Chapter 1

Topic 1

Visual Literacy

Safe working practices

At the end of this lesson, you will be able to:

- Understand the safety rules on clothing, protective gear, cleaning the craft room, hazards, safety signs and tools.
- Complete the formal worksheets
- Use your creativity to create safety gear.
- Know the rules where don'ts is very important.

NOTE:

- Do not write in this textbook because other learners need to use this book next year as well.
- Textbooks are very expensive.
- Have respect for yourself and your fellow learners.

1. Safe working practices

1.1 Clothing

- **Safety wear** (goggles, aprons, gloves, shoes, etc.) may be required for certain activities. Goggles should be worn **whenever** you use dangerous tools or chemicals or are near such use. If you are required to wear any safety equipment, you must **keep it on**.
- **Adjust your attire** for a “hands-on” activity:
- Long hair (including fringes), dangling ties, rings.
- Loose jewellery or loose/baggy clothing must be removed.
- Secured, tied back, or tucked away.
- Open-toe footwear is not safe.

1.2 Cleaning the Art and Crafts Room

- **Clean up** after yourself and **put things back** where they belong (which should be where you found them). Keep the work area and floor area clean, tidy, clear, and organized. Push chairs under the tables.
- After handling dangerous or dirty items, **wash** your hands with soap and water (for at least 10 seconds). Do so even if you were wearing gloves.
- **Properly dispose** of trash and waste. Recycle paper!
- Sinks are to be used **only** for water and water-based liquids, as approved by the teacher. **DO NOT** put anything solid in the sinks.

1.3 Hazards

1. Stand up when doing practical work to move away quickly if needed.
2. If you are scalded, burnt, or have a chemical splash on your skin, wash the affected part immediately with lots of water. Report this, and also any cuts or abrasions to the teacher without delay.
3. **Immediately report** any accident (spillage of any substance), breakage, malfunction, or unsafe condition to the teacher, no matter how small. **DO NOT** clean up spills without direction. **DO NOT** handle broken glass. **DO NOT** attempt to “fix” anything.
4. **Know the location** and proper use of all safety equipment (especially fire extinguishers and fire blankets), alarm systems, and exits.

1.3.1 Fire Hazards

- Common art materials that may cause a fire include flammable or combustible solvents, oily rags, chemical oxidizers, and compressed welding gases.
- Improper use of solvents causes most art-related fires.
Flammable solvents should be stored in a storage cabinet designed for flammable Materials.

1.3.2 Physical Hazards

- It includes injury arising from carelessness and inattention.
- Wet and slippery floors and work surfaces may lead to physical injury.
- NEVER run or chase fellow students around!

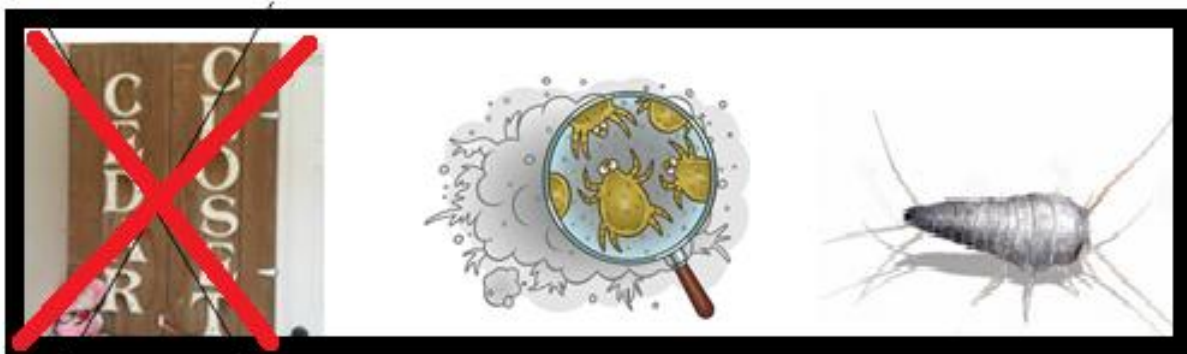

1.4 Ventilation

- Ensure proper ventilation.
- Make sure windows and doors are open to allow enough fresh air to circulate.
- When using spray paint or strong solvents, work outside.
- Use a fan to circulate airflow if necessary.

1.5 Storing of paper products

Keep paper away from insects (like paper mites and termites).

1.6 Workshop safety and responsibilities

1. Only enter the workshop when requested to do so by the teacher.
2. **DO NOT** work alone in the centre, or without a teacher present.
3. **DO NOT** bring food, drinks, candy, or gum into the centre.

4. Learners under the influence of drugs or alcohol are not permitted in the workshop and will be asked to leave the centre immediately.
5. Learners with health problems that might affect their safety in the workshop (medication, epileptics, fits, etc.) must report these conditions to the teacher.
6. If you do not understand some instructions or any other things, ask the teacher before you carry on.
7. You may only do activities if you have the educator's permission.
8. Some of these activities include touching and using materials, equipment, tools, and machines, and doing projects, or anything else in the centre.
9. **DO NOT**, walk around the centre if you need to work, and do not interfere with other pupils.
10. You may only move around by the educators' instructions.
11. **DO NOT** use any tool or machine which you are not trained to use.
 - If you feel uneasy or unsafe using any tools, inform the teacher.
 - Stay away from any other classmate while he/she is operating tools and machinery.
 - Don't talk to your friend that is working with the tools or machinery because this may cause distraction.
12. Never remove anything from the workshop without permission.
13. **DO NOT** play, fool around, or make practical jokes and pranks.
 - Learners making themselves guilty of this will have to leave the workspace immediately.
14. **DO NOT** run, rush around or throw objects around in the centre.
 - This behaviour will make you fall or injure yourself and others and cause serious consequences.
15. **DO NOT** enter any storage areas or special work areas unless specifically permitted, by your teacher.

16. All materials or machines you use need to be treated with respect and you need to be alerted all the time.

17. When you are uncertain ask, ask, and ask again until you are clear on what to use or to do.

18. The tools, equipment, and machinery are the property of the school, and you may not remove anything from the classroom without the permission of the educator.

19. **DO NOT** touch, taste, or smell any ingredients unless you are clearly instructed to do so.

20. Keep hands away from face, eyes, mouth, and body while using tools, chemicals, paints, or biological materials.

21. Wash hands with hot water and soap, after handling any biochemical items such as thinners, etc.

22. When using a scissor or any other tool that might be harmful to you, point it away from your body.

23. Pack away all materials that you will not be using right away.

24. **DO NOT** paint each other or spray one another with anything in the class.

25. If you are found guilty of any of the above rules and regulations you may be asked to leave the room immediately and your parents will be contacted.

1.7 Safety goggles and masks

- Using goggles or wearing masks might be two of the things you need to wear when working with dangerous chemicals.
- In this case, you need to listen very carefully to your educator until you are instructed to take it off.

- This is for your safety.
- If you have long hair, please tie it up so that it will not hinder your sighting.
- No rings, bracelets, necklace or any other accessory that dangles are allowed to be worn when we are in the art room especially when we are using safety gear.
- If you are working and there are loud noises that hurt your ears, make sure you ask for ear plugs from your educator to protect your ears.

1.8 Your workstation

- Stand up when doing practical work like cutting tiles etc.
- Read through the label on a bottle before you use it.
- Make sure you have all the materials you need in one place. Accidents can occur when you're hurriedly looking for something or leave the room to get something you've forgotten.
- Cramped spaces can be dangerous. See to it that there is enough space around you.
- Always make sure windows are open for ventilation when working with chemicals or projects that produce dust.
- Clean up while working, this will prevent your workstation is a mess, and it will also minimise cuts or bruises.
- Use the right equipment for the job and make sure tools and equipment are in good working order.
- Wash your hands after crafting.
- **Do not do things in a hurry.** Make sure you have adequate time to do a project before starting it.
- **Do not** work when you're tired.

1.8 Signs you will see in and around the school and their meaning

1.8.1 Danger signs	1.8.2 Mandatory signs	1.8.3 Warning signs	1.8.4 Safe condition signs	1.8.5 Emergency Signs.
				
Prohibition signs are there to tell you not to do something. They are a danger sign, telling you that it is not safe to proceed. These signs have a red circle with a red diagonal line through it.	Mandatory signs are there to tell you to do something. These signs are round and are usually coloured blue and white.	Warning signs are there to warn you of dangers. They simply aim to make you aware of a danger, so you can protect yourself. These signs are triangular. The colours used in these signs are usually yellow. Warning signs are there to warn you of dangers.	These signs are rectangular or square in shape. These signs are white on a green background and will often have a white border.	An emergency sign is a safety sign indicating the nearest location of or directions to emergency-related facilities e.g., example "Exit Signs", or "First Aid". An emergency sign instructs and gives instructions to keep everyone safe in both the workplace and public areas.

1.9 Signing of the safety agreement

At the end of this lesson, you will be able to:

- Understand why you wrote the baseline assessment.
- Know the danger and safety rules you need to follow to keep yourself safe in the classroom and how to avoid accidents.
- Respect your fellow classmates and know that if you endanger yourself, you also put them at risk of injuries.
- The DO NOT statements has serious outcomes if you don't follow the rules.
- Know how to use a scissor and craft knife
- Know different types of danger signs
- Understand how to use a glue gun
- Know the code of conduct and classroom rules

Parent Or Guardian

I have reviewed the Safety & Responsibility Rules and agree to support my child and the teacher in retaining a safe and orderly workshop environment.

Name and Surname

Learner

I have reviewed and understand the Safety & Responsibility Rules and agree to abide

Your name and surname

Signature

Date

Code of Conduct

Dear student, parents/guardians

Arts and Crafts consists out of four years containing Term 1-4.

Assessment consists out of informal and formal work that will take place throughout the year.

All assessment tasks **MUST** be completed each term.

INCOMPLETE WORK NOT SUBMITTED will result in poor performance marks.

Absenteeism: It is your responsibility as learner and guardian to inform the educator if you have missed an assessment. Doctors/funeral letter will be required for **FORMAL ASSESSMENT TASKS** when missed.

Workbooks containing informal and formal work will stay at school but if a guardian want to see the work he/she is welcome to make an appointment with the educator or the educator may make copies of the learner work and sent it to the parent/guardian.

Stationery and Art Media: School will provide this but if any of the materials disappear or get lost, you as a parent/guardian need to replace the object that was lost.

Behaviour

- No late coming will be tolerated and may result in detention.
- Enter the class, go to your desk, place your bag on the floor, greet the educator.
- Carry on with the assessment or wait for instructions from your teacher.
- Do not talk or disrupt the class and have respect for yourself and others.
- Do not interrupt the teacher when she is teaching.
- No foul language (swearing and nastiness) and assaulting will be tolerated towards each other and may result in detention.
- Cover your mouth when you cough and sneeze and throw away all tissues or toilet paper in the given dustbins.
- Use the words Please and thank you often.
- In the need of asking questions, put up your hand and wait for permission to talk. Do not interrupt other learners asking a question and do not scream out answers and comments.
- No eating and drinking in the class.
- Greet educators, parents/guardians, principal or any other grown up who enter the class.
- Store artwork and material in designated locations and clean up after yourself.
- All cleanings must be done at the end of each period.
- At the end of a period after the bell has rung or your educator will give permission for you to pack up; clean up and leave the class row for row without disrupting teaching in any other classes where teaching is taking place.
- Your hands had to be washed after break. Do not come to class and ask permission then because we respect teaching and learning time.

Name and surname of learner: _____

Formal Task 1

Instructions

Questions 1

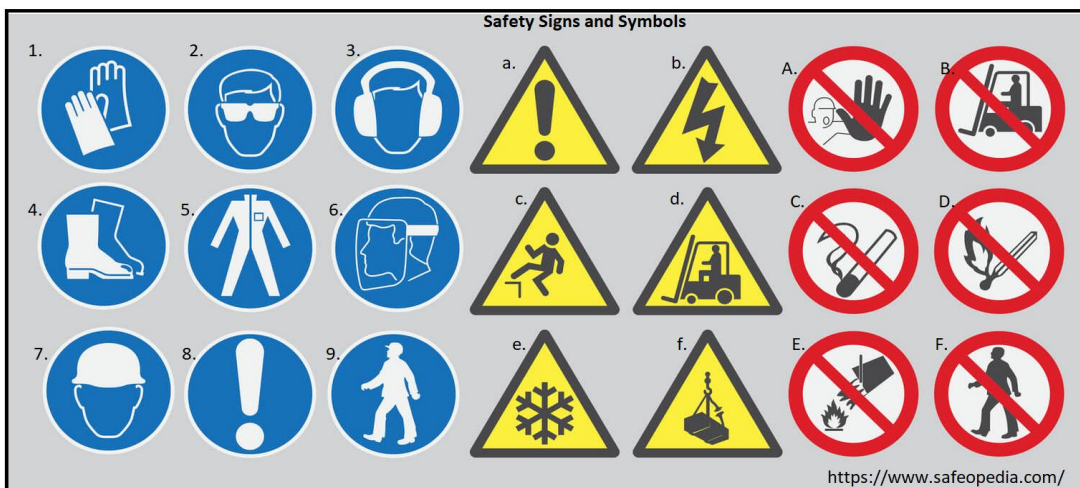

Name seven “**Do not**” rules that need to be adhered to in an art and craft classroom.
(7)

Question 2

Which one of these rules do you think is the most important? Give reasons for your answer.
(2)

Question 3

Study the picture below and answer the following questions.

A. Name only the letters and numbers of the symbols you have learned about so far. (6)

B. Which sign tells you that there is ice around and it can be slippery? _____ (1)

C. Explain why symbols C and D are nearly similar but what each one means. (4)

Similarities:
Symbol C means:
Symbol D means:

Chapter 2

Topic 1

Visual Literacy

Visual Art Diary / Portfolio

At the end of this lesson, you will understand:

- How to create a visual art diary
- How to do the activities for the year using this diary.
- Remember that this is your book that will showcase all the good work you have done.
- Keep record of your 3D work by taking photos and adding them to your portfolio.
- Do not get rid of any of your art portfolios because it showcases what you have learnt and will assist you in the world of work.

Watch the following videos to guide you in creating your diary:

"<https://www.youtube.com/watch?v=PGylJRLBNzY>"

<https://www.youtube.com/watch?v=PGylJRLBNzY>

The Art Diary/ Portfolio

2.1 What is a visual art diary?

- A visual journal works almost like a diary.
- It is also a display window of yourself and your art.
- Use an old story book (matt paper works best).
- You can paste, paint, draw or write if your art is the focal point of the page.
- It usually works well if you use a double page for each topic.
- In some instances, it looks good if the printing still shines through the artwork, but in other instances, it is better if you cover the printing with paint before you start with

als that are used in an art diary

- Glue Dots
- Double-sided tape
- No acid glue and paper
- Embellishments (decorations)
- Graphite pencils.
- Brushes.
- Paint.
- Kneaded eraser.
- Painting or drawing paper pads.
- Painting knife or a palette knife.
- Painting palette.
- Masking tape.
- Graphite pencils.
- Brushes.
- Paint.
- Kneaded eraser.
- Sponges/stamps.

your artwork.

- Here follows a list of examples you can use to start your journal:
 - Name and surname
 - Family tree
 - Who am I?
 - Family Dynamics
 - Good traits
 - Bad traits

2.2 Ma teri

2.3 Ten Principles of an Art Portfolio

- Start building your art portfolio early
- Get familiar with the art school programs you're applying to
- Create original work for your art portfolio
- Experiment with your art portfolio
- Include artwork that highlights your strengths
- Consider works-in-progress for your art portfolio
- Portfolio curating is everything for college portfolios
- Effectively document your art portfolio work
- Attend National Portfolio Day
- Think about the big picture beyond your portfolio
- Here follows a list of examples you can use to start your journal:
- Name and surname
- Family tree

Activity 2.3.1

- Decorate the front cover page of your art diary/portfolio.
- Be innovated and creative.
- It needs to show off your personality and your unique style.
- Use the ideas mentioned above or increase your knowledge by researching what else you can do.
- You may create as many mood pages as you want so that the themes will stand out.

Chapter 3

Topic 1

Visual Literacy: Art elements and Design Principles

At the end of this lesson, you should be able to:

- Understand the art elements and design principles.
- You will understand the content and concepts
- You will be able to make notes in your workbooks led by the teacher
- You will be able to complete all worksheets and practice the elements of art
- You will be able to understand the videos and re-watch the videos at home or in class on your cell phone.

<https://www.youtube.com/watch?v=CHCjbcfsqp0>

NOTE:

- Do not write in this textbook because other learners need to use this book next year as well.
- Textbooks are very expensive.
- Have respect for yourself and your fellow learners.

3.1 Art Elements

3.1.1 Lines

ART ELEMENTS - LINE

5 Types of Line in Art

Vertical Lines:

Vertical lines are straight up and down lines that are moving in space without any slant and are perpendicular to horizontal lines. They suggest height and strength because they extend towards the sky and seem unshakeable.

Horizontal Lines:

Horizontal lines are straight lines parallel to the horizon that move from left to right. They suggest width, distance, calmness, and stability.

Diagonal Lines:

Diagonal lines are straight lines that slant in any direction except horizontal or vertical. When in use, they suggest movement or lack of stability.

Zigzag Lines:

Zigzag lines are a series of diagonal lines joined at ends. They can convey action and excitement, as well as restlessness and anxiety.

Curved Lines:

Curved lines are lines that bend and change direction gradually. They can be simply wavy or spiral. Such lines convey the feelings of comfort and ease, as well as sensual quality as they remind us of the human body.

<https://yourartpath.com/types-of-line-in-art-meaning#1-5-types-of-lines-in-art-meaning-and-examples>

Variation - the use of a variety of line including width, length, texture, thickness, etc. to add interest to a drawing or painting.

Length - lines can be long or short.

Direction - lines can move in any direction.

Degree of curve - lines can curve gradually or not at all.

Hatching - lines that flow in the same direction to develop value or shading.

Line quality or line weight - refers to the thickness or thinness of a line.

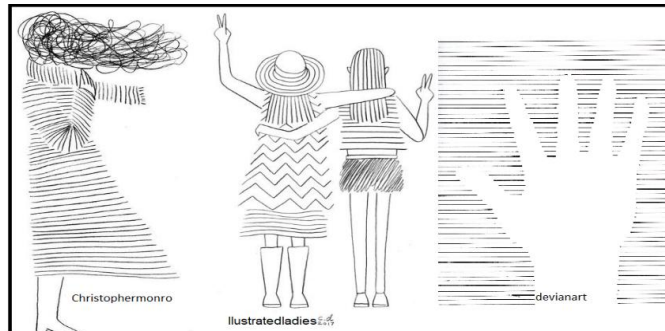

By varying the line quality artists can make objects appear more 3-dimensional and more interesting.

Crosshatching - lines that cross over each other to develop value or shading.

Implied: these are lines that suggest an edge rather than clearly defining one.

Implied lines occur where textures, colours, and values change at the edges of shapes in the artwork.

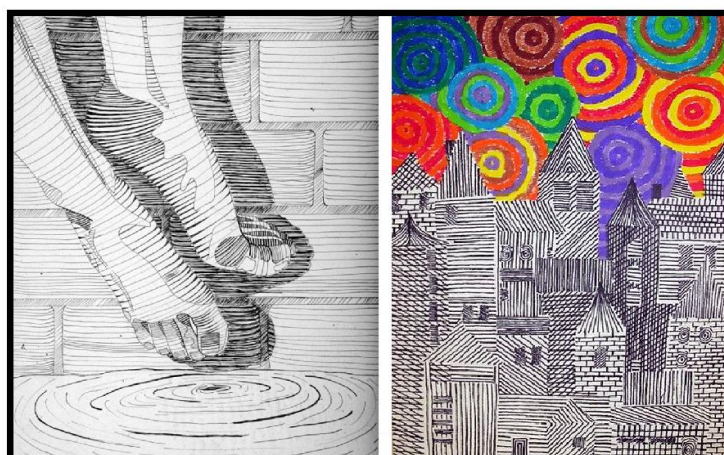

Expressive lines: lines that send us a message about what the artist wants his or her work to make us feel.

Activity 3.1.1.1

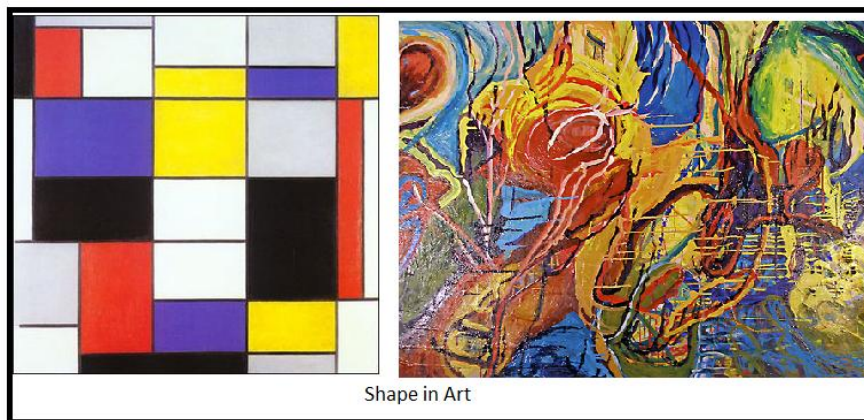

Make a line drawing using applied lines.

Choose one of the pictures below and redesign it to fit your unique style. This needs to be done in your art diary.

3.1.2 Shape and Form

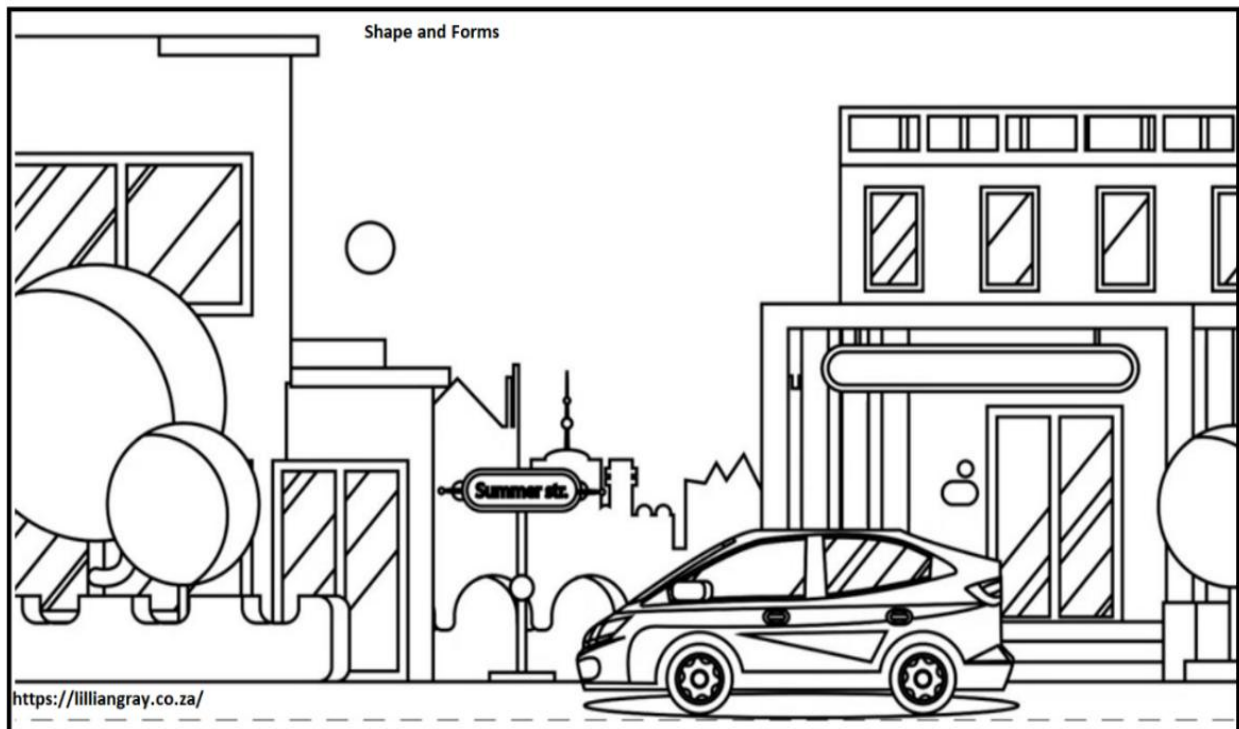

- The shape can be used alone or with other elements to communicate a concept and create art.
- There are generally two different kinds of shapes: mechanical and organic.
- Mechanical shapes are geometric.
 - They have sharp edges and can be drawn with a ruler or compass.
 - This type of shape can give a piece of artwork a feeling of control and order.
- Organic shapes are drawn freehand.
 - They are complex and usually found in natural objects found in nature.
 - These shapes can give a piece of art a more natural, less controlled feeling.

Activity 3.1.2.1

Identify all the shapes and forms in the picture and write them down.

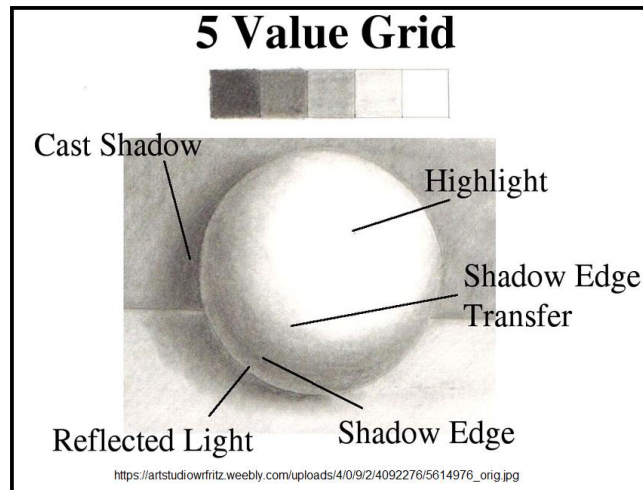

Expanded opportunity: Write down all the types of lines that were used in this picture.

Shape	Forms	Lines

3.1.3 Tone and Value

- In art, **Tone** or **Value** refers to the degree of lightness or darkness of an area.
- Even an object that is a solid colour, will have **tones** when we paint or draw it.
- Artists use a range of Tones / Values to create an illusion of the natural world.

3.1.4 Shape and form

- Shape is an element of art that is two-dimensional, flat, or limited to height and width. Form.
- An element of art that is three-dimensional and enclosed. Volume; includes height, width, AND depth (as in a cube, a sphere, a pyramid, or a cylinder).

Activity 3.1.4

By the end of this lesson, you should be able to:

- Understand the content and concepts
- Understand shading
- How to use lines to create value.
- How to identify texture.
- How to do all the activities.

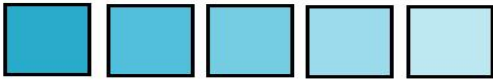

NOTE:

- Do not write in this textbook because other learners need to use this book next year as well.
- Textbooks are very expensive.
- Have respect for yourself and your fellow learners.

3.1.4.1 Activity 1

The illusion of space
Shading

We use line to create value.

A. Use the template below and create your own tonal value.
Choose a colour you like the most to colour the blocks.

When we shade we go from light to dark.
We usually use different pressure on our pencils to create the tonal value.

Here is a sample of a drawing using different tonal values.
Create your own tonal drawing.

3.1.4.1 Activity 2

By using tone, we can make shapes look 3-D through shadows and highlights.

Draw the following shapes: prism, pyramid, cylinder and cone in your art diary and use tone and shadows to colour them in with.

Think from where the light comes before you colour in.

You may use colouring pencils or one of your grey pencils.

3.1.4 Texture

- The texture is one of the elements of art that is used to represent how an object appears or feels.
- Sculptors and architects can create texture in a three-dimensional work of art by manipulating the surface texture of a piece.

- Textures in the art can be smooth, rough, hard, soft, furry, fluffy, and bumpy are just some different textures

Activity 3.1.4.1

Activity 1

Identify the textures

Directions: Draw a line to match the word to the correct texture.

	fluffy
	hard
	furry
	bumpy
	squishy
	rough
	rubbery
	fiery
	scratchy

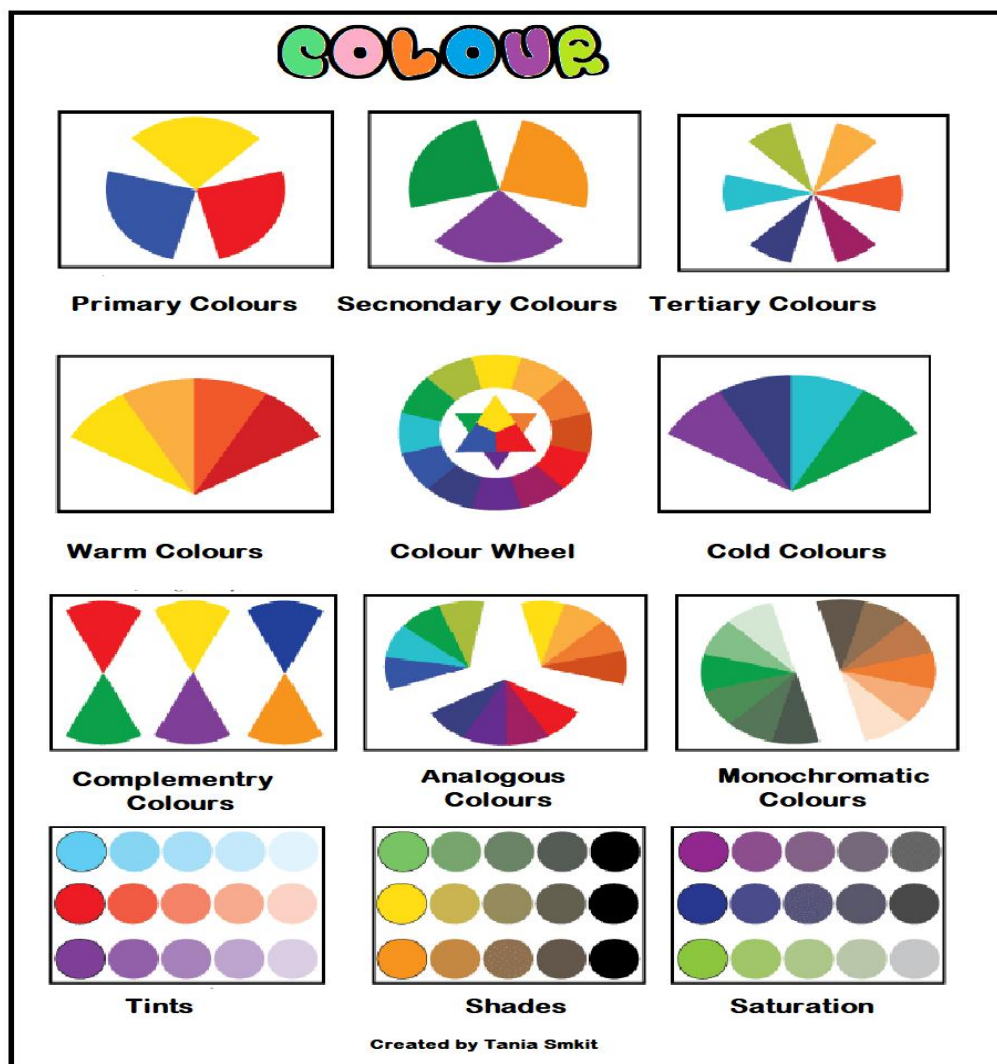

<https://www.liveworksheets.com/vv1493377er>

3.1. 5. Colour

By the end of this lesson, you should be able to:

- Understand content, concepts and be able to practice skills
- Understand what primary, secondary and tertiary colours are
- Understand the colour wheel
- Be able to identify the various colours
- Be able to complete all activities

Activity 3.1.5.1

Do not colour this in the textbook. Do the activity on the activity sheet that your teacher will hand you.

Draw three objects overlapping each other e.g., shoes.

The three main objects must then be coloured or painted in primary colours. The overlapping parts must be coloured in secondary colours.

The background should be done in tints and shades of monochromatic or cold colours.

3.2 Design Principles

By the end of this lesson, you should be able to:

- Understand design principles: Contrast, Balance, Pattern, Movement and repetition
- Know how to apply the principles in an artwork.
- Analyse artworks through using the skills you have developed.
- You will be able to understand the videos and re-watch the videos at home or in class on your cell phone

<https://www.youtube.com/watch?v=l5Q52qe9mUI>

<https://www.youtube.com/watch?v=l5Q52qe9mUI>

<https://www.youtube.com/watch?v=RMxtsOsluk>

<https://www.youtube.com/watch?v=B2RSEwwRG0c>

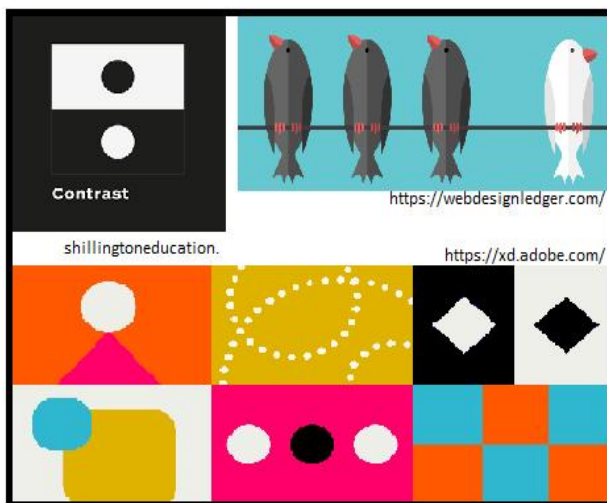

NOTE:

- Do not write in this textbook because other learners need to use this book next year as well.
- Textbooks are very expensive.
- Have respect for yourself and your fellow learners.

3.2.1

Contrast

- It can be used to emphasise certain parts of an artwork.
- It refers to the visual differences of an artwork.
- You can create contrast by colour (bright-dull), shape (organic-geometric), and tone.

3.2.2 Balance

- Balance refers to the overall distribution of visual weight in a composition.
- A well-balanced composition feels comfortable to look at.
- Each visual component of an artwork has visual weight.
- Different than the actual weight, visual weight is not measured using a scale but must be observed instead.
- Visual weight balances around the axis of an artwork.
- The axis may be vertical, in which visual elements balance on both sides of the axis. Artworks may also balance around a horizontal axis, in which visual elements balance from top to bottom.

Symmetrical Balance

- Symmetry is a type of formal balance in which two halves of an artwork mirror each other.
- This type of balance is familiar and common.
- The human body is balanced symmetrically as is our planet, our cars, clothes, furniture, etc.

- Symmetry imposes a strong sense of order and stability on both the composition and the subject.

Asymmetrical balance

- This is where both sides are similar in visual weight, but not the same.
- This usually creates more interesting compositions.

Radial balance

This balance is not very common in art compositions, but it is arranged like a sunflower with everything arranged around the centre.

Activity 3.2.1

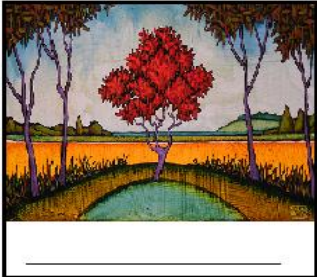

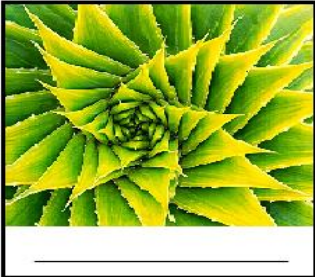

By the end of the lesson, you should be able to:

- Understand all concepts, content and be able to practice your skills
- Be able to identify and name the various types of balance
- Be able to complete all activities

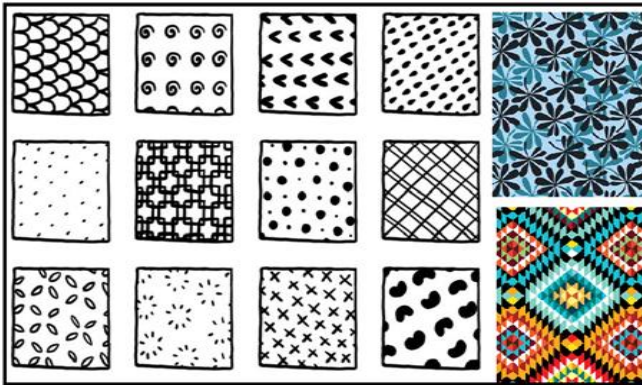

Balance

A. Identify the types of balance in the following pictures.

B. Draw the other half of the pictures.

 _____	 _____	 _____
 	 	 

3.2.3 Pattern

- A pattern is a design in which lines, shapes, forms, or colours are repeated.
- The part that is repeated is called a motif.
- Patterns can be regular or irregular.

<https://www.youtube.com/watch?v=RMxtsOsIluk>

By the end of this lesson, you should be able to:

- Understand all concepts, content and practice the skill
- Understand the various types of patterns
- Be able to draw your own patterns
- You will be able to understand the videos and re-watch the videos at home or in class on your cell phone

<https://www.youtube.com/watch?v=B2RSEwwRG0c>

Activity 3.2.3.1

Pattern
Lets Draw
Create your own patterns in the blocks below

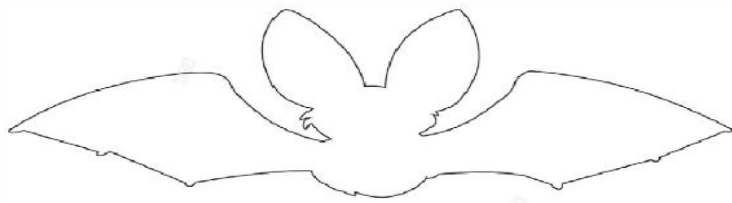

But: You need to be creative and you may not commit plagiarism.
Use your own ideas or combine artworks.

3.2.4 Movement

- Movement is **the path a viewer's eye takes through a composition.**
- In an image, the kinds of lines, shapes, and forms an artist uses can affect this movement.

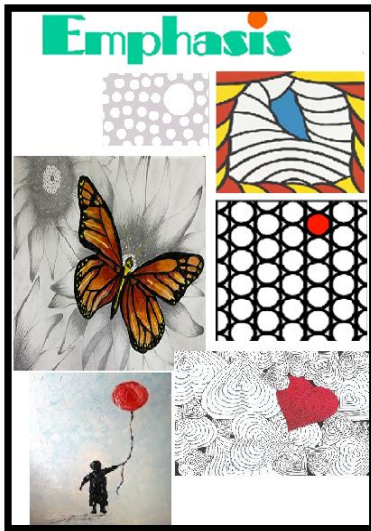

Activity 3.2.4.1

	
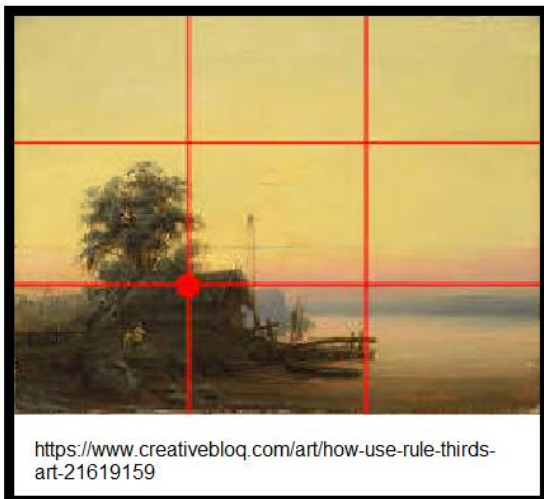

<i>Pattern</i> <i>Decorate these two animals with different patterns</i> <i>You may use any media to decorate them with.</i> <i>Use your imagination and creativity.</i>	

3.3 Emphasis

The emphasis in art refers to the principle of creating a focal point to make a certain element stand out. Artists use many techniques to create emphasis, and some artists become famous for the specific methods they use.

The Rule of thirds

The rule of thirds dictates that if you divide any composition into thirds, vertically and horizontally, and then place the key elements of your image along these lines or at the junctions of them, the arrangement achieved will be more interesting, pleasing, and dynamic.

Activity 3.3.1

Brief: Create a mixed media piece using watercolour and pen and ink.

- Choose your subject matter (suggestions: butterflies, insects (colourful), birds, sea animals with flowing fins or tentacles, flowers, candy (spilled candy!).
- In your sketchbook, draw a rough sketch of your design. Place your focal point in the Rule of Thirds. Start with the outside border, then draw an interior rectangle.
- Creatively & selectively expand part of your design onto the outside border.

- When you have your final design approved by me, you may begin on the final paper.
- Begin LIGHTLY drawing your interior rectangle by measuring 3 1/2" in from each side. Draw your main subject matter lightly.
- Add your background extending ONLY PART of it to the edges of the paper. Paint your main subject with watercolours.
- Apply India ink to the subject matter (outline & add details) & to the area beyond the border (this part will ONLY be black & white- can use hatching & cross-hatching, stippling or other Pen & Ink Techniques to show value changes & textures).

Formal Assessment: Test - Teacher to hand out notes on what learners need to study

Chapter 4

Topic 1

Visual Literacy: Careers

At the end of the lesson you will be able to:

- Understand the content and concepts of the lesson
- Understand the role of an art teacher does
- Understand the skills that are needed to become an art teacher
- Know how to do research on a topic
- Know how to make a poster using research

4. Careers

4.1. What does it mean to be an art teacher?

Art teachers work primarily to bring knowledge of artistic and creative concepts, including colour, shape, and texture, to students in foundation, intermediate, senior, and further education, and training band.

4.2 The Role of an art teacher

Art teachers instruct students how to produce, appreciate and understand the fine arts. They develop year plans, and lesson plans, give lectures, facilitate discussions and activities, keep class attendance records, assign homework, and evaluate learner progress.

4.3 Skills of an art teacher

- Artistic talent as well as creativity
- Enthusiasm, patience, and tact coupled with good organisational skills
- Enjoy teaching and working with young people
- Prepared to work outside school hours

4.4 How do art teachers teach?

- Art teachers introduce students to the formal qualities of art and different mediums of artistic creation
- They familiarise students with the tools and materials used in illustrative, craft-based, and sculptural art.

4.5 The workplace of an art teacher

- Most art teachers teach learners from grade one through to grade twelve in public or private schools.
- Some art teachers also teach privately at art centres of universities.
- Art teachers work regular school hours but are also expected to attend regular professional development courses and often arrange exhibitions of learners at work.

Activity 4.6.1

Design a colourful eye-catching poster to promote the career of an art teacher. Cut pictures from magazines.

Date: _____		Formal activity			
Poster career of an art teacher					
		1	2	3	4
Planning, Design, Esthetical value, Neatness					
Elements of art: Colour, Texture,					
Creativity: Using of Design Principles					
Use of recycled material in creating your poster

Chapter 5

Topic 2

Create in 2 D

By the end of this lesson, you should be able to:

- Understand the content, concepts and practise the skill.
- Know where clay comes from
- Understand the various kinds of clay
- Understand the terminology of clay products
- Understand the stages of clay
- Understand the requirements of the activity as well as the rubric
- You will be able to understand the videos and re-watch the videos at home or in class on your cell phone

<https://www.youtube.com/watch?v=1n7apcgQiz0>

<https://www.youtube.com/watch?v=AFKnG-vENUw>

NOTE:

Be respectful and do not write, draw or colour in this textbook because other learners need to use this book next year

5. Clay

5.1 Where does clay come from?

- Clay can be found anywhere but it is only useful for pottery if it has a quality of pliability (softness).
- You can test this by seeing how elastic (stretchy) a piece of clay is.
- Take a piece of clay, and if you can roll it into a coil and bend it into a ring without cracking and falling apart, this is an indication that clay will be great for pots and sculptures.

5.2 Kinds of clay

5.2.1 Earthenware (or common clay)

- It contains many minerals, such as iron oxide (rust), and in its raw state may contain some sand or small bits of rock.
- Earthenware is a secondary clay that has been transported by moving water some distance, picking up minerals and other materials before settling in a riverbed.
- Earthenware is commonly used in the making of terra cotta pots, roofing tiles, and other low-fire ware.

5.2.2 Stoneware

- It is a hard and durable clay that is fired at very high temperatures.
- Its natural colours vary from light grey or tan to dark grey or chocolaty brown.
- Historically stoneware was used for crocks and jugs and is now typically used to make dinnerware.

5.2.3 Porcelain

- The purest clay is **kaolin** or china clay.
- It is called primary clay because it is found very near its source.
- Kaolin has few impurities and is the main ingredient used in making porcelain.
- Porcelain can become very hard and translucent.
- It is very shiny and therefore a glaze is not needed.

5.3 Terms used in clay products

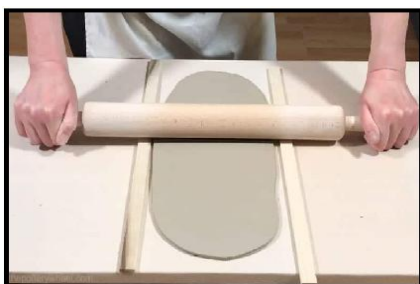

5.3.1 Coil

Rolling out long snakes of clay between your hands or on the table.

5.3.2 Pinch

Using your fingers to pinch and poke a single lump of clay into any form.

5.3.3 Slab

Rolling the clay into flat sheets with a rolling pin to cut apart and assemble.

5.3.4 Wedging

Gets air bubbles out of your clay by pushing and compressing your clay on the table

5.3.5 Slip

Wet clay is used to fasten so that they don't fall apart

pieces of clay together in the kiln

5.3.6 Scoring

A technique used in which criss-cross marks are incised onto the surface of two pieces of clay before joining with slip.

5.4 Seven stages of clay

Formal Task 1

Clay Broach

Brief: Creating a clay broach

This is an example of an elephant clay broach

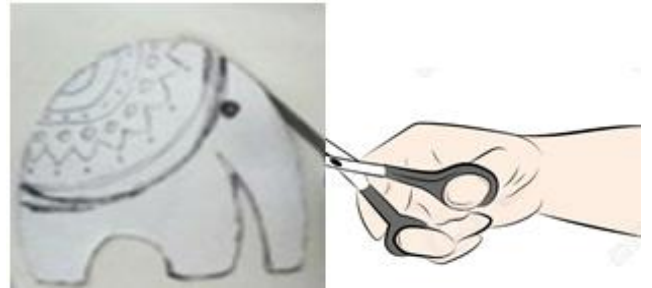

Create your broach (DO NOT COPY THIS EXACT DESIGN!!!)

Instructions

Step 1

Draw a template of your brochure on paper and cut it out.

Don't make it too big – it is a broach

Step 2

Wedge your clay and roll it flat.

Place the template on top of the clay and use a knife to carefully cut the edges out.

Step 3

Make coils and small balls of different colours by mixing some colouring in the clay.

Find the spot from where you are going to start your design.

Do a radial symmetrical design.

Start decorating with the coils and balls in any way you want.

Be creative!

Step 4

Carry on decorating –

Remember to slip all the attachments.

Step 5

Use the technique of slip and scoring and attach the pin at the back of the brochure.

Step 6

Do the finishing touches on the broach

Assessment Tool

Criteria	Mark Allocation	Learner Mark	Comments
1. Process:			
a. Is the clay wedged?	2		
b. Were the “slips” done tightly?	2		
c. Is this a unique product?	2		
d. Is the learner able to make smooth coils and balls?	2		
e. Are the edges smooth?	2		
f. Is radial symmetry clear?	2		
g. Is the result acceptable?	2		
h. Was the learner able to interpret and analyse his final product?	2		
2. Elements of art:			
a) Colour: Primary, Secondary, and Tertiary colours	6		
b) Line	2		
c) Texture	2		
d) Shape	2

TOTAL 40 /

Chapter 6

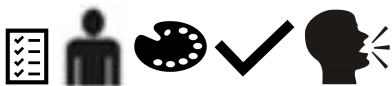

Topic 3: Create in 3 D

By the end of this lesson, you should be able to:

- Use the formula to work out costing and pricing
- How to create a tree according to the brief
- Understand the safety requirements while working
- How to use the materials needed for the assessment

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

Formal Task

The learners have a choice to do one of the Formal Tasks.

Formal Task 1

Brief: Creating a Tree out of a canvas

Materials

- Template of a Tree
- Fine line art cutter tool
- Fine line and thick line Permanent markers
- Glue Gun and Sticks
- Paint Brushes
- Paints
- 1 x Art canvas or recycled boxes that has 3 layers (e.g., Boxes that chips are packed into)

Step 1

Collect pictures of trees where the outlines are seen nicely.
Make copies and enlarge the tree you choose to make.
Cut out the tree and try to cut out details e.g., branches

Step 2

Place the Template onto the canvas or box and trace the tree's outline onto it with a pencil.

Step 3

Use the fine line art cutter tool to cut out the outlines of the tree.

Step 4

Paint the tree black or white

OR

Formal Task 2

Quilling

Brief: Decorative Tree with buttons or quilling

Use quilling or buttons for leaves and flowers to decorate the tree.

Watch the following YouTube Videos to show you how to do quilling:

https://youtu.be/kfM_ZALCHqI 5 quilling paper steps <https://youtu.be/wULr0mYYr8c> 40 quilling steps

Before starting you need to know something about quilling:

- Quilling is an art form that involves the use of strips of paper that are rolled, shaped, and glued together to create decorative designs using an eyelet tool needle.
- With help of quilling, you can make key rings, jewellery, decorative items, greeting cards, 3D models, and many more things. Start with the basic shapes.
- Make use of off-cuts and monotoes in design.

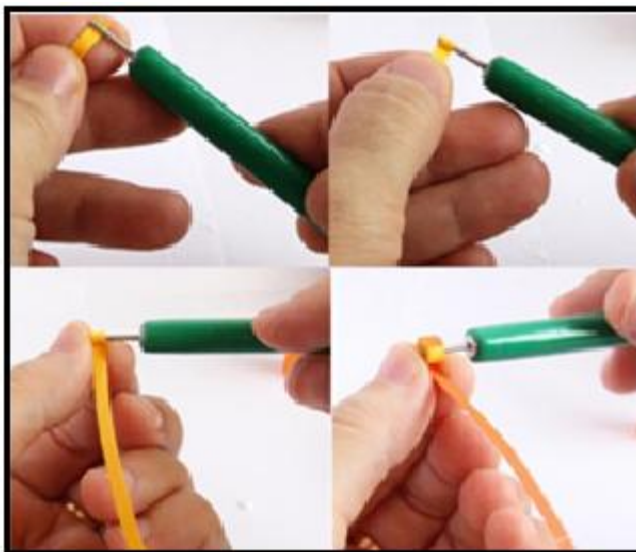

Materials needed

- Quilling Paper (strips of paper)
- Quilling needle tool
- Tweezers
- Pair of Scissors
- Glue
- Circle sized ruler

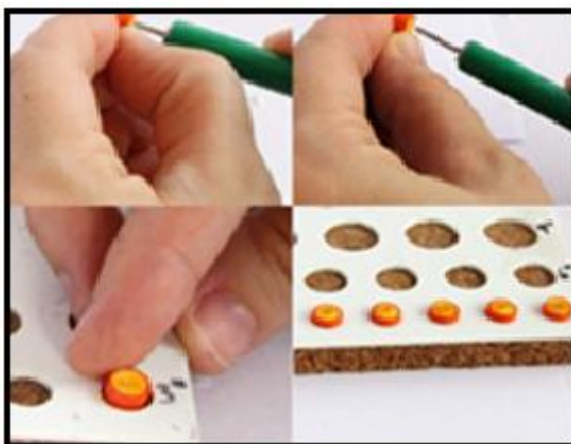

Quilling:

Step 1

Let's start by making a coil.
First, take a strip of quilling paper and the quilling needle tool.
Put the paper into the needle as shown in the picture, then start rolling.

Step 2

Take it out carefully and put it on the circular ruler to uncoil it into the size you want.

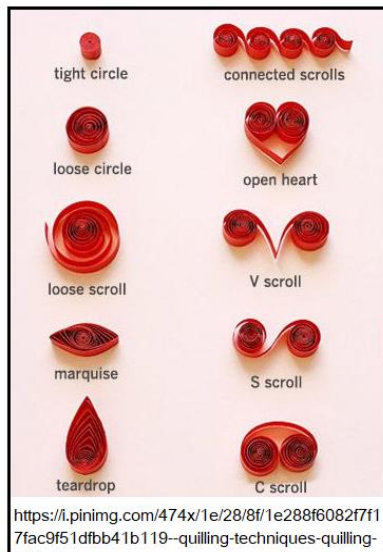

out of the ruler.

Paste the end with a little bit of glue.

Step 3

Take the coil

Step 4

Make any shape you want.

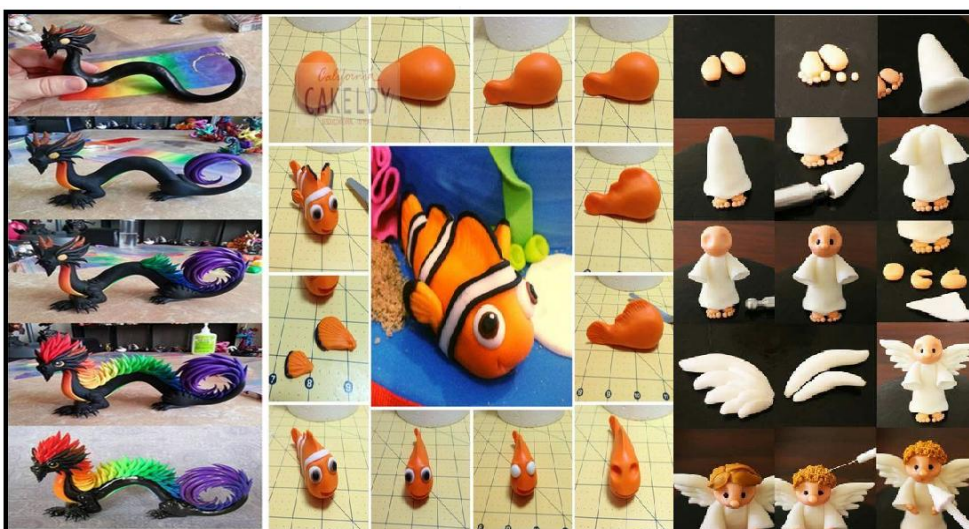

Step 5 Paste it on your tree.

OR

Formal Task 3 - Clay product

Assessment Tool

Sculpture

Date: _____

Circle the number that best shows how well you feel that you completed the item.	Excellent	Good	Average	Needs improvement	Student rating	Teacher rating
RESPONDING FORMS You made the sculptures relate to each other. They bend, dent, open, etc.	4	3	2	1		
GESTURE Both shapes are on their "feet", undercut to lift them visually off the base.	4	3	2	1		
SURFACE You developed a variety of 3 or more surfaces on the piece -from rough to smooth to cracked to modeled.	4	3	2	1		
Colour usage	4	3	2	1		
Textures	4	3	2	1		
NEGATIVE SPACE You made the spaces between the pieces	4	3	2	1		
MOVEMENT You used textures, forms, holes or other carved effects to lead the audience around your sculpture.	4	3	2	1		
CRAFT Your work is crafted with care and attention to detail.	4	3	2	1		
Design principles	4	3	2	1		
How did you create the negative space in your work? How is it important to the sculpture? _____ _____ 2						
What did you find difficult in creating this sculpture? Explain. _____ _____ 2						
TOTAL: ____ / 40

Chapter 7

Topic 1

Visual Literacy

Entrepreneurial Awareness

By the end of this lesson, you should be able to:

- Understand how to make a profit from products that are sold
- Understand how to create a budget and how to price products.
- Understand what profit margins are as well as selling techniques.
- Know where to sell your end products.
- You'll watch a video on a walk about in a art gallery and explain to learners that this is necessary for them to go to this excursion for developing porpoises.

<https://www.theteachertoolkit.com/index.php/tool/gallery-walk>

7. Entrepreneurial Awareness

7.1 Entrepreneurial skills

- In learning how to budget, learners need to get into the habit to write everything out.
- When learners are familiar with identifying patterns, and get up close and personal with the reality of what they earn versus what they want to buy, they will be able to make better financial decisions.
- Often crafters who start to turn their craft into a business neglect to pay themselves a fair wage for their time or misjudge the amount of time it takes to create a piece from start to finish.
- Using a formula to calculate your price will give you a good starting point for what your labour is worth.

7.2 Ordering online

- When shopping from other overseas companies the delivery time may take a little bit longer.
- Choose and validate the company before you start shopping, because some online shopping sites might be schemes or fraudulent.
- Find the product you wish to buy.
- Keyword search boxes are located on nearly every page of the website.
- Add to cart.
- Pay online with your visa card.
- Checkout.
- Wait for up to 14 days for delivery when shopping online in South Africa.

7.3 What is gallery etiquette?

- Don't touch any artwork.
- When looking at an art piece, stand and evaluate the art piece from a distance.
- Do not make rude public comments.

Activity 7.3.1

- Visit a crafter or artist or let one of these creative people visit the school to come and tell learners what happened in their lives before they turned professional.
 - Interview the artist or crafter.
 - Write down a few sentences about the artist and make a mood page in your art diary on crafting or art direction you would like to follow when finishing up schooling.
 - Collect pictures from the gallery and paste them into your workbook as evidence of going on the excursion.
 - Write a few sentences on your experience or give feedback through a tell-and-show activity.
 - Go to an art gallery, do a walkabout and fill in the form below.
 - Write down the questions and answer the questions in your workbook.
-

1. Did I adhere to the rules of the art gallery?
2. Did I choose an art piece, posted a picture of this art piece, and evaluated the Art piece by using Art Elements and Design Principles?
3. How did the art piece fit into the exhibition?
4. How is the object valuable? Give your own opinion.
5. Research what copyright means? Find the answer from the internet and write a few sentences on copyright.

When going to the art gallery remember the following:

- No touching and no running.

Fill in the checklist when completing your walkabout in the art gallery.

Criteria	Tick List
I adhered to the rules of the art gallery.	
I chose an art piece and evaluated an art piece around Art Elements and Design Principles.	
How did the art piece fit into the exhibition?	
How will it look with the other material in the exhibition?	
Is the object valuable, fragile, or copyright protected?	

7.2 Calculating cost per product

The sales price must be equal to or greater than the product cost per unit to avoid losses.

Product Cost

Product Cost Formula = Direct Labor + Direct Material + Factory Overheads

<https://cdn.wallstreetmojo.com/wp-content/uploads/2019/06/Product-Cost-2.jpg>

Many professional crafters use a rate of R150 to R250 per hour to calculate their labour costs.

Suggestions on how to cost your product so that you will be able to sell, buy new stock, and make a profit.

- Cost of supplies + R150 per hour time spent on completing one article.
- Cost of supplies x 3 on a product.

For example, if you have determined the cost to purchase supplies to make one unit of your product is R20 and it takes you a half-hour to complete it, then your formula would look like this:

$R20 + R75 = R95$ - Time spent to make the product.

$R20 \times 3 = R60$ - Cost of the suppliers

$R95 + R60 = R155$ - That the item needs to be sold for

While it may need some modification as you find your target market and observe the market for your product, it is a good place to begin when determining your starting price. You can adjust your costs due to the popularity of selling it and your profit margin will go up but there is sometimes a golden rule to follow.

Keep overheads low, productivity high, and research where you can save money and where you buy the products from.

COSTING YOUR PRODUCT		
Cost on Time spent to create your product	Cost of suppliers where you bought products one by one	Total costing

Term test set by educator on work learnt during this term.

Chapter 1

Topic 1

Visual Literacy -Safety in and around the classroom

By the end of this lesson, you should be able to:

- Understand the basic rules of the classroom and safety measures from term 1 and 2.
- Understand the new safety measures and potential dangers in an art classroom
- Take notes on the most important aspects.

NOTE:

Do not write, draw, or colour in this textbook because other learners need to use this book next year as well.

1. Safety in and around the classroom

1.1 Safety First

- There have been many great artists in history who embodied the belief that art is worth dying for.
- Of course, this usually refers to the process of making great art in the face of political or social oppression.
- Nobody ever celebrated the artists who forgot to open a window for proper ventilation.
- The process of making art is an important part of human society, but it can also come with its risks.
- From casting a sculpture in molten bronze to conducting a simple sketch in graphite, artists should be aware of the risks of their craft and take proper precautions to protect against them. Let's review four basic procedures to help us all think about safety.

1.2 Know Your Materials

- Artists deal with several materials in their projects, most of which are not things the human body is naturally exposed to.
- Why do you think murals survived for thousands of years?
 - It's because the artists used a highly durable material that could withstand the elements: lead-based paint. Without knowing the risks of that material, a number of those painters suffered and even died of lead poisoning.
- Artists used these materials for a reason, and many dangerous materials are still great for art.

- In most cases, goggles, masks, and rubber gloves will protect you from dangerous materials.

1.3 Storing Materials

Many paints, sealants, will release noxious fumes. If they're not stored properly, well-ventilated spaces away then tragedy could strike.

varnishes, glazes, etc.,

generally in cool and from other materials,

This same applies to the disposal of materials.

Oily rags, for example, are some of the top culprits in workshop fires.

Artists don't always think that a pile of used rags could be dangerous, but the fumes from the rags compound and can burst into flames.

These rags should be stored in an airtight metal container.

1.4 Know Your Tools

- Research your tools and ensure that you're fully trained in how to use them.

-In the simplest case, tool mismanagement could result in a pretty nasty paper cut.

-Besides knowing how to use your tools properly, be sure to wear safety equipment.

-Again, in most cases, goggles, gloves, and masks will be sufficient, but other tools may require fire and chemical-resistant aprons, helmets, and even safety harnesses.

Activity 1.4.1 Create your safety sign.

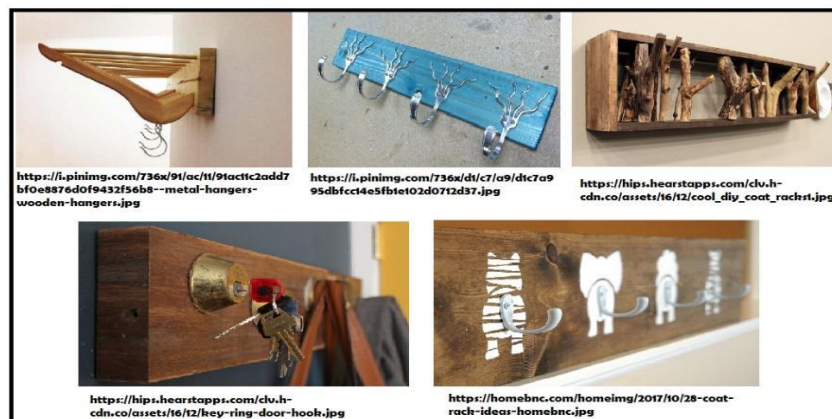

Observe the following:

- Wording
- Size of lettering
- Colours of images

Activity 1.4.2

Brief: Creating a hanger for hanging your apron, art portfolio, and mask.

- Use recycled material to create this wall-hanging product.
- Research some coat hanger ideas.
- Draw and plot out how your hanger should look like.
- Plan before you start and create a functional end product.

Chapter 2

Topic 1

Visual Literacy

The visual art diary/portfolio

By the end of this lesson, you should be able to:

- Create your own front cover page using your own uniqueness and creativity.
- Keep your portfolios safe.
- Understand plagiarism.
- Create your front cover page and first few pages in your art portfolio.

Watch the following video on YouTube to understand the portfolio:

<https://www.youtube.com/watch?v=CHCjbcfsqp0>

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year

2. The visual art diary/portfolio

2.1 What is a visual art diary?

- A visual journal works almost like a diary.
- It is also a display window of yourself and your art.
- Use an old story book (matt paper works best).
- You can paste, paint, draw or write if your art is the focal point of the page.
- It usually works well if you use a double page for each topic.
- In some instances, it looks good if the printing still shines through the artwork, but in other instances, it is better if you cover the printing with paint before you start with your artwork.

Here follows a list of examples you can use to

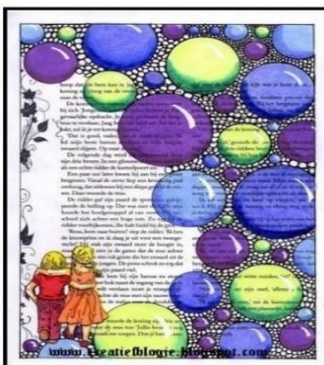

start your journal:

- Name and surname
- Family tree
- Who am I?
- Family Dynamics
- Good traits
- Bad traits
- What do I believe in?
- Hobbies and sport
- Do at least one double page per day.
- You can also consider topics like “How to do
- I feel today?”, “My best friend”, “Today’s good deed”, etc.
- Remember and recap Term 1 work.

Activity 2.1.1

- Decorate the front cover page of your art diary/portfolio.
- Be innovated and creative.
- It needs to show off your personality and your unique style.

Chapter 3

Topic 1

Visual literacy

Art Elements and Design Principles

Art Elements

1.1 Lines

Organic vs. Geometric Lines

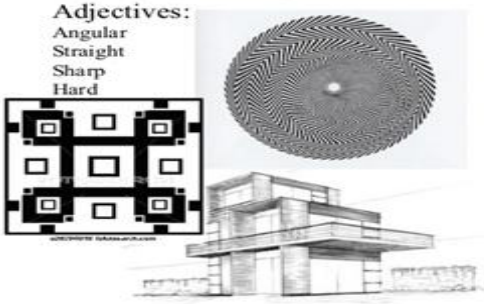

Organic lines are lines that imitate the lines and shapes found in nature.

Adjectives:
Smooth
Curved
Flowing
rounded

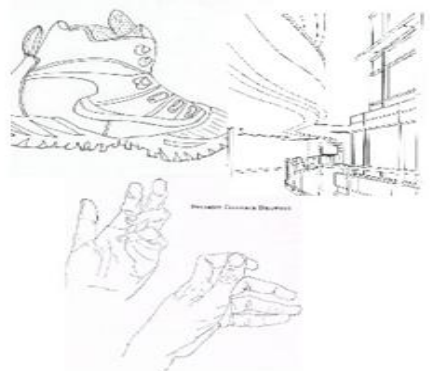

Geometric lines are lines with hard edges and angles that replicate lines found in man made objects or geometry.

Adjectives:
Angular
Straight
Sharp
Hard

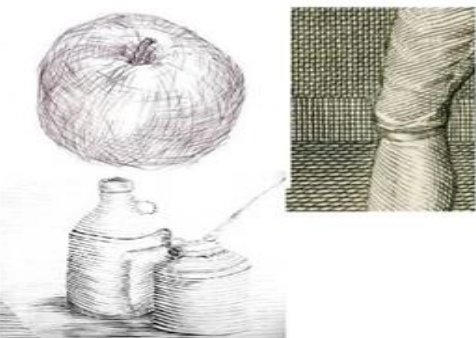

Contour and Cross Contour Lines

Contour Lines are lines that describe an edge.

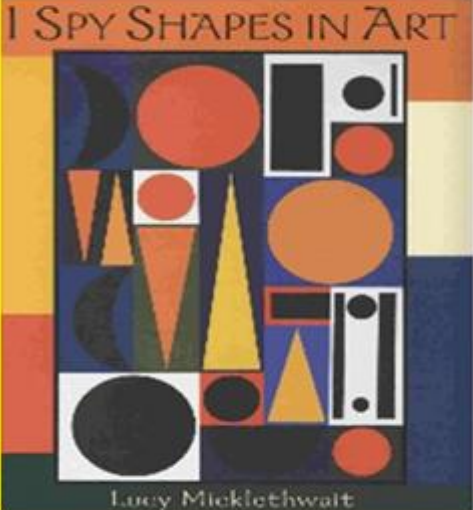

Cross Contour Lines are lines that describe surfaces, texture, form and volume.

1.2 Shape

Shape

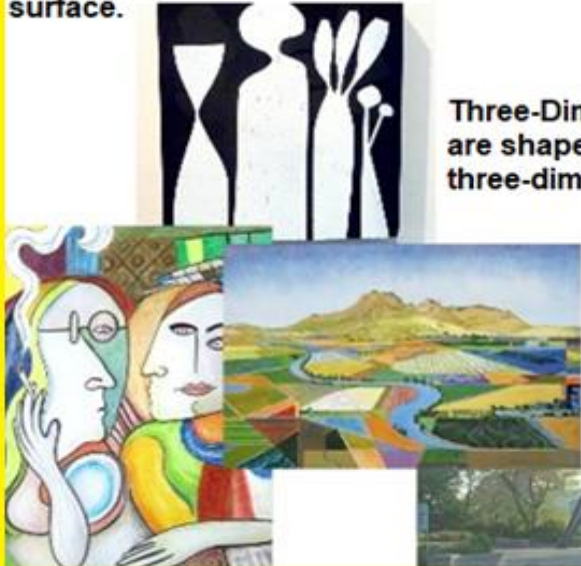

Shape is an inclosed space.
Space is created by inclosed line or the difference between one or more elements of art for example value, colour or texture.
Shape is measured by height and width only.

Shape may be possitive or negative; organic / biomorphic or geometric.

They are used in two - or three-dimensional work.

2D and 3D Shapes

Two-Dimensional Shapes
are shapes drawn on a flat surface.

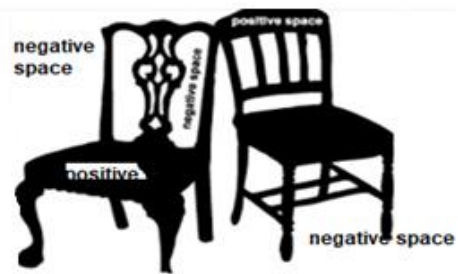

Three-Dimensional Shapes
are shapes created in real or three-dimensional space

Positive and Negative Shapes

Positive Space

Objects or things that occupy the foreground in a 2D work of art or they are the parts of a 3D sculpture.

Negative Space

It is the shapes that exist between positive shapes or spaces.

These shapes become the background.

Negative shapes mimic the positive shapes and are important in creating a successful work of art as the positive shapes.

Organic and Geometric Shapes

Like organic lines, organic shapes are shapes that mimic shapes found in nature.

Geometrical shapes

They are also like geometrical lines and mimic man-made shapes and generally have corners and flat sides.

2.3 Form

Form

Form are objects that has height, width and depth

The figures show here are two dimentional drawings of forms.

Forms can be drawn on a two dimentional surface but these drawings are not actually forms.

Three dimentional forms exist in real space and have actual height, width and depth.

One can walk around it and see all angles

The image contains several illustrations and photographs of forms. At the top, there are four 2D drawings of basic forms: a purple cube, a purple rectangular prism, a grey cylinder, and a grey cone. Below these are three photographs of 3D sculptures: a bronze sculpture of a horse, a bronze sculpture of a reclining figure, and a bronze sculpture of a head.

Organic and Geometric Forms

Like line and shape, organic forms mimic natural lines and shapes while geometric forms contain straight lines and angles found in man made structures.

2.4 Texture

TEXTURE

Texture is the roughness or smoothness of a surface.

Texture can be real, tactile e.g. sandpaper, or visual texture e.g. a drawing of feathers

2.5 Colour

Color is the light we see reflected back from an object. It can affect the mood of a piece and add another dimension to an art work. Color consists of three properties:

Hue, the name of the color. Ex. Red or red-orange.

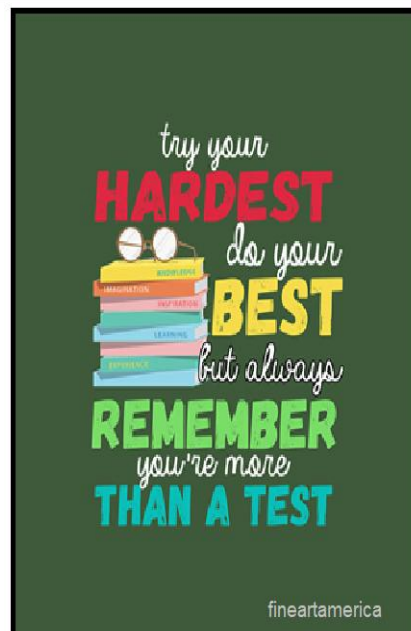

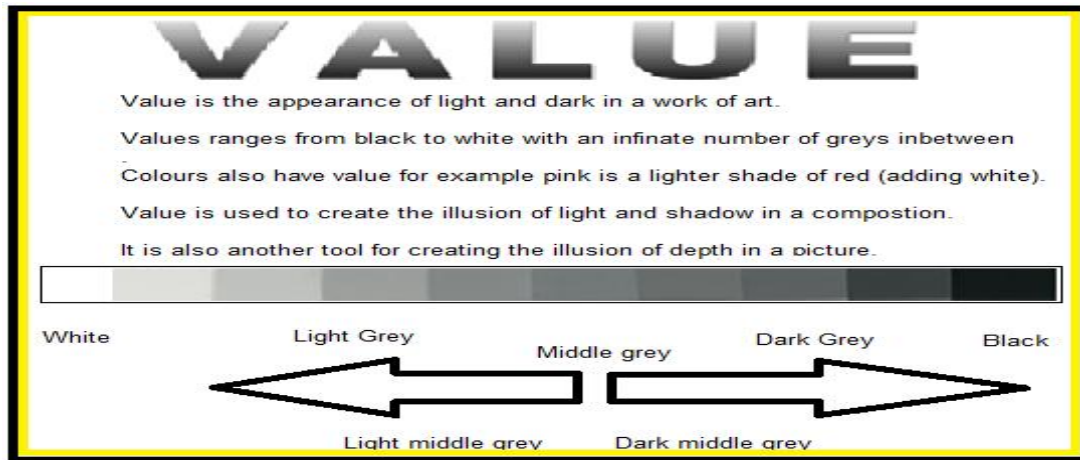

Saturation, how bright or concentrated the color is.

Value, how light or dark the color is. The colors in the color wheel get lighter as they get closer to the wheel's center.

The color wheel is the basis of color theory: The theory that explains which colors will result when different pigments are mixed.

2.6 Value

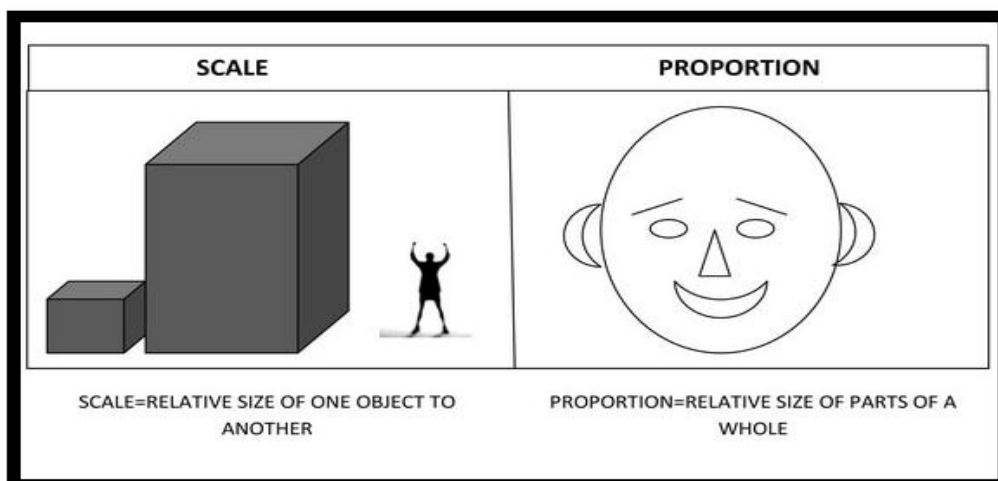

Design Principles

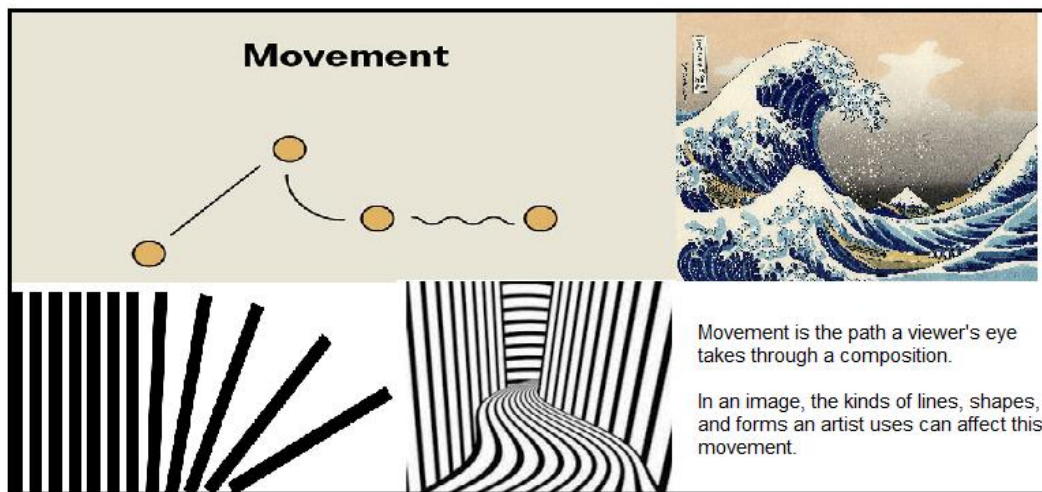

- Your teacher will hand you the formal activity worksheet. Do the activity and hand in to your teacher.
- He/she will mark the work and hand it back to you.
- After you receive it back, you need to paste the test in your book and do corrections on each question you did wrong.
- Your parents need to sign this test.
- Failing in doing so, you have not adhered to the classroom rules.
- Do not write in this book as other learners need to use this book again.
- If you did not achieve you did not fail but you need to try harder, so learn and try your best.

2. Design Principles

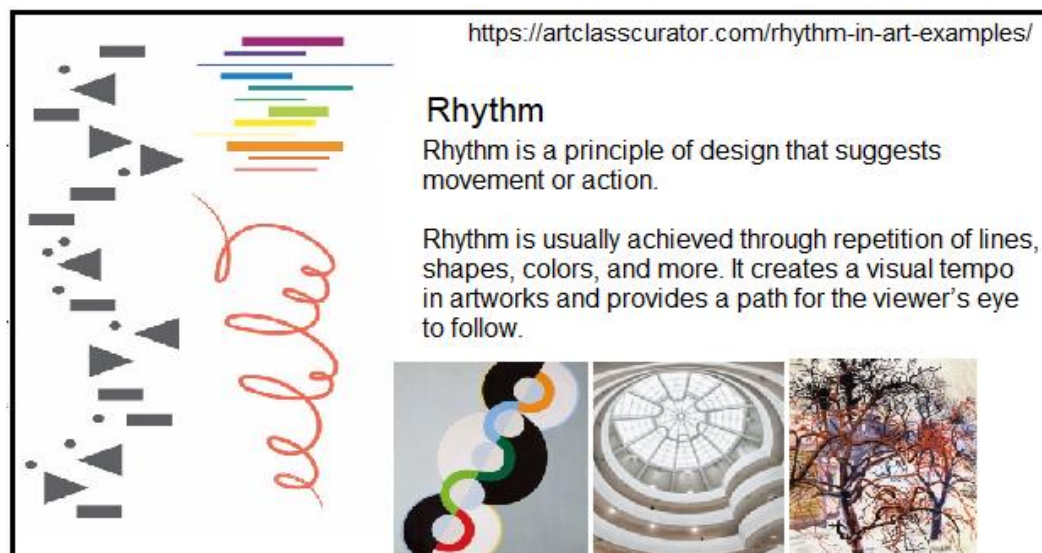

2.1 Proportion

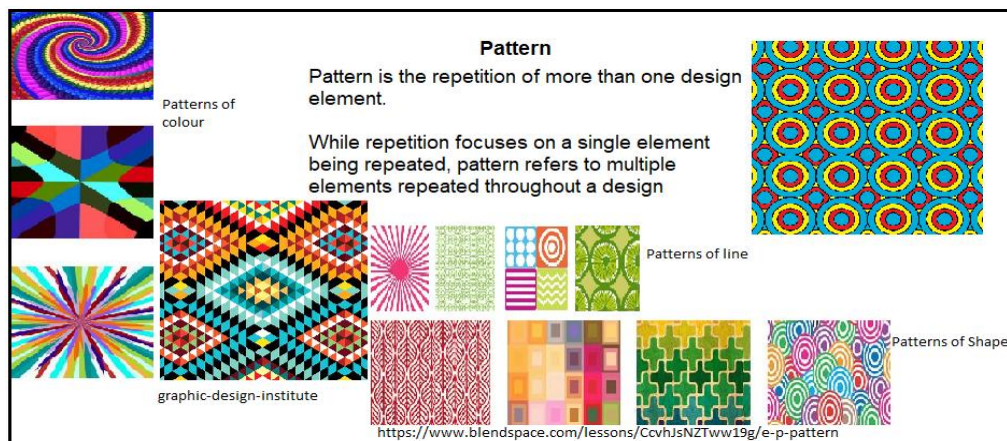

2.2 Movement

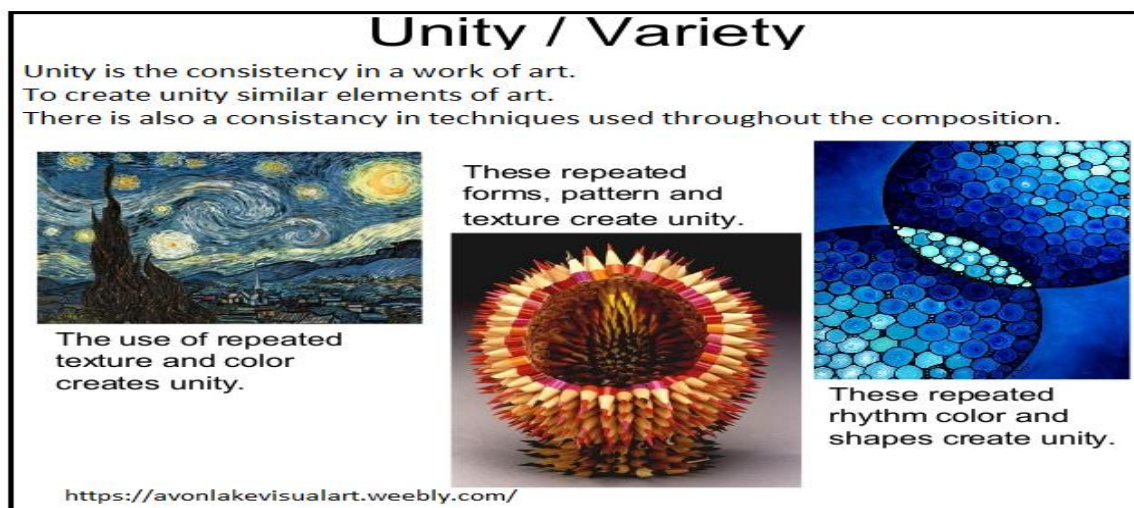

2.3 Rhythm

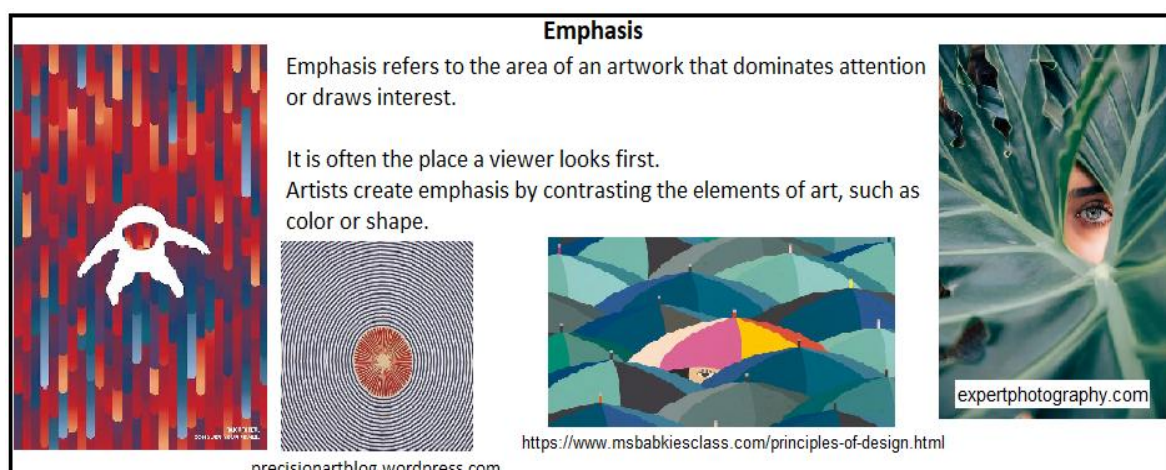

2.4 Pattern

2.5 Unity

2.6 Emphasis

2.7 Contrast

Contrast

Contrast refers to the arrangement of opposite elements and effects.

For example, light and dark colors, smooth and rough textures, large and small shapes.

Contrast can be used to create variety, visual interest, and drama in an artwork.

<http://teresabernardart.com>

www.artsper.com

www.artranked.com

www.artranked.com

Formal Task 2

By the end of this lesson, you should be able to:

- Your teacher will hand you the formal activity worksheet.
- Do the activity and hand in to your teacher.
- He/she will mark the work and hand it back to you.
- After you receive it back, you need to paste the test in your book and do corrections on each question you did wrong.
- Your parents need to sign this test.
- Failing in doing so, you have not adhered to the classroom rules.
- Do not write in this book as other learners need to use this book again next year.
- If you did not achieve you did not fail but you need to try harder, so learn and try your best.

NOTE:

Do not write, draw or colour in this textbook-other learners need to use this book again

2.7.1

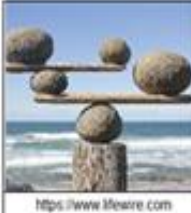

(12)

Design Principles

Draw an example of each of the principles in the blocks below. After completing the drawings, explain in a sentence why it is important. (8)

Emphasis	Unity	Pattern	Focal Point	Balance
---	--	--	--	--

Identify the following Design Principles and write it down underneath the picture.

 https://www.amblyme.com/	 https://www.lifeatre.com	 https://vsscom.wordpress.com	

2.7.2 Match the Design Principles with the correct wording on the right column. (7)

Match the Design Principles with the correct wording.

Pattern	Opposite elements are arranged together. Their arrangement can still be appealing.
Contrast	All parts of the image work together to be seen as a whole.
Unity	It is a design in which lines, shapes, forms or colours are repeated.
Emphasis	Ties a composition together and help the composition make sense as a whole piece of art.
Scale	It is achieved when opposite elements are arranged together.
Variety	It is how an artist or designer creates a focal point in their work.
Harmony	The size of a whole object in relation to another whole object. In the art different effects is will give perseption of size.

2.7.3

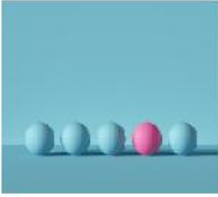

Design Principles

Match the Design Principle with the picture.
Choose the correct word from the wordbox and write it down in the provided space.

Repetition Movement Emphasis

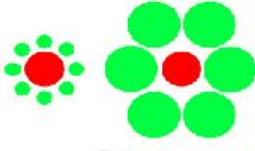

Balance Contrast Unity

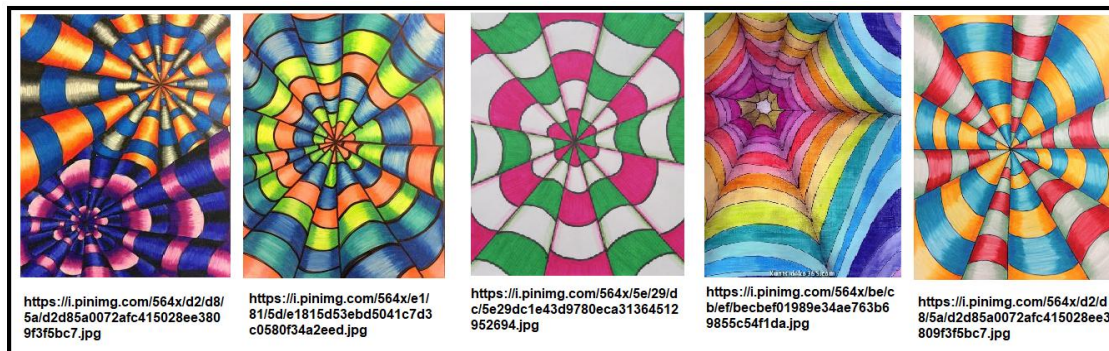

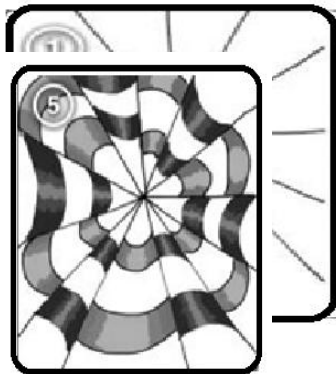

2.7.3 Formal Task - 3D Cone drawing

Materials needed

- Art diary/portfolio or an A3 page that was cut into a perfect square
- Grey pencil
- Black thick permanent marker to do outlines with
- Colouring pencils or pastels

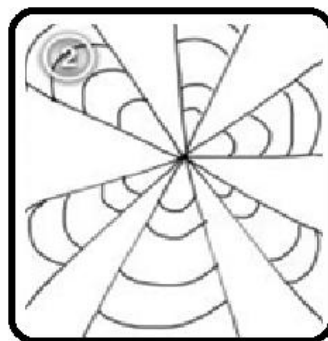

After completing step concentric curved lines curve within each “slice”

Step 1

Draw six straight lines with a pencil that intersect at the same spot.

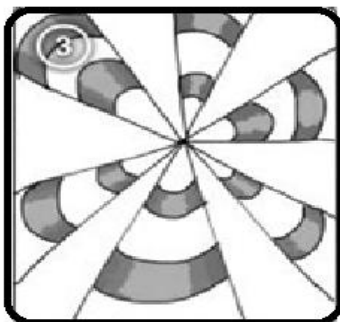

Draw another six straight lines that are drawn in between the previous six lines.

You need to have twelve straight lines in total.

Step 2

one, draw a series of alternating the direction of the of the cones.

Step 3

Label every other slice with a “B” lightly in pencil to mark that space in a different colour or if you only want in two colours you are permitted to do so.

This will help to speed things up and will reduce any potential mistakes while using your black permanent marker when you want to trace the outlines.

Study the picture above and now colour each “B” the You may vary the colours from

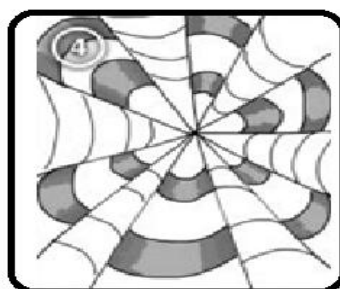

same colour in one line.
one row to another.

Step 4

In each alternative cone to create an optical

Step 5

Start colouring

you need to draw curved lines illusion.

Rubric Total: 20	 4 - 5	 3	 2	 1
On Task: I used my time well. I was focused and on task.				
Composition: The art elements are balanced and work well together.				
Creativity: My art is unique and shows my own ideas. I was creative.				
Work quality: My art is carefully made. I paid attention to details.				

Reflection

Indicate by ticking in the blocks above where you think you needed more help and where you did great.

Formal assessment mark distribution for Art Elements and Design Principles.

Art Elements	Test	15
Design Principles	2.7.1	12
	2.7.2	7
	2.7.3	6
Formal Task 3	Rubric	20
	Reflection	5

Chapter 3

Topic 1

Visual Literacy - Careers

By the end of this lesson, you should be able to:

- Understand types of careers in the printing industry.
- Created notes that teacher will hand to you on careers
- Complete all activities either in your workbooks or art dairies.

NOTE:

- Do not write, draw or colour in this textbook because other learners need to use this book next year.

3. Careers

3.1 Printing

- Jobs in the printing industry have a wide range that one can choose from.
- One has the opportunity to work in different sectors.
- Some of these sectors in printing include:
 - Large-volume printers of books, magazines, newspapers, catalogues, etc.
 - Stationary, labels, flyers, business cards, etc. printers
 - Packaging printers and assemblers
 - Printers that specialise in printing on non-paper materials, such as metal, plastic, fabric, and wood.

3.2 Pre-Press Jobs

- These roles are responsible for the work required before the printing process begins.
- They are perfectly suited to those who are creative and have an interest in art and design.

3.3 Art worker or Mac Operator

- The Art worker in the print industry takes creative design concepts from a client's brief or the designer to make the file ready for print.
- This involves fixing colours, typography, and inconsistencies in the digital file.
- The day-to-day responsibilities of an Art worker include working with clients, graphic design, using Adobe, producing visuals, sticking to brand guidelines, and providing colour proofs.
- **These Key skills required include:**
 - Ability to work with clients
 - Extensive experience using Adobe or equivalent software
 - Experience working on print-ready files
 - Attention to detail for accurate proofing of print-ready work
 - Ability to understand a brand or client's guidelines
 - Being able to be under pressure and to tight deadlines.

3.4 Printing Process Jobs

- These jobs help in creating a printed product.
- These jobs are manual, but the people doing them need to solve creative problems and give support.

3.4.1 Machine Printer

- Machine Printers help in the manufacturing process of a printed process.
- After receiving a customer's requirements and specifications, they are responsible for loading the printing press with paper (or another material) and once a test run has proved successful, start the printing process.
- Most Machine Printers are trained in several different printing methods, depending on the materials they will be printing on.
- As part of the job, Machine Printers will match colours, restock ink levels, programme job data into control units, carry out quality control, and carry out basic maintenance of their machines.

- There are no formal qualifications needed to be a Machine Printer, but GCSEs in art and design, ICT, Maths, and English, would be beneficial.
- Some people start their careers in Machine Printing with an apprenticeship.
- Some key skills needed for the role include:
 - Being able to work with our hands.
 - Working independently and as part of a team.
 - The ability to solve problems and show initiative.
 - Good time management.

3.4.2 Print Finisher

- Print Finishers are responsible for turning printed materials into the finished product the client or customer requests.
- With some companies, a print finisher will operate large machines that perform several actions, from cutting the pages to binding the finished book.
- Whilst other companies will have smaller machines, each performing different tasks in the print finishing process. Print Finishers can work with several printed materials, such as books, catalogues, and glossy magazines.
- **The skills required to be a Print Finisher include:**
 - Excellent attention to detail.
 - Working well with your hands,
 - The ability to work accurately under time pressures.
 - The will to retrain when printing techniques change.
- **Packaging Jobs**
- Packaging is one of the key areas of the print industry, and below are some of the most common packaging jobs that we recruit for.

3.4.3 Gluer Minder

- A Gluer Minder is responsible for operating the gluing machines that (sometimes fold) and gluing flat printed products to create cartons, boxes, etc.
- This includes setting up the gluing machine, operation, and clean up.
- Key responsibilities of a Glue Minder include efficiently running the machines following targets, quality control and maintaining accuracy, ensuring that the machine area is safe, as well as adhering to all health and safety procedures.

Desired skills include:

- Attention to detail
 - Ability to work with minimal supervision
 - Being able to handle several different responsibilities.
 - Meeting deadlines under pressure.
 - Good communication skills.
 - Packaging Technologist
-
- Responsible for the design, development, and manufacture of a wide range of packaging products, Packaging Technologists can work in several different industries, including the likes of cosmetics, food and drink, cleaning products, toiletries, etc.
 - The primary task of a Packaging Technologist will include creating new packages to meet the requirements and specifications of a client's brief.
 - To complete this task successfully they will produce samples, run trials, control quality standards, and negotiates with suppliers.
 - There are a few ways to get into a career as a Packaging Technologist, including through an apprenticeship or school leaver training programme.

- Graduates will usually require a degree in an appropriate engineering, scientific, or technical subject, such as mechanical engineering, chemistry, or graphic design.
- Some key skills required for the job include:
 - Design and technical skills
 - The ability to problem-solve and innovate
 - Excellent communication skills
 - Attention to detail,
 - The ability to work well in a team.
 - Senior Management Jobs
 - Those in senior management roles will be responsible for overseeing the work of several different departments, to ensure that the company is producing the best-printed products for their clients.

3.4.4 Senior Account Manager

- A Senior Account Manager for a printing firm will be responsible for overseeing and providing day-to-day support for all client projects, to ensure that they are in line with the briefs.
- The role is critical to the successful running of a printing company as they liaise with various departments, including design, production, and packaging, right from receiving the client's brief through to delivery.
- As a brand ambassador within the company, the Senior Account Manager is also responsible for keeping clients up to date with the progress of their projects regularly.

- Plus, they have plenty of administrative tasks, including budgeting, invoicing, and future client planning. A Senior Account Manager will need the following skills:
 - The ability to multi-task to keep track of multiple projects at one time.
 - Great organisational skills
 - Excellent communication and team management skills.
 - Being able to work under pressure and tight deadlines
 - Manage workload effectively

3.4.5 Design Manager

- In the print industry, a Design Manager will be in charge of a company's design function, providing the opportunity to be innovative in the creation of new designs.
- A key role in the packaging industry, a Design Manager will be responsible for overseeing a team of structural designers, producing structural designs from concept, and using computer-aided design (CAD).
- Plus, they will take work with clients to find the perfect design solution and review processes and materials for cost reductions.
- The skills you need as a Design manager include:
 - Previous experience as a structural designer.
 - High level of proficiency using CAD
 - Management experience
 - Excellent attention to detail.
 - Great communication skills and the ability to build strong business relationships.
 - Ability to work in a creative design team.

Activity 3.4.5.1

By the end of this lesson, you should be able to:

Make summary notes on the careers in your class workbooks.

Complete the tasks given to you by the educator

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

➤ **Choose one of the printing careers.**

Write down the name of the career and write down what kind of skills you need to have to be able to do the career you chose.

➤ **Choose a career that fits the best with the picture about a career.**

Use coloured pencils or pens to draw a line from the words to the pictures.

Extended opportunity

- Collect pictures from magazines on careers.
- Cut out the pictures and make a mood page on careers in your art dairies.
- Write short sentences on the pictures you chose.
- Present it In front of the class and tell your classmates why you decided on this career and why you think you will be able to do this kind of job.

Match the words with the pictures

Painter

Art curator

Baker

Artist

Graphic Designer

Art Director

Art Tracher

Chapter 4

Topic 2 - Create in 2D

By the end of this lesson, you should be able to:

- Understand the content and concepts on composition in art.
- Make notes on the most important aspects of composition in arts in your art workbooks.
- Use a marble to enhance the skills you will be practicing on a marble in your art diary.
- Complete all activities
- You will be able to understand the videos and re-watch the videos at home or in class on your cell phone

<https://thevirtualinstructor.com/blog/how-to-draw-a-realistic-marble-with-colored-pencils>

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

4.1 Composition in art

4.1.1 Definition - Composition in a work of art or craft refers to the arrangement of design elements to create an image – a picture.

4.1.2 Why is composition so important?

Composition is important because it shapes the viewer's experience of the artwork.

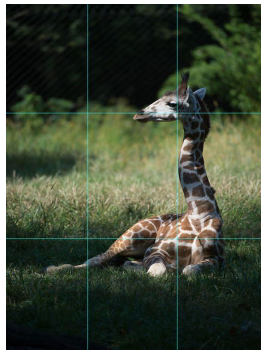

Composition is a big part of what makes a piece eye-catching and dynamic, calm and soothing, disorienting, etc.

4.1.3 Here are 7 Rules For composing a Better composition:

- The Rule of Thirds. / The rules of odds
- Symmetry.
- Leading Lines.
- Leading and Head Room.
- Depth.
- Size Equals Power.
- Break the Rules.

4.2 Rules of thirds

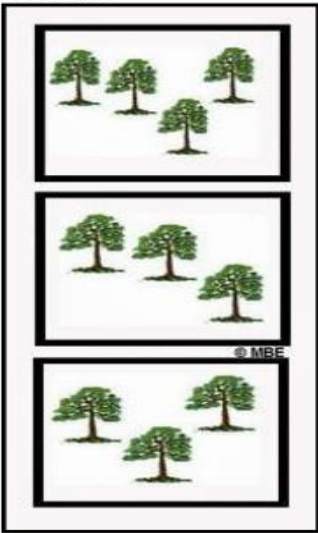

- Rule of thirds is a guideline commonly followed by visual artists.
- The objective is to stop the subject(s) and areas of interest such as the horizon from dividing the image, by placing them near one of the lines that would divide the image into three equal columns and rows, ideally near the intersection of those lines.
- Note that the horizon falls close to the bottom grid line and how dark areas are in the left third of the overexposed area in the right third.

4.3. Rule of odds

ART COMPOSITION RULES

The Rule of Odds
One of the simplest ways to create a composition more dynamic is to have an odd number in the composition e.g 3, 5 or 7 rather than an even number e.g 2, 4 or 6. This is called the rule of odds.

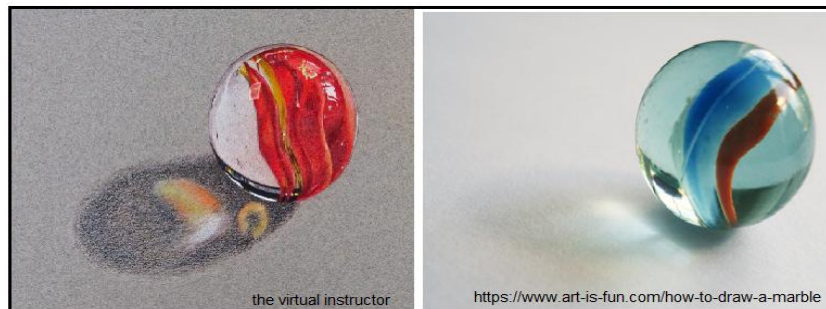

<https://image.slidesharecdn.com/artappreciation-151228054557/95/art-appreciation-23-638.jpg?cb=1458576388>

4.3.1 Formal Task

Rule of Odds - Brief: Drawing a marble

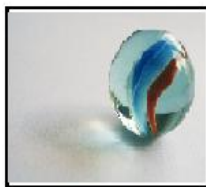

One Point perspective drawing activity

Materials needed:

- * One A4 page
- * 2- B pencil
- * A ruler
- * Pair of scissors
- * Sellotape

Step 1

- * Teacher will hand out a photo copy of a marble drawing on a A4 page.

Step 2

- * Flip the marble drawing over so that it faces the table.
- * Use the 2-B pencil and colour the back of the page.

Step 3

- * Flip back the page and secure the picture of the marble by placing it on the second A 4 page and sellotape the edges.

Step 4

- * Use a HB pencil and trace the marble picture onto the white page.
- * Trace the shadow the marble makes as well.

Step 5

- * After tracing the marble picture, remove the picture from the bottom A4.
- * The outlines of the marble picture will appear onto the page.

Step 6

- * Always start with the lightest colour first.
- * Try to use your eraser to make the outlines almost unseeable before colouring with the white pencil

Step 7

- * Use Denim Blue to lightly colour in the diagonal blue strip in the marble.
- * Remember to use a gentle touch!

Step 8

- * Use red for the strip that runs parallel to the blue strip.
- * Dont press to hard and keep colours evenly spread.

Step 9

- * Use a darker red to place some shading and even colour lightly over the previous red.

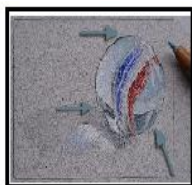

Step 10

- * Use a very dark blue or purple on either side of marble as shown, and also a little bit in the marble's shadow.

Step 11

- * Identify the darkest areas and draw them in with Cool Grey.
- * Be careful when you apply dark colours, because they are hard to erase.
- * Add them lightly.

Step 12

* Add a touch of Jade Green to the top, right bottom and left bottom of the marble, as shown.

* If you don't have the green, mix green with grey on top.

Step 13

* Add more Denim Blue or light blue to the diagonal stripe in the middle of the marble.

Step 14

* Layer a different tint of Blue over parts of the Denim Blue in the marble's diagonal stripe.

Step 15

* Add a touch of Mediterranean Blue or any other blue or even mix bright green with the blue or purple will work as well to the diagonal stripe.

Step 16

* Keep on adding different tints and shades of blue.

* You might need to start pressing a bit harder at this stage, since by now you have worked up several layers of coloured pencil.

Step 17

* Deepen the colour of the red diagonal stripe by adding Tuscan Red or using a different colour e.g., dark orange and even purple.

Step 18

* Make the red diagonal stripe more vibrant by layering it with different reds and oranges.

Step 19

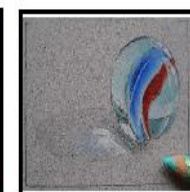

* Add white to the lightest areas of the red stripe to create highlights.

Step 20

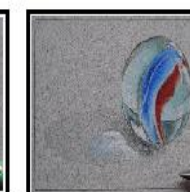

* Use Poppy Red for the final touch-ups in the diagonal red stripe.

* The diagonal red stripe is now done!

Step 21

* Add Light Green to the left and right sides of the marble to create a sense of translucency.

Step 22

* Use a very dark grey to bring out the darker areas in the marble, as well as in the shadow.

* Don't worry if it seems too dark in some places – we'll lighten it up and smooth it out in the next step.

Step 23

* Apply green over the dark grey, that you applied in the previous steps in both the marble and the marble's shadow.

Step 24

* Apply white over the green.
* The green created more depth, so adding the white will bring back more of the translucency.
* Be sure to add White on the bottom left part of the marble.

By now, the surface of the paper feels slicker. All these layers of colored pencil have made the paper have less "tooth". You'll need to press harder, but be careful not to press too hard.

Step 25

* Add a hint of light aqua on the top and right of the marble.

* See how it's making the marble look even more round and solid.

Step 26

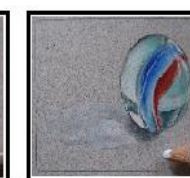

* Apply cool grey to the shadow and the marble's darker spots

* After that, go over the same areas where you applied the cool grey with another light coat of green, which will blend the grey more smoothly with the rest of the marble.

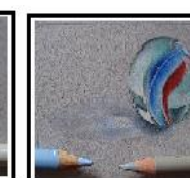

Step 27

* Add Warm Grey to the marble's shadow.

Step 28

* Use white and grey to go over the lines and add layers of different with to enhance the picture.

Step 29

* Keep on going adding another layer of light and dark greys and also use the blue colours on top of the other blues so it will make the marble much more transparent. Pressure is needed but remember not to press too hard.

Rubric

Creating a 2D marble picture to enhance the rule of thirds

Chapter 5

Topic 3 - Create in 3D

Beading

By the end of this lesson, you should be able to:

- Make short notes in your classwork book on bead history
- Understand content, concepts and skills that you will be gaining in creating the paper beads.
- Know which tools to use to create paper beads
- Complete all activities and tasks given
- You will be able to understand the videos and re-watch the videos at home or in class on your cell phone

<https://www.youtube.com/watch?v=XpV-57rtk08> <https://www.youtube.com/watch?v=73FgNiDR9p4>

<https://www.youtube.com/watch?v=uCatqDiuydg>

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

5. Paper beading

5.1 Where did paper beads originate from?

- Paper beads are the oldest craft done on the African continent.
 - Women of the villages, many living in poverty, generally make the paper beads from magazines that they find.
 - Making paper beads is a traditional craft that goes back, in England at least, as far as the Victorian age.
-
- Young ladies would gather socially in their dining rooms, whilst making handmade paper beads from scraps of wallpaper rolled on knitting needles.
 - Paper beads were used to make door curtains as room division.

- In the 1920s to 30s, this practice made a comeback, but this time, the beads were a bit smaller.
- Victorian women used newsprint and other printed papers to craft smaller beads.
- They would apply perfume on the beads to create scented paper beads.
- Since perfumes were a bit expensive during those times, scented paper beads were a way for them to smell good without having to worry about using up their perfume bottle.
- They would then polish the beads bees' wax and string them on to long pieces of thread.
- More recently artist-made paper beads have been made in companies as part of development projects in countries such as Uganda.
- This sees a move away from charitable aid towards business initiatives that provide sustainable income and development opportunities.
- The techniques used for African paper beads remain largely the same as used in Victorian times, but with scrap paper from printing companies and paper recycling markets, rather than wallpaper samples.

- The most prominent enterprise of this nature is a Scottish-based company called Mzuri-beads which markets and

sells ethical Ugandan paper beads, as well as cow horn beads, bark-cloth beads, banana leaf beads, and lamp-work beads made from recycled glass.

5.2 What is a paper bead?

- Jewellery made from paper beads is a paper craft that is quite popular today.
- The art of paper bead crafting, however, has been practiced since

the Victorian age.

- Women would gather and make paper beads from leftover wallpaper. Their craft techniques were quite simple.

5.3 Making of paper beads and tools used

- **Paper** – Magazine pages, wrapping paper, wallpaper, coloured art paper, or more specialist papers such as handmade Japanese Washi paper or Chiyogami paper.

Ruler – for measuring up.

Pencil – for marking up the paper.

Straight Edge – for cutting against.

- **Craft Knife, Rotary Cutter, or Scissors** – for cutting out. If you are using scissors, you should use the longest pair available to reduce the number of cuts required along each length.
- **Self-Healing Cutting Mat** – for cutting on.

- **Soft Paint Brush** – for applying glue to the paper.

- **Glue** – for securing your rolled beads.
- Use Mod Podge, white PVA glue/wood glue.

- **Metal Skewer or Thin Wooden Dowel** – for rolling paper against.
- **Wooden Cocktail Sticks** – for holding your rolled beads when drying or when varnishing.
- **Varnish** – for waterproofing your rolled beads.
- Quick-drying marine varnish is perfect and is usually touch dry within 1 hour and ready for a second coat in 4 hours.
- Experiment with gloss, satin, matt, and antique-

col
our

ed varnishes for different finishes.

- **Polystyrene Block, a box, etc.** – For securing the beads whilst varnishing and drying. Push a cocktail stick holding

an individual bead firmly into the block.

Formal Task 1

Create in 2 D

Brief: 2D Paper Bead product

- Design a 2D paper bead bracelet or necklace, earrings, or a combination.
- Your design has to be done in primary, secondary, or monochromatic colours.

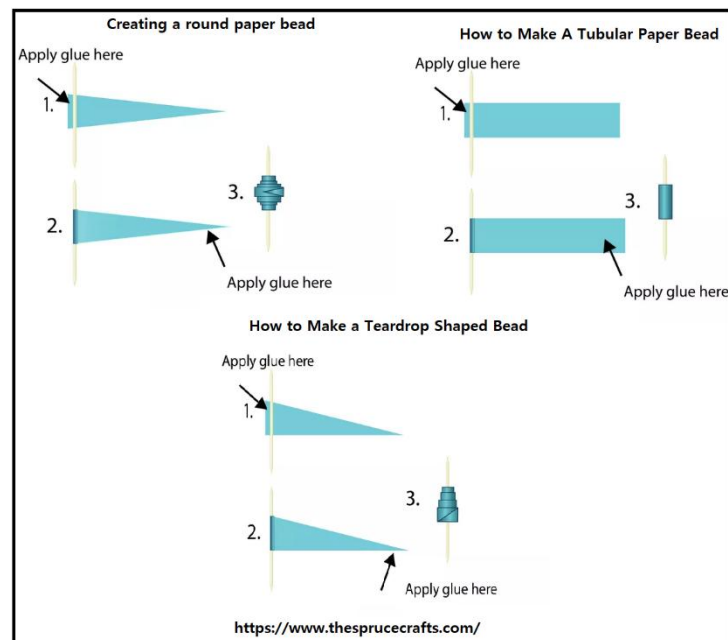

- These designs need to be done in your art diary (portfolio).
- You may create several mood pages until you are happy with what you want to do.
- Here are a few design ideas.

You may create more than one of the same products if time allows it. Here are a few lessons on how to make paper beads.

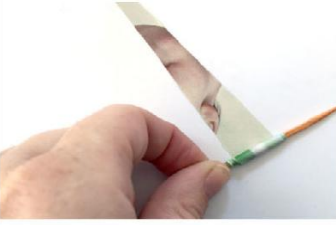

Rolling of a paper bead

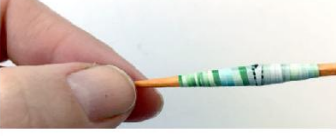

Step 1

clumsycrafter

Steps to create paper beads

- * To start you need to cut paper from the magazine into long tapered strips.
- * To do this you simply need to cut the paper into really long strips that start at about 1/2 mm wide and tapers evenly into a point.
- * Start with the side of the paper that you want to use facing down.
- * Place the tooth pick on the wide end of the paper and slowly start rolling the paper around the toothpick.
- * Keep rolling the paper around the toothpick. It should be easy and fast.
- * Once you get about two inches left, run the glue stick over the end and finish wrapping it around the toothpick.
- * You might have to hold the end for just a minute to keep it tacked down.
- * Then your bead looks finished but it's not quite done yet!
- * First slightly push it up the toothpick to make sure it's not stuck.

clumsy crafts

- * Measure a strip of paper approximately 1.9 cm wide and 30 cm long.
- * Cut out with a craft knife or scissors.

- * Measure halfway across the paper at one end and make a pencil mark.
- * This is going to be the point of the top of your bead.

- * At the other end of the paper, place your ruler and measure from one end to the midpoint.
- * Trim with a craft knife.
- * Repeat on the other side.
- * You'll notice you just cut out a very long triangle (see the picture above).
- * One of the ends will be 1.9 cm wide, and the other end will be a tip.
- * You'll start rolling from the wide end.

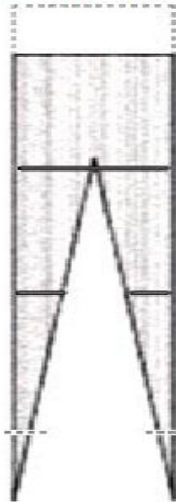

- * Place a piece of tape at the long end of the triangle.
- * Place a cocktail straw on the tape as shown.
- * It's easier to roll (I found) setting the straw a little bit back on the piece of tape.

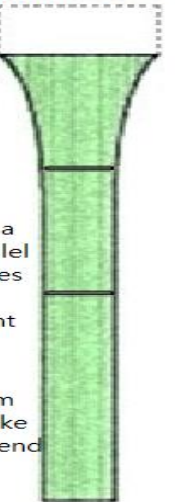

Add a rectangle of paper to thicken the bead core

Draw on a few parallel guide lines to aid alignment

Cut the tip from triangles to make more of patterned or lettered papers.

Rubric

At the end of this craft product, you were able to:	Marks allocated	Marks received
1. Identify the type of beads you wanted and drew them on The paper you selected.	2	
2. Assembled the bead and ended it off with glue.	2	
3. Created different kinds of beads using sizing, colour and Shape.	3	
4. Created a repeating patten for your necklace using 12 to 15 beads.	2	
5. Creativity: Design is unique, creative processes were Used and the learner used his ideas.	3	
6. Technical skills: Learner used a minimum of 3 or more Different methods.	2	
7. Art elements and design principles Elements were used and design principles were used.	6	
8. Craftsmanship: very clean and neat work	2	
9. Effort: - Used time wisely - Started working on my own without the need for assistance. - Completed work on time. - Created more than one item.	8	
TOTAL	30	

Reflection: Set up a reflection sheet for the learners

Chapter 6

Topic 1

Visual Literacy - Entrepreneurial Awareness

By the end of this lesson, you should be able to:

- Understand what entrepreneur skills are and how to make money with products you make.
- Create a budget and understand how to price products.
- Understand what profit margins are and the various selling techniques.
- Know and understand where to sell your end products

7. Entrepreneurial Awareness

7.1 Entrepreneurial skills

- In learning how to budget, learners need to get into the habit to write everything out.
- When learners are familiar with identifying patterns, and get up close and personal with the reality of what they earn versus what they want to buy, they will be able to make better financial decisions.
- Often crafters who start to turn their craft into a business neglect to pay themselves a fair wage for their time or misjudge the amount of time it takes to create a piece from start to finish.
- Using a formula to calculate your price will give you a good starting point for what your labour is worth.

7.2 Calculating cost per product

The sales price must be equal to or greater than the product cost per unit to avoid losses.

Many professional crafters use a rate of R150 to R250 per hour to calculate their labour costs.

Suggestions on how to cost your product so that you will be able to sell, buy new stock, and make a profit.

- Cost of supplies +R150 per hour time spent on completing one article.
- Cost of supplies x 3 on a product.

For example, if you have determined the cost to purchase supplies to make one unit of your product is R20 and it takes you a half-hour to complete it, then your formula would look like this:

$R20 + R75 = R95$ Time spent to make the product.

$R20 \times 3 = R60$ Cost of the suppliers

$R95 + R60 = R155$ - That the item needs to be sold for

While it may need some modification as you find your target market and observe the market for your product, it is a good place to begin when determining your starting price. You can adjust your costs due to the popularity of selling it and your profit margin will go up but there is sometimes a golden rule to follow.

Keep overheads low, productivity high, and research where you can save money and where you buy the products from.

Activity 7.2.1

Choose either the 2D or the 3D product that you have created and calculate the cost of your product. Use the following guidelines when working out your budget:

1. Distributors where you can buy art materials cheaper.
2. Do research on local distributors and write them down.
3. Write an email to the distributors asking about the price of their products.
4. Negotiate with the distributors on the price when buying in bulk.
5. Make a list of materials you need. Keep this as a referral point for other projects.
6. Create a budget journal to keep and record any important information that can help you throughout year 3 and carry this journal over to year 4.
7. Make a list of distributors that has online shopping options.

COSTING YOUR PRODUCT

Cost on Time spent to create your product	Cost of suppliers where you bought products one by one	Total costing

Term test

The Teacher will provide guidelines on what you need to study.

Chapter 1

Topic 1 - Visual Literacy

Safety in and around the classroom

By the end of this lesson, you should be able to:

- Understand the content and concepts on safety using clay.
- Be able to make notes on the most important aspects in your workbooks.
- The steps of doing clay work
- Complete the worksheet activity on safety.

NOTE:

Do not write, draw, or colour in this textbook because other learners need to use this book next year.

1. Safety in and around the classroom

1.1 Working with clay

- There have been known cases of **silicosis, or "potter's rot, from chronic inhalation of large amounts of free silica during clay mixing.**
- Symptoms of silicosis include shortness of breath, dry cough, emphysema, and high susceptibility to lung infections such as tuberculosis.
- This means that ventilation while working with clay is very important. Open windows, and use safety goggles and a mask that will illuminate the dust in the room.

1.2 Rules in pottery?

- Always wash the piece before glazing – bisque ware.
- Always handle your project with two hands.
- In other words, BE CAREFUL – it's your project.
- NEVER throw clay – dry or wet!!

1.3 Safety precautions

- Thoroughly wash hands and forearms before eating or smoking.
- Dust and dirt shall be removed daily from work areas by damp mopping floors and damp wiping work area surfaces.
- Damp wipe shelves at least once a week.
- Rinse out rags, cloths, and sponges and let them dry out for the next time you are in the studio.
- It's best not to let the clay dry in clumps on your tools and cleaning equipment.

1.4 Steps doing clay work

- Clay Preparation
- Actual Shaping
- Firing
- Painting and Decorating

1.5 Porcelain clay

- Polymer clay, it's **non-toxic** and does not need to be cooked or cured.
- A favourite of many artists, cold porcelain allows you to create simple projects such as this clay vase, or very intricate pieces where you can add delicate details to your sculpture.

1.6 Food safe?

- Unglazed surfaces of pieces made from midrange (stoneware) and high-fire clays may be considered food safe.
- Some glazes are soluble in the presence of certain foods.

1.7 Ceramics

- Ceramics in general considered a nonporous and nontoxic product that is often reported to be a safe material for human health.

1.8 Airdry clay

- Airdry clay is not food safe.
- Students can still create mugs, bowls, and plates with air dry clay, but they must be for decorative purposes only.

1.9 Modelling clay

- Polymer clay is not flammable, however, polymer clay can burn if the temperature is too hot. It will scorch and darken but not necessarily explode into flames.

1.10 Safety hazards

- There is a danger of accidents if clay or water can be added while the mixer is in operation.
- Bags of clay and glaze materials can be very heavy, and lifting can cause back problems.
- Hypersensitivity pneumonia, asthma, or other respiratory problems may occur with exposure to moulds growing in wet clay.
- Throwing on a potter's wheel for long periods can result in carpal tunnel syndrome because of the awkward position of the wrists.
- Hand contact with wet clay can lead to dryness of fingertips and hands.
- Moving parts of kick wheels can cause cuts and abrasions.

1.11 Precautions when working with clay

- Use premixed clay to avoid exposure to large quantities of clay dust.
- Clay storage and mixing should take place in a separate room.
- Bags of clay (and other pottery materials) should be stacked on grids off the floor for easier clean-up.
- All clay mixers should be equipped with local exhaust ventilation to remove fine silica dust particles from the air.
- Clay mixers should be equipped with proper machine guards so that they cannot be opened to add clay or water while the mixer blades are turning.
- Wear separate work clothes while in the studio.
- Choose clothes of material and design that don't trap dust.
- Wash these clothes weekly, and separately from another laundry.
- Avoid contact with clay on broken skin areas.
- Use a skin moisturizer.

1.11.1 Formal Task

Brief: Safety with clay

Your teacher will hand you this activity.

Do not answer the questions in this book.

Answer on the activity sheet and then paste it into the workbooks.

Match column A with column B and write the correct answer in column C.

Column A	Column B	Column C
1. Clay dust	A 	
2. Storage for Clay	B 	
3. Firing Clay	C 	
4. Asma	D 	
5. Polymer clay	E 	
6. Ventilation	F 	
7. Stoneware	G 	
8. Wash your hands	H 	
9. Ceramics	I 	
10. Heavy	J 	
11. Air dry clay	K 	
		10

Chapter 2

Topic 1 - Visual literacy

Careers

By the end of this lesson, you should be able to:

- Know the different career pathways available to you.
- The skills needed for the various careers
- Make short notes in your classwork books.
- Complete all tasks and activities given to you

2. Careers

2.1. Prop artist

- Prop Artists create 3D objects.
- As a Prop Maker, it's unusual to just work in one genre of performance.
- You will make props for theatre, film, TV, events, advertising, and window display.
- The heart of prop-making is problem-solving and skilled making.
- The word prop means property and is a mobile model or item that can be used by members of a cast.
- Prop makers work closely with the production designer, art director, and prop master to bring designs to life.
- They may have prop assistants, trainees, and apprentices assisting.
- Sometimes, instructions are supplied; other times, prop makers can take liberties with how to finish a prop.
- They also typically build two of every prop in case one is damaged and are responsible for instructing actors how to operate the prop.
- Every job begins with "a concept and technical drawing.

- From there, it is decided what materials are needed, what the budget is for the job, and the deadline.
- Some jobs may need to be turned around within a day, while others could take up to months depending on the detail and the size of it.
- Even once everything is approved, prop makers often go through several rounds of creation before a final prop is decided on.
- While a degree isn't necessary for prop work, a background in art, design, crafting, and/or carpentry is usually preferred.
- Prop builders have to be able to sculpt, weld, and make moulds, life cast, and vacuum form, and use plastics, wood, metals, plaster, and paint effects.
- Prop makers work in different kinds of materials ranging from metal, wood, latex, fiberglass, etc.
- These props are all different depending on the instructions for all productions.
- The props range from jewellery making to weapons, false trees and rocks and even moving models.

2.1.1 Skills needed

- The key thing to understand about being a Prop Maker is that you live in a very three-dimensional world.
- You will be replicating objects, creating new objects, and liaising with designers and directors in whatever genre you're working in.
- You're going to be the sort of person that is always fiddling with a bit of clay, foil, cardboard, slime, polystyrene, etc.
- You might have made a skeleton out of coat hangers when you were a kid.
- You will never make the same thing over and over ever again and it is fun work.
- You have to be very adaptable, have a very, very fine eye for detail and quality of outcome, and have a real understanding of three-dimensional form.
- You have to be able to draw to describe a shape and have a certain amount of art history, so you know how to make something that looks like it's from the 1920s and not the 1940s.

- You have to have a sense of humour, be playful, and be very experimental.
- You have to learn traditional skills and making, but you also have to have a playful, inventive mind to go your way with it, to find a solution to complex problems.
- You need to think outside the box and sometimes have people ready to tell you it will never work or what crazy ideas you have now but keep to your strengths and experiment.
- You might make a tree, then another tree, and then another one, but they're never the same; they've always got a different purpose in the set making you are part of.

The Lightsaber - Star Wars

The Snitch
Harry Potter and the Sorcerer's stone

The Golden Ticket - Willy Wonka & The Chocolate Factory

Task 2.1.1.1

1. Collect famous movie props pictures from magazines, posters, and Movie Tickets, the internet, etc. Use these prop pictures and create a collage in your Art diary.
2. Create a movie poster creating your movie name and drawing your Own characters.
3. Look at the movie posters below and answer the questions. Your teacher will hand you this activity enlarged. Do not answer any questions on this activity sheet.

Match the movie with the wording (genre).
Write the correct genre underneath each movie poster.

Action film	Science fiction	Comedy	Mystery
Crime film	Disaster	Musical	Adventure
Romance film	Documentary	Thriller	War film
Western film	Animation	Anime	Superhero
Horror film	Drama	Fantasy	Cartoon

Below the movie posters, there are lines for writing the correct genre for each movie.

Chapter 3

Topic 1: Visual Literacy

Art elements and Design Principles

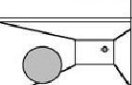

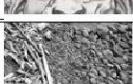

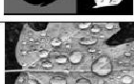

Teachers notes:

- Understand the concepts of Art elements and design principles and how it is used throughout art and craft products.
- Complete all activities

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

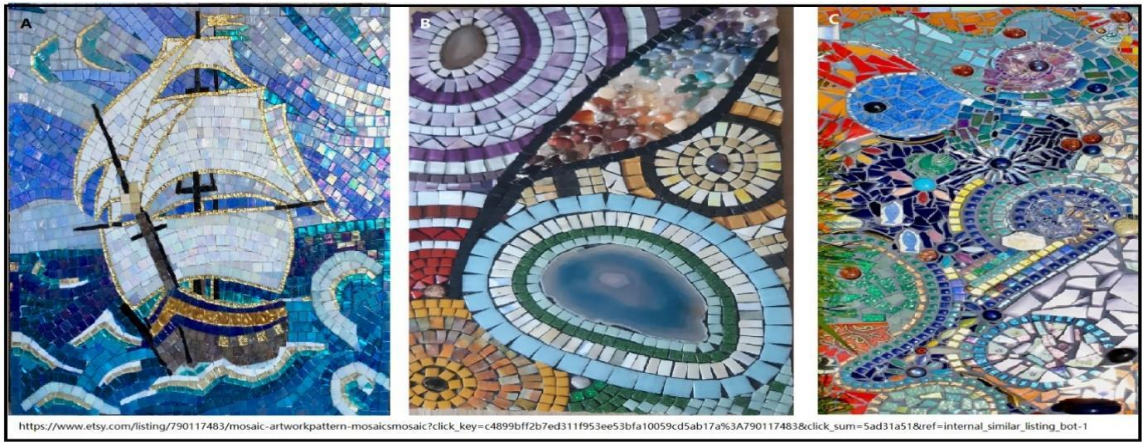

3.1 Art Elements

	Balance	Movement	Pattern	Contrast	Rhythm	Emphasis	Unity
Line							
Shape							
Shape							
Form							
Colour							
Value							
Texture							

<http://www.wheelerarts.org/elements-and-principles-of-art.html>

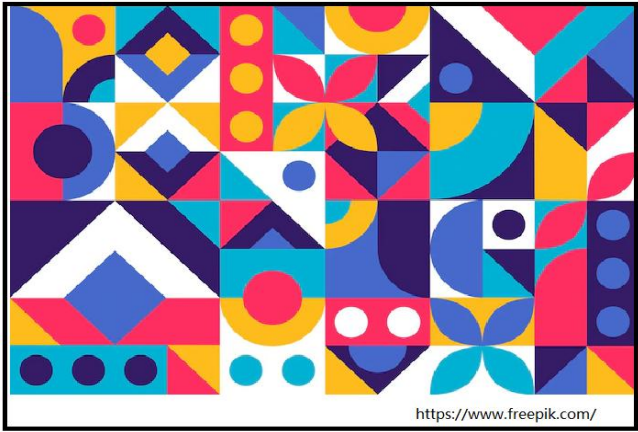

3.1.1 Identify the types of lines you see in the following pictures.

A	B	C

3.1.2 Identify all shapes in this image. Write it down and draw.

3.1.3 Colour

3.1.3.1 Name the primary colours used in this mosaic piece.

3.1.3.2 Which secondary colours were used?

3.1.3.3 Explain what secondary colours are and how to mix colours to get to secondary colours.

3.1.3.4 What colours were used with tinting and shading?

3.1.3.5 Brown was used in creating the eyes. What colours do we mix to create brown?

3.1.4 Texture

Meaning: the way a surface feels or is perceived to feel. Texture can be added to attract or repel interest in an element, depending on the pleasantness of the texture.

Types of texture

- Tactile texture is the actual three-dimension feel of a surface that can be touched. Painters can use impasto to build peaks and create texture.
- Visual texture is the illusion of the surfaces' texture peaks and valleys, like the tree pictured. Any texture shown in a photo is a visual texture, meaning the paper is smooth no matter how rough the image perceives it to be.
- Most textures have a natural touch but still seem to repeat a motif in some way. Regularly repeating a motif will result in a texture appearing as a pattern.
- Overlap is the effect where objects appear to be on top of each other. This illusion makes the top element look closer to the observer. There is no way to determine the depth of the space, only the order of closeness.
- Shading adds gradation marks to make an object of a two-dimensional surface seem three-dimensional.
- Cast shadows give an object a three-dimensional look.^[5]
- Linear Perspective is the concept relating to how an object seems smaller the farther away it gets.
- The atmospheric Perspective is based on how air acts as a filter to change the appearance of distant objects. How objects become lighter the further they are away from us e.g. mountains.

Creating Texture with tin foil and glue

Materials needed

- Tin foil
- Rope or glue gun
- Scissors
- Permanent Markers
- A4 Recycled cardboard

Instructions

Step 1

- Use the piece of cardboard your teacher has handed out and made a simple design on the cardboard with a pencil.

Step 2

- Carefully go over the drawn lines with the glue gun and allow them to dry.
- Be careful as the glue will be hot.

Step 3

- Cover the cardboard with tin foil and gently rub it to expose the textured outlines of the drawing then colour the tin foil using the permanent markers.

3.2 Design Principles

3.2. 1 Balance

Study the following pictures and answer the questions:

A. Which of the statues in images A and B is symmetrical? Why do you say so?

B. Draw a symmetrical line through image D with an orange pencil.

C. Which of the statues in images E and F is A-symmetrical? Give a reason for your answer.

D. Which shape is repeated in image A? _____

3.2.2 Formal Task

Brief: Create in 2 D: Movement and rhythm figures

Materials to be used

- Black sheet of paper for the background
- Multi coloured printed paper
- Magazines
- Glue
- Scissors

Instructions

**Create in 2 D
Movement and rhythm in creating figures**

1. The background of your art piece will be done on a black A3 page.

2. * Collect magazines, and collect images where people are doing an action e.g., singing, jumping, running etc.
* Go to your art diary and create a collage of people doing an action.

3. * Choose one picture you like the most and do not paste this picture in your art diary.

4. * Trace about one cm around the picture create a bubble cut.
* Choose three to four bright coloured paper and place it underneath the picture.
* Secure the picture and the paper by using 3 paper clips.

5. * Carefully cut the figure out using your scissor.
* Reposition and move the paper clips around as you go along.
* Try to cut out all the small details in your picture e.g., hands, shoes, feet etc.

6. * Save the cut offs (scrap paper)
* These scrap coloured paper can be swopped between each other to later create the background.

7. * After you have cutted your figures, it may look like this.
* Place the figurines one side so that you can start working on your background.

8. * Use the scrap paper pieces that were left and swop with your class mates so that you have now three other colours you did not have previously.
* Cut out different shapes out of the coloured paper.
* Create a background onto the black A3 using the shapes and glue to secure it.

9. * Take your cut out figures and arrange them onto your shapes.
* The figures should overlap each other.

* Here are some different overlapping figures as samples.
* Remember yours should be unique and must be your own work.
* Do not copy your friends work.

<http://afaithfulattempt.blogspot.com/2012/03/rhythm-movement-figures.html>

Chapter 4

Topic 2

Create in 2D: Mosaic

By the end of this lesson, you should be able to:

- Understand the concepts and content you need to make on mosaic.
- Understand the history of mosaic and make notes in your workbook
- Know and understand the basic types of mosaic
- Complete all tasks and activities given to you
- You will be able to understand the videos and re-watch the videos at home or in class on your cell phone

<https://www.youtube.com/watch?v=M68cfili8A> <https://www.youtube.com/watch?v=6--o7diaRvw> <https://www.youtube.com/watch?v=Ycx9sCulL3A>

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

4. Mosaic

4.1 History of Mosaic

- Mosaic is an art form that involves fitting small pieces of rock, shell, tile, or glass called tesserae together to create a pattern that may be abstract or realistic.
- Some of the finest examples can be found in ancient art from the Greco-Roman world, and in Byzantine churches.
- The Romans were especially fond of using this art for flooring, and some truly incredible floor mosaics have been revealed at archaeological sites.
- With the spread of Christianity came an explosion of this art in churches and other houses of worship; they depicted saints or religious scenes and often integrated precious materials such as gold and gems.
- This craft can be used to decorate everything from the chests of drawers to floors, and it has been a part of the artistic expression of many cultures all over the world.

- Some Native American cultures, especially in Latin America, also developed mosaic, which was used to ornament shields and body armour.
 - Latin American designs used stones, such as turquoise, and precious metals, and immense technical skill was involved.
 - The Middle East has also been a site of incredible mosaic work.
 - Islamic art does not depict human figures, but rather complex geometric patterns that often involve subtle interplays of colour and shading.
 - Middle Eastern designs have been used to ornament furniture, flooring, and walls.
 - They are often made specifically with tile and have been used to convey social status and power since they are expensive to install.
 - This striking decorative art is also used by modern artists.
 - All of the historical uses of mosaics can be seen in modern design, ranging from ornate tile floors to furnishings and sculptures.
 - Artisans often have very fine materials to work with, and they may include things like mirrors and vibrantly coloured glass to make their designs particularly eye-catching.
 - Today mosaic includes not just murals and pavements, but also artwork, hobby crafts, and industrial and construction forms.
 - Making a mosaic can be fun since there are so many possible materials to work with.
 - At a minimum, an artist will need a surface to use as a backing and materials to cover it in.
 - Tile factories and pottery studios are great sources of broken clay and glass to use, and individuals can also purchase tiles that are specifically designed for this purpose.
 - A strong adhesive is needed to fix the tesserae to their backing, and crafters will also need grout to finish the piece, along with sealer if it needs to be able to endure moisture.
 - Tools, like tile Cutter, are also very handy, and artists should remember to wear face protection when breaking pottery or cutting glass.
 - There are four basic types of mosaic art:
-

- Classical
- Organic
- Industrial
- Artisanal

Activity 4.1.1

Your teacher will hand out this activity

Mosaic

Answer the following questions on the mosaic.

1. What type of material do you use to create a mosaic work of art?

2. Where did the Romans use mosaic art? _____

3. During the spread of _____ came to an explosion of Mosaic art in especially places of _____ and _____.

4. What did the Latin Americans decorate with mosaic art?

5. Which culture has complex geometric patterns in its artworks? _____

6. What type of articles are used to do mosaic art?

--

7. Which three places are great resources where today's time's one can find recycled mosaics?

--

8. Name the four basic types of mosaics

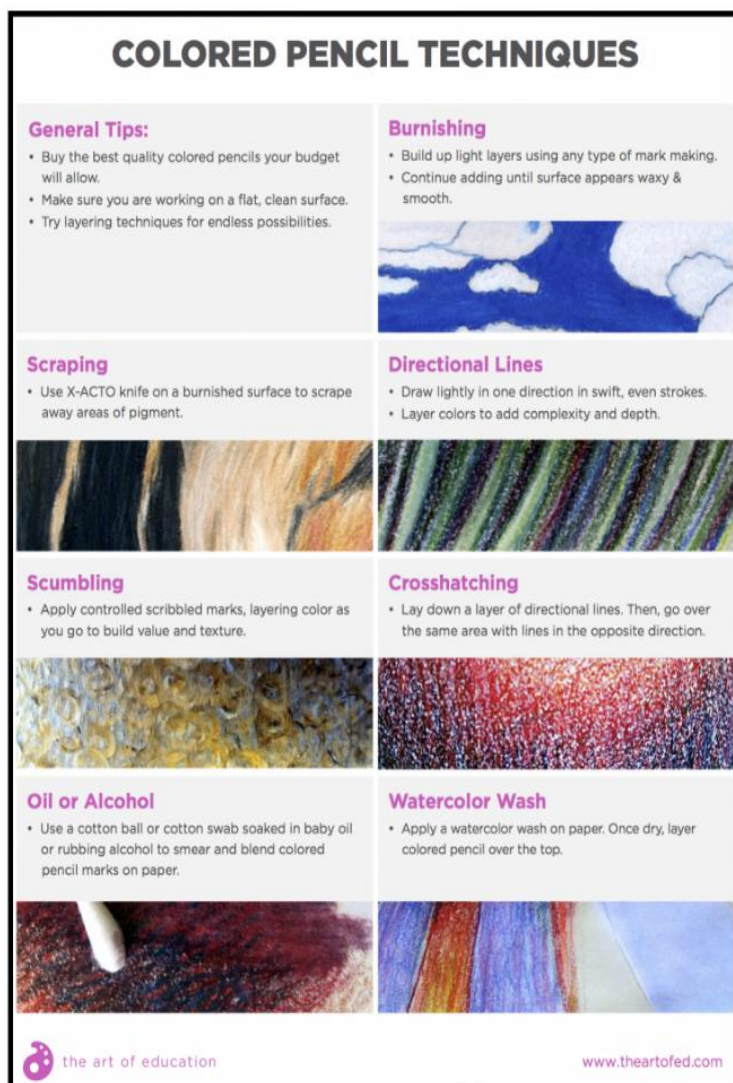

Formal Activity: Create in 2 D

By the end of this lesson, you should be able to:

- Understand the brief as well as the instruction sheet.
- Divert a template into a grid in order to redraw the animal onto the grid paper.
- Understand what is expected of you during the activity and assessment.

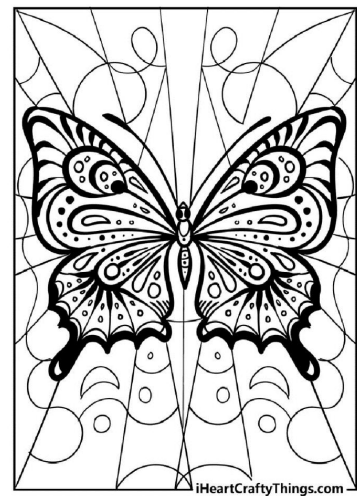

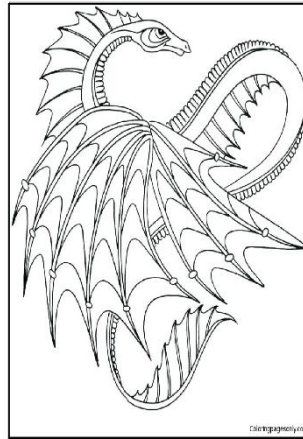

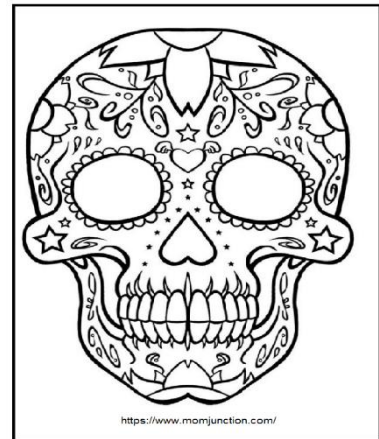

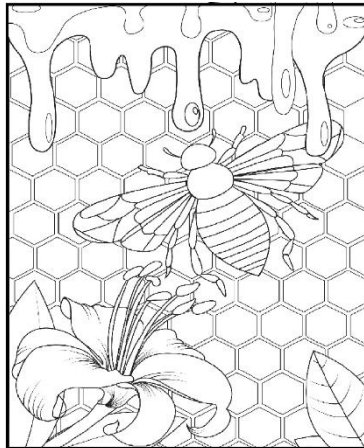

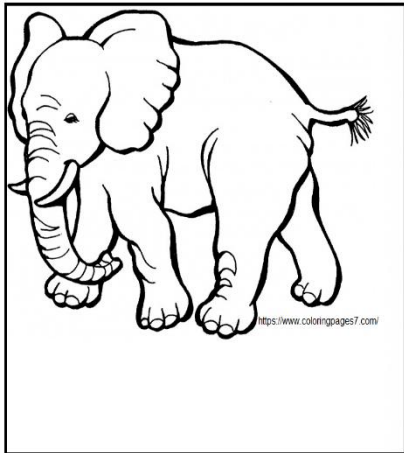

NOTE:

Do not write/draw/colour in this textbook. Other learners need to use this book next year.

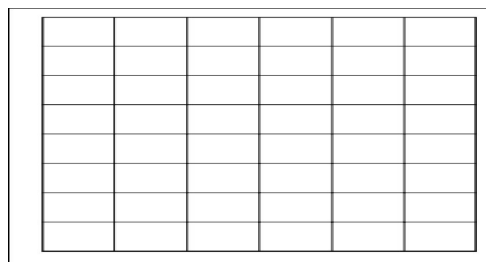

Templates

Your teacher will provide you with the relevant templates.

Grid

The grid will be provided to you by the teacher.

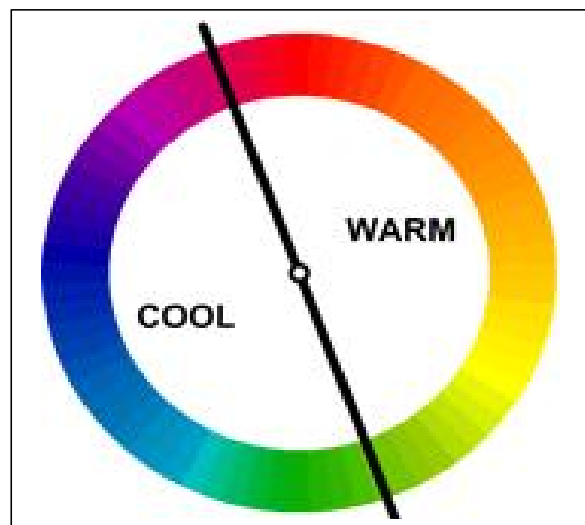

Formal Task 2

Brief: Create a 2D mosaic art

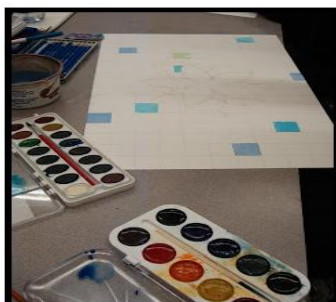

Materials needed

- Grid paper
- Pencil
- Colouring pencils
- Water colouring paints
- Paintbrush
- Water
- Eraser
- Images of animals

Instruction sheet

1. Draw a grid onto the picture you chose.
2. Redraw the picture onto the grid template your educator will give you.
3. Using watercolours, decide on either warm or cool colours for the background.
4. The picture should be the opposite colours you choose.
5. Colours need to be transparent, so add lots of water when you mix them.
6. Move around the paper- don't work on squares side-by-side as you run the risk of having colours 'bleed' into each other.

<http://afaithfulattempt.blogspot.com/>

Assessment

Category	Mark Allocation	Score
Drawing and Planning The learner chose a design and drew grid lines on top of the picture. The learner transferred the drawing onto the grid paper correctly. The drawing was done very lightly so that the pencil marks were not easily identifiable.	5	
Perspective & Drawing The student followed all the rules of drawing the perspective. A foreground, middle ground, and background are seen in the picture.	5	
Watercolour Painting Skills Watercolour paints were applied overall. Hot and cold colours with tints and shading were used in opposites in the creation of the painting. The learner rotated the page so that there were little to no smudges (neatness)	4 5 2	
Materials used Learner kept his/her working area clean. No unnecessary water was used in the painting. Paintbrushes were cleaned in between the painting The paint did not run into other sections of the painting.	1 1 1 1	
TOTAL: 25		

Chapter 5

Topic 3: Create in 3 D

By the end of this lesson, you should be able to:

Understand and complete the task given to you.

Know what materials are needed to complete the task

Understand the video that is shown to you and re-watch using your cell phone

<https://youtu.be/jLPV-xcOESI>

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

Formal Task

Creating in 3-D

Brief: Creating a functional mosaic tray

Materials to be used

- Tray
- A variety of tesserae
- 1 Piece for the centre (Optional)
- Adhesive
- Grout
- Wheeled Nippers (for cutting tiles)
- Geometry set for drawing design (optional)
- Sealer for wooden tray
- Acrylic paint
- Paintbrush
- Scraper (old gift card/ice cream stick/spatula / etc)
- Latex gloves
- Safety glasses
- Disposable or plastic bowl, sponge

Instructions

Prepare the tray for tiling

- Get your wood tray ready by sanding off any rough spots.
- Pay extra close attention to the inside of the handles and the top edges.
- Most wood trays are made from smooth, soft wood and 120 grit sandpaper will work fine.

Sealing wooden tray base

- As this is a wooden tray that (depending upon its use) may be exposed to water, it is important to seal it well.
- Coat the inside of the tray, including the walls, with 3 coats of sealer.
- Use a sealant made from PVA glue, diluted in water (1 part PVA glue to 4 parts water).
- Wait until the glue has dried.
- Paint surfaces with acrylic paint so it covers all angles (front, back, sides, and bottom).
- While the tray is drying, you can cut the tiles or glass pieces of china.
- Put on a pair of safety goggles.
- Use the wheel nippers to snip off the tiles.

The Design

- Choose a design you would like to draw on your tray.
- The design can be very simple.
- To start, draw your outer border to the width of your tiles.

- Use a template before you start and only after knowing exactly what you would like your tray to look like start drawing from the centre of the tray.
- Take your time to get the positioning correct.

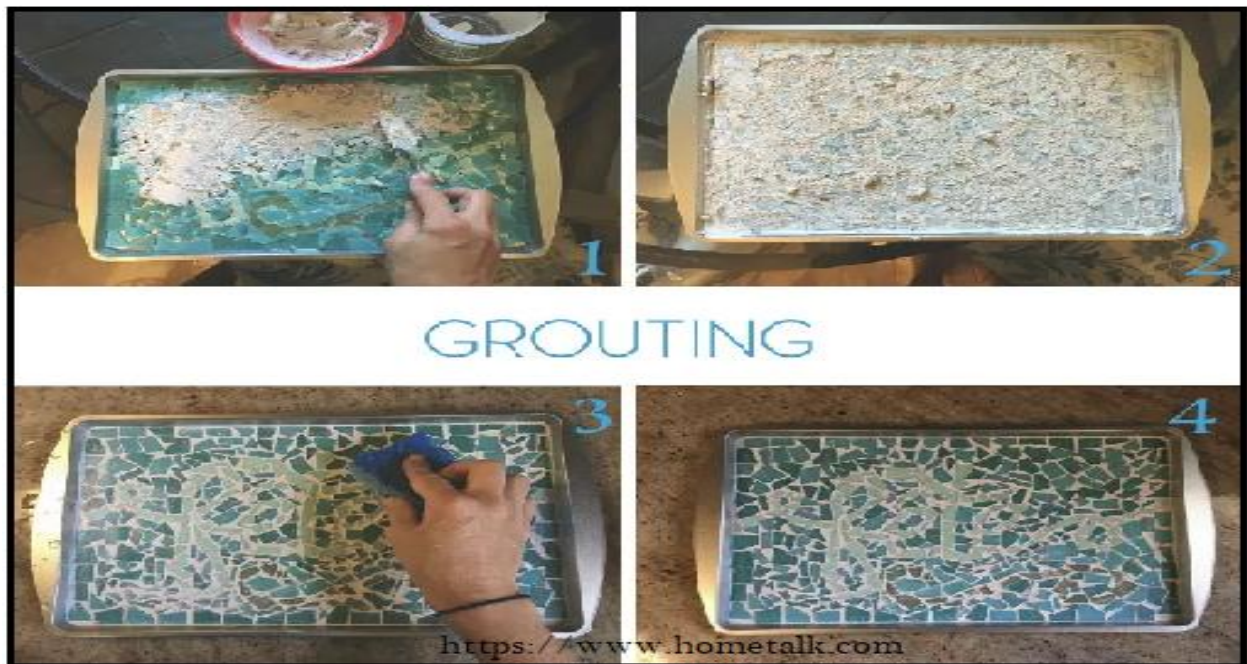

- If you are going to draw geometrical circles use a geometry set so your circles will be perfect.
- You need to make sure of balancing your design.

Assembling the tray

- When you're happy with the design, use glue to glue down the pieces of tiles, china, etc.
 - Work in a well-ventilated area.
 - Allow the glue to dry slightly before proceeding.
 - Try to use contrasting colours in your design.
- You may use different materials to fill in, the open spaces around your focal area.
 - Remember to leave gaps where your grout has to be placed.
 - When the surface of the frame is complete, allow the adhesive to stand for 24 hours before applying the grout.

Grouting

- Mix the grout powder with water to a consistency of toothpaste.
- Spread the grout evenly over the whole area where the tiles were laid.
- Make sure it covers all the gaps.
- Wipe the excess grout off while the grout is still wet.
- When removing the grout be careful not to use too much water as you are using a wooden surface that is prone to water damage.
- A damp sponge will do the job.
- Once grouted allow 24 hours for the mosaic piece to dry thoroughly.
- A coat of grout sealer will also help with water protection and stain resistance.
- Paint the tray inside and out with acrylic paint sealer to ensure all surfaces are sealed (including the bottom of the tray).

Assessment

Criteria	1	2	3	4	5
Elements of art and Principles of design: - Line - Colour - Shape - Pattern - Rhythm - Movement	The learner did not attempt to use the art elements/principles. The artwork was not completed.	The learner cannot explain how to apply the elements / design principles to their artwork. Work not completed	The learner is vague in his/her description of how to apply the element/ design principles to their artwork.	The learner is basic in his/her description of how they used the art elements/ design principles in their work.	The learner explained how he/she used the art elements/ design principles in their work thoroughly and with great detail.
Creativity/ originality The preliminary sketch was drawn out design on the object to be mosaic	The piece shows little or no evidence of original thought. There are no preliminary sketches.	The piece shows little evidence of original thoughts. There are attempts at preliminary sketches.	The learner's work lacked sincere originality. There are attempts at sketches, but he/she does not show enough problem-solving efforts.	The learner's work demonstrates originality. The learner has created several sketches to work through problem-solving.	The learner's work demonstrates originality and shows evidence of planning and problem-solving through complex sketches.
Terms/ vocabulary - Rhythms - Direct method - Tesserae - Nippers - Grout - Adhesive	The learner disregarded craftsmanship and did not put forth effort for understanding. He/she did not ask for help or responded negatively to help to improve their craftsmanship/understanding.	The learner showed poor craftsmanship or lacked understanding. He/she did not ask for help or responded negatively at times to help.	The learner showed average craftsmanship and understanding. He/she asked minimal questions and minimal effort to respond to help from the teacher	The learner showed average craftsmanship & understanding. The learner asked questions and responded to help from the teacher.	The work shows outstanding craftsmanship and was finished with a great deal of care. The learner asked questions and responded to help from the teacher appropriately.
Skills - Placing - Spacing - Grouting	The learner did not finish the work.	He/she had a sloppy mosaic placement with poor spacing. Grouting is sloppy and tiles are not polished off.	. Mosaic placement and spacing as well as grouting are sloppy.	The learner spaced tiles appropriately. The learner grouted appropriately.	Mosaic placement is very well done, and grouting is well done.
TOTAL 20					

Reflection

(5)

1. In your assembly of the craft product, where did you need help?

2. Did you like creating this product? Give reasons for your answer.

3. When comparing your work, do you think it is a marketable product, and do you think someone would like to have the same type of tray? Give reasons for your answer.

Chapter 6

Visual Literacy

Entrepreneurial Awareness

By the end of this lesson, you should be able to:

- Understand what a business plan is and how to use it.
- Understand the purpose of a business plan.
- Know who the creator of the lesson is and understand that all resources are acknowledged

Resources or sources where we get our research information from:

Desirae Odjick

(<https://www.shopify.com/blog/business-plan?ref=exviver1>)

6. Entrepreneurial Awareness

6.1 What is a business plan?

- A business plan is a document describing a business, its products, or services, how it earns (or will earn) money, its leadership, and staffing, its financing, its operations model, and many other details essential to its success.
- A business plan is a roadmap for launching and growing a business

6.2 Purpose of a business plan

The THREE (3) main purposes of a business plan:

1. It will help you see if your idea is feasible.
 2. It will give insight into your target market.
 3. It will allow you to research your competition.
- A business plan can help you clarify your strategy, identify potential roadblocks, decide what you'll need in the way of resources, and evaluate the viability of your idea or your growth plans before you start a business.

- When you're starting a business, your to-do list is very long and filled with more immediately rewarding tasks, like taking product photos, creating Ad-campaigns, and opening Social Media accounts.
- Not every business launches with a formal business plan, but many founders find value in taking time to step back, research their idea and the market they're looking to enter and understand the scope and the strategy behind their tactics.

6.3 Why write a business plan?

- Investors rely on business plans to evaluate the feasibility of a business before funding it, which is why business plans are commonly associated with getting a loan.
 - But there are several compelling reasons to consider writing a business plan, even if you don't need funding.
1. **Planning.** Writing out your plan is an invaluable exercise for clarifying your ideas and can help you understand the scope of your business, as well as the amount of time, money, and resources you'll need to get started.
 2. **Evaluating ideas.** If you've got multiple ideas in mind, a rough business plan for each can help you focus your time and energy on the ones with the highest chance of success.
 3. **Research.** To write a business plan, you'll need to research your ideal customer and your competitors—information that will help you make more strategic decisions.
 4. **Recruiting.** Your business plan is one of the easiest ways to communicate your vision to potential new hires and can help build their confidence in the venture, especially if you're in the early stages of growth.
 5. **Partnerships.** If you plan to approach other companies to collaborate, having a clear overview of your vision, your audience, and your growth strategy will make it much easier for them to identify whether your business is a good fit for theirs—especially if they're further along than you in their growth trajectory.

6. If you're looking for a structured way to lay out your thoughts and ideas, and to share those ideas with people who can have a big impact on your success, a business plan is an excellent starting point.

6.4 Questions for a successful business

(Questions like: (<https://strongluv.com/business-ideas-kids/>)

1. What makes your Business Idea different and how will you stand out from your competition?
2. What does your business name say about your business?
3. Who is your ideal customer? What are they passionate about?
4. How will you get the word out about your business?
5. What are your competitors charging?
6. What will you do with your profits?

6.5 Elements of a Business Plan

(<http://thedreamshareproject.com/roadtripblog/2013/05/01/how-to-write-a-business-plan/>)

This is a list of elements most business plans should include but be sure to research the specific requirements of your industry.

1. Cover page: Business name and contact information.
2. Table of contents: Lists all the sections of the plan and page numbers.
3. Executive summary: One-page overview that summarizes the whole report.
4. Business Description: How your business satisfies a need.
5. Business environment analysis: What is the outlook for the industry you are getting into? Why is it a good time to start this type of business?
6. Industry background: your experience in the industry or other qualifications.

7. Competitor analysis: Prove that there is a market for this product or service by listing competitors who have had success in the field. Then, point out competitors' weaknesses and how you plan to be better than them.
8. Target market: Describe which demographic will want your product. For example, Happy Meal from McDonald's is targeting children who want the toy.
9. Marketing plan: Describe how you plan to reach your target audience. For example, Internet advertising, phone calls and email, billboards, commercials, or magazine ads.
10. Management summary: Who is in charge, why are they qualified, and what is their vision for the business?
11. Operations plan: Describe the process of creating your product from start to finish. Where and how will you produce your product/service? How will you assure quality? What raw materials do you need? Who will be your suppliers?
12. Financial plan: Describe your plans to get funding, what expenses you are expecting, and how you will generate revenue over time.
13. Appendix and milestones: Include any other relevant information, achievements, or awards.

Your teacher will hand out this activity

Chapter 1

Topic 1

Visual Literacy

Safety in and around the classroom

By the end of this lesson, you should be able to:

- Understand the content on safety around paintbrushes.
- Understand the concepts of different paints and paintbrushes.
- Know and understand how to take care of paintbrushes.
- Make notes from the board into your classwork books about painting / printmaking, paintbrushes etc.

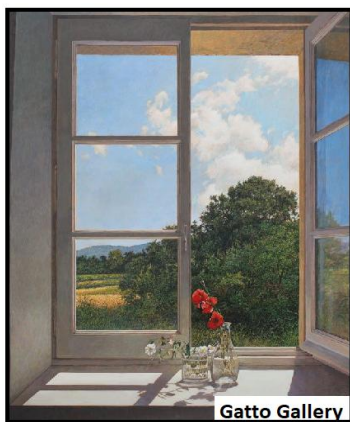

1. Safety in and around the classroom

1. 1 Painting / Printmaking

- The hazards of painting and printmaking relate to the paints, inks, solvents, and corrosive materials associated with these activities.
- The following table identifies some of the hazards associated with the materials we use in painting and printmaking.

1.2 Ventilation in the Art and Craft centre

The biggest health and safety hazards associated with **oil paint** and its mediums **are** harmful fumes and the risk of fire.

- The only toxic risk within oil painting is in the solvents and mediums you use.
- Turpentine and mineral spirits are toxic as they exude fumes that are very bad for your health.
- It is perfectly fine to use them, but do so sparingly, keep lids closed and windows open.
- Even though fumes from latex and oil paints can irritate the eyes, nose, and throat, they do not poison the body when used as directed.

- Any irritation should go away once you get into the fresh air. If fresh air doesn't help, take a warm shower and wash your hair.

1.3 What are Khoki pens?

Also known as a khoki or a fibre-tipped pen.

1.3.1 What are the types of marker pens?

Marker pens come in four types of ink: pigment, water, oil, and alcohol-based.

Pigment and water-based inks are for traditional paper. On the other hand, oil and alcohol-based inks are for non-paper media (e.g., plastic, metal, or glass)

1.3.2 Are marker pens poisonous?

Inks can be mildly irritating to the mouth and stomach and rarely causes limited vomiting.

If your child has been chewing on a pen or marker, take it away from them and give them a drink of water and wash their hands and face.

1.3.3 Which permanent markers are nontoxic?

- Crayola Ultra-Clean Washable Marker Set.
- Pebeo 7A Fabric Marker Light, Opaque, and Fabric sets
- Sharpie Stained Fabric Marker Sets.
- Fabric Mate Permanent Superfine Fabric Markers.

1.3.4 What do I do with my permanent markers when they get dry?

(Watch the following video to assist you in everlasting markers:

https://www.youtube.com/watch?v=J64BFg_JH2o)

- Fill your bowl with rubbing alcohol (you can also use the cap of the alcohol bottle, as you'll see in these examples) and put the Sharpie, tip down, in the liquid.
- Let it sit until you see a little ink running out into the alcohol.
- Then, cap your marker and let it sit for 15 minutes before using it again.

Chapter 2

Topics 1 and 2

Visual Literacy

2. Landscaping

2.1 What is Landscaping?

What is a Landscape?

When we travel through the countryside, we see that lands, mountains, rivers, reservoirs, forest and villages.

There are different types of landscapes

- * Mountain Landscape

- * Coastal Landscape

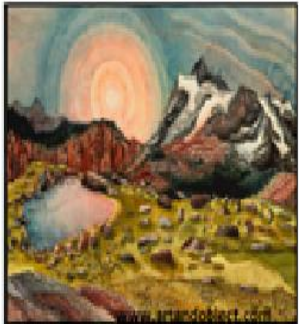

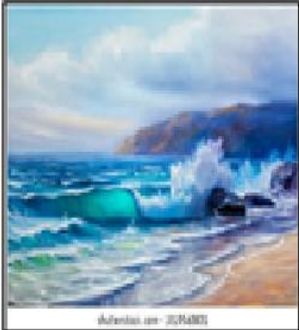

- Landscape paintings may capture mountains, valleys, bodies of water, fields, forests, and coasts and may or may not include man-made structures as well as people.
- The three parts found in a landscape are:
 - **Line:** Line is used to carrying the eye through a landscape and to create physical flow and connectivity.
 - Vertical lines carry the eye skyward and are useful in expanding small spaces.
 - **Mass:** In design, mass is a measure of visual size.
 - **Form:** Form refers to the shapes of objects in a landscape.

• The following are the 5 basic elements that one finds in all landscapes

- Colour.
- Line.
- Form.
- Texture.
- Scale.

Activity 2.2.1

Landscape Art Activity	Study the pictures and analyse the following art elements		
	Line	Colour	Shapes
			
			
			

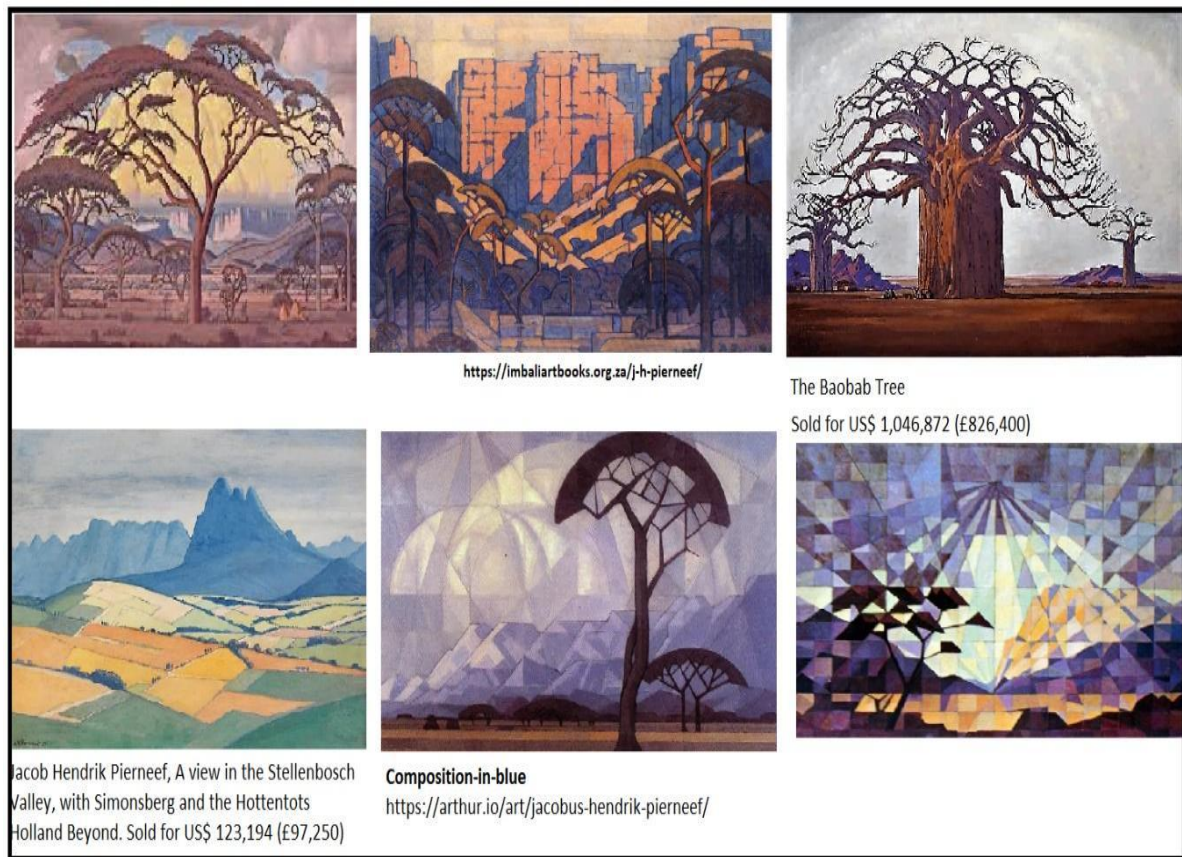

Teacher's notes:

- Watch the following video: <https://www.youtube.com/watch?v=hbgIGruGEuc>
- Understand the content and concepts about famous landscape artist Pierneef.
- Complete the activity worksheets.
- Listen to the feedback and ask your teacher if you do not understand certain aspects.

2.2 Famous South African Landscape artist

2.3 Jacobus, Hendrik Pierneef

- Jacobus Hendrik Pierneef was a South African landscape artist, generally considered to be one of the best of the old South African masters.
- Having developed an unmistakable and economical aesthetic during the first half of the twentieth century, his pictures, whether described as startlingly beautiful, willingly experimental, nostalgic, or gently monumental, are familiar to generations of South Africans
- His distinctive style is widely recognised, and his work was greatly influenced by the South African landscape.
- Born: 13 August 1886, Pretoria / Died: 14 November 1957, Pretoria
- He painted and made lino prints in his spare time while earning his living at other occupations, and it was only in 1924 that he became a professional artist.
- Pierneef loved painting the baobab which is more dominant in his oil paintings, with one praised linocut. Others trees he loved were the: Wild pear, Wild fig, Kiaat, Leadwood, Karee, Marula, Resin, and Palm trees.
- Jacob Hendrik Pierneef's work has been offered at auction multiple times, with realized prices ranging from R1250, 20 to R25847139, 04 depending on the size and medium of the artwork.
- Here are some famous paintings Pierneef created in his lifetime.

Activity 2.1.2.1

Pointillism is a unique method of painting which focuses on using carefully placed dots to create an image. The spacing of these dots helps to create light and dark shading. Colours are traditionally not mixed in pointillism and are instead layered over each other or near each other to give the impression of mixing.

Create a Pointillism landscape painting using a template
You can use the landscape template provided **OR** draw your own template in pencil.

You will need:

- A landscape template printed in a very light greyscale
- Cotton buds
- Coloured paints
- Water

<https://i.pinimg.com/originals/d5/e0/c5/d5e0c5bfc8951ce4a42c7ed14c17172f1.jpg>

Chapter 3

Topic 1

Visual literacy - Art elements and Design Principles

By the end of this lesson, you should be able to:

- Understand how to analyse artworks from famous artist through using the art elements and design principles.
- Understand what art elements and design principles are found in a landscape
- Be able to identify art elements and design principles in landscapes.
- Complete all tasks
- Understand the video and re-watch using your cell phone.

https://www.youtube.com/watch?v=HfTdbd_VVz8 <https://www.youtube.com/watch?v=6csGIE5qttg>
<https://www.youtube.com/watch?v=WV79CQySnf0>

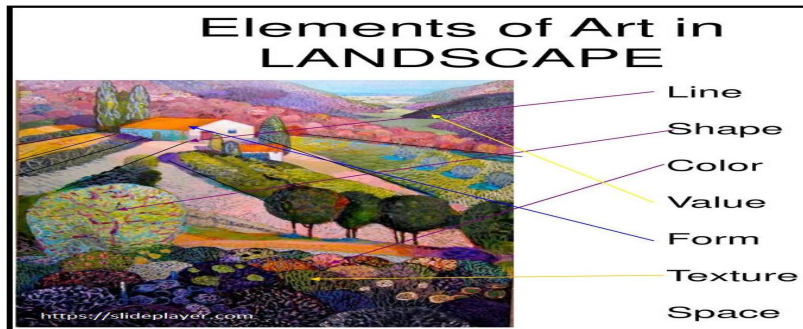

NOTE:

Do not write/draw/colour in this textbook. Other learners will use this book next year.

Summary page on art elements and design principles

	Balance	Movement	Pattern	Contrast	Rhythm	Emphasis	Unity
Line							
Shape							
Shape							
Form							
Colour							
Value							
Texture							

<http://www.wheelerarts.org/elements-and-principles-of-art.html>

3.1 Art elements

3.1.1 Line

Line and shapes

<https://mymodernart.com/line-drawings-of-mountains-christa-j-neveld/>

1. Explain all the Art Elements used in this landscape.
2. What types of lines were used ?
3. What is the effect of the circles ranging from big to small?

3.1.2 Colour

Colour

<https://www.denecroft.com/>

Write down the types and how do one mix the colours that were used in Picture A and B.

3.1.3 Shapes

<https://www.artavita.com/artists/25684-rebeccapascos>

Shape

Name and draw the shapes that were used in this sea scape

3.1. 4 Texture

www.artistsandillustrators.co.uk

Texture

1. Explain the types of textures used

2. Draw the types of textures you see.

3.2 Design Principles

3.2.1 Focal Point

media.mg.co.za

Focal Point

1. Explain where the focal point is in this picture and give a reason why you say so.

3.2.2 Balance

Balance

A

<https://i.pinimg.com>

Discuss the two types of balance you see in both pictures.

A

B

www.thehouseshop.com

B

3.2.3 Pattern

Pattern
Write down and draw all the patterns you see in this painting

3.2.4 Rhythm

Rhythm
1. What is Rhythm in art?

2. How was rhythm used in this seascape?

3.2.5 Unity

- Unity in design simply means all the separate parts of the landscape work together to create a great total design.
- Colours, shapes, sizes, textures, and other features work together to create a unified space.
- Patterns and colours are often repeated

Unity

Explain in your own words how unity was created in this painting through the use of:

1. Colour: _____
2. Shapes: _____
3. Sizes: _____
4. Repetitive patterns: _____

Chapter 4

Topic 2

Create in 2D

By the end of this lesson, you should be able to:

- Understand the concepts and skills to be used in creating a 2 D painting
- Create a mood page in your art diary
- Plan your final art piece
- Understand which art materials to use.

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

Formal Task

Brief: Planning and exercising a 2D product

Materials needed:

- Art diary
- Glue
- Scissor
- Pencils
- Colouring pencils and or water colouring paints

Instructions

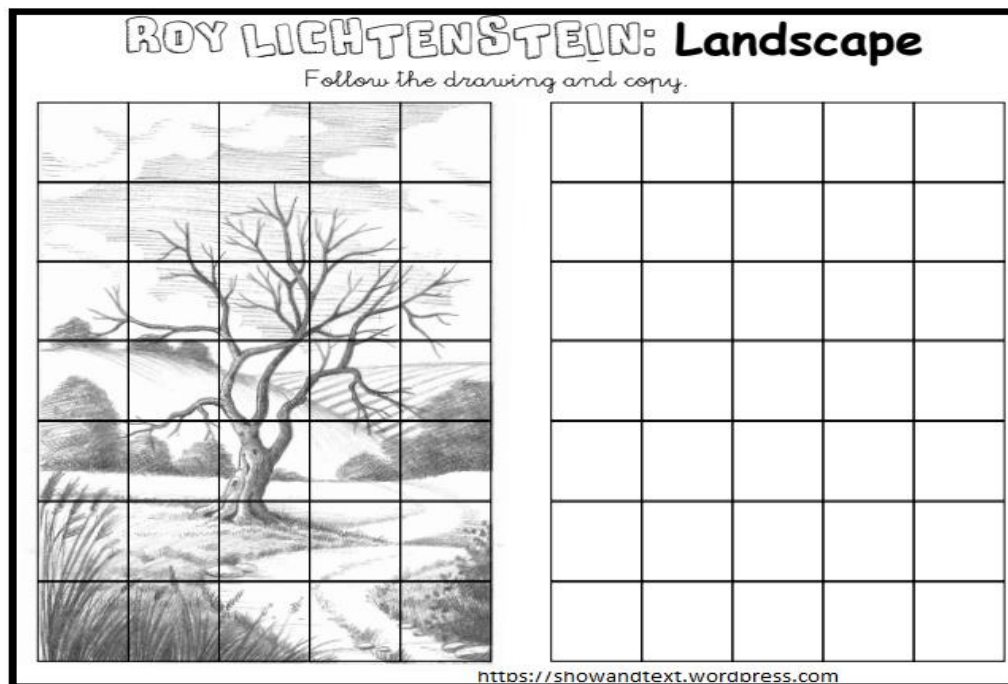

Study the pictures below.

- Collect pictures from the internet and create a mood page in your art diaries.
- Practice a few types of pictures incorporating all the art elements and design principles you have learnt.
- Experiment with different kinds of art media in your art diary.
- Draw your final picture so it will make a perfect composition fitting the whole page in your art diary.

- Colour/collage / paint or use mixed media to create your final 2-D drawing.
- Read the rubric before you start.
- Here are a few samples of landscape combinations you may use or you may also use any other style in creating your landscape.

You may also follow the following steps in assisting you in your drawing.

Assessment

Criteria	Marks allocated	Marks achieved
Work detail: The composition of the work forms a unity Work is balanced. Repetition was used in creating the art piece.	3	
Material use: The learner used his/her choice of material according to their feeling and emotions	2	
Time allocation: All work was handed in on time.	1	
Foreground / Middle ground / Background The foreground has all the items in the foreground and is easily identified. Middle ground: One can see that it is there because of items inter-crossing each other. Background enhances the drawn items.	3	
Focal Point: There is a clear focal point	1	
Detail: Detailing was used by using a focal point and enhancing it with tints and tones	5	
Craftsmanship: Look at smudge marks, erasure lines, paper, canvas quality, and materials used.	2	
Art elements: At least 5 were used.	5	
Originality: The learner created his/her style, and the work is not copied.	2	
TOTAL	25	

Chapter 5

Topic 3

Create in 3 D

By the end of this lesson, you should be able to:

- Understand the video and re-watch using your cell phone:
- https://www.youtube.com/watch?v=GBvfiCdk-jc&list=PLQ0gMXzeXyNdQjUS_AxMKrd3ntPKdUGZY&index=127
- <https://www.youtube.com/watch?v=PqCsEhd5fWY>
- Understand what a puppet master does and who famous ventriloquist are.
- Complete all tasks

NOTE:

Do not write, draw or colour in this textbook because other learners need to use this book next year.

5. Pottery or air-dry clay products

5.1 Study the following ideas and choose which birdfeeder you would like to make.

How do we work with clay?

Watch the following links to see how one works with air dry clay:

<https://www.youtube.com/>

<https://www.youtube.com/>

<https://www.youtube.com/>

A few tips before you start with your clay piece

1. Prep your workplace. Work on a piece of plastic e.g., a 2-liter ice cream lid or a plastic bag or a silicon mat, wax paper, or even a paper towel.
2. Air-dry clay is very sticky, so before you start working use a little lotion (cream) on

your hands to minimize the stick.

3. Not all air-dry clay is created equal. The easiest to work with I've found is Crayola Air Dry clay or Model Air Dry clay one can buy from Pick a Pay, Checkers, CNA, and china shops.
4. Place a damp paper towel over your project and then apply a layer of cling wrap. This keeps your clay from drying out and ready for you to resume when you can.
5. If your clay is too thin, it is more likely to crack. Keeping this in mind, make sure you start your project with a solid foundation.
6. When sculpting your air-dry clay, it's not uncommon to have imperfections. Smoothing out these imperfections are easy with a little water. Using a small sponge or a little water on your fingers you can easily smooth out these areas. Be careful not to use too much water on your project, it will increase your drying time.

7. Don't worry if you notice some rough areas after your project has dried. You can always use a little fine grit sandpaper.
8. When adding, make sure you "score" and "slip."
9. Scrape both surfaces of the clay with a toothpick or a clay sculpturing tool. This gives the new piece of clay something to adhere to. Using a little "slip" (watered-down clay in a paste consistency) cover both scored surfaces. Then join them together using your finger or another sculpturing tool. This ensures a strong bond that is less likely to crack or break.
10. It's best to allow all surfaces of your project to have air exposure if possible.
11. Most projects take 24 hours to dry but are *fully cured at 72 hours*. Keeping out of direct sunlight for sunlight will crack the result and this will surely make you very unhappy.

Formal Task 1

Brief: Creating a birdfeeder with airdry clay

Materials

- Clay
- Rolling pin
- Toothpicks
- Stamps
- Cookie cutters and any other materials that can make imprints on the clay

Instructions

Step 1

Decide on a product you want to make and collect images from magazines, the internet, etc.

Create a mood page in your art diary/portfolio on different kinds of bird feeders.

Plan out how and what methods you will be used to create the birdfeeder and plot the plan in your art diary.

Create a few preliminary drawings on how you want your end product to look.

Step 2

You may use any of the following methods:

- Pinch Pots. Begin a pinch pot by forming a lump of clay into a smooth sphere that fits the size of the hand.
- Coil Method. Coils of clay can be used to build bowls, vases, and other forms in various shapes and sizes.
- Slab Method.

Step 3

Techniques when using clay

Here are a few basic techniques you can use in creating the bird feeder:

3.1. Conditioning the clay

Prepare your clay before you start.

Knead the clay using your hands or the side of your palms and gently work the clay through to condition it before you begin.

This technique will work to smooth out the clay and stop any air pockets from forming.

3.2. Clay coiling

The clay coiling technique is one of the easiest techniques to learn, you can also apply this technique to pottery clay, later down the track too.

Begin your coil by rolling the air-dry clay out into small snakes using a rolling pin or the side of an old jar.

Once you have a long snake, wrap the clay around and around, to create a coil. You might find it easier to roll out a bunch of coils before you begin moulding them together, or you can work as you go.

3.3 Slab building

If you're looking for a strong, square shape to use in your creation, you'll want to use the slab building method, this is a type of air-dry clay technique too.

Start by rolling your clay out to an even thickness, this will make your slab robust.

Once you've rolled your clay out, you can create shapes using a ruler or a knife to evenly cut the sides of the clay.

You'll want to make sure that you press the edges firmly. You can even use a coil to support the sides so your work doesn't fall over.

3.4 Pinch pottery

Don't let the name fool you, the pinching pottery technique can be used for air dry clay too.

It is a great way for beginners to get a feel for working with clay.

Begin by rolling a single ball of clay, shape it using your hands and press your thumb into the centre.

Reinforce the structure by using your hands to press out the walls with your thumb to create a strong structure for your clay, this will also help to prevent breakage.

3.5 Slip

Slip acts as a glue that connects clay.

Airdry clay is different from typical clay, so begin by breaking off gradual pieces. Make sure that the pieces are paper-thin and then add a tablespoon of water to around a tablespoon of clay, then leave it for a few hours to dry.

Water can be added to your air-dry clay to change the consistency.

Make sure you gradually add in the water when making slip or your air-dry clay may crack or break.

If you put too much water in, pop your clay in an airtight container with a small amount of paper towel to stop it from drying out.

3.6 Imprinting

Imprinting is simply pressing or scratching into the clay to create texture.

Have a look around the house for anything with texture such as lace, rope, shells, stones, jars, and lids.

These can be great to stamp into the clay to produce a pattern.

If you want to scratch or etch into your clay using small tools, you may find our quick guide to air-dry tools helpful.

3.7 Image transfer

If you want to add an image or text to your air-dry clay, you can simply print the image or text out on standard copy paper.

If you do have text, make sure you flip the text to a mirror reverse.

Then begin by rolling your clay out to around 1cm in thickness and add a small amount of water to the clay to dampen it.

Pop the design face down, (be careful to not press it) and then let it set for two minutes before you gently pull the design off.

3.8 Blending colour

To combine two colours of air-dry clay, roll out your first colour, followed by your second colour, and then knead the two together.

Continue to knead and roll the clay until the colours have blended. Note, it is easier to blend colours that are within the same colour family, as dark colours and light colours may be harder and more time-consuming to blend.

To create a marble effect, use an acrylic or metallic marker to your creation in the middle of a circular piece of clay, then simply twist it to create a snake-like shape.

Twist the clay until it becomes a coil and then roll it out to create a marbled effect.

3.9 Gluing

If you're working with multiple pieces such as sculpture work or adding small shapes and features to your work, you could find that when moulding pieces together, the small pieces may fall off once the clay dries.

Instead of moulding the pieces together, which may fall apart, use craft glue to secure the pieces.

Be careful when placing the pieces as the clay will soak up the glue.

3. 10. Drying

Typically, air dry clay takes around 24 – 48 hours to dry.

To make airdry clay dry faster, you can flip your creation over at around the 24-hour mark to ensure that the entire project can dry out evenly.

Avoid leaving it in the sun, using a hairdryer, or putting it in the oven as this can cause cracks when the project hasn't dried evenly.

If you find that you want to extend the life of your clay, keep your clay in an air-tight container or heavy-duty zip-lock bag.

3. 11. Waterproofing

If you're thinking of keeping your project outside, then you'll want to 'seal' it otherwise the clay will revert to its wet form when it starts to absorb water.

To protect your creation, make sure that your clay has dried completely before sealing.

To waterproof your air-dry clay, use a coat such as a clay varnish or acrylic gloss medium.

You can use most acrylics or a mix of equal parts PVA glue and water.

For satin acrylic, (such as our satin acrylic range) seal it four times and allow each coat to dry before applying the next.

We don't recommend that you use airdry clay for food or drink ware as it is not classified as a food-safe product, but sculptures, decorative bowls, trinkets, or pots for your plants are all great project ideas.

3.12. Glazing

Glazing will add a nice sheen and can stop your creation from snapping.

Once your air-dry clay has completely dried, you can spray a lacquer varnish over it or use an acrylic gloss medium over it to prevent any snapping.

3.13 Sanding

It is possible to sand airdry clay.

Once your clay has dried completely and hardened, you can use a piece of sandpaper to smooth out any sharp edges.

You may want to start with a small grit to refine any rough edges before gradually increasing the grit to a finer level to polish the clay.

3. 14. Bulking

You can use foil or polystyrene to bulk out your sculptures, this type of air-dry clay technique will reduce the amount of clay that you use but will also make your sculptures lighter.

Form your shape using foil or polystyrene or add wire if you need a little more flexibility to your sculptures

Assessment Tool

After your teacher has marked your work, take a photo and paste it into your art diary along with the rubric.

This is concrete evidence that you have done and completed the project.

SCULPTURING ASSESSMENT TOOL				
Outcomes	4	3	2	1
Shape	Accurately drew shape of chosen item. All details present.	Drew the shape of chosen item. 1-2 Details missing	Attempted to draw the chosen item. 3-4 Details missing	Did not draw the item
Design	Detailing in the design of the item were done above average.	Detailing were done well. Learner did good	Student poorly created a design only using limited methods	Did not complete the product and basic methods were used
Craftsmanship	Used art material correctly. No cracks or rips on the artwork	Object is somewhat crisp and detailed. Used art material correctly.	Object is slightly sloppy. Art materials not used accordingly.	Very sloppy art. Art materials not used well. Lots of rips and cracks are seen
Composition	Student used all the available spaces to its full potential. Object is well balanced.	Student used available spaces to its potential.	Attempted to use spaces to its potential.	Did not use space wisely. Art piece looks unfinished or very over-done.
Creativity and Originality	Student was very creative. Design is detailed and an is it is a original design. Very interesting to look at.	Student was somewhat creative. Design is detailed. Student took from other ideas to create the artwork.	Not as detailed as it could be. Aspects of design are copied from other sources.	No effort as creativity or originality. Design is a direct copy.
Signed Name	Name is signed neatly in the artwork where it does not distract from the design.	Name is signed on the front bottom or top of the design	Name is sloppy written on the front or back and distracts the eye from the artwork.	No name = no points.
TOTAL 25				

OR

Task 2

5. 2 Puppetry

5.2 1 What is a ventriloquist?

- A ventriloquist performs by throwing their voice and channelling it into a character, puppet or doll.

- The Latin word ventriloquism means to “speak from the stomach”, which is effectively what the ventriloquist is doing when he applies the Distance effect.
- The first ventriloquist was simply voice artists with a basic puppet, relying more on audio skills and delivery than any visual impact.
- Today they have moved forward by adding visual stimuli in addition to audio delivery, such as more interactive puppets, or adding physical and visual misdirection cues to cunningly divert the audience's attention to wherever the ventriloquist desires.
- Ventriloquism today is a multi-level skill that generally involves themes of comedy and visual performance but still focuses on the art of one person not moving their lips whilst their character seemingly mimics the words through their actions.

5.2 Ventriloquist Dummy

- Modern ventriloquists use a variety of different types of puppets in their presentations, ranging from soft cloth or foam puppets (Verna Finly's work is a pioneering example), flexible latex puppets (such as Steve Axtell's creations) and the traditional and familiar hard-headed knee figure (Tim Selberg's mechanized carvings).

- The classic dummies used by ventriloquists vary in size anywhere from twelve inches tall to human-size and larger, with the height usually falling between thirty-four and forty-two inches.
- Traditionally, this type of puppet has been made from Paper-Mache or wood.
- In modern times, other materials are often employed, including fiberglass, resin, latex, etc.

- Great names in the history of dummy making include Jeff Dunham, Frank Marshall (the Chicago creator of Bergen's Charlie McCarthy, Nelson's Danny O'Dea,) and Winchell's Jerry Mahoney, etc.
- The McElroy brothers' figures are still considered by many ventriloquists as the apex of complex movement mechanics, with as many as fifteen facial and head movements controlled by interior finger keys and switches.
- Jeff Dunham referred to his McElroy figure Skinny Duggan as "the Stradivarius of dummies."
- The Juro Novelty Company also manufactured dummies.

Activity 5.2.1

Ventriloquist

Your teacher will hand out the questions to this activity enlarged. Do not do this activity in this book.

Answer the following questions.

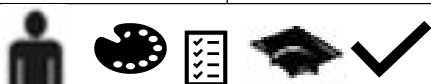

1. What is a ventriloquist?

2. Name a ventriloquist you like a lot and explain why?

3. Can you name the following characters?

1.	2.	3.	4.	5.
----	----	----	----	----

Formal Task

Brief: Creating a puppet using any material

Instructions

Do not do this activity in this book. Your teacher will hand you the activity.

Create the thumbnail drawings in your Visual Diary.

Keep in mind that you need to explore what your puppet will look like.

Keep the following in mind:

- The materials you want to use
- The character traits of your puppet
- The personality of your puppet
- The facial expression of your puppet

3.1 What materials will you make use of to create your puppet? Explain.

Note:

- Jeff Dunham's sidekick 'José Jalapeño on a Stick' is a stick puppet whose mouth moves.
- Think out of the box when it comes to creating your puppet.
- Do not just make use of the obvious materials.
- Be creative and make sure that most of the materials you use are recycled and recyclable.
- Research the different techniques you will need to create your puppet.
- Think about the different art elements and design principles and how you are going to make use of them when constructing your puppet.

Before constructing your puppet, keep the following in mind:

- Ventriloquist puppets are designed to sit either on the ventriloquist's lap, in their arms, or next to them on a stand.
- Head and mouth movements are controlled by accessing them through a slit in the back of the puppet.
- The puppet's head should be able to easily move around.
- You must be able to control the movements of the puppet's mouth easily.

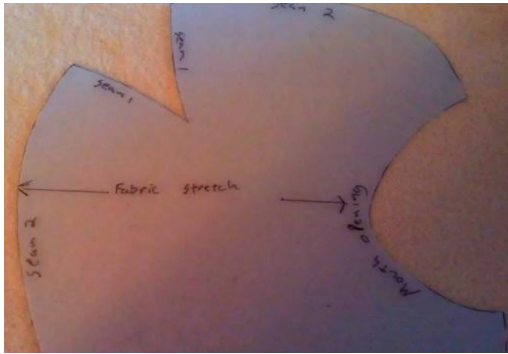

The lesson was copied from: <https://www.instructables.com/How-to-Build-a-Quality-Puppet/> Step by step lessons on building puppets

Step 1: Materials

- * 3/4 meter of fabric(fleece)
- * 6 X 9 20 cm piece of foam
- * 18.0594 x 7 cm pieces of polyfoam or reticulated foam
- * 1 sheet of pattern plastic used by quilters to create patterns.
- * 1 square of Black Felt
- * Hot glue and glue gun and glue sticks
- * Quality Thread the same color as your fleece
- * Bees Wax
- * 3 meters of elastic
- * Polyester fiberfill
- *Sharpie Fine Point marker
- *Basic sewing supplies

Step 2:

Trace and Cut the Materials

- Place the pattern on the back side of the fabric. It's also known as the "wrong" side of the fabric.
- You do this to not get a marker on the front of the puppet where people will see it.

• IMPORTANT!!

- When placing the pattern on the fleece for the head, make sure the pattern is sitting on the fabric, so the fabric stretches from the front of the puppet to the back of the puppet. Not up and down. Also, make sure the "Nap" or "Grain" of the fabric is going in the same direction for both halves of the puppet.
- Otherwise, the seam will be obvious no matter how you sew it together.
- Use the Sharpie to trace the pattern.
- Don't press hard! You don't want the marker to bleed through the fabric.
- Do the same for the foam. You can cut out the Foam with a sharp pair of scissors, an Exacto knife, or a razor blade.
- The foam will dull the blade.
- For the Mouth plate, if you can't find stiffened felt you can use plastic pattern sheets in place of the stiff felt listed on the Puppet Project pattern.
- Be sure to snip off the very tip of the sharp corners. This will help make sure a hole is not created in the puppet's mouth over time.

Step 3:

Foam Skull and Mouth plate

- The mouth plate is the foundation for this type of puppet. There are many ways to make a mouth plate; this is simply one way. In general, the cheaper the materials you use, the less durable the puppet will be.

No puppet will last forever. If, for example, you use cardboard for your mouth plate; you

can expect your puppet to fall apart in short order, as cardboard is not very durable.

- Start by taking the two plastic mouth plate pieces and gluing them to the foam mouth plate as shown in this photo.
- I then add the elastic to the back of the mouth plate on the half that will be the top of the mouth. This helps to keep your hand in place for this kind of puppet.

- Next glue the foam skull pieces together. First glue the individual seams then glue the two halves together.
- At this juncture do not glue the mouth plate to the skull. If you, do it will make putting the mouth plate in the puppet more difficult.

Here are a few tips on hot gluing foam:

- Apply the hot glue to only one edge of the seam but be generous.
- When applying the glue, get close to the edge but not over.
- Glue one to two inches at a time, less if you are gluing around a tight curve.
- Press your seams together, line the surfaces with each other, and hold them in the most natural position possible. Foam will stretch and although this can be a redeeming feature it can also be a downfall. Again, try to keep the foam in a natural position and allow the glue to cool completely.

Step 5:

The head

- Sew the two halves of the head together using the Henson Stitch as described in the previous step.
- **Do NOT** put the right sides together for this as it will put the seam on the outside of the puppet.
- You need to put the pieces next to each other with the right sides facing up.
- Start by sewing the relief seams first.
- Make sure you line up all of your seams. You want your puppet to look symmetrical.
- Now turn the head inside out so we can add the felt mouth.
- Line up the felt mouth with the fleece, right sides together.
- Using a whip stitch, attach the felt to the fleece. You're going to have to work to keep the edges flush as you sew around the mouth.
- The extra effort it takes, however, is worth it in the end.

Step 6

The body

- Now sew the two halves of the body together and then turn inside out so the right side of the fabric is on the outside.
- You can sew the body and arms with the sewing machine if you like.

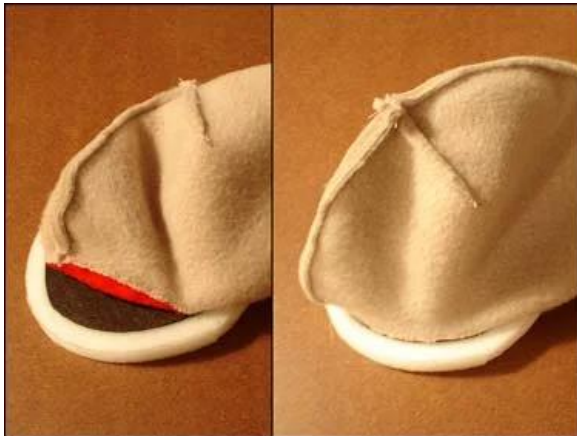

"clothes" on the puppet.

- Also, sew up the arms. (right sides together) Turn them "inside out" so the right side of the fabric is now on the outside and the seams are on the inside. stuff the arms with the polyester fibrefill.
- Attach the arms to the body.
- An option for this, if you like, is to use a different material for the body.
- You can do this, so you don't have to put

Step 7

The mouth plate

- With the puppet

et head still inside out, glue the mouth plate to the felt mouth; making sure everything is lined up.

- Take your time on this and don't rush it.
- Be sure to use glue all along the edges of the felt. Don't glue the fleece to the mouth plate.

Step 8

Attach the skull to the mouth plate

- Determine which half of the mouth plate is the top half.
- Glue the skull to the mouth plate making sure the skull is centred.

Step 9

Turn the puppet head right side out

- Turn everything right side out.
- The puppet may be stubborn but with a little work and patience, it will happen.

Step 10

Attach the body to the head

Chapter 6

Topic 1

Visual Literacy

Entrepreneurial Awareness

6.1 Entrepreneurial skills

- In learning how to budget, learners need to get into the habit to write everything out.
- When learners are familiar with identifying patterns, and get up close and personal with the reality of what they earn versus what they want to buy, they will be able to make better financial decisions.
- Often crafters who start to turn their craft into a business neglect to pay themselves a fair wage for their time or misjudge the amount of time it takes to create a piece from start to finish.
- Using a formula to calculate your price will give you a good starting point for what your labour is worth.

6.2 How to calculate cost per product?

- The sales price must be equal to or greater than the product cost per unit to avoid losses.

Product Cost

$$\text{Product Cost Formula} = \text{Direct Labor} + \text{Direct Material} + \text{Factory Overheads}$$

<https://cdn.wallstreetmojo.com/wp-content/uploads/2019/06/Product-Cost-2.jpg>

- Many professional crafters use a rate of R150 to R250 per hour to calculate their labour costs.
- Suggestions on how to cost your product so that you will be able to sell, buy new stock, and make a profit.
 - Cost of supplies + R150 per hour time spent on completing one article.

- Cost of supplies x 3 on a product.
- For example, you have determined the cost to purchase supplies to make one unit of your product is R20 and it takes you a half-hour to complete it, then the formula would look like this:

$R20 + R75 = R95$ Time spent to make the product.

$R20 \times 3 = R60$ Cost of the suppliers

$R95 + R60 = R155$ That the item needs to be sold for

- While it may need some modification as you find your target market and observe the market for your product, it is a good place to begin when determining your starting price.
- You can adjust your costs due to the popularity of selling it and your profit margin will go up but there is sometimes a golden rule to follow.
- Keep overheads low, productivity high, and research where you can save money and where you buy the products from.

COSTING YOUR PRODUCT		
Cost on Time spent to create your product	Cost of suppliers where you bought products one by one	Total costing

Examination

Educator will give you guidance on what to study.
