

Basic Marking And Cutting Tools

1. Ruler

- It is used for measuring lengths.

3. Try Square

- It is used to check right angles.

5. Marking Gauge

- It is used marking parallel lines.

2. Measuring Tape

- It is used to measure length to complete work.

4. Bevel Square

- It is used to transfer and duplicate angles.

6. Tenon Saw

- It is used for short accurate cuts.

7. Divider

- It is used for drawing circles, arcs , radii etc.

9. Coping Saw

- It is used to cutting curved surfaces.

11. Hammers

- It is used for general carpentry, nail pulling etc.

8. Files

- It is used to remove fine amounts of materials.

10. Bevel Edge Chisels

- It is used for fine finishing wood.

12. Marking Pencil

- It is used for drawing lines.

Question: 1

1. Name two types of Sandpapers.

1.1 _____

1.2 _____

2. What is the use of a Sandpaper.

2.1 _____

3. Identify the following sizes of Sandpapers.

3.1 (40 -60) : _____

3.2 (80 - 120) : _____

3.3 (150 - 180) : _____

3.4 (220 - 240) : _____

3.5 (320 and above) : _____

Sandpaper To Shape And Finish A Piece Of Timber

Step 1 : To sand wood, scribe a line using a pencil across the surface.

Step 2 : Take 60 or 80-grit sandpaper and run in the direction of the wood grain.

Step 3 : Rub until the line disappeared.

Step 4 : Repeat rubbing using a 120 and 180-grit sandpaper.

Step 5 : Remove dust with tack cloth or vacuum.
