

Safety Rules When Using Of Climbing a Ladder / Scaffolding

1. Always avoid bringing a ladder/scaffolding into contact with electricity.
2. Place a ladder/ scaffolding so that its feet are a quarter of its length away the object it is resting against.
3. The ladder/ scaffolding should be secured at the top.
4. Wherever possible, ladders/ scaffolding should be extended 1m above the support.
5. The ladder/ scaffolding should be inspected regularly and repaired when necessary.
6. As paint conceals, use vanish on wooden ladders or two coats of oil to preserve them.

7. Keep ladder/scaffolding clean because dirt hides defects while greases cause people to slip.
8. Do not leave ladder/ scaffolding lying on wet surfaces or exposed to the weather.
9. Do not use ladder/ scaffolding horizontal as runaways.
10. Tools and equipments should be hauled up by ropes not by ladder/ scaffolding.
11. Never leave a ladder/ scaffolding where it may fail.
12. Never place a ladder/ scaffolding in front of the door without taking adequate precautions.
13. Ladder/ scaffolding should be equipped with safety feet.
14. Use both hands when climbing up and down a ladder/ scaffolding.
15. Only one person at the time should use a ladder.
16. Store ladder/ scaffolding in a cool surface.
