SECTION 4: ASSESSMENT	66

SECTION 1:

INTRODUCTION:

1. Requirements for Wholesale and Retail as a subject

1.1. Time Allocation

The total number of hours allocated for the subject in a five-day cycle is 13½ hours. Sufficient time must be allocated in the school timetable for the practical work required to be done.

1.2. Resources

1.2.1. Human resources

Wholesale and Retail requires a trained subject specialist. It is preferred that the teacher offering Wholesale and Retail has attended training in this subject. Industry related experience would be an asset. Teachers must build a relationship with managers of both small and large Wholesale and Retail outlets in the area and regularly visit them to keep abreast with the industry

If possible teachers should ask to shadow workers on the floor and in the receiving and cash office areas to get a better understanding of what happens at this level of operation.

Wholesale and Retail teachers are required to:

- Teach the subject content with confidence and flair
- Interact with learners in a relaxed but firm manner
- Manage the SIM (Simulated shop) store fixtures and fittings and stock and conduct stock taking and inventory (where applicable)
- Manage the budget
- Manage the teaching environment
- Plan for practical work
- Plan for theory lessons
- Arrange for learners to visit outlets within the area. This might be able to be done through learners doing this on the own if outlets are within the area and able to be

accessed through public transport otherwise the school should provide transport and arrange outings

- Maintain and prepare the Sim store for all the practical exercises (where applicable)
- Ensure learner safety
- Carry out School Based Assessment (SBA)
- Implement innovative methods to keep the subject interesting
- Be self-motivated to keep her/himself abreast of the latest developments in the industry
- Regularly visit wholesalers and retailers and discuss with management any new innovation within the industry
- Provide students with letters stating they are wholesale and retail students so when they visit outlets to observe and talk to management they will be accepted more readily.
- Where possible and where allowed (taking into account the security requirements of businesses) learners should be encouraged to visit outlets and watch the staff at work to better understand the theory they learn in the classroom.
- In schools that have no, or limited access to computers and the internet, teachers should visit outlets and take photographs that can be used to illustrate concepts.

1.2.2. Learner Resources:

- Text/ resource book
- The internet (where available)
- Pen/pencils
- Wholesalers/retailers in the area
- Magazines.
- Newspapers
- Internet pictures or photographs taken by the teacher
- Calculators

2. Infrastructure, equipment and finances

Schools must ensure that teachers have the necessary infra-structure, equipment and financial resources for quality teaching and learning.

2.1. Infrastructure

- Any school wishing to offer Wholesale and Retail as a subject should try to set up a room to look and operate as a retail store. The requirements of this SIM room, as it is referred to in this document, are as follows;
- The school should try partner with retailers in the area and that will help then get second hand equipment, suppliers promotional stands and ticketing and “stock”
- Schools should ask their local retailers to get empty boxes, cans, bags etc of stock from their suppliers for the shop
- A back area separated from the “shop” that can be used as a stockroom must be made available
- There must be sufficient “stock” to fill the shelves. It is advisable that this stock be empty bottles, boxes, cans, bags etc collected by students and staff. Real stock is prone to theft.
- The “stock” should cover a number of different departments/categories such as (examples only)
 - Tea/coffee/sugar containers
 - Pet food containers
 - Cool drink bottles/cans
 - Men’s toiletries
 - Ladies toiletries
 - Baby products
 - Health foods/medicinal containers
- Empty bags/bottles can be made more realistic by filling them. Examples are
 - Dog food bags with newspaper
 - Ground coffee bags with soil
 - Cool drink bottles with coloured water
- The SIM room needs to be managed and prepared prior to learners doing their practical exercises such as stock counting, shelf filling, tidying etc.

- Electricity supply to the SIM room is crucial, for the operation of the PoS.

2.2. Maintaining the Sim room

- The room must be kept locked at all times when not being used.
- Only limited numbers of people should be allowed access to the keys to the sim room.
- Lecturers or someone tasked with being in charge of the room should be the only ones to have access to the sim room key.
- Students should be used to clean, tidy and sweep the room as part of their training and it should not be necessary for cleaning staff to access the room.
- A regular stocktake of equipment is very important as the tills are computers and prone to theft.
- Only Lecturers or the person tasked with being in charge of the sim room should be given access to the code/password of the Admin level that allows for changes to settings on the PoS

2.3. SIM room equipment

The following is the minimum requirement for a retail SIM store.

Equipment	Requirements
Point of Sale Equipment (Tills) Linked to a computer Back Office System	Scanning Point of Sale hardware
	Minimum of 2 per SIM room, preferably 3 (this is dependent on the numbers of learners)
	The system must allow for a minimum of 4 levels of authority Admin, Supervisor, Office Clerk, Cashier (That can be set under Admin level)
	The system must allow for different tasks to be allocated to these different levels of authority. (That can be set under Admin level)
	The system must allow for each Cashier to cash up – preferably a blind cash up but this is not a must have (This function can be set under Supervisor

	level)
	Show Cashier's overs & shorts after cashing up. (This can be set under Office Clerk level)
	The system must allow the set-up of a float amount (This can be set under Admin level)
	The system must allow the banking to be completed and banked (This can be set under Office Clerk level)
	The system must allow multiple forms of payment and be programmable to visually show the type of payment methods. It must include; ○ Cash ○ Credit card ○ Debit card ○ Coupons ○ Vouchers
	The above tender types must be designed, printed and available for use when the learners use the PoS
	Plastic discs that can be used as coins at the PoS
	The system must allow new products to be added to the system both with and without bar-codes (This can be set under Supervisor level)
Shelf edge label printer	A shelf edge label printer linked to a system that allows labels to be printed from bar code or product code
	Shelf edge label strips on all shelves
Store fixtures and fittings	Supermarket shelving with backboards
	Supplier promotional stands
	Pegboard and pegs
	Clothing rails

Stockroom area	Some shelving which is required to store small and single excess stocks
	Floor space is required to demonstrate building of stacks in the stockroom
	Empty cartons in quantity which should be filled with newspaper and sealed to allow the building of stacks
	Stock
Stock	Preferably empty boxes, bags and cans
	As wide a range of categories as possible
	Carrier bags

NOTE: If the school cannot arrange for computerised tills (PoS) then manual tills or even cash boxes can be used. As long as the learners can process sales and "handle cash and give change"

2.4. Other equipment

- Where possible, learners should have access to a computer that will allow for the design and printing of promotional tickets. (A program such as Word)
- Where this is not available learners can use paper and colored pens

2.5. Consumables

- Printer paper for the printing of promotional tickets
- Shelf edge label paper
- Cash up stationary
- Change requisition slips (These can be requested from many of the banks)
- Cashing up stationary (Designed by the teacher – Example provided)
- Poster paper/board
- Receiving and dispatch stationary (Designed by the teacher - Example provided)
- Banking stationary (Designed by the teacher and from banks)

2.6. Teacher Resources:

- Text book
- Carrier bags/Pictures of logos
- YouTube videos on the Supply Chain (where there is access to the internet)
- PowerPoint presentation to be prepared by the teacher (where there is access to computers)
- YouTube Videos on customer service (where there is access to the internet)
- YouTube videos of Inventory counting (where there is access to the internet)
- Actual products with examples of date coding/sell/use by dates
- Examples of merchandising techniques downloaded off the internet or photographs taken by the teacher
- Products with prices/product codes
- Examples of pricing/codes off the internet or photographs taken by the teacher
- Examples of tickets and promotional tickets/posters from retailers in the area
- Businesses in the area
- Pictures of technology used to receive stock taken off the internet. (where there is access to the internet)
- Pictures of money counting equipment taken off the internet. (where there is access to the internet)
- Explanation by SA Police Services regarding the legal procedures for stopping and searching a shoplifter (Policeman visit the class and discuss)
- YouTube video on visual merchandising. (where there is access to the internet)

2.8. Finances:

Budget and inventory

A budget must be allocated for the subject. The amount will be determined by the number of learners taking the subject across all the years and the nature of the practical work required as

stipulated in the curriculum. The budget needs to be revised annually and must consider all resources needed per year. The funding must make provision for maintenance of equipment and the replacement over the years.

Resourcing could be sub divided into the following categories:

- Hardware and Equipment
- Consumable Materials
- Practical Assessment Task Resources (PAT)
- Teaching and Learning Support Material
- Learner excursions (Petrol)
- Text books, Workbooks and Teachers Guide

3. Field Exercises and Report back.

Retail is a very visual industry and as such learners will be required to visit outlets within the area to identify examples of topics learned through the week.

This might be able to be done through learners doing this on the own if outlets are within the area and learners are able to visit them using public transport.

If this is not an option, the school should provide transport and arrange outings

After field work learners are to make a presentation to the class on their finding.

A minimum of one lesson at the end of each week or the start of the next week must be devoted to the presentations where presentations are required

SECTION 2:

SPECIFIC GUIDE BY WEEK

TERM 1. WEEKS 1 - 3**TOPIC. The Wholesale and Retail Industry:**

The supply chains

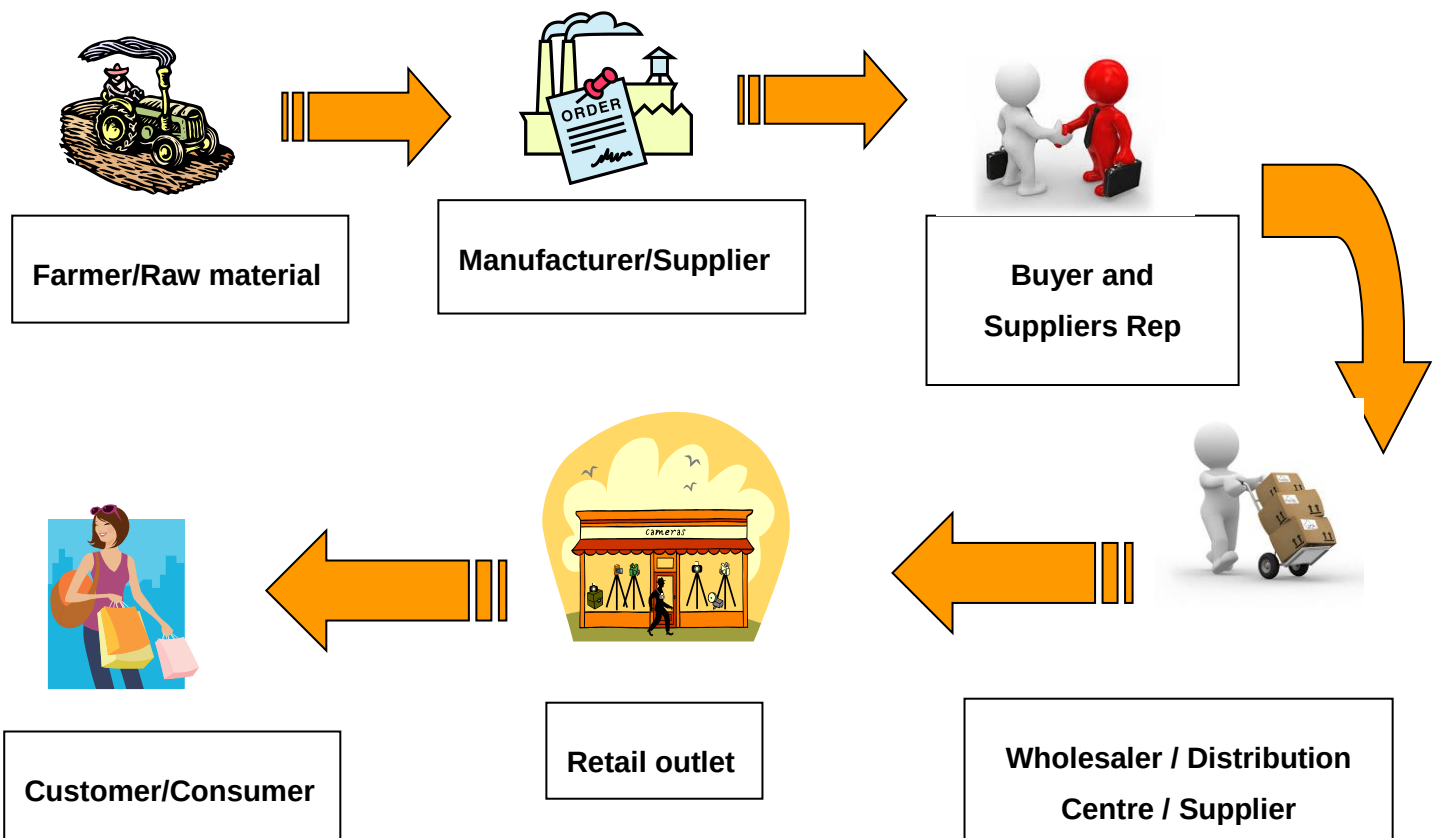

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 1 - 3	The supply chains	The supply chain Role players in the supply chain The role of each role player in the supply chain The cold chain Flow of stock, cash and information through the supply chain The importance of accurate and timely information		Draw a poster illustrating the supply chain and showing the flow of stock, cash and information through the supply chain.		Theoretical explanation Practical task	Text book YouTube videos (where available) Poster board

ANSWERS TO STUDENT ACTIVITIES

Draw a poster illustrating the supply chain and show the flow of stock, cash and information through the supply chain.

Task	Completed correctly	Not correctly completed
Illustrating the supply chain		
Showing the flow of stock		
Showing the flow of cash		
Showing the flow of information		

Learners to indicate that stock moves **down** the supply chain as indicted, that cash moves **up** the chain (in the opposite direction and that information moves in both directions

Comment on the students work in the space provided in the student's workbook

Activity 1: The role of the role players in the supply chain

In your own words explain the role of each of the role players in the supply chain.

THE FARMER/RAW MATERIAL

The farmer has beans and potatoes to sell.

These raw materials (the potatoes and the beans) are then harvested and are packed and sold in many different ways.

They could be sent to a factory to be cooked and canned so we can buy canned vegetables.

Of course the factories that makes the cans, the labels, the bags and all the other packing material also need raw materials to make their products and getting hold of these items would also form part of a supply chain.

MANUFACTURER/SUPPLIER

In our example, the manufacturer would be the factory who cans the beans, it could also be the business that packs the baby potatoes and garlic butter into the convenience packets, it could be the business that sorts and packs the fresh potatoes into the different size packs that potatoes are sold in.

The manufacturer or supplier takes the product and adds value to it, through the packaging, canning or bottling and prepares it in a form that is easier to sell onto the customer.

There could also be more than one “manufacturer” in the supply chain. One manufacturer could have special machines where sheets of plastic and metal are turned into products like cans and bottles and then supplied to the product manufacturer. The product manufacturer would then use these resources and fill them with the beans, potatoes, deodorant, cereal and all the other products sold on the retailer’s shelves.

BUYER and SUPPLIER’S REPRESENTATIVE

The next stage of the supply chain involves two parties who need to negotiate with each other.

- 1) **The Buyers** who work for the retailers and wholesalers
- 2) **The Suppliers’ rep** who is the sales person representing the supplier.

The buyers who work for the retailers and wholesalers are responsible for choosing and buying the products at the best possible price. They negotiate prices and terms with the supplier's rep (sales person).

The success of any wholesaler or retailer depends largely on the ability of the Buyer to buy according to the needs of their customer and at good prices so that the products can be sold for a good profit.

WHOLESALE/DISTRIBUTION CENTRE/SUPPLIER

Once the wholesalers and retailers have agreed terms the next step is to get the product onto their shelves

The products can follow a few possible paths from the manufacturer to the retail outlet.

Some of the bigger retailers can buy enough to make it worthwhile for the supplier to deliver products directly to each individual retail outlets.

In the case of large retail chains, they often have their own Distribution Centres. The supplier delivers large quantities to these **DC's** as they are known and the retailer then splits the goods into smaller packs to send to their individual retail outlets.

DC – this is the term used for a Distribution Centre. A distribution centre looks like a big warehouse where stock is received, split, stored and then distributed to individual outlets. As each of the retail's outlets need more stock, the DC's will pick it, pack it and deliver it to each of the outlets in the group

In some cases, the manufacturer delivers his goods in large quantities to wholesalers.

The wholesaler then sells them on to smaller retailers in smaller quantities.

RETAIL OUTLETS

This is the supply chain member closest to the consumer.

It is the staff in the retail outlet who sells the final products to the end user, the customer.

CUSTOMER/CONSUMER

The customer is the last and most important member of the supply chain.

It is the customer that buys what he/she wants and will only buy if the product is available (in stock) and is at the right price.

TERM 1 WEEK 4 & 5**TOPIC. The Wholesale and Retail Industry:**

The flow of stock and cash

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 4 & 5	The flow of stock and cash through an outlet	The flow of stock through an outlet The role of each role player in this process The flow of cash through an outlet The role of each role player in this process		Poster of the flow of stock Poster of the flow of cash		Theoretical explanation Practical projects	Text book PowerPoint presentation (where available)

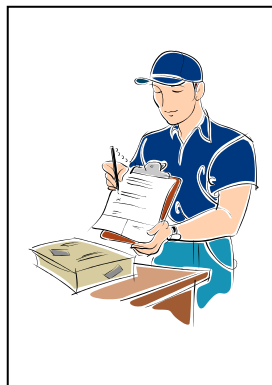

ANSWERS TO STUDENT ACTIVITIES

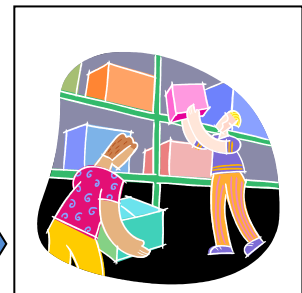

Draw a poster illustrating the flow of stock through a retail outlet and show where each job is involved in the process

The supplier delivers the goods to the outlet

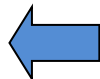

The goods are checked in at the receiving department in the outlet by the **Receiving Clerk**

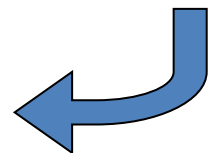

They are packed into the stockroom by the **Stockroom Assistant** (or taken straight to the shop)

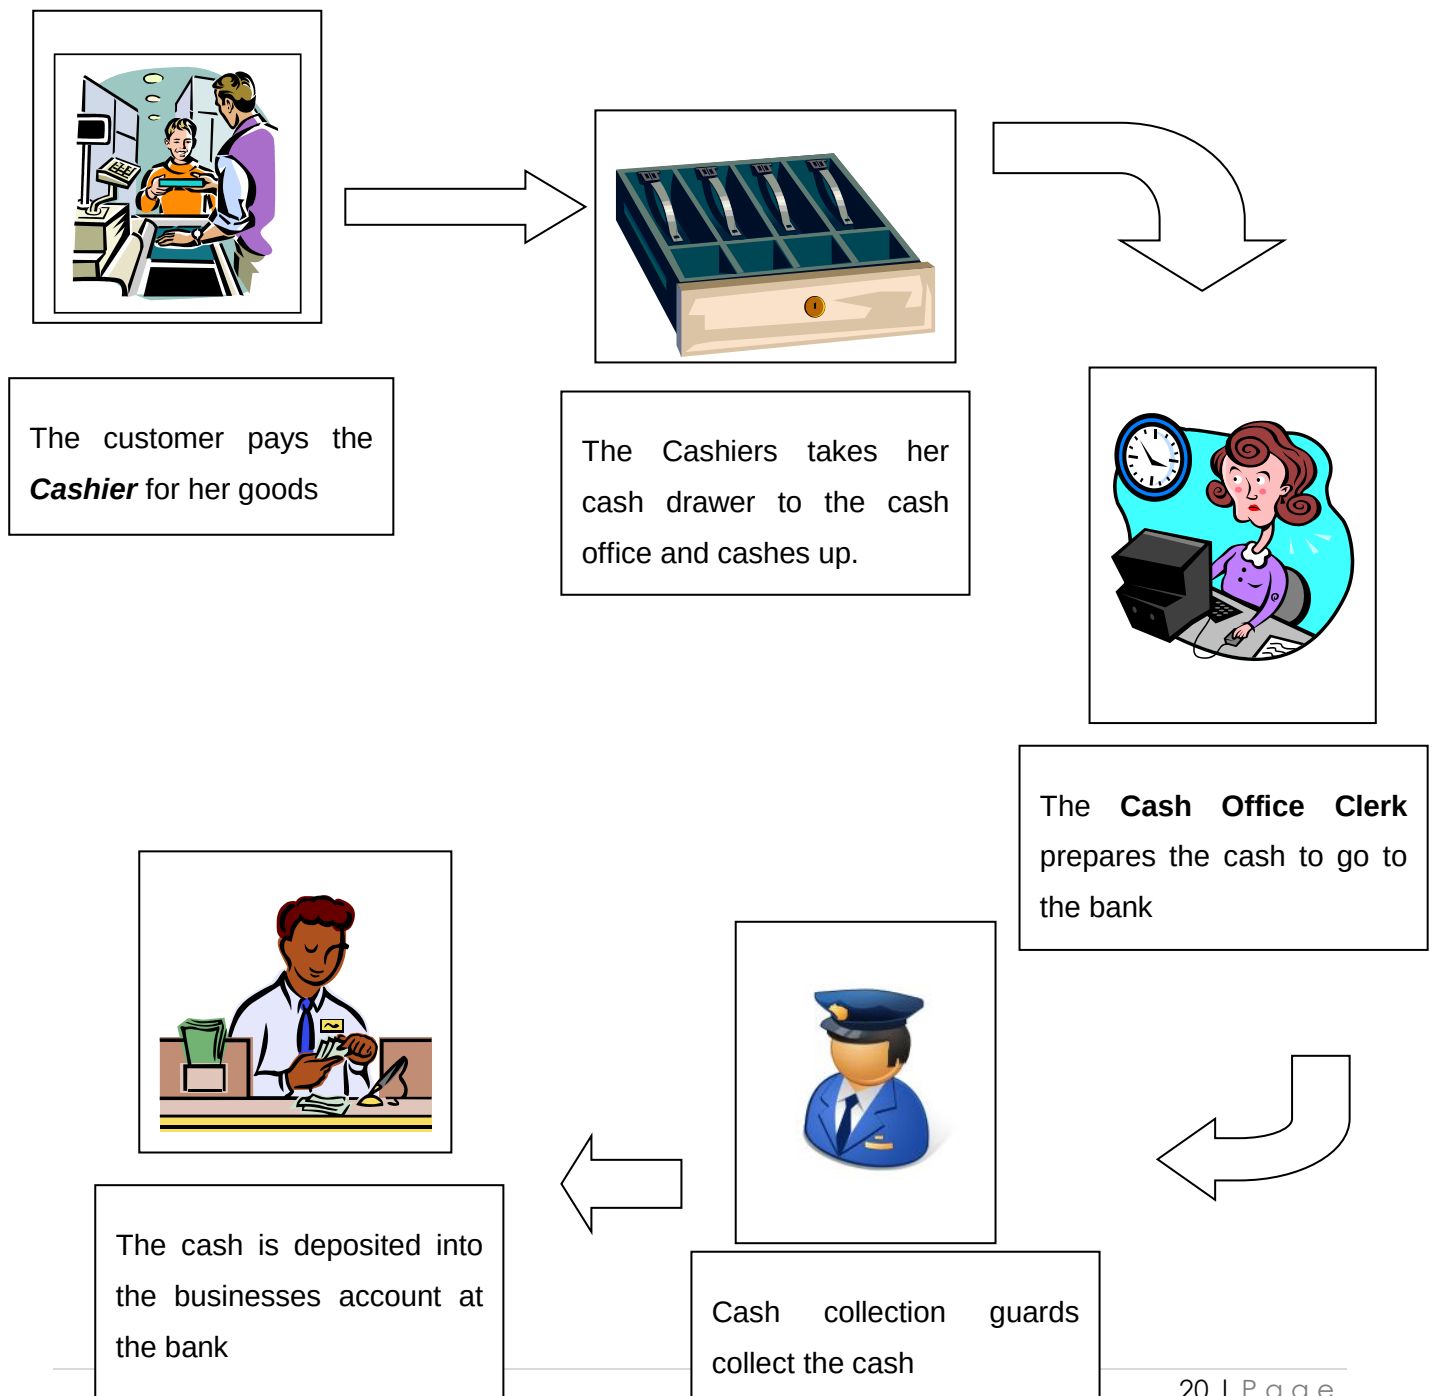

The customer pays the **PoS Operator** for their goods and leaves the outlet

The **Shelf Packers/Sales Assistants** unpack the stock onto the shop floor fixtures

Draw a poster showing the flow of cash through an outlet and showing where each job is involved in the process .

TERM 1 WEEKS 6 & 7**TOPIC. The Wholesale and Retail Industry:**

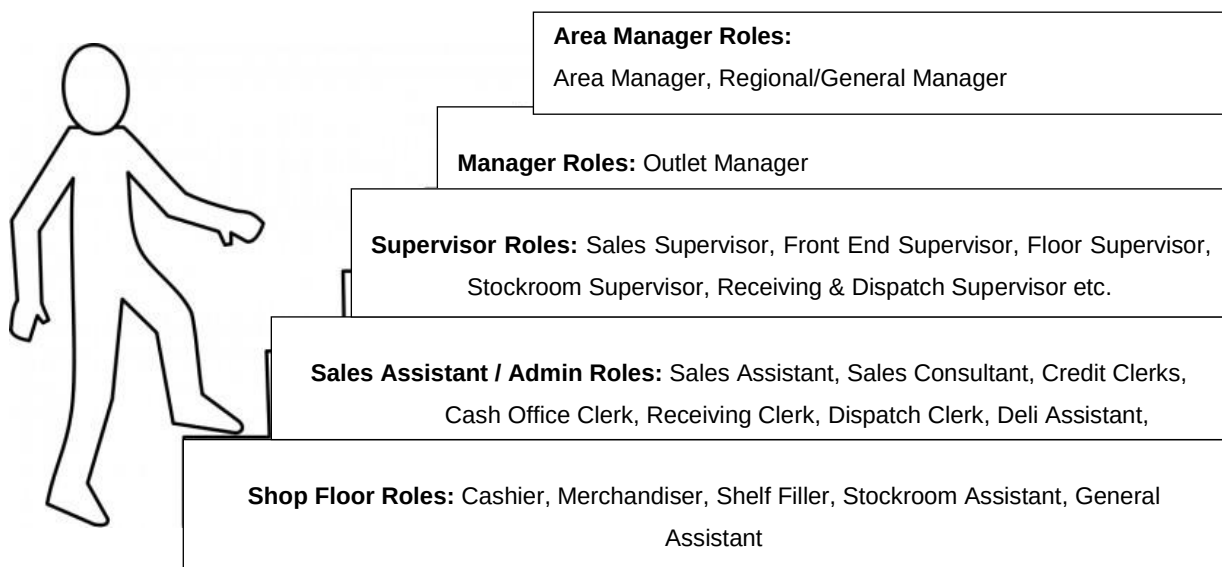

Career paths in the industry

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 6 & 7	Career paths in the industry	Other operational functions in the outlet The levels of jobs in a large chain n Progression within the retail industry		Project - Draw a poster showing progression within the operations of a chain outlet		Theoretical explanation Draw a poster	Text book

ANSWERS TO STUDENT ACTIVITIES

Draw a poster illustrating progression within a retail outlet.

TERM 1 WEEK 8

TOPIC. PROFIT

Shrinkage

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 8	Introduction to shrinkage	The concept of shrinkage				Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 2: Shrinkage

Explain what shrinkage is in your own words.

Shrinkage is a term that is used to describe the loss of any profits which the retail or wholesale business experiences.

TERM 2 WEEKS 1 & 2**TOPIC. PROFIT:**

The effect of shrinkage

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 1 & 2	The effect of shrinkage on the business and employees	How shrinkage affect the business How shrinkage affects employees		Calculation of retained income in 2 scenarios		Theoretical explanation Learners to calculate retained income for two scenarios	Text book Calculators

ANSWERS TO STUDENT ACTIVITIES

Activity 3: The effect of shrinkage on employees

Describe how shrinkage affects the employees of a wholesale or retail business.

Losses directly affect the business as a whole and directly affects each and every employee as individuals because losses reduce Gross Profit and less Gross Profit means:

- The business has less money to pay competitive salaries
- The business has less money to pay expenses
- Less retained income therefore less ability to improve the business which means less chance for growth and promotion for employees
- Less profit to distribute as dividends to the shareholders.

When there is less profit available, it can put a retail business into a risky position. There have been many examples of retail businesses that have had to close branches due to the high level of shrinkage in those branches resulting in job losses

Managers have lost their jobs because of high shrinkage in their outlet because they were responsible for managing and being accountable for the profits of the outlet.

Activity 4: The effect of shrinkage on the profits of a business

Complete the two Income Statements to show the effect shrinkage has on the profits of a business.

The Profit & Loss Account of ABC Trading Without shrinkage & losses		The Profit & Loss Account of ABC Trading WITH shrinkage and losses	
	R		R
ACTUAL SALES	250 000	ACTUAL SALES	250 000
COST OF GOODS SOLD	<u>175 000</u>	COST OF GOODS SOLD	175 000
		<i>SHRINKAGE & LOSSES</i>	<u>17 000</u>
GROSS PROFIT	75 000	GROSS PROFIT	58 000
OTHER INCOME	5 000	OTHER INCOME	5 000
EXPENSES	<u>35 000</u>	EXPENSES	<u>35 000</u>
NET PROFIT BEFORE INTEREST	45 000	NET PROFIT BEFORE INTEREST	28 000
INTEREST	<u>(5 000)</u>	INTEREST	<u>(5 000)</u>
NET PROFIT BEFORE TAX	40 000	NET PROFIT BEFORE TAX	23 000
TAXATION	<u>10 800</u>	TAXATION	<u>6 210</u>
NET PROFIT AFTER TAX	29 200	NET PROFIT AFTER TAX	16 790
DIVIDEND	<u>8 760</u>	DIVIDEND	<u>5 037</u>
RETAINED INCOME	20 440	RETAINED INCOME	11 753

TERM 2 WEEK 3

TOPIC. PROFIT

Causes of shrinkage

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 3	Causes of shrinkage	Causes of shrinkage		Verbal or written explanation		Theoretical explanation,	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 5: Shrinkage and losses

List in your own words 4 ways in which shrinkage can take place in a wholesale or retail business.

- **The loss of cash (through theft, robberies etc)**
- **The loss of merchandise through theft or breakage or wastage**
- **Bad and inaccurate paperwork and errors**
- **Supplier fraud**
- **Wastage/damages**
- **Customer fraud**
- **Breaches in security**

TERM 2 WEEKS 4 & 5

TOPIC. TARGET MARKET:

Customer profiles

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 4 & 5	Customer profiles	The impact of customer profiles on product Outlets aimed at the different customer profiles		Field work. (where possible) Interviews		Theoretical explanation Field work. (where possible) Interviews. Presentation	Text book Local retailers (where available)

ANSWERS TO STUDENT ACTIVITIES

FIELD WORK/INTERVIEWS

Identify the target market for 5 different outlets within the area and describe their customer profile

Outlet	Target Market

Comment on the students work in the space provided in the student's workbook

FIELD WORK/INTERVIEWS

Identify outlets aimed at the different customer profiles in the area and explain how this affects their product range

Younger (teenage) shopper	
Older, mature shopper	
Gender - female	
Gender - Male	
Higher income	
Lower income	

Comment on the students work in the space provided in the student's workbook

TERM 2 WEEK 6

TOPIC. CUSTOMER SERVICE:

Types of service

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 6	Types of service	The importance of customer service Types of service in the industry		Field work Interviews		Theoretical explanation Field work Interviews Presentation	Text book YouTube videos on service (where possible)

ANSWERS TO STUDENT ACTIVITIES

FIELD WORK/INTERVIEWS

Visit outlets in the area and identify examples of outlets providing the different types of service

Full service	
Part service	
Self service	

Comment on the students work in the space provided in the student's workbook

TERM 2 WEEK 7

TOPIC. SERVICE:

Examples of service

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 7	Examples of service	Examples of good and bad service Service standards		Class discussion on service Interviews		Theoretical explanation Class discussion Interviews	Text book

ANSWERS TO STUDENT ACTIVITIES

Interview a family member and ask for an example of good and bad service and why they considered the incident good or bad

TERM 2 WEEK 8

TOPIC. SERVICE:

Internet shopping and service

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 8	Service expectation when shopping on the internet	How service expectations change when shopping on the internet Service requirements				Verbal or written explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 6: Internet shopping

What kind of service do you think people shopping on the internet will demand?

When shopping on the internet customer will shop with businesses that:

- Have an easy to use website
- Offer free deliver.
- Deliver the same day or very quickly.
- Have an exchange policy that is fast and friendly.
- Allow easy payment methods
- The ability to track orders to see how far they are

TERM 3 WEEK 1

TOPIC. SERVICE:

Moments of truth

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 1	Moments of truth	The concept "Moments of Truth" Example of moments of magic Examples of moments of misery Moments of truth for internet shoppers		Field work Interviews Presentation		Theoretical explanation Field work Interviews Presentation	Text book

ANSWERS TO STUDENT ACTIVITIES

Examine this statement

- The objective of business is not to make money
- The objective of business is to serve the customer
- The result is to make money

Activity 7: The objective of business

What do you think it means for a wholesale or retail business and do you agree with it?

If you look after your customer, he/she will keep coming back and will tell his/her friends about your good service.

This will bring in more customers.

The better your service the more sales you will have.

Therefore, the result of providing a high level of service is that you will make money.

Often an outlet that sets out to make money is so focussed on not losing money that it puts in place rules that reduce the level of service. Rules such as making it difficult for a customer to exchange products or get a refund.

In the long run this chases customers away so the outlet loses sales and therefore loses money it would make if it gave better service.

FIELD WORK/INTERVIEW

Visit a retail supermarket and put together a list of when a moment of truth occurs

Comment on the students work in the space provided in the student's workbook

TERM 3 WEEK 2

TOPIC. STOCK:

The impact of stock levels

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 2	The impact of stock levels on a business	Impact of stock on customers Impact of stock on finance Impact of stock on shrinkage & breakages				Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 8: The impact of stock levels on a business

Explain how stock levels impact on a customers

Customers can only buy your products if they are on display on the shop floor.

If they come in for a regular line and you are out of stock – that's a moment of misery.

If they have a number of these moments of misery because you are out of stock of a number of items, they will shop elsewhere

Then you have stock sitting on your shelves and fewer customers coming to shop in your outlets so less money and less profit coming into the business

Activity 9: The impact of stock levels on a business

Explain how stock levels impact on the finances of a business

Excess stock impacts on the finance of the business

Buying too much stock, stock that sits on your shelves and does not sell, ties up your money – your Capital.

The more stock you carry the more capital you tie up and therefore the more Capital you need to run your business.

If the owner doesn't have the money to put into the business, he/she will have to go to the bank and borrow money and we already know that borrowing money means you not only have to pay that amount back but also have to pay interest every month.

This has resulted in many one-man businesses not being able to make enough money to pay their expenses and they have to close their business.

Excess stock impacts on shrinkage & breakages

It is also a fact that the more stock a business has, the more difficult it is to manage that stock.

The fuller the stock storage area is the more chance there is that breakages will take place.

There is also more chance that theft will take place as management cannot see if items go missing in an overfull stock storage area.

Sold outs impact on customer service and sales and therefore profits

Customers can only buy your products if they are on display on the shop floor.

Every sold out is a sale lost and a loss of profit

If you are out of stock of a number of items, they will shop elsewhere

Then you have stock sitting on your shelves and fewer customers coming to shop in your outlets so less money and less profit coming into the business

Activity 10: The impact of stock levels on a business

Explain how stock levels impact on shrinkage, breakages and wastage

It is also a fact that the more stock a business has, the more difficult it is to manage that stock.

The fuller the stockroom is the more chance there is that breakages will take place.

There is also more chance that theft will take place as management cannot see if items go missing in an overfull stock storage area.

Being overstocked with items not selling also creates more 'dead stock' as packaging, design etc could change and outlets are then left with outdated stock no-one wants and they have to reduce the prices (and this means reducing the outlets profits) to clear the items.

We have all seen the end of season sales in clothing outlets where styles change from year to year.

If the products sold by the outlet have expiry dates like food items and medicine, overstocks will lead to items becoming out of date and having to be thrown out and this means wastage will increase

TERM 3 WEEK 3

TOPIC. STOCK:

Reasons for counting

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 3	Reasons for counting	Why outlets count stock Counting for ordering Counting for financial stocktake				Theoretical explanation	Text book

Activity 11: Stock counting

Give two reasons for businesses to count stock

Having an accurate knowledge of the outlet's stock on hand allows staff to tell customers if there is stock of an item they are looking for. **This is good customer service**

To make ordering more accurate

For financial stocktake

TERM 3 WEEK 4

TOPIC. STOCK:

Counting methodology

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 4	Methods of counting	How outlets of different sizes count stock Non-computerised methods of counting Computerised methods of counting		Teamwork Presentation		Theoretical explanation Teamwork Presentation	Text book YouTube videos of stock counting methods (where available)

ANSWERS TO STUDENT ACTIVITIES

Activity 12: Counting

In teams of two describe how outlets that are computerised and not computerised count stock.

Then present your ideas to the class.

Comment on the students work in the space provided in the student's workbook

TERM 3 WEEK 5

TOPIC. MERCHANDISING:

The concept and importance

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 5	The concept and importance	Concept & objective of merchandising The influence of displays on sales The difference in merchandising methods in wholesalers & retailers		Class discussion		Theoretical explanation Class discussion	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 13: Merchandising

Explain the importance of merchandising to a retail business

Ultimately, merchandising is aimed at **encouraging an interest in the products by the shopper and trying to get them to make a purchase.**

Good merchandising increases sales and therefore improves the bottom line of the organisation

CLASS DISCUSSION

Why do wholesalers not use the merchandising methods used by retailers?

TERM 3 WEEK 6

TOPIC. MERCHANDISING:

Merchandising in sub sectors

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 6	Merchandising methods in the different sub sectors	Merchandising methods in; Furniture CFTA Food Speciality Fuel		Teamwork Presentation		Theoretical explanation teamwork Presentation	Text book

ANSWERS TO STUDENT ACTIVITIES

TEAMWORK

Break the class into teams and give each team one sub-sector to work on. The teams must describe the merchandising methods used by that sub-sector and make a presentation to the class.

Where possible they should use pictures or drawings to illustrate their points

Comment on the students work in the space provided in the student's workbook

TERM 3 WEEK 7 & 8**TOPIC. MERCHANDISING:**

Fixtures and fittings

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 7 & 8	Fixtures & Fittings	Different fixtures and fittings for merchandising different categories of stock.		Field work (where possible) Presentation		Theoretical explanation Field work (where possible) Presentation	Text book PowerPoint presentation (where available) Merchandising techniques can be downloaded from the internet. (where available)

ANSWERS TO STUDENT ACTIVITIES

FIELD WORK

Visit outlets in the area and identify and take photographs of (or draw) different fixtures and fittings for merchandising different types of stock or access the internet for examples of different fixtures and fittings

Comment on the students work in the space provided in the student's workbook

TERM 4 WEEK 1 & 2**TOPIC. MERCHANDISING:**

Merchandising methods

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources

SECTION 4:

ASSESSMENT

4.1 Assessment

Year 1 Reporting only in the term when the skill is done.

The GETC: Skills and Vocational Qualification at NQF Level 1 is a four-year Learning Programme. In year one a learner is exposed to a number of Vocational Subjects. Each subject is offered over a ten-week period (one term) in Year 1, where the learner is exposed to the basic skills required for the subject. By the end of year 1 the learner will select a minimum of one skill for the qualification.

Year 1	Formal School-Based Assessments
	Learner performance in the Term:
	Practical 75% *
	Theory 25%
Term Report	100%

4.2 Timing of formal assessment

Suggested Program of Assessment for Wholesale and Retail

YEAR 2					
Term	Content/ concept/skill	Activities	Forms of Assessment	%	FATs based on activities in CAPS: TO
Term 1	- Understanding the Wholesale & Retail Industry - Plan to improve the profit of a wholesale or retail business	Activity 1 Produce a poster	Practical Project	45%	FAT 1
		Activity 2 Produce a poster	Practical Project	15%	
		Activity 3 Produce a poster	Practical Project	15%	
		Activity 2 Respond to questions	Pen and paper test (Oral or written)	25%	
Term 2	- Plan to improve the profit of a wholesale or retail business - Identify different target markets and how they impact on retail businesses - Identify standards of service expected of the industry - Explain the importance of stock control and receive and dispatch stock	Activity 1 Calculate profit	Practical demonstration	50%	FAT 2
