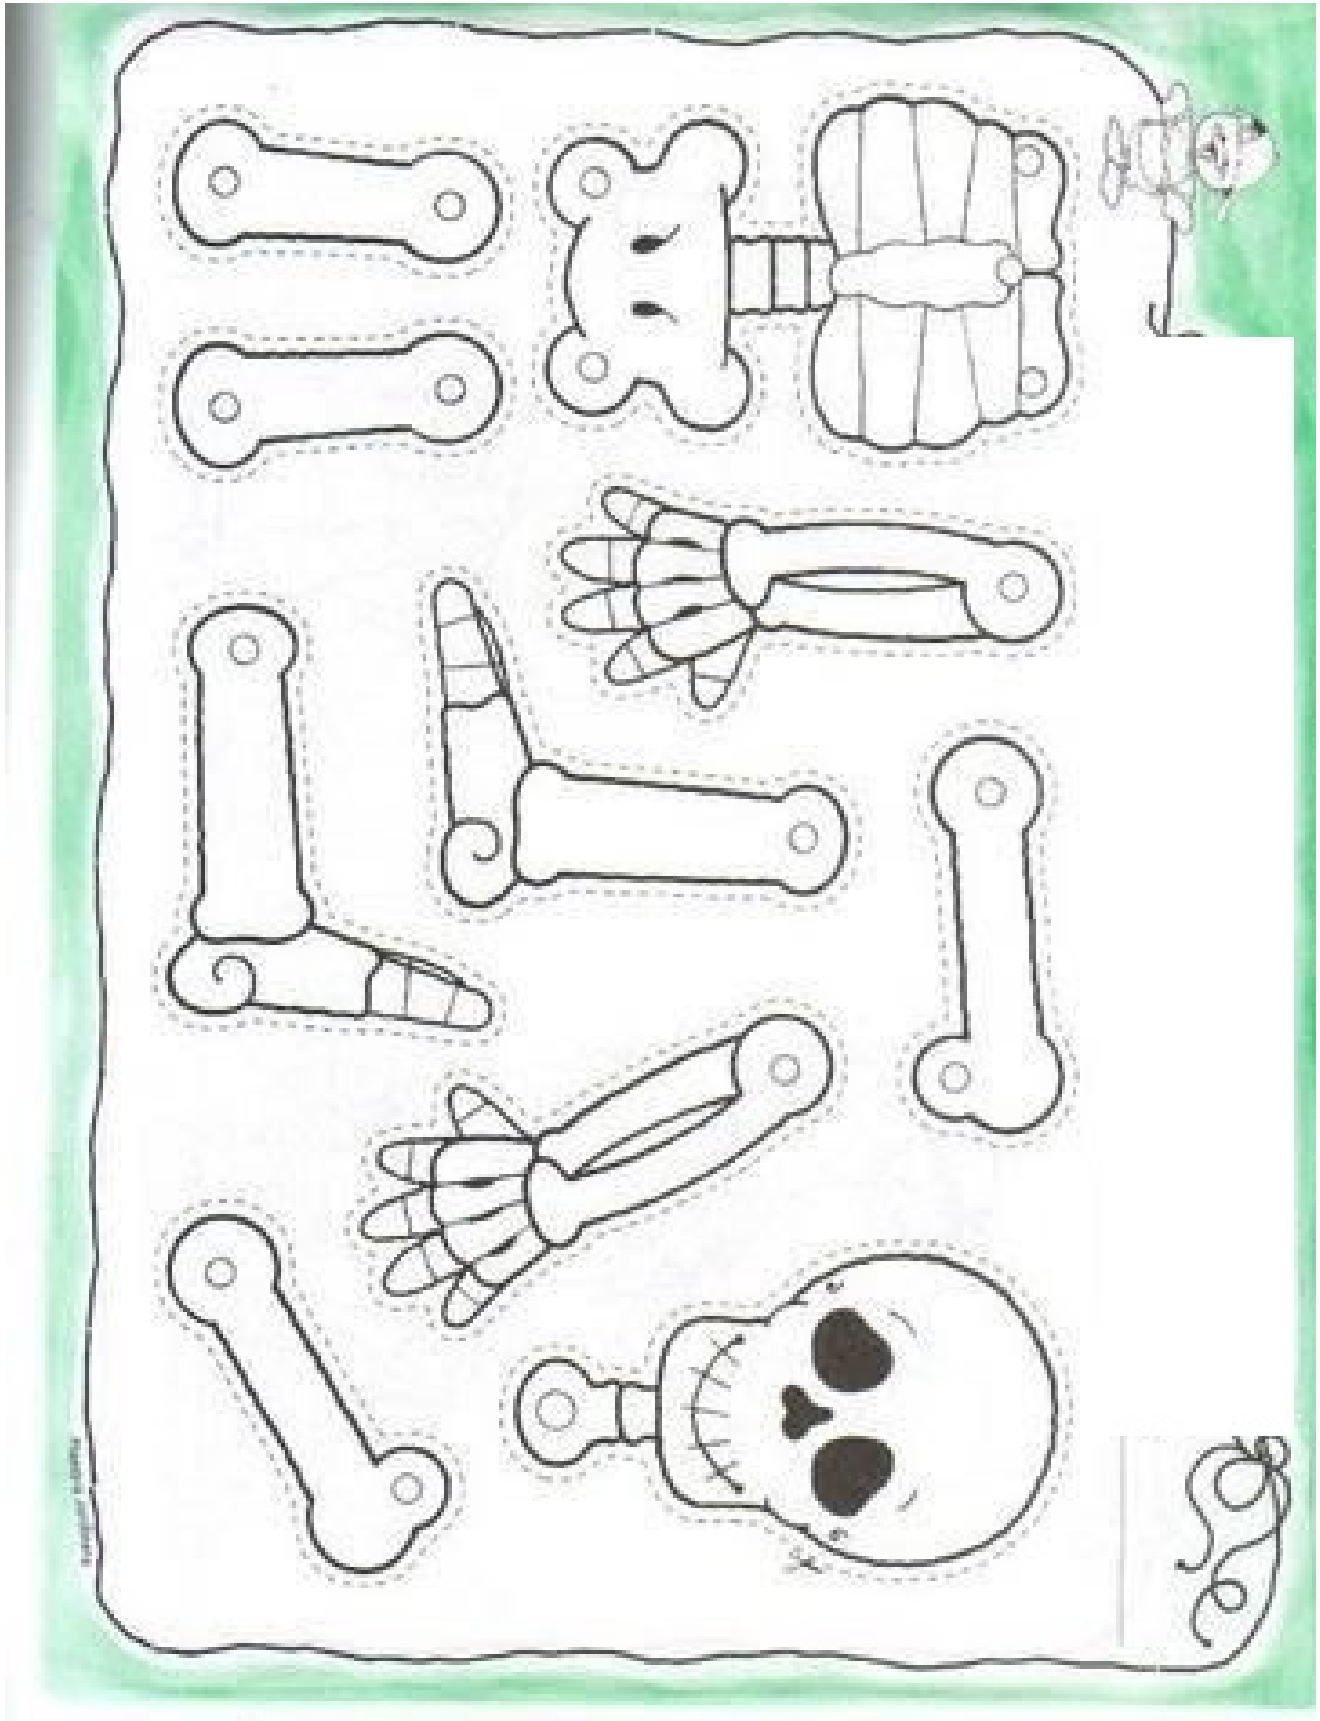

Marks will be awarded for	Originality	4
	Working muscles	4
	Use of colour	4
	Neatness	4
	Creativity	<u>4</u>
	Total:	20 marks

Muscular System Hand Craft for Kids Supplies

- Card stock paper or cardboard
- String or yarn
- Straws
- Tape
- Scissors
- Pencil

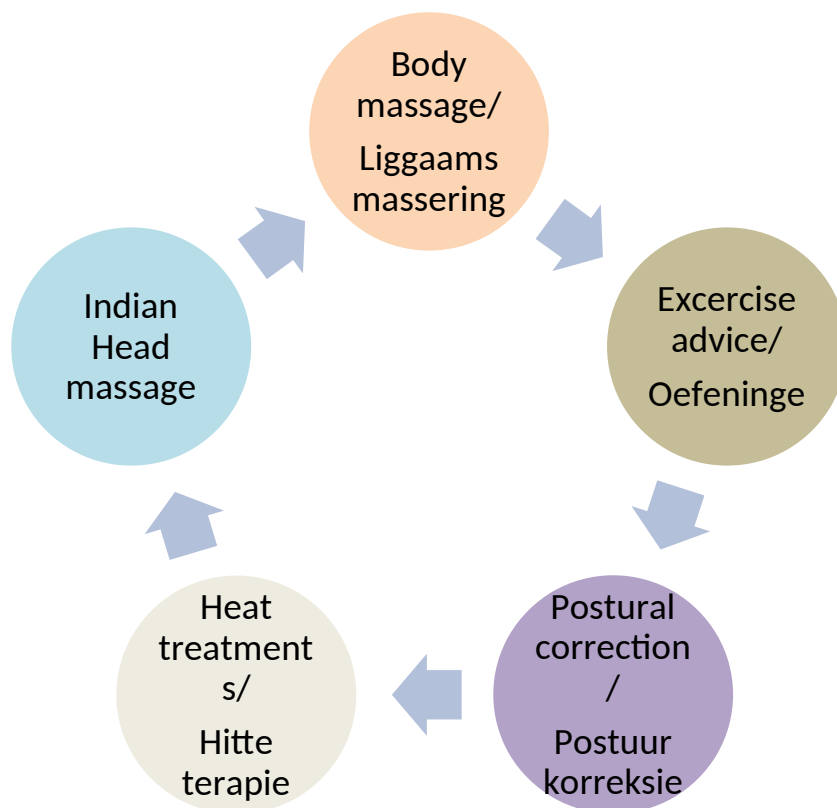

Colour your own skeleton, cut out the different pieces and build your own skeleton that represents your different body parts.

BODY ASSESSMENT

CLIENT CONSULTATION FOR BODY TREATMENTS

- ⦿ Having a good figure provides confidence in men and woman
- ⦿ A fit and healthy body combats stresses and strains of everyday life
- ⦿ Relaxation forms
 - heat therapy
 - _ body massage
 - _ exercise
- ⦿ When your body is not and healthy it will become ill, fatigue have premature aging and poor skin and hair conditions
- ⦿ Beauty therapists can offer the following

The main reasons that clients attend body treatments are:

Relaxation

- ✓ Treating specific areas to lose weight or tone muscles
- ✓ Figure correction after massive weight loss or giving birth/
- ✓ To lose weight

If it is a clients first time at a salon, make her feel at ease as they might be embarrassed about their weight problem

CONSULTATION IS THE VERY 1ST STEP IN PLANNING A BODY TREATMENT

RECORD CARDS

A detailed record card must be completed for

NB information :

Medical history
Lifestyle
Figure faults

LESSON 4:

DATE: _____

A. Complete the sentences below and fill in the missing words.

1. When your body is not _____ it will become ill, fatigue have premature _____ and _____ skin and hair conditions.
2. Having a good figure provides _____ in men and woman/

B. Name four reasons why clients attend body treatments

1. _____
2. _____
3. _____
4. _____

C. Name the three most important information needed on a client card

1. _____
2. _____
3. _____

Figure Analysis

Reasons why we need to analyse the body and posture/

- ④ To ensure that the treatment recommended will be the most effective/
- ④ To ensure the treatment will not cause any body harm or discomfort
- ④ To recognise problems that can't be treated by therapists but only by a doctor

The figure assessment is a VISUAL OBSERVATION

- ④ The client needs to remove their clothing as far as their underwear
- ④ The analysis need to be done in front of a mirror so the clients can look at their own body while the therapist explains the treatment/

Correct posture

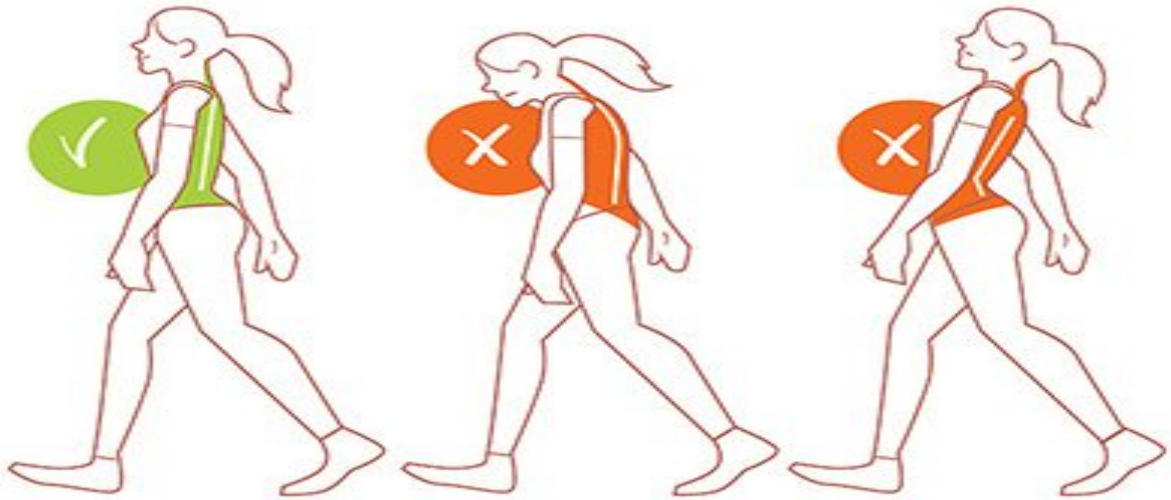

Good posture depends a great deal on muscle tone

A client with good posture will stand tall and straight without strain

A good posture:

- ④ The head and shoulders should be level

- ⦿ The spine should be in a straight line down the back and not curved in any direction
- ⦿ The abdomen should be flat
- ⦿ The arms should be in a relaxed position at the side of the body hanging evenly/
- ⦿ The legs and knees should be straight with the feet together facing forward

Breathing may be full and deep

- ⦿ The digestive organs function more efficiently if they are not compressed/
- ⦿ An even distribution of body weight ensures that the body does not become tired with some muscles working overtime

LESSON 5:

DATE: _____

State whether the following is **TRUE OR FALSE**

1. The figure assessment is a visual observation

2. The client needs to keep their clothes on

3. The analysis need to be done in front of everyone

4. The therapist needs to explain the treatment to the client

Name 5 reasons for a good posture

1. _____

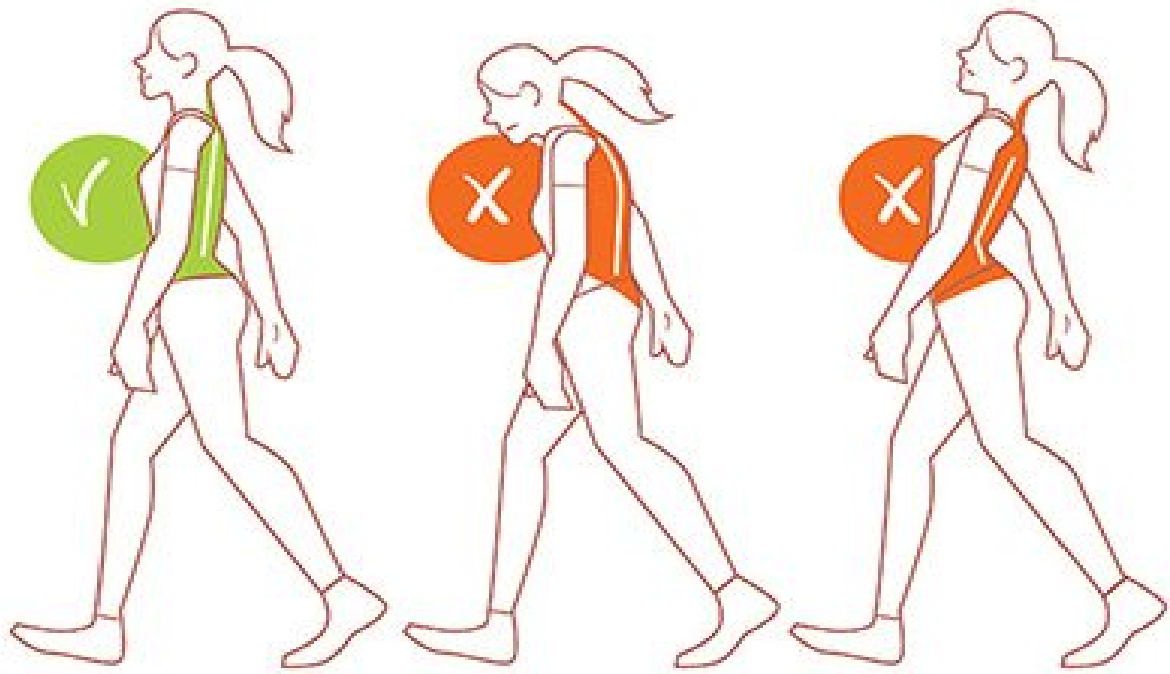

2. _____

3. _____

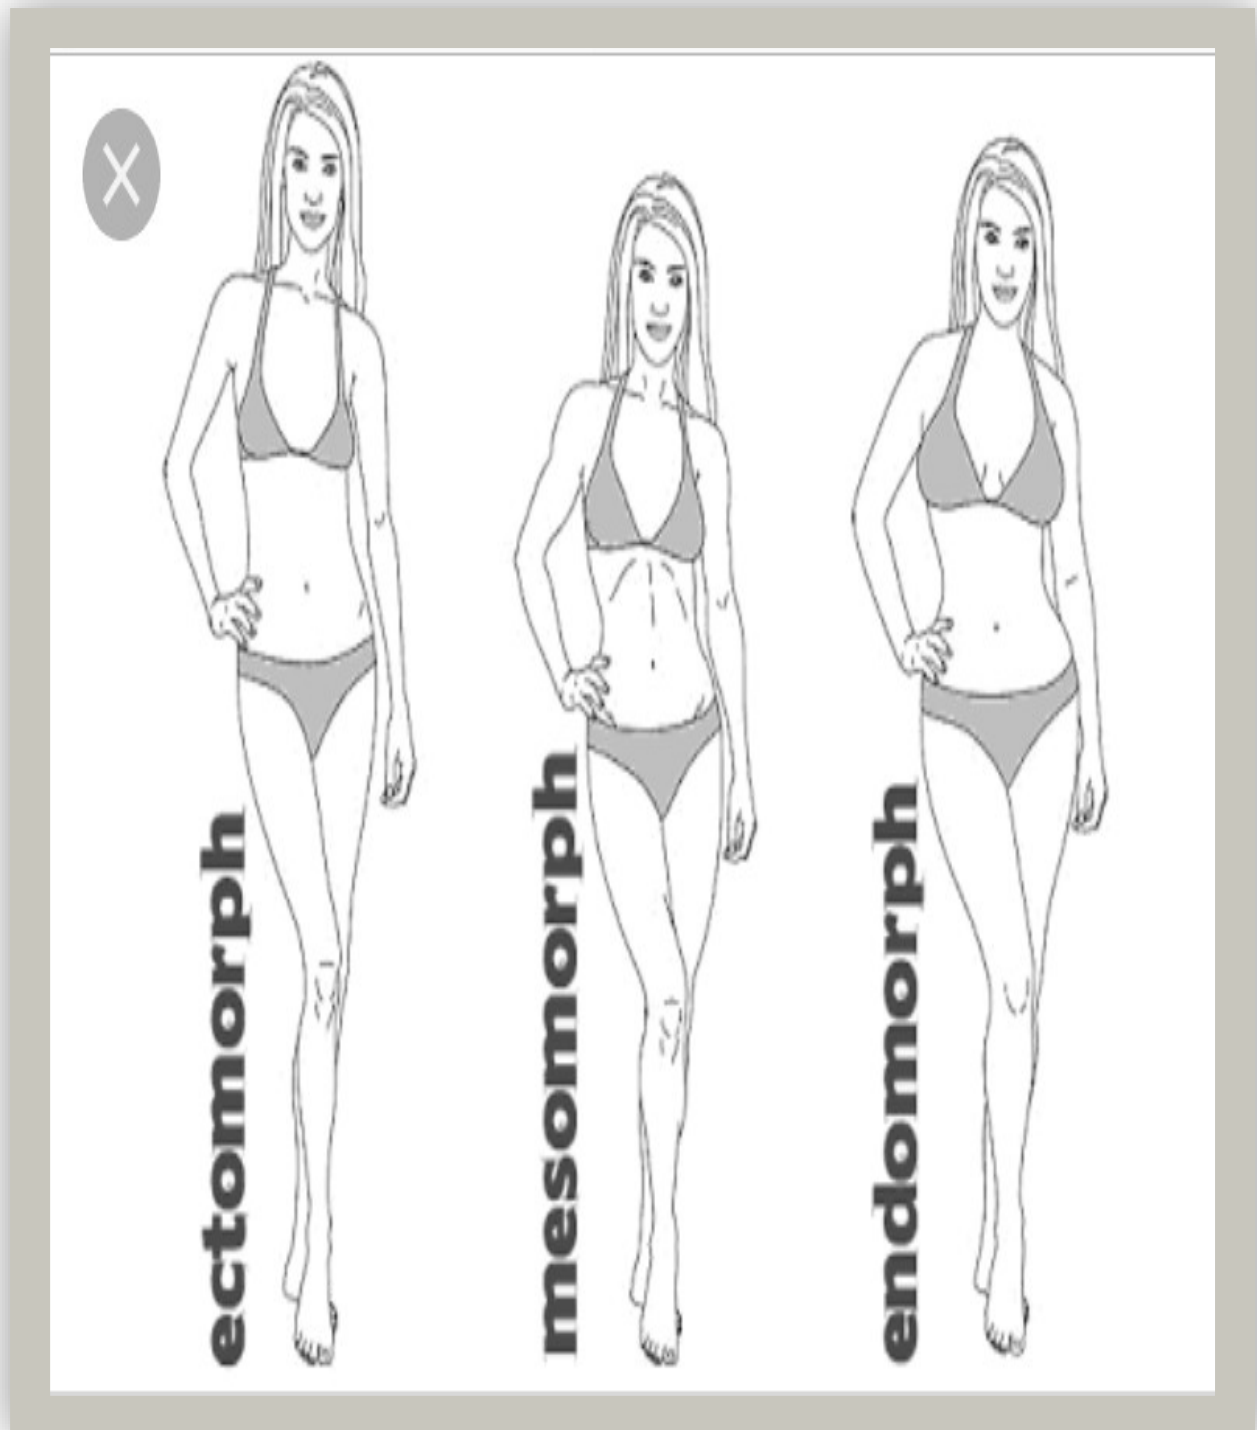

4. _____

5. _____

Indicate if the following postures are correct or incorrect

Body types

ECTOMORPH:

- ⦿ This body type is lean and angular with long limbs
- ⦿ Very little body fat and a lack of muscle bulk/\

MESOMORPH:

- ⦿ Strong with an even distribution of weight
- ⦿ Broad shoulders and well-toned muscles
- ⦿ Body type of an athlete who normally has no weight problem while being active

ENDOMORPH:

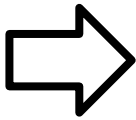

- ⦿ Round in shape with more fat than muscles
- ⦿ They tend to put on weight easily around the hips, stomach, thighs and shoulders
- ⦿ The limbs and neck are short and hands and feet are small

DATE: _____

Nail Art

What is nail art?

- Nail art is a creative way to paint, decorate, enhance and embellish the nails.
- It's a type of art work that can be done on fingernails or toenails. You usually will do this after a manicure or pedicure.

Just to refresh your memory.....

- A manicure or pedicures are beauty treatments that soften the skin around the nails, removes the cuticles; and trim, shape and polish the nails.

PREPARING FOR NAIL ART

Nail art involves **DETAILED WORK** so it is important that both you and your client are **COMFORTABLE** and have good lighting to work in.

A purpose-built nail station or nail desk is ideal as it is designed and shaped especially to avoid stretching during the treatment.

✎ Products and equipment can be stored cleanly and safely, and a magnifying lamp can be adjusted as a requirement for close-up work.

- ☑ A seat with adjustable height and backrest for both you and your client ensures you are seated correctly in relation to one another with appropriate support for your backs. This way there will be no excuse for bad posture and aching backs during a treatment.

- ☒ The following checklist will ensure comfort both for you and your client.
- ☒ Sit close enough to your client to avoid stretching and straining arms during the manicure.
- ☒ Sit upright with back straight and shoulders relaxed.
- ☒ Seating should be firm and at a correct height.
- ☒ Sit with your legs together and not crossed
- ☒ Make sure you work in good light
- ☒ Make sure that you work in a well ventilated room (enough air coming in)

LESSON 6:

DATE: _____

1. What is a manicure and what does it do to your hands?

2. What is nail art?

NAIL BRUSHES AND TOOLS

Dotting/marbling tool

Ideal for creating flowers and other designs requiring either one or a cluster of dots.

Tool should be cleaned with warm soapy water and wiped with disinfectant after use.

Fan brush

A fan brush has a very wide set of bristles. Ideal for sweeping colour across the nail with a single movement.

Fine detail brush

A small, very fine, pointed brush used for precise detailed work.

Flexi brush

This is a striping brush in its own bottle of paint. Used for creating lines, wisps and strokes.

Glitter brush

Ideally a stable brush to apply the mixture of glitter and its adhesive. The brush is cleaned with nail polish remover

Orange stick The taped end of an orange stick is useful for picking up stickers and secures other small items after attaching it to the nail.	
Striping brush (long) A broad brush with a long, fine bristles used for creating stripes and straight lines on the nail	
Striping brush (medium) Used for producing thick lines and colour on the nails.	

NAIL PRODUCTS AND MATERIALS

Base coat

A good ridge-filling basecoat is essential to provide a smooth nail surface to work on.

Top coats

A good top coat with a soft brush is essential for nail art. Ensure the top-coat is floated over the nail not dragged so that your work stays in place.

Top Coat No Smudge

Flat stones

Flat stones are ideal for encasing on the nail between layers of clear acrylic or pushed gently on wet nail polish.

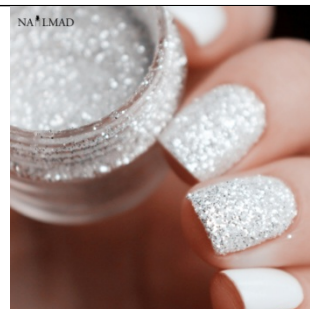

Foils

They come in various colours and patterns and have a striking, metallic finish. They are attached to the nail with foil adhesive.

Glitters

Very fine glitter dust can be applied by mixing with a special glitter mixer or top coat. The glitter can be mixed before application and then painted over the nail or alternatively, the brush can be dipped in the mixture. Glitter gives a lovely extra sparkle to the nail art

designs.	
----------	--

Nail paints The nail paints used in nail art are usually non-toxic, water based acrylics. They come in a wide range of colour and are used with different types of brushes to create abstract patterns, lines and scenic designs.	
Nail polish Nail polishes can be used as the base colour for most designs. Matt nail polishes can be used for striping.	
Rhine stones These are flat backed crystals, which sit on the nail, they come in different shapes and sizes and give a lovely sparkle to the nail.	
Striping tape Striping tape has adhesive on one side; colours are applied with light pressure over the chosen nail polish and then snipped just short of the nail edge of the nail. It needs to be sealed to prevent lifting of the edges.	

1. Complete the cross word puzzle.

H	S	E	P	I	R	T	S	D
S	C	R	A	P	E	R	N	Z
U	K	L	O	P	M	A	T	S

FREEHAND
HAND
PLATES
SCISSORS
SCRAPER
STAMP
STICKERS
STRIPES

2. Identify the nail art tools, products and brushes.

		
1.	2.	3.
		
4.	5.	6.

3. What should you check for to ensure comfort both for you and your client

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

GEM PRACTICAL APPLICATION

Rhinestones (gems) are picked up with a dampened tip of the orange stick and then placed onto wet polish or top coat which secures the stones as it dries.

For gem application you will need:

1. Basecoat
2. Coloured nail polish
3. Small container of water
4. Rhinestones (gems)
5. Orange stick
6. Top coat

Application:

1. Ensure that the nails and surrounding skin are in good condition.
2. Apply basecoat
3. Apply two coats of coloured polish
4. Dampen the tip of the orange stick and use it to pick up the rhinestone.
5. Place the stone in position over the wet nail polish, flat side down.
6. Repeat until the final effect is achieved.
7. Apply two coats of top-coat to seal.

Date: _____

STRIPPING TAPE PRACTICAL APPLICATION

The self-adhesive strip tape is applied to the nail with light pressure then CUT with scissors

You will need:

1. Basecoat
2. Coloured nail polish
3. Stripping tape
4. Small scissors
5. Top coat

Application:

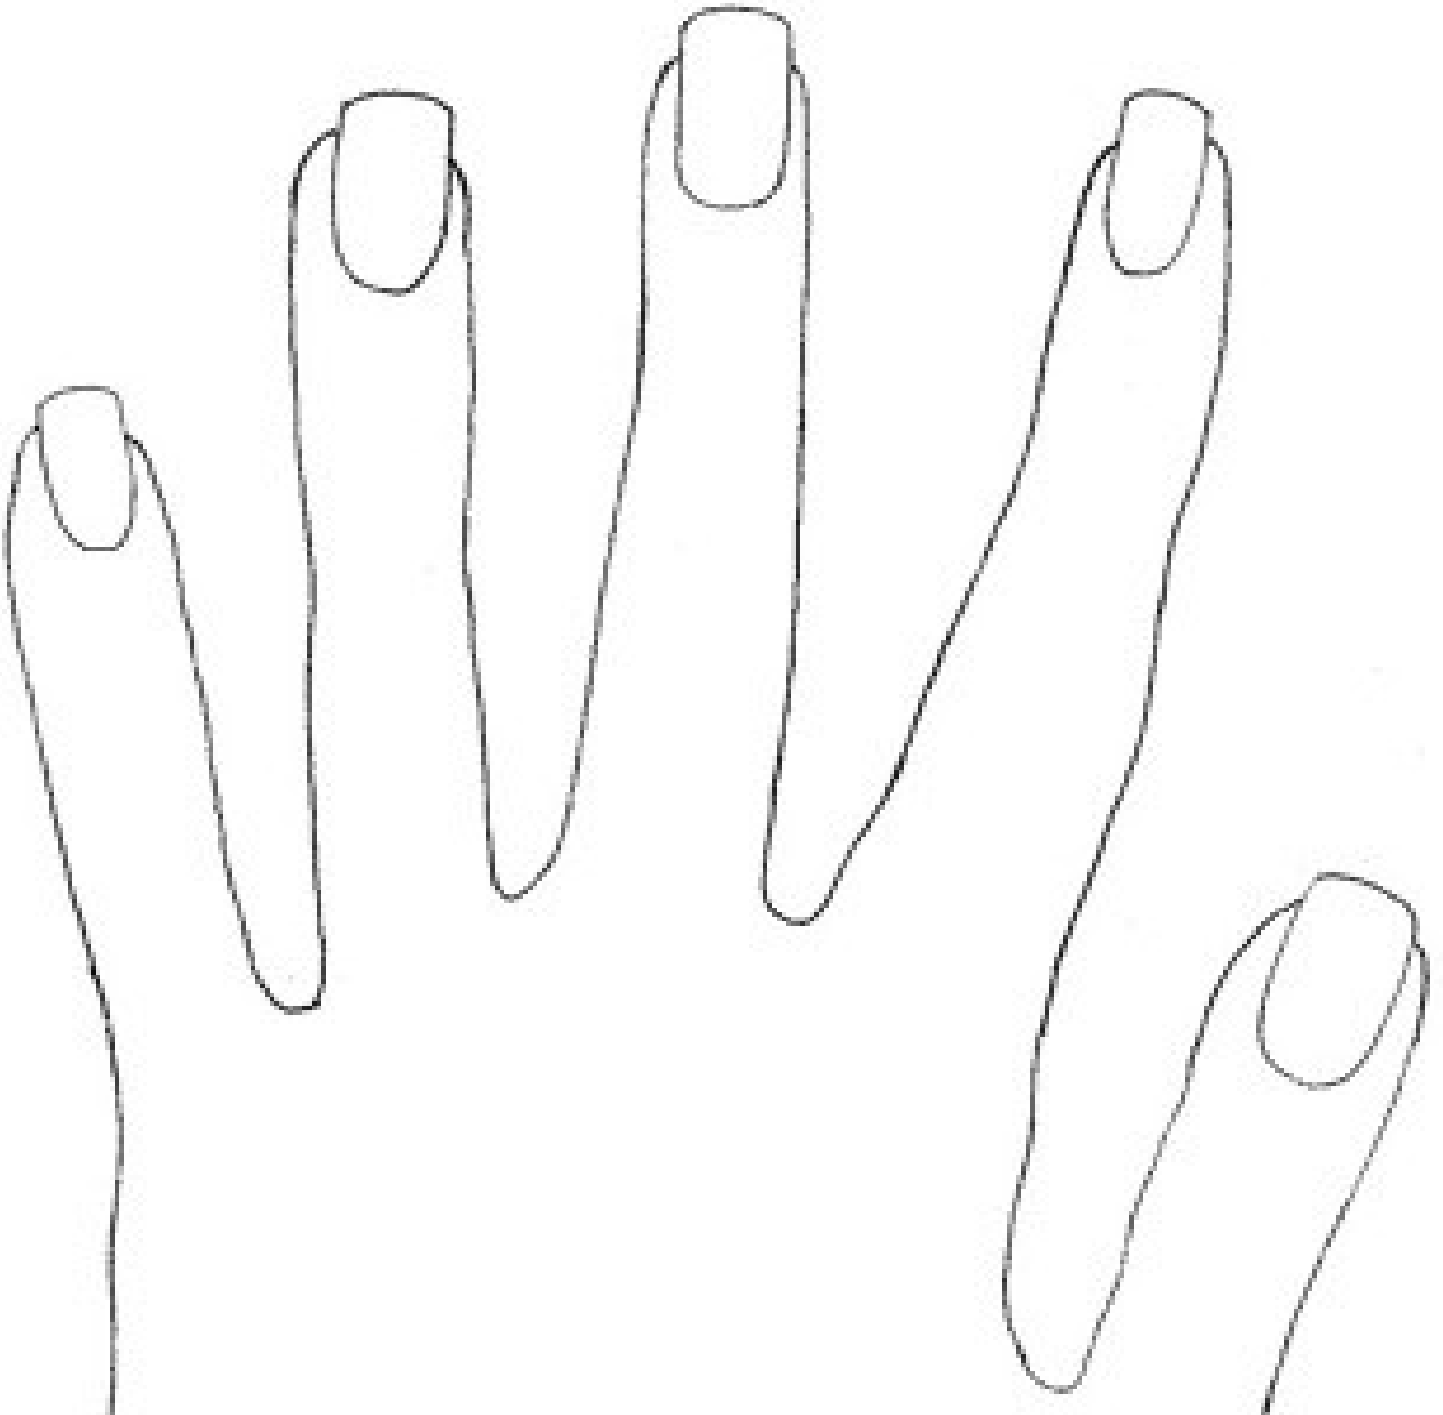

1. Ensure nails and surrounding skin are in good condition
2. Apply basecoat
3. Apply two coats of coloured nail polish, ensuring good, even coverage of the nails
4. When the polish is completely dried, cut off a length of stripping take slightly longer than the required length and position on the nail, with the sticky side down.
5. Trim the tape just short of the free edge before securing it to the nail
6. Apply two coats of top coat to seal.

LESSON 8:

DATE: _____

Design gemstone and striping nail art on the fingernails.

Date: _____

Demonstrate how to clean and sanitise hands prior to service being performed.

- It's very important to always make sure your hands are clean.
- You must always wash your hands before you start with your treatments and afterwards.
- Your client must also wash their hands before you start with their treatment.

HANDWASHING

Is the best way to prevent the spread of infection.

You're at work – You're busy.

Your hands look clean – But, They're not

Your hands have germs on them that could make someone sick.

You could get sick – Your family could get sick – Your clients could get sick.

If you work with different people and touches them, you must wash your hands often!!

HAND HYGIENE

- First wet your hands and apply liquid soap
- Rub your hands together and scrub all surfaces (palms, fingers & in between)
- Continue for 10-15 sec – scrubbing together with the soap removes germs
- Rinse well and dry your hands

IT'S VERY IMPORTANT TO HAVE CLEAN HANDS AT ALL TIMES!!
