(School Of Specialization)

Maintenance Year 1 Learning Content

Overview of Maintenance

- Maintenance management is vital in ensuring the long term success of your maintenance program by monitoring quality assurance, maintaining operational efficiency and keeping assets in optimum running order.
- Properly maintained assets and resources keep your production stable and greatly minimize the chances for unplanned downtime.

At the end of the term learners should be able to:

1. Apply safety rules in the workshop.
2. Name or identify marking and cutting hand tools.
3. To know the uses of making and cutting hand tools.
4. Maintain hand and power tools or machines.
5. To know different types and sizes of sandpapers.
6. To different types of hinges.
7. To know different types of locks.
8. To make a Jewelry Box.

Maintenance Year 4

Content
