Kwa Thema Skills School

Subject : Maintenance

Grade : Year 2

Date : / /

Question : 1

1. Name the following Metalwork Power Tools.

1. _____

3. _____

5. _____

7. _____

Marks : 8

Time : 30 mins

2. _____

4. _____

6. _____

8. _____

Basic Method Of Joining Metals

1. Soldering

- It is a process used for joining metal parts form a mechanical or electrical bond.

3. Riveting

- It is a process used to join parts together by way of a metal part called a Rivet.

5. Screws

- Are fasteners

Feedback : Activity

2. Arc Welding

- It is a process of using concentrated heat by an electric arc to weld metals together.

3. Gas welding

- It is a process of joining two metal items together by melting and cooling parts both.

3.

Question : 1

1. Identify the following methods of joining metals.

1. _____

3. _____

5. _____

Marks : 5

Time : 10 mins

2. _____

4. _____

Mark And Cut a Small Piece of Metal Sheet

Drill And Rivet

Step 1 : Mark the Sheetmetal.

Step 2 : Cut the desired layout on the Sheetmetal.

Step 3 : Drill the holes.

Step 4 : Use a file to remove shavings.

Step 5 : Use Blind Rivet to join components of project.

Feedback : Practical Activity

Soldering

Step 1 : Pre-cleaning

Step 2 : Fitting

Step 3 : Heating the parts

Step 4 : Apply the Solder

Step 5 : Cooling the soldered joint

Step 6 : Post-cleaning
