Visual Arts

Visual Literacy

Reptiles or Insects

Dear learner by the end of this activity you will be able to:

- Observe and discuss images and identify and name art elements and emphasis in each image.
- Below are 10 photographs showing different reptiles and insects.
- Use your visual diary to identify and illustrate the elements art e.g. shape, size, colour and textures that you can identify.
- Think of all the work you have done about elements of art in Year 1-2.
- What parts of these 10 photographs are being emphasised and how is this done?

 Activity 1

Dear learner by the end of this activity you will be able to:

- Identify texture, shape and form in images of reptiles and insects.
- Please use your visual diary for activity 1.
- Your teacher will provide you with the template, you will then cut and paste it into your visual diary.
- Complete this activity in your visual diary.
- Identify; name or draw the shapes/form and textures that are evident in each of the images in the table below.
- The images in the table are for reference only, use the enlarged image in your book.
- PLEASE do not write in this book.

Reference	Texure	Shape/Form
		
		
		
		
		
		

Create in 2D

Reptiles or Insects

Assessment 1 Formal activity

Start Date: _____

End date: _____

Dear learner by the end of this activity you will be able to:

- Use draw and/ or colour media to explore a variety of media and techniques.
- Use art elements: Reinforce relevant art elements through image of reptiles or insects.
- Use design principles: Emphasis and focal point and integrating previous knowledge from Year 1-2

Recourses

A3 white paper

Charcoal, grey pencil or pens.

Instructions

Draw a reptile or insect by using different features from visual literacy.

Create a fantasy reptile or insect by looking at images for reference.

Step 1

- Planning in visual diary.
- Think of what you want to draw, how you want to do it and in which medium (pen, charcoal or pencil)

Step 2

- Take your A3 page and make light pencil outlines and basic shapes of your insect or reptile.

Step 3

- When you are happy with the basic shapes, form and proportions of your insect/ reptile, go over the lines and add the identifying details.

Step 4

- Add your fantasy element to your drawing.

Step 5

- Finishing touches and details.

Example only

Little Wings by Alex Konahia

Little Wings by Alex Konahin

Arnaud Pollette

Drawing by Redmer Hoekstra

Swirling pen and Ink Wildlife by Si Scott

Swirling pen and ink Wildlife by Si Scott

✓ Rubric

Assessment criteria	Marks allocated	Marks received
Elements of Art:		
1. Elements of art: Texture, shape, form, line, value. (1 mark for every element used)	7	
Principles of Design:		
1. Emphasis: Was clearly and effectively created.	1	
2. Focal point: This may form part of emphasis, does your eye fall on the focal point?	1	
3. Is this image in unity with effective use of all appropriate design principles.	5	
Medium used was pencil, charcoal or pen / mix.	3	
This is a work of fantasy without any doubt to the viewer.	2	
The subject choice is a reptile or insect.	3	
Planning was done in visual diary and finish product resembles planning.	3	
TOTAL	25	

Reflection (Use the visual diary to complete reflection)

1. Did you enjoy this activity?
2. Did this activity make you look at insects or reptiles in a different way?
3. What was the most challenging part of this activity?

Start Date: _____

End Date: _____

Dear learner by the end of this activity you will be able to:

- Use skills and techniques: Sculpting.
- Use art elements: Reinforce texture, shape and form.
- Use design principles: Reinforce emphasis and focal point.
- Spatial awareness: Reinforce conscious awareness of working in space e.g. view model from multiple angles.
- Use tools appropriately and safety requirements.

Resources

Cutting knife.

Any type of clay or soap.

Toothpicks, or any other sculpting tools.

Instructions

You may choose any sculpting medium that you are comfortable with.

Make your own fantasy insect/ reptile.

You may make the same insect /reptile that you drew in 2D or a new fantasy insect/ reptile.

Example

Clay Snake (example only - you will make a fantasy insect/ reptile)

Step 1

- Roll a piece of clay between your fingers.
- You roll the clay until the snake is as thin or thick that you would want it to be.

wikihow.com

Step 2

- Flatten one end of the clay that you rolled for the snakes' head.
- You can attach two small balls to the head or poke holes with toothpicks for the eyes.

wikihow.com

Step 3

- Make a tiny clay tongue and attach to the head.

wikihow.com

Step 4

- Now, you will add the details and interesting patterns, textures and shapes that make your snake a fantasy snake.

wikihow.com

Fantasy Porcelain Animals by Ukrainian Artist Duo Anya Stasenko And Slava Leontyev

Elements of Art:		
1. Texture: Evident and creatively made in your sculpture.	4	
2. Shape and Form: Accurate or effective for the design. Created with intent.	4	
Principles of Design:		
1. Emphasis: There is a clear focal point created with effective use of emphasis / design principles.	4	
2. Focal point: There is a clear focus point where your eye land on your fantasy creature.	4	
Spatial awareness: Sculpture, viewable from multiple angles and extends into space.	4	
Correct use of tools used to create texture, help form and make your sculpture.	4	
Planning was done for a new sculpture of resembles the 2D drawing and planning in visual diary.	1	
TOTAL	25	

Reflection (Use the visual diary to complete reflection)

1. Were you able to mould and sculpt your fantasy creature as you wanted it?
2. What part of this activity was most difficult?

Your teacher will do this with you in class.

Teachers resource

How to make paper clay

- 1. Gather your supplies.** To make paper clay, you'll need toilet paper as well as a few supplies you can find at the hardware store. This recipe results in a smooth, malleable clay you can mould over any type of prepared form. It dries into a hard surface to which you can apply paint or varnish. Here's what you need:
 - 1 roll of single ply toilet paper (not the kind with lotion, scent or colour added)
 - 1 cup premixed joint compound (do not buy it in powdered form; get "regular")
 - 3/4 cup PVA glue (white school glue)
 - 2 tablespoons mineral oil
 - 1/2 cup white flour
 - 2 large bowls
 - Electric mixer
 - Measuring cups
- 2. Remove the toilet paper from the roll.** It's less messy to slip the entire roll of paper off of the cardboard roll at once, rather than unwinding the paper entirely. Place the toilet paper in one of the bowls.
- 3. Fill the bowl with water.** Pour it over the toilet paper until it's completely saturated. Push the toilet paper down into the water to make sure it all gets wet.
- 4. Squeeze out the toilet paper and place the pulp in a separate bowl.** Tear it off in smaller chunks (1 inch or less) so you can squeeze out as much water as possible. Place the pulpy chunks in a separate bowl so you can mix them with the other ingredients. Keep going until you've squeezed out all the toilet paper.
- 5. Measure 1 1/2 cups of toilet paper pulp.** One roll of plain toilet paper typically equals a cup and a half of pulp. If your brand of toilet paper makes very small or large rolls, you might end up with less or more pulp than you need. Make more toilet paper pulp or discard the excess as needed, so you have 1 1/2 cups of pulp in the bowl.
- 6. Add the remaining ingredients.** To the bowl with the pulp, add a cup of premixed joint compound, 3/4 cup white school glue, 2 tablespoons mineral oil, and 1/2 cup white flour.
 - Do not substitute these ingredients. Different types of glue, oil, flour, and so on will change the consistency of the paper clay and may not produce the results you want.
- 7. Mix up the clay until smooth.** Use your electric mixer to beat the clay at a high speed. The paper fibres will break down and blend with the joint compound, glue, oil and flour until it takes on a smooth, dough-like consistency.
 - If you want a thicker clay, mix in an extra half cup of flour.
 - For a thinner consistency, add an extra half cup of glue.

How to make clay

Ingredients

Flour and Salt Clay

- 4 cups (480g) of all-purpose flour
 - 1.5 cups (417g) of salt
 - 1.5 cups (350ml) of water
1. **Mix 4 cups (480 g) of flour and 1.5 cups (417 g) of salt in a large bowl.** Add both dry ingredients to a large mixing bowl. Then, use a big plastic or wooden spoon to stir the dry ingredients until they are thoroughly mixed.
 - Make sure the flour and salt are **mixed well before you add the water** because it will be harder to redistribute one of the ingredients once the clay starts to form.
 2. **Add 1.5 cups (350 mL) of water gradually as you stir the mixture.** Pour small amounts of water into the bowl at a time, stirring between pours. Blend the mixture as well as you can before you add more water. By the time all of the water is added to the bowl, your clay should be forming a ball.
 - It should get harder to stir each time you add more water.
 3. **Knead the clay until it reaches an even consistency.** Take your clay out of the bowl and place it on a flat surface, like the kitchen counter. Use your hands to push and pull the clay to work it into a nice consistency.
 - You can also pick up your clay and throw it down on the counter to work out any air bubbles that might be present. This will help your clay stay moist longer.
 4. **Sculpt the clay as you desire.** Now that your clay is ready, you can mould it into a figure, create ornaments, or just play around. Use it as you would use a store-bought clay.
 - This kind of clay can make great keepsakes. For example, press your child's foot or hand into the dough until there is an imprint, then let the mould harden to make a gift.
- Tip:** Use cookie cutters or a glass to cut out shapes, if you like. Start by rolling your clay out flat using a rolling pin. Then, cut your clay into shapes using a cookie cutter or a drinking glass, which can make circles for ornaments. If you wish to hang the shapes as ornaments, poke a hole near the top of the shape using a drinking straw or a toothpick.
5. **Allow the clay to air dry for 2 days to preserve your model.** If you want to create a sculpture or keepsake, you'll need to let your clay dry. This kind of clay dries out quickly, but it's best to leave it untouched for at least 2 days to make sure it's fully dry.
 - Variation:** If you need to speed up the drying process, bake your clay at 100 °C for 3 hours. If it still feels soft after 3 hours, you can put it back in the oven for up to 2 more hours.
 6. **Store unused clay in an airtight container.** You can preserve your clay for a few weeks by keeping it in an airtight container. Make sure you leave the clay in the container whenever you're not playing with it, as it will dry a little bit whenever it's exposed to the air.

For instance, you can use a plastic bag with a zipper or a Tupperware container. For extra longevity, place the clay in the refrigerator.

Performing Arts

Warm up and play – Physical

Dear Learner

By the end of this activity you will be able to do physical warm up for co-ordination and control (including spinal rolls, swings, floor work, body part isolations, knee bends and rises)

- Hand-eye coordination games to improve your movement.
- There are many drills.
- To give you an idea of what you could do have a look at the drills below.

<https://youtu.be/GvdLf45mGq0>

Drill 1- Balloon/ Ball Tossing

This fun partner exercise has you catching and bumping the balloon/ ball back and forth with each other using your hands, heads, and other body parts. Change the angles and speeds to keep it random and try starting out facing different directions or work on standing closer together or further apart. You will see, this game can be a lot more challenging than it looks.

By Jarlo Ilano, MPT, OCS

Drill 2 - Juggling

More than just for those creepy clowns at birthday parties, juggling is a great way to develop rhythm and timing. Start with slow circles with just two balls, finding your pacing and coordination between both hands, then add the third ball. It is amazing how the addition of that extra ball can make you speed up too much and lose your rhythm. The benefit of this exercise is in the repetition and the awareness of how off-beat you can be when you are nervous.

By Jarlo Ilano, MPT, OCS

Drill 3 - Small Ball Tossing

this time with a small ball, this drill allows for
ons.
s and throwing patterns for endless variations.
en your partner tells you to turn as she/ he
quires a quick orientation of direction that you do
the ball as you catch it.

Drill 4 - Jump Rope Drills

A classic conditioning exercise, jumping rope also works on hand/foot/implement coordination when you go beyond two foot hopping. Running in place, one foot multiple hops, and crisscrossing are all options you can play with. Keep the rope moving at a steady pace while you get fancy in your footwork and jumping rope can be a good coordination drill that teaches you how to maintain rhythm and control while tired.

By Jarlo Ilano, MPT, OCS

Drill 5 - Target Practice

A staple hand/eye drill, target practice involves the difficult but very natural skill of throwing and accurately seeing and aiming that toss. It's both difficult and addicting to practice hitting at a target. Start close to the target and progressively move further away from it, and also play with standing at different angles rather than directly in front of it. You can add another level of difficulty by facing away, then quickly turning and aiming for the target.

By Jarlo Ilano, MPT, OCS

Drill 6 – Ball toss from different positions

Back to the ball toss, you can change your orientation and positioning to add even more variety to the activity.

Try on both knees, moving in a squat, lying on your back or stomach or side, lunge positions—whatever feels most challenging and fun.

By Jarlo Ilano, MPT, OCS

Drill 7 – Balloon Hockey

Using a balloon instead of a small bean bag or “hacky sack” slows down the rate of fall, making this an easier exercise, though the balloon’s lightness can be a bit more random when you hit it hard.

Work on softening your movements to keep the balloon up in the air and play with the positioning of your foot and body. Again, different positioning changes the exercise entirely, so work from standing, squatting, kneeling, and on your back.

By Jarlo Ilano, MPT, OCS

Drill 8 – Dribbling

Dribbling a small ball as you would a larger soccer ball is more unpredictable with the size of the ball needing changes in how hard you hit.

The speed you need to maintain the right angles needs a good amount of practice and persistence.

Practice dribbling with one hand and switching back and forth between both hands. Play with different speeds and dribbling closer to the ground or further away from it. There are many possibilities here.

By Jarlo Ilano, MPT, OCS

Drill 9 – Wall ball bounce

When you do not have someone available to toss around a ball with you, all you need is a solid surface in front of you and bouncy ball. When you switch up how you toss the ball, and the angles from which you aim for the wall, there’s little predictability in the way the ball returns to you.

Work on throwing the ball from different distances and aim for different points on the wall or aim for the floor so that the ball bounces off the wall.

By Jarlo Ilano, MPT, OCS

Drill 10 – Targeting through rings

This is another version of target practice, where you are now tossing objects through an object with an open area. Hoops, rings, cardboard cut-outs, large to small openings etc, they add even more variation to your target practice.

The further away you are from the rings or other open area, the harder it will be to make your target. See how challenging you can make this fun drill!

By Jarlo Ilano, MPT, OCS

Warm up and play – Vocal

Dear Learner

By the end of this warm up activity you will have done vocal warm ups by using any type of music genre to enhance unison, canon, two-part harmony, and call and response and create musical phrases, in pairs, using repetition, accent, call and response, and/or echo.

- Warming up is key – we do it for sports, so why not for our vocal cords?
- We all know that every professional athlete needs to take the time to stretch their muscles to effectively prepare for a big game. In much the same way, any good voice actor understands that vocal warm ups are necessary to ensure that they can deliver their best performance when they step up to the microphone.
- Vocal warm ups are very beneficial. Vocal warm ups can help loosen your vocal cords, and set you up to nail your next audition or school speech. Using your voice for a long time is challenging if you are not prepared.
- Each time you use your voice, you place strain on your body. This is something you should take into consideration before giving a lengthy speech or singing. It is very important for you to warm up your voice.

Different vocal warm up activities

1. Entire body

- Bend
- Stretch
- Make faces
- Tap your chest

<https://youtu.be/CFXqyl4C1J4>

2. Loosening the muscles in your head and activating your lungs

- Close your right nostril
- Breathe in deeply through your left nostril
- Close your left nostril
- Breathe out through your right nostril
- Close your left nostril and do the same again the other way around

3. Long breaths

- Breathe in through your nose and lift your arms out at your sides
- While breathing out, make an “S” sound and bring your arms down again

4. Diaphragm exercises

- Say a few individual letters with intensity: F – S – T – SH

- Tongue and diaphragm: say a few individual syllables with intensity: da – de – di – do – du
- Palate and diaphragm: raise your palate and the top of your head: ga – ge – gi – go – gu
- Jaw and diaphragm: let your jaw hang loosely: ja – je – ji – jo – ju

5. Letting your lips go loose

- Say “brrrrrrr” several times and allow your lips to vibrate

6. Tongue Twisters e.g.

- Unique New York, unique New York, unique New York.
- A big black bug bit a big black bear.
- She sells seashells by the sea shore.
- Peter Piper picked a peck of pickled peppers.
- How much wood could a woodchuck chuck if a woodchuck could chuck wood?
- What time does the wristwatch strap shop shut?
- A skunk sat on a stump and thunk the stump stunk, but the stump thunk the skunk stunk.
- No need to light a nightlight on a light night like tonight.
- My cutlery cuts keenly and cleanly.
- Four furious friends fought for the phone.
- Reading and writing are richly rewarding.
- Any noise annoys an oyster, but a noisy noise annoys an oyster most.
- I saw a kitten eating chicken in the kitchen.
- He threw three free throws.
- Three free thugs set three thugs free.
- If you stick a stock of liquor in your locker
It is quick to stick a lock upon your stock
Or some joker who is quicker's
Going to trick you of your liquor
If you fail to lock your liquor with a lock
- Someone said something simple
A simple something said to me
Simply simple someone said
A simple something said to me.

<https://youtu.be/5pLs8gO0myg>

7. Yawn

The sillier you sound and the better a vocal warm up makes you feel. Do not be shy. Have fun with it!

- Step 1: Open your mouth as if to yawn.
- Step 2: Slide all the way down from the top of your vocal range to the lowest grumble you can muster.
- Step 3: You will know when you bottom out.

You should only do this exercise a few times as a part of each vocal warm up routine. You should never start with this one, and it is often best to leave it until the end when you have already exercised your voice.

<https://youtu.be/2pvGfc3wEVE>

Improvise and Create

Activity 1

Balance

Dear Learner

- By the end of this activity, you should have developed skills in mirroring. Partner skills such as copying, leading, following, mirroring, and balance.

i A dramatic activity based on a common daily experience. Two students face one another. One pretends to be a person looking into a mirror while the other pretends to be the reflection of that person, exactly duplicating the person's movements.

- Learners are divided into pairs.
- Have a look at the Yoga poses in the images below.
- Practice each pose and focus on your posture and movements.
- Next, your teacher will give you a sequence of movements that you will complete.
- Each learner works with a partner and imitates the movement made by the other, or mirrors the movements made.
- The focus is on developing concentration and observational skills.

<https://www.youtube.com/watch?v=cNe-QxsMvoM>

I AM AWESOME.

PEACOCK

(Triangle)

CHAIR

1. Stand tall with your feet a few inches wider than shoulder-width apart.
2. Face your back, left foot out at a slight angle.
3. Raise your arms up parallel to the ground and then lean your upper body slightly over your front right leg.
4. Bend at your waist as you reach your right hand down and rest it on your chair.
5. Reach your left arm straight up toward the sky.
6. If it feels okay with your neck, look up toward your raised arm.
7. After a good stretch, switch sides.

STANDING

1. Stand tall with your feet a few inches wider than shoulder-width apart.
2. Face your back, left foot out at a slight angle.
3. Raise your arms up parallel to the ground and then lean your upper body slightly over your front right leg.
4. Bend at your waist as you reach your right hand down and rest it on your shin or ankle.
5. Reach your left arm straight up toward the sky.
6. If it feels okay with your neck, look up toward your raised arm.
7. After a good stretch, switch sides.

I AM CONFIDENT.

EAGLE

CHAIR

1. Place your feet firmly on the ground as you sit tall.
2. Cross your left leg over your right, wrapping it around as much as you can. Try to hook your left foot behind your right calf.
3. Bring your arms straight out in front of you and bend your elbows.
4. Cross your right arm over your left arm at the elbows. Wrap your arms around each other, trying to touch the palms of your hands together, with fingertips pointing up towards the sky.
5. Switch sides and repeat the steps.

STANDING

1. Stand tall.
2. Cross your left thigh over your right leg. Try to wrap or hook your left foot behind your right calf.
3. Bring your arms straight out in front of you and bend your elbows.
4. Cross your right arm over your left arm at the elbows. Wrap your arms around each other, trying to touch the palms of your hands together, with fingertips pointing up towards the sky.
5. Focus your attention on balancing as you bend your knees slightly.
6. Switch sides and repeat the steps.

I AM CALM.

DEER

(Side Angle)

CHAIR

1. Place your feet flat on the ground and sit toward the front of your chair.
2. Lean your upper body forward.
3. Twist to the right, as you rest your left arm on your right thigh or knee. Straighten your left arm and point your fingers toward the ground.
4. Lift your right arm up and point your fingers toward the sky.
5. Get in a good stretch and then repeat the steps on the other side.

STANDING

1. Stand tall and step your feet wide apart.
2. Lift and extend your arms out to both sides with your palms facing the ground.
3. Turn your left foot and toes in at a slight angle and point your right foot forward.
4. Bend your right knee so that your right thigh is parallel to the floor.
5. Lift your left arm up towards the sky and lower your right arm down towards the ground.
6. Get in a good stretch and then repeat on the other side.

I AM FLEXIBLE.

CRANE

(Dancer)

CHAIR

1. Stand tall in Bear Pose behind the chair.
2. Hold the back of your chair with your left hand.
3. Balancing on your left leg, lift your right leg behind you, bending it at the knee.
4. Grasp your right foot with your right hand and notice the stretch in your thigh.
5. Lean slightly forward and lift your back leg higher for a deeper stretch.
6. Now try this pose on the other side.

STANDING

1. Stand tall in Bear Pose.
2. Balancing on your left leg, lift your right leg behind you, bending it at the knee.
3. Grasp your right foot with your right hand and notice the stretch in your thigh.
4. Lean slightly forward and lift your back leg higher for a deeper stretch, as you extend your left arm forward.
5. Now try this pose on the other side.

Activity 2

Vocal repetition

Dear Learner

By the end of this activity, you should be able to create musical phrases in pairs using repetition, accent, call and response and or echo.

Building focus through acting exercises - Written by Troy Dobosiewicz

- Repetition exercises can help actors develop focus.
- Repetition exercises can be practiced in person or online.

https://za.pinterest.com/pin/create/bookmarklet/?media=https://dramatics.org/wp-content/uploads/2020/09/repetition_acting_web1.jpg&url=https://dramatics.org/value-of-repetition/&is_video=false&description=Girl%20interacting%20with%20someone%20on%20computer

Exercise 1

- One of the most difficult things about repetition is getting started, because you may think it feels silly.
- Keep in mind that many acting activities may seem silly at first are actually very good at developing your skills. Embrace the silly, laugh, mess up, and have fun developing your performance skills.
- First, get a partner and sit six feet apart. (If you are making a video or using video chat you are already in the correct position.)
- Let us say you are Partner One. Start by closing your eyes. When you are comfortable, open your eyes and say the first thing you notice about Partner Two (the person that is across from you, or that is on the other end of the video). You might say something like “You have a yellow shirt,” “You have brown hair,” or “You are wearing jeans.” You cannot say something mean, and you must identify something you believe, or think is true in the moment.
- With opened eyes, Partner One observes and says: “You have a yellow shirt.”
At this point Partner Two repeats what Partner One said with a simple *word change*: “I have a yellow shirt.”
Partner One repeats, “You have a yellow shirt.”
Partner Two repeats, “I have a yellow shirt.”
- This repetition activity should go on for two or three minutes.
- Two or three minutes is a long time to hold focus, but as performers onstage or screen, we must train endurance focus. Again, the main goals of the exercises are to develop your ability to focus on

another person and identify what is true in the moment. That is what actors do onstage, but with memorized lines.

- After two or three minutes, it's Partner Two's turn to lead.
Partner Two opens their eyes, observes Partner One and identifies what is true in the moment. Partner Two might remark, "You are wearing a gold necklace."
Partner One must repeat, "I am wearing a gold necklace."
- Even if Partner One knows the necklace is not real gold, Partner One must repeat, "I am wearing a gold necklace," since Partner Two noticed the necklace and believed it to be gold.
- This follows the basic "Yes, and ..." principle of improvisation, in which nothing can be refuted, in this case because it would interrupt the exercise.

Differentiation on exercise 1

- Now Partner One and Partner Two both close their eyes.
- After a verbal count of three, they both open their eyes.
- The first person who notices something says it.
Perhaps Partner Two says, "You are wearing a sweater."
Partner One may either repeat, "I am wearing a sweater," or state a new observation, for example, "You have brown eyes."
Partner Two can then repeat, "I have brown eyes," or state a new observation.
- The exercise goes on with each partner either confirming their partner's statement or saying something new. This is more difficult than it sounds because both performers are living in the moment. So, do not worry about messing up. Just laugh and try again. Remember this is challenging for everyone.
- Continue Repetition Exercise One for about 15 minutes, or until you get into a smooth back-and-forth in which you see and respond to the moment. Remember, this activity is not as simple as it sounds. Expect lots of laughing but try to stay focused.

https://www.youtube.com/watch?v=f_HLiM2b2gQ

Exercise 2

- First, take a break. After all, staring at another person for so long can be challenging.
- Now, go back to the positions you were in exercise 1.
- Take a minute or two to practice Repetition Exercise 1.
- In the second exercise, not only can you identify physical characteristics of the other performer, you also can look deeper.
- This time, when you open your eyes, you can either make a visual observation, such as "You are wearing a hat," or you can identify Partner Two's perceived state. For example, you might say, "You are happy."

- Partner Two then repeats, “I am happy,” (even if they are not happy) or notice and state something new about Partner One. Practice Repetition Exercise Two for 15 minutes or more, then take another break.

Exercise 3

- Keep an open mind when transitioning to Repetition Exercise Three.
- This step goes beyond both physical features and simple states of being.
- In this round, performers close their eyes, count to three, and open them together.
- Whoever notices something about the other performer first makes a statement beyond a state of being.

Example

- Partner One may say, “You are dressed nicely to go to dinner,” “You hate this game,” or “You are ready for this to be over.”
- The idea is to look beyond the physical, beyond the state of being, and into what the state of being might indicate.
- Partner Two may repeat, “I am dressed nicely to go to dinner,” “I hate this game,” or “I am ready for this to be over.” However, they can also identify something new or repeat elements from Repetition Exercise One or Two.
- The lesson continues with new observations or repetitions. If you have time, repeat these exercises for an hour each day.

Activity 3

Dear Learner

By the end of this activity be able to pair role-plays, using appropriate language, movement, facial expressions, perform group role-play using characters created, body language, movement, facial expressions, gestures and voice control.

i Gibberish, also called jibber-jabber or gobbledygook, is speech that is (or appears to be) nonsense.

It may include speech sounds that are not actual words, or language games and specialized jargon that seems nonsensical to outsiders.

Doesn't the term gibberish itself, on striking our ears, sound ridiculous?

It is, in fact, like a baby talk or a quick chatter.

<https://www.toptengama.com/wp-content/uploads/2017/10/Gibberish-words-in-English.jpg>

Gibberish may also be actual words that are just placed together in random ways and in that way they make no sense.

The following sentences are Gibberish in how they appear and said:

- Cold is with the monkey's ears and toes.
- Friends are baskets and hats.
- Wishes are hoping and trees are wet.
- TV shows on radios are lazy.
- Food is sitting with weather flying.

The poem "Jabberwocky" in Alice in Wonderland is a classic example of gibberish usage.

Jabberwocky - Alice in Wonderland

Tw'as brillig, and the slithy toves
Did gyre and gimble in the wabe;
All mimsy were the borogoves,
And the mome raths outgrabe.

"Beware the Jabberwock, my son!
The jaws that bite, the claws that catch!
Beware the Jubjub bird, and shun
The frumious Bandersnatch!"

He took his vorpal sword in hand:
Long time the manxome foe he sought—
So rested he by the Tumtum tree,
And stood awhile in thought.

And as in uffish thought he stood,
The Jabberwock, with eyes of flame,
Came whiffing through the tulgey wood,
And burbled as it came!

One, two! One, two! and through and through
The vorpal blade went snicker-snack!
He left it dead, and with its head
He went galumphing back.

"And hast thou slain the Jabberwock?
Come to my arms, my beamish boy!
O frabjous day! Callooh! Callay!"
He chortled in his joy.

'Tw'as brillig, and the slithy toves
Did gyre and gimble in the wabe;
All mimsy were the borogoves,
And the mome raths outgrabe.

The Jabberwock, with eyes of flame,
Jaws that bite and claws that catch.

Beware the Jabberwock, my son,
And the frumious Bandersnatch.

He took his vorpal sword in hand
And the vorpal blade went snicker-snack.
He left it dead, and with its head
He went galumphing back.

-by Lewis Carroll-

Interpret and Perform

Assessment 1 Formal activity

Gibberish – Language, body, and facial gestures.

Start Date: _____

End Date: _____

Dear Learner, by the end of this activity you will be able to:

- Pair role-plays, using appropriate language, movement, facial.
- Perform group role-play using characters created, body language and movement, facial expressions, gestures, and voice control.

Instructions

- Learners pair up.
- Learner 1 start to explain a scenario in Gibberish using appropriate language, movement, facial expression, and gesture.
- Learner 2 needs to interpret what Learner 1 is saying.
- Each learner will get a turn to interpret the Gibberish.

Improvisation sentences and scenarios						
	Not achieved 0	Below standard 1	Average 2	Good 3	Very good 4	Excellent 5
Personal performance	Not done	Almost no emotion / personality shown	Some attempt at emotion / personality	Very little emotion / personality	Capturing of character done well	Excellent performance
Language	No gibberish used	Attempt was made, but not well executed	Attempt made and somewhat executed	Gibberish used but nothing new and inventive	Well done very few mistakes and interruptions	Excellent sounds like a native language
Movement	No movement stands still and frozen	Moves side to side in one place no intentional movement	Some movement, went to different spots in a conscious way	Moves around use space well	Moves well within the drama, intentional and with purpose	Movement is effortless and flows with the drama intentional and well executed
Facial expressions	No facial expressions	Almost no facial expressions	Minimal facial expressions almost as if it was a mistake	Facial expressions work well with the drama and character	Very good fits the character and the emotion that was created	Animated and very expressive, emotions are evident and clearly understandable
Character development	No Character	Almost no character development	Some character development was noticeable	Character development showed growth	Character development was good and had a build up	Excellent character development
Total Marks						25

Interpret and Perform

Assessment 2 Formal activity

Improvisation sentences and scenarios

Start Date: _____

End Date: _____

Dear Learner, by the end of this activity you will be able to:

- Perform group role-play using characters created, body language and movement, facial expressions, gestures, and voice control

<https://youtu.be/6HzaVp7HWZo>

Instructions

- Learners get a scenario from the teacher e.g., Day at the dentist, or two customers at a 50% off sale, or boyfriend/girlfriend cheated on you, or helping grandmother in the kitchen, etc.
- Using appropriate language, movement, facial expression, and gesture. Learners remain in their pairs.
- Learners start with the scenario given to them. At any point in time teacher will give learner a sentence that was written down by learners beforehand and the sentence needs to be incorporated in the scene.
- Roleplay plots to think about:
- Guardian Angel.
- Vampire Prince.
- Mental Hospital Patient/ Doctor.
- Western Universe.
- Werewolf Universe.
- Zombie Apocalypse.
- After losing all of their supplies, friends and allies Person A finds themselves lost and without any defence. ...
- Ghost and Haunted.

Improvisation sentences and scenarios						
	Not achieved 0	Below standard 1	Average 2	Good 3	Very good 4	Excellent 5
Personal performance	Not done	Almost no emotion / personality shown	Some attempt at emotion / personality	Very little emotion / personality	Capturing of character done well	Excellent performance
Performance as group member	Not done	Does not work well with group	Very little participation and group spirit shown	Just enough participation and group spirit shown	Works well with rest of group	Team player
Conflict and Resolution	No conflict and resolution	Almost no conflict and resolution was created in the play	Some conflict and resolution was noted	Conflict and resolution was detected in the play	Conflict and resolution was very good and the audience was captured by it	Excellent conflict and resolution in the play. It kept the audience on the edge of their seats
Character Interaction	No interaction	Almost no interaction with other role players	Some interaction was notable	Interaction did take place	Interaction was good and a good repour in role playing	Excellent Interaction and repour.
Character Development	No Character	Almost no character development	Some character development was noticeable	Character development showed growth	Character development was good and had a build up	Excellent character development
Total Marks						25

Rhythm 	Rhythm is created when one or more elements of design are used repeatedly to create a feeling of organized, but not uniform, movement. Rhythm creates a mood like music or dancing. To keep rhythm exciting and active, variety is essential.
Movement 	Movement is the path the viewer's eye takes through the work of art, often to focal areas. Such movement can be directed along lines, edges, shape, and colour within the work of art.

Visual Arts

Visual Literacy

Term 1-3

Dear learner by the end of this activity you will be able to:

- Discuss the successes of your work done throughout the year.
- Consider art elements and design principles that you learned as part of the discussion.

- Take part in a class discussion about the work you have done this year, Term 1-3.
- Take what you have learned this year and evaluate your work.
- What about your work was done very well and where could you have improved?
- Work with your teacher and fellow learners.
- This is a constructive session and we are not here to point out everyone's mistake.
- Have respect for each other and the work.

Create in 2D

Term 1-3

Assessment 1 Formal activity

Start Date: _____

End date: _____

Dear learner by the end of this activity you will be able to:

- Use drawing and/ or colour media to explore a variety of media and techniques.
- Use art elements: Use all elements taught during the year.
- Use design principles: Contrast and proportion.

Resources

A3 white paper.

Mix mediums.

Instructions

Combine all the techniques learned throughout the year.

Create a picture combining all the work done from Term 1-3.

Example

Resources

A3 white paper.

Mix mediums.

Instructions

For this activity students will have to make a drawing of themselves or a reptile/insect in a cartoon style drawing.

Emphasis one part of this cartoon drawing by enlarging it out of proportion with the rest of the figure/ body e.g. large nose, eyes, feet etc.

Also, only use one colour theme. (only primary colours) (only complementary 2 colours) etc. Choose.

Step 1

- Draw the outline of the face and its guideline.
- Draw a circle, place the vertical (guideline) off to one side.
- This will show that the head is slightly turned to a side.

wikihow.com

Step 2

- Add a nose where the lines cross.
- Start with an oval and change the nose shape to the shape that you would like it to be.
- Big, small, wide, narrow etc

wikihow.com

Step 3

- Draw a mouth. (Start with a long triangle)
- The mouth can be crooked, straight, upside down etc.
- Also, draw teeth. (As you would like them to be)

wikihow.com

Step 4

- Sketch the eyes.
- This is a cartoon and usually the eyes are large, but you may make them any size or shape you would like.

wikihow.com

Step 5

- Add a body.
- The proportions of your cartoon body may be out. You may choose the size you desire.

wikihow.com

Step 6

- Draw your cartoon's hair, hat, or whatever covers the head.

wikihow.com

Step 7

- Trace over your sketch lines with darker lines.
- Here you can add extra details, like a gap tooth or earrings.
- Also add some details to the body.

wikihow.com

Step 8

- Colour your cartoon in the colours that you decided.
- Adding shadows may add to the overall look of your cartoon.
- Also, consider adding in a background or other relevant information.

Create in 3D

Term 1-3

Assessment 2 Formal activity

Start Date: _____

End date: _____

Dear learner by the end of this activity you will be able to:

- Perform skills and techniques like pasting, cutting, wrapping, typing, joining various recyclable materials.
- Use art elements: All art elements taught during the year.
- Spatial awareness: Reinforce conscious awareness of working in space.

Resources

Mix art media.

Instructions

- Combine all the techniques that you learned this year a create a picture using one of the themes done this year, Term 1-3.
- Consider combining all the things you had to make into one.

Example

Resources

Recycled materials.

Cardboard box that fits over your head.

Coloured paper (cut offs, scrapes)

Glue, ruler, pencil, craft knife.

Instructions

Use recycled materials to make a 3D product/sculpture of the image you drew in 2D. (Cartoon person)

Use your visual diary for planning and refer to the planning you have done for your drawing.

Step 1

- Use your visual diary, refer to work that you have done throughout the year.
- Decide on the face that you want to make, the cartoon drawing or a new one.
- Design the face that you want to make and style it into a block image.

wikihow.com

Step 2

- Get together scrap paper in the colours that you would like to use for your face/ head sculpture.
- Pick the colours that you would like to use and get different shades of these colours.

wikihow.com

Step 3

- Cut the paper into small squares.
- 5cm x5cm size squares.

wikihow.com

Step 4

- Arrange the square into the face that you want to make.
- Do not paste anything yet, just do a dry run to see what it would look like and make changes where needed.

wikihow.com

Step 5

- Take your cardboard box.
- Draw a grid onto the box (5cm x 5cm blocks) front, back and sides, the top as well.

wikihow.com

Step 6

- Glue the squares onto each side of the box.
- In the design that you have laid out.
- Work on one side at a time, allow the glue to dry and make sure everything fits and works out before moving on.

wikihow.com

Step 7

- Cut out spaces for your/ the eyes.
- Use a craft knife to cut out the eye squares in your design.

wikihow.com

Step 8

- Try it on.

wikihow.com

Your teacher will do this with you in class.

Teachers resource

How to make paper clay

- 8. Gather your supplies.** To make paper clay, you'll need toilet paper as well as a few supplies you can find at the hardware store. This recipe results in a smooth, malleable clay you can mould over any type of prepared form. It dries into a hard surface to which you can apply paint or varnish. Here's what you need:
- 1 roll of single ply toilet paper (not the kind with lotion, scent or colour added)
 - 1 cup premixed joint compound (do not buy it in powdered form; get "regular")
 - 3/4 cup PVA glue (white school glue)
 - 2 tablespoons mineral oil
 - 1/2 cup white flour
 - 2 large bowls
 - Electric mixer
 - Measuring cups
- 9. Remove the toilet paper from the roll.** It's less messy to slip the entire roll of paper off of the cardboard roll at once, rather than unwinding the paper entirely. Place the toilet paper in one of the bowls.
- 10. Fill the bowl with water.** Pour it over the toilet paper until it's completely saturated. Push the toilet paper down into the water to make sure it all gets wet.
- 11. Squeeze out the toilet paper and place the pulp in a separate bowl.** Tear it off in smaller chunks (1 inch or less) so you can squeeze out as much water as possible. Place the pulpy chunks in a separate bowl so you can mix them with the other ingredients. Keep going until you've squeezed out all the toilet paper.
- 12. Measure 1 1/2 cups of toilet paper pulp.** One roll of plain toilet paper typically equals a cup and a half of pulp. If your brand of toilet paper makes very small or large rolls, you might end up with less or more pulp than you need. Make more toilet paper pulp or discard the excess as needed, so you have 1 1/2 cups of pulp in the bowl.
- 13. Add the remaining ingredients.** To the bowl with the pulp, add a cup of premixed joint compound, 3/4 cup white school glue, 2 tablespoons mineral oil, and 1/2 cup white flour.
- Do not substitute these ingredients. Different types of glue, oil, flour, and so on will change the consistency of the paper clay and may not produce the results you want.
- 14. Mix up the clay until smooth.** Use your electric mixer to beat the clay at a high speed. The paper fibres will break down and blend with the joint compound, glue, oil and flour until it takes on a smooth, dough-like consistency.
- If you want a thicker clay, mix in an extra half cup of flour.
 - For a thinner consistency, add an extra half cup of glue.

How to make clay

Ingredients

Flour and Salt Clay

- 4 cups (480g) of all-purpose flour
 - 1.5 cups (417g) of salt
 - 1.5 cups (350ml) of water
7. **Mix 4 cups (480 g) of flour and 1.5 cups (417 g) of salt in a large bowl.** Add both dry ingredients to a large mixing bowl. Then, use a big plastic or wooden spoon to stir the dry ingredients until they are thoroughly mixed.
 - Make sure the flour and salt are **mixed well before you add the water** because it will be harder to redistribute one of the ingredients once the clay starts to form.
 8. **Add 1.5 cups (350 mL) of water gradually as you stir the mixture.** Pour small amounts of water into the bowl at a time, stirring between pours. Blend the mixture as well as you can before you add more water. By the time all of the water is added to the bowl, your clay should be forming a ball.
 - It should get harder to stir each time you add more water.
 9. **Knead the clay until it reaches an even consistency.** Take your clay out of the bowl and place it on a flat surface, like the kitchen counter. Use your hands to push and pull the clay to work it into a nice consistency.
 - You can also pick up your clay and throw it down on the counter to work out any air bubbles that might be present. This will help your clay stay moist longer.
 10. **Sculpt the clay as you desire.** Now that your clay is ready, you can mould it into a figure, create ornaments, or just play around. Use it as you would use a store-bought clay.
 - This kind of clay can make great keepsakes. For example, press your child's foot or hand into the dough until there is an imprint, then let the mould harden to make a gift.

Tip: Use cookie cutters or a glass to cut out shapes, if you like. Start by rolling your clay out flat using a rolling pin. Then, cut your clay into shapes using a cookie cutter or a drinking glass, which can make circles for ornaments. If you wish to hang the shapes as ornaments, poke a hole near the top of the shape using a drinking straw or a toothpick.

11. **Allow the clay to air dry for 2 days to preserve your model.** If you want to create a sculpture or keepsake, you'll need to let your clay dry. This kind of clay dries out quickly, but it's best to leave it untouched for at least 2 days to make sure it's fully dry.

Variation: If you need to speed up the drying process, bake your clay at 100 °C for 3 hours. If it still feels soft after 3 hours, you can put it back in the oven for up to 2 more hours.

12. **Store unused clay in an airtight container.** You can preserve your clay for a few weeks by keeping it in an airtight container. Make sure you leave the clay in the container whenever you're not playing with it, as it will dry a little bit whenever it's exposed to the air.
- For instance, you can use a plastic bag with a zipper or a Tupperware container. For extra longevity, place the clay in the refrigerator.
