Code of Conduct

Dear student, parents/guardians

Arts and Crafts consists out of four years containing Term 1-4.

Assessment consists out of informal and formal work that will take place throughout the year.

All assessment tasks **MUST** be completed each term.

INCOMPLETE WORK NOT SUBMITTED will result in poor performance marks.

Absenteeism: It is your responsibility as learner and guardian to inform the educator if you have missed an assessment. Doctors/funeral letter will be required for **FORMAL ASSESSMENT TASKS** when missed.

Workbooks containing informal and formal work will stay at school but if a guardian want to see the work he/she is welcome to make an appointment with the educator or the educator may make copies of the learner work and sent it to the parent/guardian.

Stationery and Art Media: School will provide this but if any of the materials disappear or get lost, you as a parent/guardian need to replace the object that was lost.

Behaviour

- No late coming will be tolerated and may result in detention.
- Enter the class, go to your desk, place your bag on the floor, greet the educator.
- Carry on with the assessment or wait for instructions from your teacher.
- Do not talk or disrupt the class and have respect for yourself and others.
- Do not interrupt the teacher when she is teaching.
- No foul language (swearing and nastiness) and assaulting will be tolerated towards each other and may result in detention.
- Cover your mouth when you cough and sneeze and throw away all tissues or toilet paper in the given dustbins.
- Use the words Please and thank you often.
- In the need of asking questions, put up your hand and wait for permission to talk. Do not interrupt other learners asking a question and do not scream out answers and comments.
- No eating and drinking in the class.
- Greet educators, parents/guardians, principal or any other grown up who enter the class.
- Store artwork and material in designated locations and clean up after yourself.
- All cleanings must be done at the end of each period.
- At the end of a period after the bell has rung or your educator will give permission for you to pack up; clean up and leave the class row for row without disrupting teaching in any other classes where teaching is taking place.
- Your hands had to be washed after break. Do not come to class and ask permission then because we respect teaching and learning time.

Name and surname of learner: _____

Signature of learner: _____

Name and surname of the parent/guardian: _____

Signature of parent/guardian: _____

Learners:

- Your teacher will hand out the front cover page of the Terms work.
- Colour the picture and after you have completed it paste it in your learner book on the first page.

Chapter 1

Visual Literacy

1. Health and safety

At the end of this lesson, you need to:

Understand safety rules in the classroom

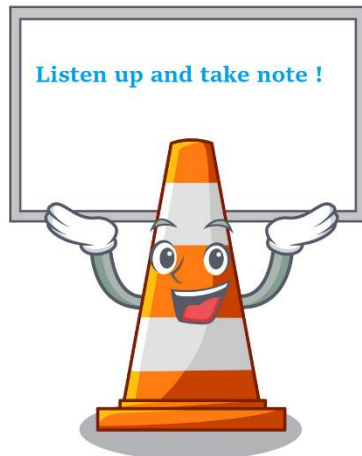

Understand the conduct in an art room

Know the clothing one need to wear in the art room

Be able to know how to clean the art room

Know how to conduct yourself when a accident takes place

Sign the contract between you and the educator that you will abide to the rules

Workshop safety is everyone's responsibility and the following rules have been put in place to ensure the safety of all learners and teachers.

1.1 Conduct

- **Only enter** the workshop when requested to do so by the teacher.
- **Learners** under the influence of **drugs or alcohol** are not permitted in the workshop.
- Learners with any **health problems** that may affect safety in the workshop (medication, epileptic fits, etc.) must report these conditions to the teacher.

- Be responsible, careful, and alert **AT ALL TIMES** in the workshop.
- **DO NOT work alone** in the workshop, or without a teacher present.
- **DO NOT bring food**, drinks, candy or gum into the workshop.
- Store bags, backpacks and clothes well out of the way before going to work areas.
- **Follow all instructions** precisely and carefully. If you do not understand a direction or a part of a procedure, **ask the teacher** before proceeding.
- Perform **only** those activities assigned or permitted by the teacher. “Activities” include touching and using materials, equipment, tools and machines, and doing projects, or anything else in the workshop. When in doubt, **ask the teacher** before taking action.
- **DO NOT wander** around the workshop, distract, or interfere with others. Stay at your work area unless permitted to move.
- Keep well clear of any person operating tools. Do not even talk to the operator as this may cause distraction. Bumping an operator could cause serious injury.
- Never **remove anything** from the workshop without permission.
- Fooling around, practical jokes and pranks are **NOT** tolerated in the workshop.
- Do not run, rush around or throw objects around in the workshop.
- **DO NOT enter any** storage areas or special work areas unless specifically permitted.
- **All** materials and equipment should be **treated with care and respect**.
- **All** tools, chemicals, and unknown substances should be **considered dangerous**.
- **DO NOT** touch, taste or smell any substance unless clearly instructed to do so. Keep hands away from face, eyes, mouth, and body while using tools, chemicals, paints, or biological materials. Wash hands after handling such items.

1.2 Clothing

- **Safety wear** (goggles, aprons, gloves, shoes, etc.) may be required for certain activities. Goggles should be worn **whenever** you use dangerous tools or chemicals or are near such use. If you are required to wear any safety equipment, you must **keep it on**.

- **Adjust your attire** for a “hands-on” activity:
- Long hair (including fringes), dangling ties, rings.
- Loose jewellery or loose / baggy clothing must be removed.
- Secured, tied back or tucked away.
- Open-toe footwear is not safe.

1.3 Cleaning the Art and Crafts Room

- **Clean up** after yourself and **put things back** where they belong (which should be where you found them). Keep the work area and floor area clean, tidy, clear and organized. Push chairs under the tables.
- After handling dangerous or dirty items, **wash** your hands with soap and water (for at least 10 seconds). Do so even if you were wearing gloves.
- **Properly dispose** of trash and waste. Recycle paper!
- Sinks are to be used **only** for water and water-based liquids, as approved by the teacher. **DO NOT** put anything solid in the sinks.

1.4 Accidents!

1. Stand up when doing practical work in order to move away quickly if needed.
2. If you are scalded, burnt or a chemical splash on your skin, wash the affected part immediately with lots of water. Report this, and also any cuts or abrasions to the teacher without delay.
3. **Immediately report** any accident (spillage of any substance), breakage, malfunction or unsafe condition to the teacher, no matter how small. **DO NOT** clean up spills without direction. **DO NOT** handle broken glass. **DO NOT** attempt to “fix” anything.
4. **Know the location** and proper use of all safety equipment (especially fire extinguishers and fire blankets), alarm systems and exits.

1.5 Chemical Hazards

It is very important that you must understand the hazards inherent in the art materials you use such as **toxic content, flammability, and reactivity**, and the appropriate precautions to protect against illness or injury.

Did you know that we as artist and crafters use adhesives and this is harmful to your health like paints, paint removers, bleach, ammonia, vinegar, alcohol and hydrogen peroxide.

This is used in techniques of paper crafting.

Store them in appropriate containers, out of reach of small children, and never, ever mix them without knowing their interaction.

These adhesives need to be used in a well-ventilated area, away from a heat e.g., the sun, a glue gun), wires/outlets and flames.

All dangerous and poisonous chemicals need to be labelled and must have wording so you will understand that it is dangerous and a chemical.

1.6 Tools that generates heat

This can be tools like glue guns, irons, embossing heater, stove/hot plate etc., must be turned off and unplugged after you have used them.

These types of tools are used to emboss pictures, melt crayons or plastic beads, melt wax etc., must be placed on a protected, heat resistant surface.

1.7 Fire Hazards

Common art materials that may cause a fire include combustible solvents, oily rags, chemical oxidizers, and welding gases.

Improper use of solvents causes most art-related fires.

Flammable solvents should be stored in a storage cabinet designed for flammable materials.

flammable or
compressed

1.8 Physical Hazards:

It includes injury arising from carelessness and inattention.

Wet and slippery floors and work surfaces may lead to physical injury.

NEVER run or chase fellow students around!

1.9 Ventilation

<http://www.sci-news.com/medicine/opening-windows-doors-sleep-quality-05459.html>

Ensure proper ventilation.

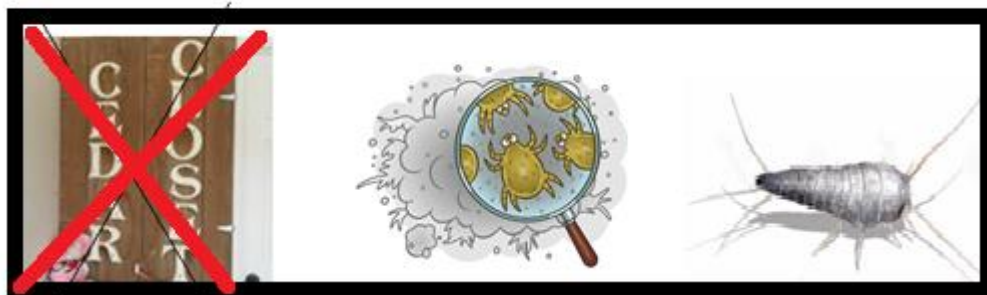

Make sure windows and doors are open to allow enough fresh air to circulate.

When using spray paint or strong solvents, work outside.

Use a fan to circulate airflow if necessary.

1.10 Storing of paper products

Keep paper away from insects (like paper mites and termites).

1.11. Emergency preparedness

Studios should have fire extinguishers and first aid kits close at hand.

Know where this equipment is located and how to use it. Get to know the appropriate emergency response.

1.12 Protective Gear:

All students should wear an overhault to prevent soiling of clothes.

It is considered a serious offence to smear or splash paint, dirty water or any other agent or solvent on a fellow student.

Craft paint contains strong pigments that may not wash out and damage clothes permanently.

A student guilty of the above will be liable for the damage and his parents will be informed. He will be sent to the office and an incident report will be put in his file.

Gloves and safety goggles or glasses should be worn when working with agents that can damage the skin or eyes of a student.

Activity 1

Every learner and parent must agree to these rules.

Do not fill in and sign the form in this book.

Your educator will hand you this as a document where you and your parent/guardian need to sign.

Please sign the following Safety Agreement:

Parent Or Guardian		
I have reviewed the Saftey & Responsibility Rules and agree to support my child and the teacher in retaining a safy and orderley workshop environment.		
_____	_____	_____
Name and Surname	Signature	Date

Learner		
I have reviewed and understand the Saftey & Responsibility Rules and agree to abide		
_____	_____	_____
Your name and surname	Signature	Date

Activity 2

Instructions

The following questions will be written in your classroom workbook.

Copy the questions in any colour you want but you may not use white, yellow and or orange.

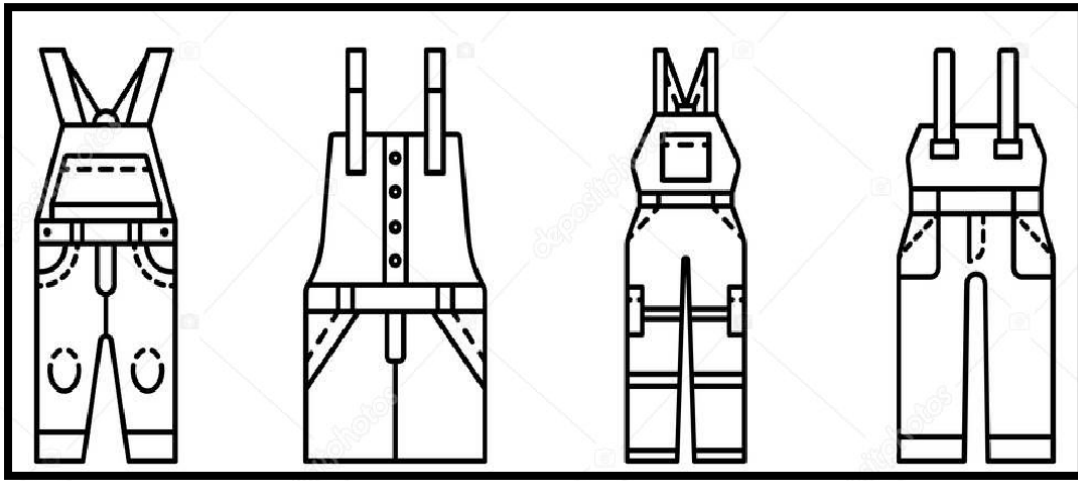

After you have written the question, use your blue pen to answer the question.

After each question, you need to skip a line and then continue with the following question and answer. Do all the questions requested.

Questions

1. Name all the important safety rules that need to be adhered to in an art and craft classroom.
2. Which one of these rules do you think is the most important? Give reasons for your answer.

2. Design your own safety clothes. Make this interesting and creative. Do this in your art dairy.

2.

The Art Dairy

At the end of this concept on creating your art dairy, you need to understand:

An art dairy (portfolio) is done in every year so that you will have evidence on what you have done throughout the year.

That in each year the challenges get more difficult, and you need to be more creative.

Keep all your portfolios together to assist you one day if you want to enrol in a collage to study the arts further.

What is a visual art dairy/journal?

A visual journal works almost like a diary.

It is also a display window of yourself and your art.

Use an old story book (matt paper works best).

You can paste, paint, draw or write, if your art is the focal point of the page.

It usually works well if you use a double page for each topic.

In some instances, it looks good if the printing still shines through the artwork, but in other instances it is better if you cover the printing with paint before you start with your artwork.

Here follows a list of examples you can use to start off your journal:

Name and surname

Family tree

Who am I?

Family Dynamics

Good traits

Bad traits

What do I believe in?

Hobbies and sport

Do at least one double page per day. You can also consider topics like “How do I feel today?”, “My best friend”, “Today’s good deed”, etc.

Activity 3

Decorate your front cover page of your art dairy/portfolio.

Be innovated and creative.

It needs to show off your personality and own unique style.

3.

Art elements

Reflect on year 1 and 2 work and learn something new on line.

At the end of line, you will be able to:

Understand different kinds of line and how line works.

Use line in an activity and be able to reflect on what you have learned.

3.1 Lines

Line Vocabulary

In terms of art, line can be described as a moving dot. Line is perhaps the most basic element of drawing.

Variation - the use of a variety of line including width, length, texture, thickness, etc. to add interest to a drawing or painting.

Length - lines can be long or short.

Direction - lines can move in any direction.

Degree of curve - lines can curve gradually or not at all.

Hatching - lines that flow in the same direction to develop value or shading

Line quality or line weight - refers to the thickness or thinness of a line. By varying the line quality artists can make objects appear more 3-dimensional and more interesting.

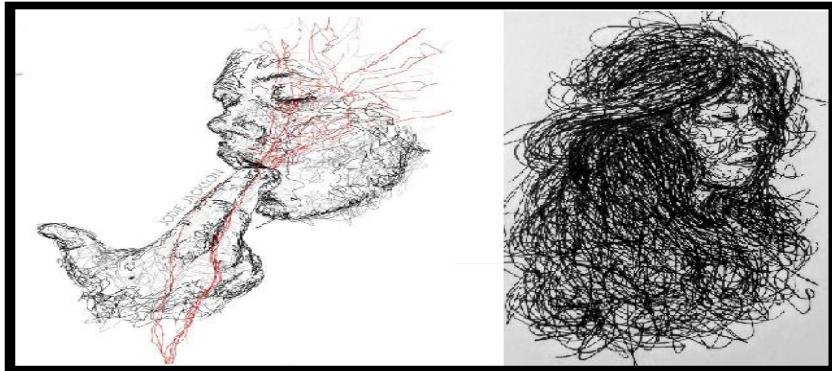

Crosshatching - lines that cross over each other to develop value or shading.

Implied: these are lines that suggest an edge rather than clearly defining one.

Implied lines occur where textures, colours and values change at edges of shapes in artwork.

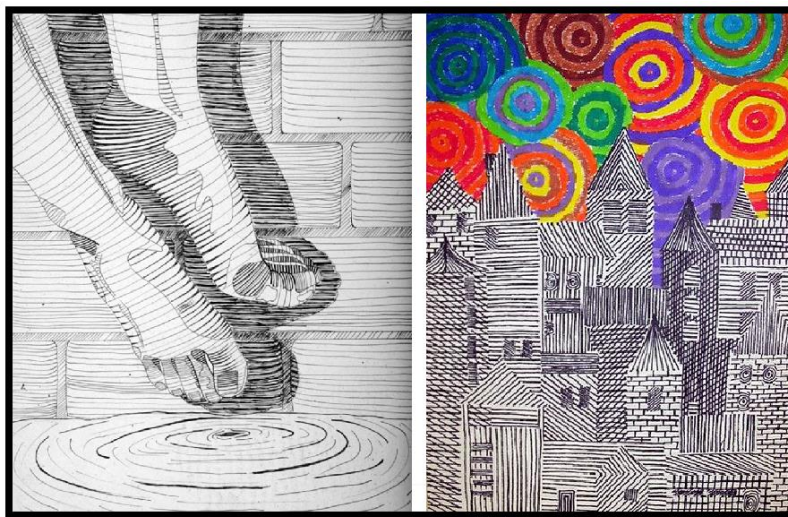

Expressive lines: lines that send us a message about what the artist wants his or her work to make us feel.

Activity 4

Make a line drawing using applied lines. Choose one of the pictures below and redesign it to fit with your unique style. This need to be done in your art dairy.

3.2. Tone / Value

- In art, **Tone** or **Value** refers to the degree of lightness or darkness of an area.
- Even an object that is a solid colour, will have **tones** when we paint or draw it.
- Artists use a range of Tones / Values to create an illusion of the natural world.

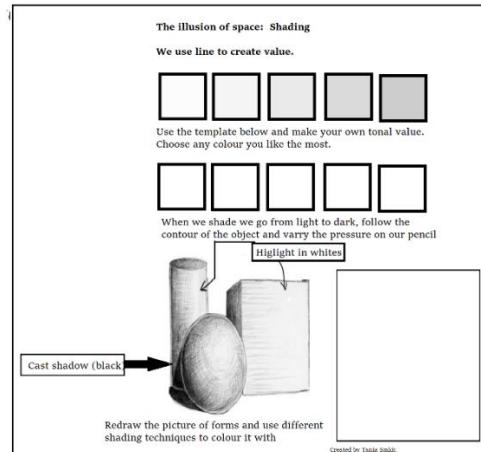

Activity 5

At the end of this activity, you will understand how to use tonal value.

Your educator will hand you the activity sheet.

Do not colour or practice this activity in this book because other learners also need to use the book next year.

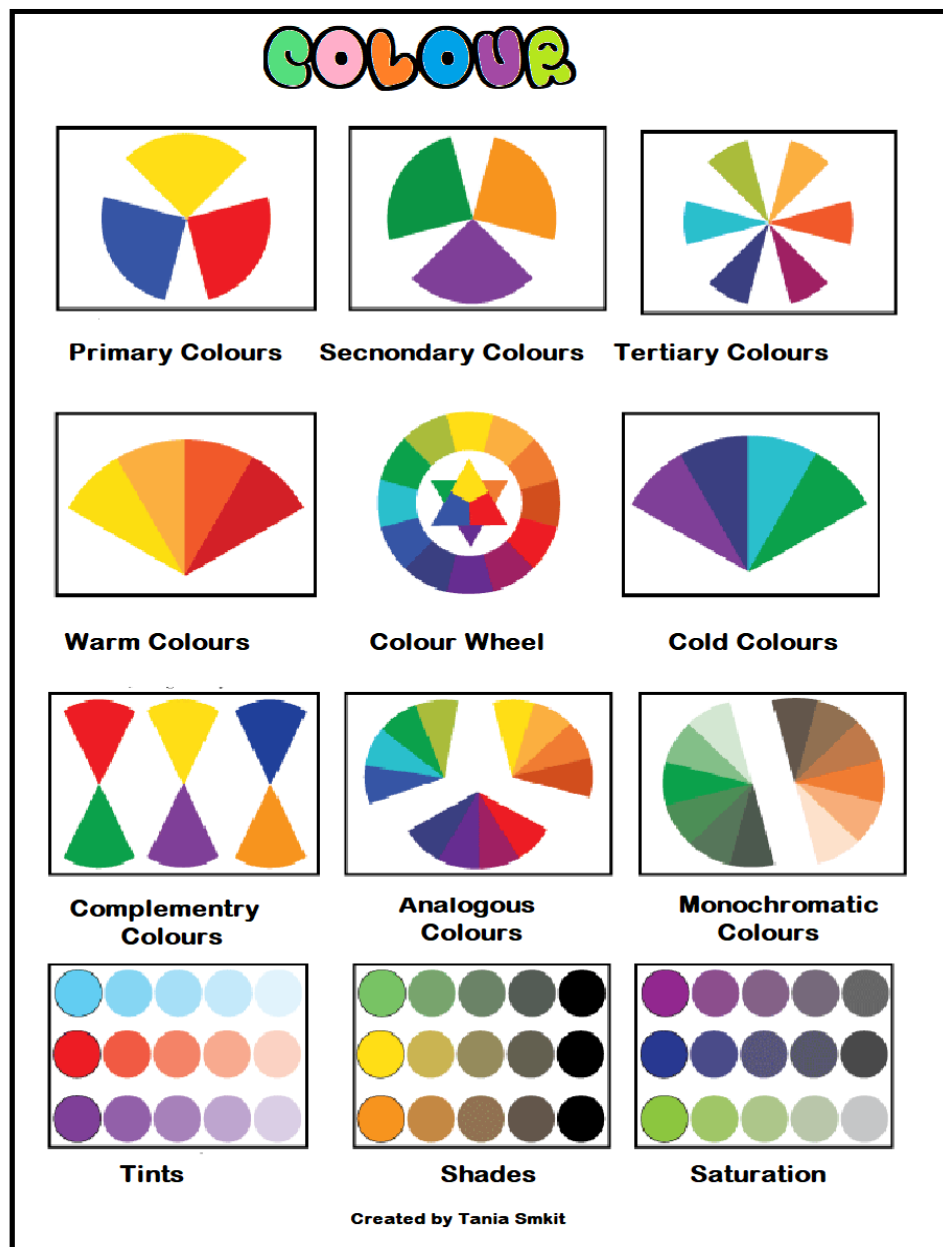

3.3 Colour

At the end of this colour lesson, you will understand the following colours:

primary, secondary, tertiary, monochrome, warm/cold colours and analogical colours.

Know how to apply the colours and write a test on colours

3.3.1 Template

Three properties of colour are:

- **Hue:** The name of the colour (red, green, etc.)

- **Value or Brightness**

The lightness or darkness of a colour.

Values, tints and shades of colours are created by adding black to a colour for a shade and white for a tint.

It can be used to depict light and shadow on a colour and help show volume/form.

- **Intensity or Saturation**

The purity (brightness or dullness) of the colour

Pure red is bright; red mixed with a little green becomes less intense, more neutral. Saturation gives a colour brightness or dullness.

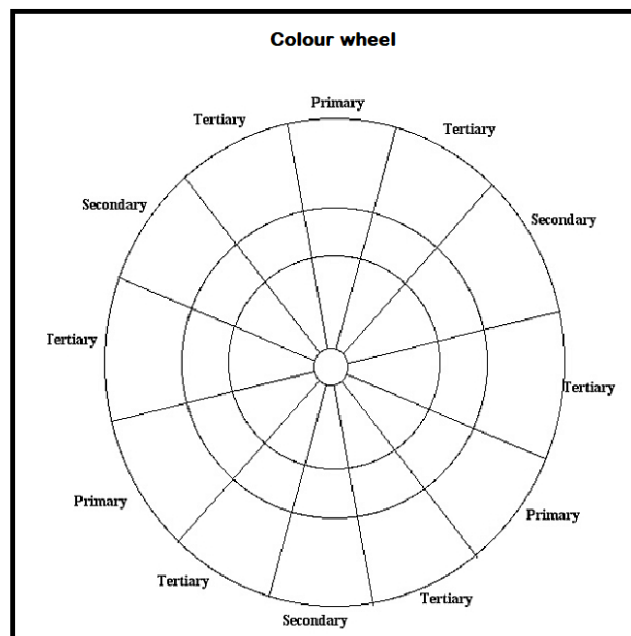

Activity 6

Colour Wheel

Your teacher will hand you the colour wheel handout.

Complete the colour wheel activity and paste it in your art dairy.

Do not colour in the colour wheel in this textbook because other learners need to use this text book next year as well.

4. Design Principles

At the end of this concept, you will be able to:

Understand design principles: Contrast, Balance, Pattern, Movement and Repletion.

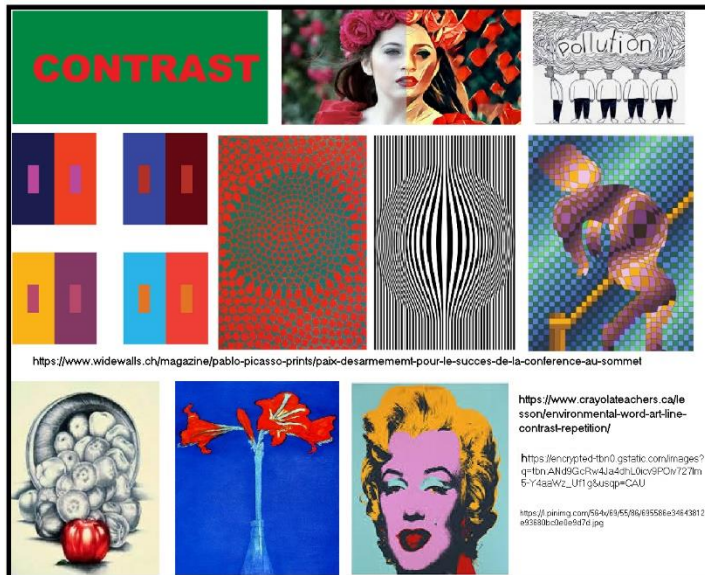

Know how to apply the principles in an artwork.

Analyse artworks through using the skills you have developed.

Complete worksheet activities.

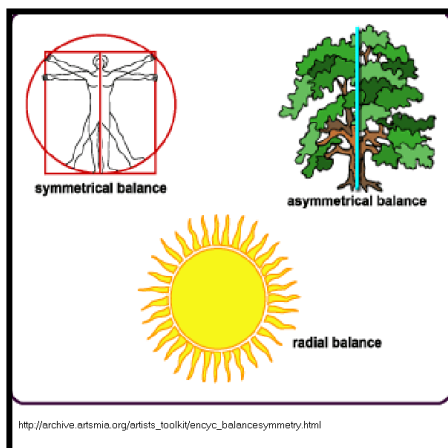

Write tests on theory that you have learnt.

4.1 Contrast

- It can be used to emphasise certain parts of an artwork.
- It refers to the visual differences of an artwork.
- You can create contrast by colour (bright-dull), shape (organic-geometric), tone values (light-dark), texture (smooth-rough), size (small-large), etc.

4.2 Balance

Balance refers to the overall distribution of visual weight in a composition.

A well-balanced composition feels comfortable to look at.

Each visual component of an artwork has visual weight.

Different than actual weight, visual weight is not measured using a scale but must be observed instead.

Visual weight balances around an artwork's axis.

- The axis may be vertical, in which visual elements balance on both sides of the axis. Artworks may also balance around a horizontal axis, in which visual elements balance from top to bottom.

4.2.1 Symmetrical Balance

- Symmetry is a type of formal balance in which two halves of an artwork mirror each other.
- This type of balance is familiar and common.
- The human body is balanced symmetrically as is our planet, our cars, clothes, furniture etc.
- Symmetry imposes a strong sense of order and stability on both the composition and the subject.
- The image below will show you perfect symmetrical balance.

Asymmetrical balance

This is where both sides are similar in visual weight, but not the same.

This usually creates more interesting compositions.

Radial balance

This balance is not very common in art compositions, but it is arranged like a sunflower with everything arranged around the centre.

Activity 7

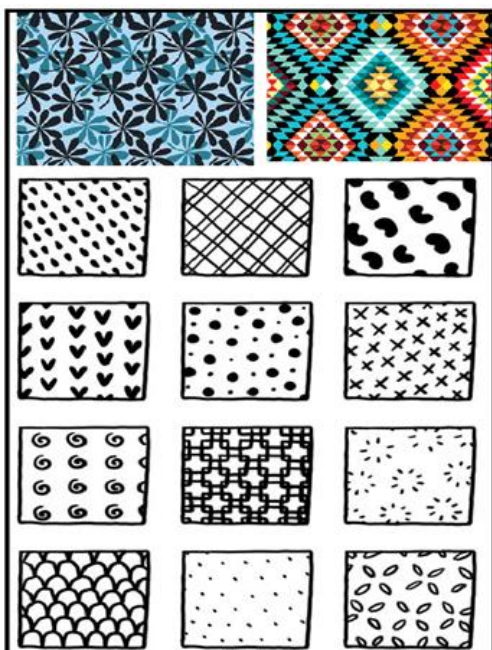

Your teacher will hand you the worksheet.

Do not fill in the worksheet in this textbook.

After completing the worksheet, paste it into the art diary or workbook as per instruction of your educator.

Balance	
	 <i>Name what type of Balance were used here.</i> _____
	 <i>Name what type of Balance were used here.</i> _____
	 <i>Name what type of Balance were used here.</i> _____

4.3 Pattern

A pattern is a design in which lines, shapes, forms or colours are repeated.

The part that is repeated is called a motif.

Patterns can be regular or irregular.

Activity 8

8.1

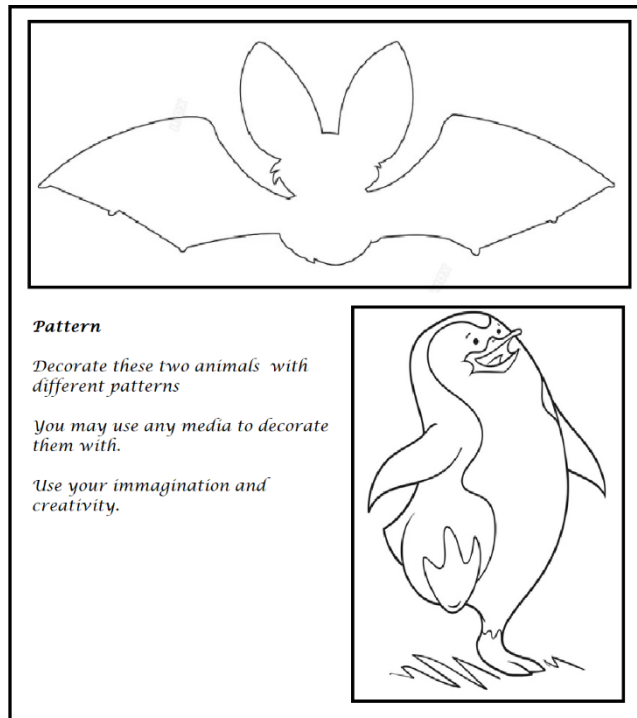

Pattern

Lets draw

Create your own patterns in the blocks below

BUT: *You need to be creative and you may not commit plagiarism. So begin using your creativity*

8.2

4.4 Movement

Movement is **the path a viewer's eye takes through a composition.**

In an image, the kinds of lines, shapes, and forms an artist uses can affect this movement.

Activity 9

Materials

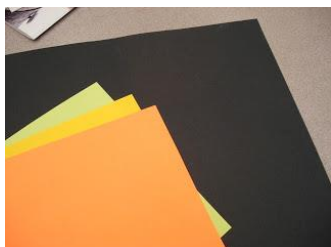

- Black sheet of paper for the background
- Multi coloured printed paper
- Magazines
- Glue
- Scissors

Instructions

Step 1

Start off by having one sheet of black paper for the background.

Choose three colours of bright coloured paper.

Use the magazines to look for a full-page figure in motion- someone walking or jumping or doing sports.

Here's an example of a suitable figure:

Do a 'bubble cut' around the figure and then paperclip it to a stack of your chosen three colours.

Step 2

Carefully cut it out. You'll need to move and reposition your paperclips as you go. Try and cut out the small details (hands, fingers, etc.) but it

might be too difficult for some.

Any interior shapes need to be cut out using an art knife.

Save the coloured scraps of paper left from the cutting as students can swap with each other for the background shapes.

Then you'll have three figures in different colours.

Step 3

Now design the background. Choose three different coloured sheets of paper and cut out three shapes each of a variety of angular shapes

(squares, triangles, rectangles, diamonds, etc.)

The angular shapes contrast against the curves of the figure.

Using a **glue stick**, glue these onto the black paper, trying to overlap the shapes in a balanced way.

Step 4

Glue your figures on top, making sure to overlap and try to use a diagonal line of movement.

4.5 Repetition

Repetition is simply **repeating a single element many times in a design**.

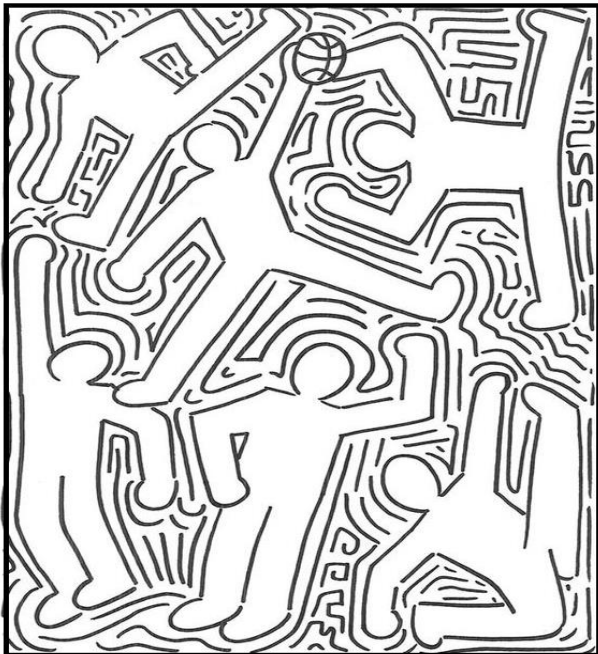

For example, you could draw a line horizontally and then draw several others next to it. Repetition can be useful in web and app design.

For example, you'd expect the logo of a business to be repeated on every page and in the same place.

Activity 10

Use this repetition picture and colour it in with any media that you want.

Test: Classtest on Art elements

Chapter 2

Create in 2 D

Activity 11

Formal Activity

Creating pre drawings of trees in the art dairy.

At the end of this activity you will be able to:

- Read and understand the instructions that the activity entails.
- You will be able to create a mind map on how your end product will look like.
- You will create a A4 page where various trees will be collaged.
- You will complete pre drawings in how you think your end product should look like.

Brief

- Create a mind map where you will discuss art elements and design principles in trees when you look at them from your perspective.
- Create a second page where you will make a collage with different kinds of trees.
- Choose one of the trees you liked the most and redraw it on the following A4 page with only the outlines of the tree visible.
- The open spaces in-between you need to colour with a colour you like the most.
- White pages in your art dairy
- Images (pictures) of different trees
- Magazines, posters, flyers etc of trees
- Pencil
- Eraser
- Colouring pencils

Step 1

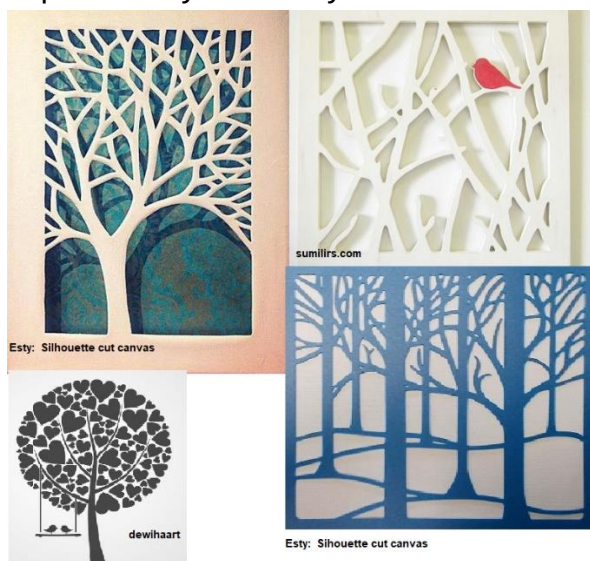

- Collect images and pictures of trees and create a page in the art dairy where you will discuss in a mind map the art elements and design principles you have learnt during this term.
- This must be creative and add in colour to enhance your pictures of the trees.

Step 2

- Create a page where you experiment with drawing different shapes and forms of trees.
- Do not make it extremely difficult for yourself as you will use one of these trees as your end product image.

Step 3

- Study the images below to guide you in your choice of tree outlines and what is expected of you when you are finished with the end product.

Step 4

- Decide which one of the trees you would like to use for the end result.
- Make copies and enlarge the tree you choose to make.
- Your teacher will hand you a piece of hardboard so you can draw the outlines of the tree on it to use it as a template for the next step.
- Cut out the tree and try to cut out details e.g., branches

Step 5

Materials

Template of a Tree

Fine line art cutter tool

1 x Art canvas or recycled boxes that has 3 layers e.g., boxes chips are packed into

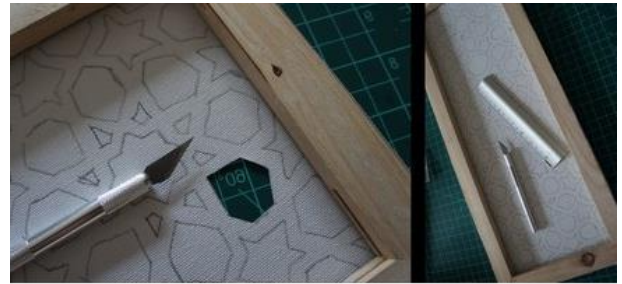

Fine line and Thick line Permanent markers

Glue Gun and Sticks

Paints

Paint Brushes

- Your teacher will hand out a blank canvas or a box to you.
- Turn the template so that the white part is facing down and you can see the wooden frame properly.
- Trace the template onto the canvas using a pencil.
- Your tracing should be done lightly so that no outlines will be black and permanent on your canvas.
- Use the fine line art cutter tool to cut out the outlines of the tree.

Step 6

Paint the tree black or white

Read through the rubric and see if you did comply with all the steps in the instruction sheet. Take a photo of your end product and past it in the art dairy with all your planning of the tree.

Rubric

2D Formal Assessment

Outcomes	1	2	3	4	5
Craftsmanship	Learner could not trace the tree onto the canvas properly	Learner had some difficulties to trace the template onto the canvas	Learner could trace a basic tree onto the canvas	Learner had enough skills to trace the branches onto the canvas	Fine details were traced onto the canvas.
Cutting Skills	Learner could not use the knife and needed help from the teacher	Learner could cut out some details of the tree	The tree were cut out but details need attention	Cutting out of the tree was done and it looked like the trace template	Learner mastered the cutting skill and fine details were cut out as well
Creativity	Learner had little to no creativity painting and decorating the tree	Learner used basic skill to paint and decorate	Learner did well in decorating the canvas and painting it	Learner did very good in decorating and painting the canvas	Learner exceeded beyond his/her ability in creating a masterpiece
Art elements	Some art elements could be seen and were used	Learner used more than 3 art elements	Learner used most of the art elements	All art elements were used that were taught this term	Learner did excellent work capturing all art elements and design principals
Design principles	Some design principles could be seen and were used	Learner used more that 3 design principles	Learner used most of the design principles	All design principles were used that were taught this term	Learner exceeded in his/her knowledge of the design principles
Time management	Learner did not finish his product	Learner finished his product but the final touches were not done	Learner finished and decorated his/her tree	Learner finished on time and made a second tree	Learner made more than two trees and decorated it with excellent
Pre drawings and planning	Learner did not do the planning in full	Learner dis some of the planning for the 2D product	Learner completed his planning	Learner planned well and all pages in the art dairy were used	Learner exceeded in the planning of the 2D product and pre drawings were above average
TOTAL ____ / 35					

OR

Colourful Alcohol Ink Tiles

By: Karalee McDonald

Materials and Equipment:

- White ceramic tiles or Glossy cardboard.
- Rubbing alcohol at least 70%.
- Paper towels.
- Alcohol inks.
- Small brushes.
- Black acrylic paint.
- Water-based lacquer or sealer.

Instructions

- Wipe off tile.
- Brush a thin coating of the blending solution (rubbing alcohol) thoroughly on the top of the tile or glossy cardboard.
- Randomly drop complimentary colours of 3 or less inks. Too many will make a muddy brown.
- Experiment with adding drops within drops or blending solution drops or even splatter them!
- Allow to dry completely—overnight is good. Where the inks puddle, it takes some time to dry.
- Be sure to colour the sides, either with the inks or use sketch markers (colour permanent markers) which are alcohol-based.
- Gently, and with a soft brush well-dipped in the sealer, coat the surface and either let dry and repeat at least a couple times.
- Work out a basic budget on the production of your Alcohol Ink Tiles or Cards. (Your teacher will supply you with the costing list)

Rubric:

Criteria	5	4	3	2	1
Art elements	Learner was able to use all art elements and tiles or cards are exquisite.	Learner used all art elements and tiles or cards are very good.	Learner used most art elements and tiles or cards looks good.	Learner used some art elements and products are satisfactory.	Learner used a minimum art elements
Marketable	Tiles or cards will sell.	Most tiles or cards will sell.	Some tiles or cards will sell.	A minimum tiles or cards will be able to be sold.	Tiles or cards are not suitable to sell.
Design principles	Used all principles in the correct way with stunning end results	Used all principles in the a very good way and end results are good	Used most principles and the result is relative good.	Used some principles and result is satisfactory	Used principles but end result was of low quality
Skills	Excellent skills development	Good skill development	Relatively good skills development	Some skills were developed	Very little to no skills.
Productivity	Learner was able to complete more than six tiles or cards.	Learner produced 6 tiles or cards.	Learner produced 4 tiles or cards.	Learner can produce more than 1 tile or card.	The learner was able to complete a tile or card.
Detail	All details can be seen.	Learner's details were good,	Learners' details on the tiles were satisfactory.	Were distracted in some of the methods.	Learner were not able to use all components to its fullest.
Budget	Learner was able to work out the budget on the production as well in a very good way	Learner was able to set up a budget	Learner could set up a basic budget	Learner did a budget, but a lot of elements were missing	Learner was unable to set a budget

Chapter 3

Create in 3 D

At the end of this lesson, you will have created a paper sculpture of a tree in 3D. You will understand and apply the art elements and design principles described below in the art vocabulary box.

You will be able to evaluate your work and understand the feedback your educator will discuss with you on your end product.

You will if able to complete more than one of these trees.

Creating a 3 D marketable product using all the art elements and design principles we have been practicing in this Term.

Brief

What will be evaluated in this lesson:

Art Elements

- Line: 8 Basic lines, expressive and actual line
- Colour
- Shape: Geometric

Design Principles

- Contrast
- Balance
- Movement
- Pattern
- Repetition

Materials needed

- Toilet rolls / Carlton paper rolls
- Glue gun and glue sticks or any other glue
- Scissors
- Paper torn from newspapers
- Ponal glue
- Paints
- Paint Brushes
- Mod Podge
- Masking tape

Instructions

Phyl & Mrs Impoy
formhttp://plbrown.blogspot.com

Step 1

- Design a rough sketch based on your 2D product in your art dairies.

Step 2

- Construct your tree with the paper rolls (toilet paper and or Carlton rolls)
- Use masking tape to help in the assembling of your tree.

Step 3

Tear the newspaper into thin strips.

Make a base for the tree so that it can stand on its own.

Use the mod podge or ponal glue diluted with water or wallpaper glue diluted and cover the tree piece by piece.

Let the tree dry and repeat the process.

Step 4

After the tree has dried, paint the tree first with a base coat of white PVA paint.

Step 5

Decorate the tree the way you would want to.
Use your imagination, own style and creativity.

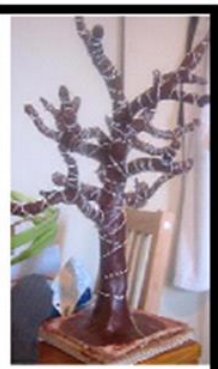

Here is a view samples: Remember you may not copy tree so it looks like below because it will be plagiarism.

Completed Projects by twodollarclown

Sculpture

Date: _____

Circle the number that best shows how well you feel that you completed the item.	Excellent	Good	Average	Needs improvement	Student rating	Teacher rating
RESPONDING FORMS You made the sculptures relate to each other. They bend, dent, open, etc.	4	3	2	1		
GESTURE Both shapes are on their "feet", undercut to lift them visually off the base.	4	3	2	1		
SURFACE You developed a variety of 3 or more surfaces on the piece -from rough to smooth to cracked to modeled.	4	3	2	1		
Colour usage	4	3	2	1		
Textures	4	3	2	1		
NEGATIVE SPACE You made the spaces between the pieces	4	3	2	1		
MOVEMENT You used textures, forms, holes or other carved effects to lead the audience around your sculpture.	4	3	2	1		
CRAFT Your work is crafted with care and attention to detail.	4	3	2	1		
Design principles	4	3	2	1		

How did you create the negative space in your work? How is it important to the sculpture? _____

 _____ 2

What did you find difficult in creating this sculpture? Explain. _____

 _____ 2

OR

Formal Task

Materials

Template of a Tree

Fine line and Thick line Permanent markers

Paint Brushes

1 x Art canvas or recycled boxes that has 3 layers
(e.g., Boxes chips are packed into)

Fine line art cutter tool

Glue Gun and Sticks

Paints

Step 1

Collect pictures of trees where the outlines are seen nicely.

Make copies and enlarge the tree you choose to make.

Cut out the tree and try to cut out details e.g. branches

Step 2

Place the Template onto the canvas or box and trace the tree's outline onto it with a pencil.

Step 3

Use the fine line art cutter tool to cut out the outlines of the tree.

Step 4

Paint the tree black or white

Be creative!!

Step 5

Use
and
decorate

quilling leaves
flowers to
the tree.

Watch the following YouTube Videos to show you how to do quilling:

https://youtu.be/kfM_ZALCHqI 5 quilling steps

<https://youtu.be/wULr0mYYr8c> 40 quilling steps

Before starting you need to know something about quilling:

Quilling is an art form that involves the use of strips of paper that are rolled, shaped, and glued together to create decorative designs

With help of quilling you can make keyrings, jewellery, decorative items, greeting cards, 3D models and many more things.

We are going to start with the basic shapes.

Materials needed

- Quilling Paper (strips of paper)
- Quilling needle tool
- Tweezer
- Pair of Scissors
- Glue
- Circle sizer ruler

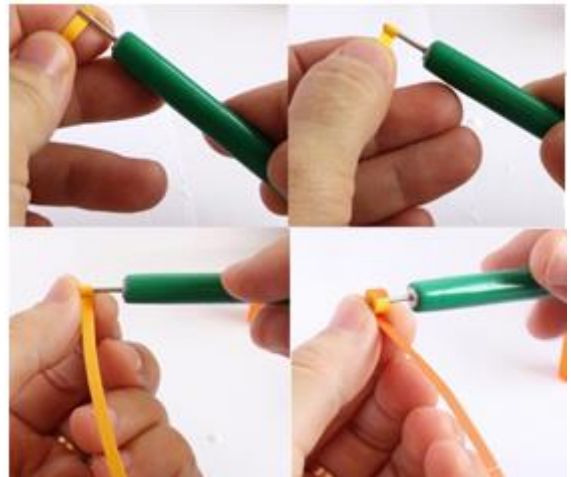

Quilling:

Step 1

Let's start by making a coil.

First take a strip of quilling paper and the quilling needle tool.

Put the paper in to the needle as shown in the picture, then start rolling.

Step 2

Take it out carefully and put it on the circular ruler to uncoil into the size you want.

Step 3

Take the coil out of the ruler.

Paste the end with a little bit of glue.

Step 4

Make any shape you want.

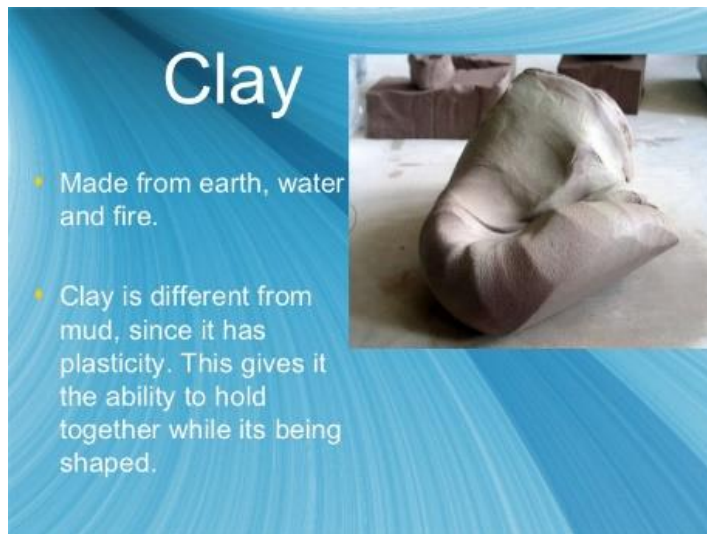

Step 5 Paste it on your tree.

Clay

1.1 Where Clay comes from:

Clay can be found anywhere but it is only useful for pottery if it has good “plasticity.” You can test this by seeing how stretchy a piece of clay is. If you can take a piece of clay, roll it into a coil and bend it into a ring without cracking and falling apart, chances are it will make good pots and sculptures.

2. Kinds of clay

2.1 Earthenware (or common clay)

- It contains many minerals, such as iron oxide (rust), and in its raw state may contain some sand or small bits of rock.
- Earthenware is a secondary clay that has been transported by moving water some distance, picking up minerals and other materials before settling in a river bed.
- Earthenware is commonly used in the making of terra cotta pots, roofing tiles, and other low-fire ware.

2.2 Stoneware

- It is a hard and durable clay that is fired at very high temperatures.
- Its natural colours vary from light grey or tan to dark grey or chocolaty brown.
- Historically stoneware was used for crocks and jugs and is now typically used to make dinnerware.

2.3 Porcelain

Porcelain

- The purest clay is **kaolin**, or china clay.
- It is called a primary clay because it is found very near its source.
- Kaolin has few impurities and is the main ingredient used in making porcelain.
- Porcelain can become very hard and translucent.
- It is very shiny and therefore a glaze is not needed.

3. Terms used in making pottery or clay products

3.1 Techniques

3.2 Coil

Rolling out long snakes of clay between your hands or on the table.

3.3 Pinch

Using your fingers to pinch and poke a single lump of clay into any form

3.4 Slab

Rolling the clay into flat sheets with a rolling pin to cut apart and assemble.

3.5 Wedging

Gets air bubbles out of your clay by pushing and compressing your clay on the table

3.6 Slip:

Wet clay used to fasten pieces of clay together so that they don't fall apart in the kiln

3.7 Scoring:

A technique used in which criss-cross marks are incised onto the surface of two pieces of clay before joining with slip.

3.8 Process:

Kiln: The furnace in which ceramics are fired.

Firing: Clay is hardened by heating it to a high temperature, fusing the clay particles.

Bisque: Clay that has been fired once, usually at a low temperature.

Green ware: Unfired clay ready or nearly ready for firing.

4. Stages

4.1 Plastic stage

Clay is easily manipulated and bent.

4.2 Leather hard stage

A damp condition of the clay when it is too firm to bend yet soft enough to be carved. It is almost like leather.

4.3 Bone dry stage

No visible moisture, no dampness to touch, clay is ready to be fired. It is VERY fragile and can break easily.

4.4 Clay Brochure

We are going to make a clay brochure. This is an example of an elephant clay brochure. It might seem small, but there is a lot of detail.

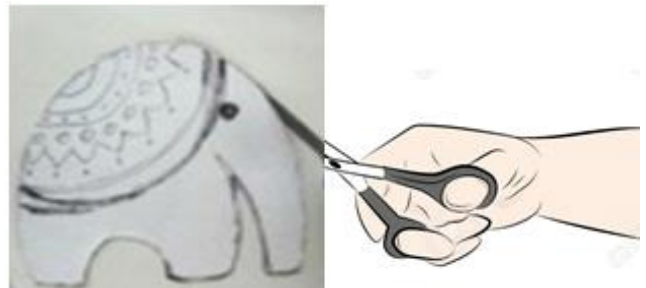

Create your own brooch

DO NOT COPY THIS EXACT DESIGN!!!

Step 1

Draw a template of your brochure on a paper and cut it out.

Don't make it too big – it is a **brochure**.

Step 2

Wedge your clay and roll it flat.

Place the template on top of the clay and use a knife to carefully cut the edges out.

Step 3

Make coils and small balls of different colours by mixing some colouring in the clay.

Find the spot from where you are going to start your design.

Do a radial symmetrical design.

Start decorating with the coils and balls in any way you want.

Be creative!

Step 4

Carry on decorating –

Remember to slip all the attachments.

Step 5

Using the technique of slip and scoring and attach the pin at the back of the brochure.

Step 6

Do the finishing touches on the Brochure.

Total: 40

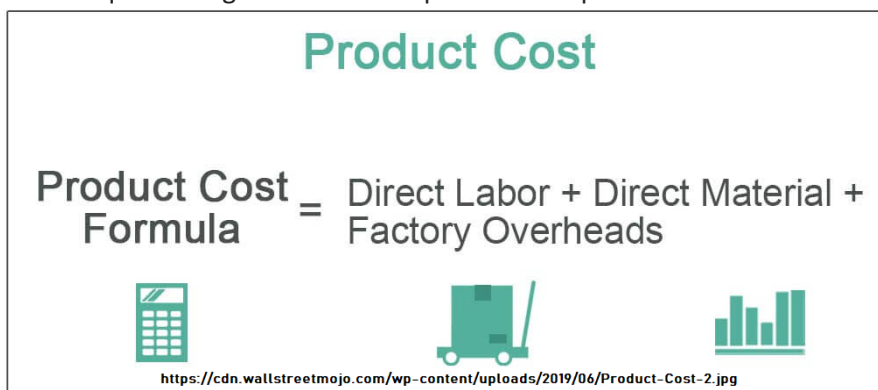

Pricing and costing

Visual Literacy: Entrepreneurial skills

- Learning how to budget, learners need to get into the habit to write everything out.
- When learners are familiar on identifying patterns, get up-close-and-personal with the reality of what they earn versus what they want to buy, they will be able to make better financial decisions.
- Often crafters who start to turn their craft into a business neglect to pay themselves a fair wage for their time or misjudge the amount of time it takes to create a piece from start to finish.
- Using a formula to calculate your price will give you a good starting point for what your labour is worth.

How to calculate cost per product?

The sales price must be equal to or greater than the product cost per unit to avoid losses.

Many professional crafters use a rate of R150 to R250 per hour to calculate their labour costs.

Suggestion on how to cost your product so that you will be able to sell, buy new stock and make a profit.

- Cost of supplies + per R150 hour time spent on completing one article.
- Cost of supplies x 3 on a product.

For example, you have determined the cost to purchase supplies to make one unit of your product is R20 and it takes you a half-hour to complete it, then your formula would look like this:

$R20 + R75 = R95$ Time spent to make the product.

$R20 \times 3 = R60$ Cost of the suppliers

$R95 + R60 = R155$ That the item need to be sold for

While it may need some modification as you find your target market and observe the market for your product, it is a good place to begin when determining your starting price. You can adjust your costs due to popularity of selling it and your profit margin will go up but there is sometimes a golden rule to follow. Keep overheads low, productivity high and do research on where you can save money where you buy the products from.

COSTING YOUR PRODUCT

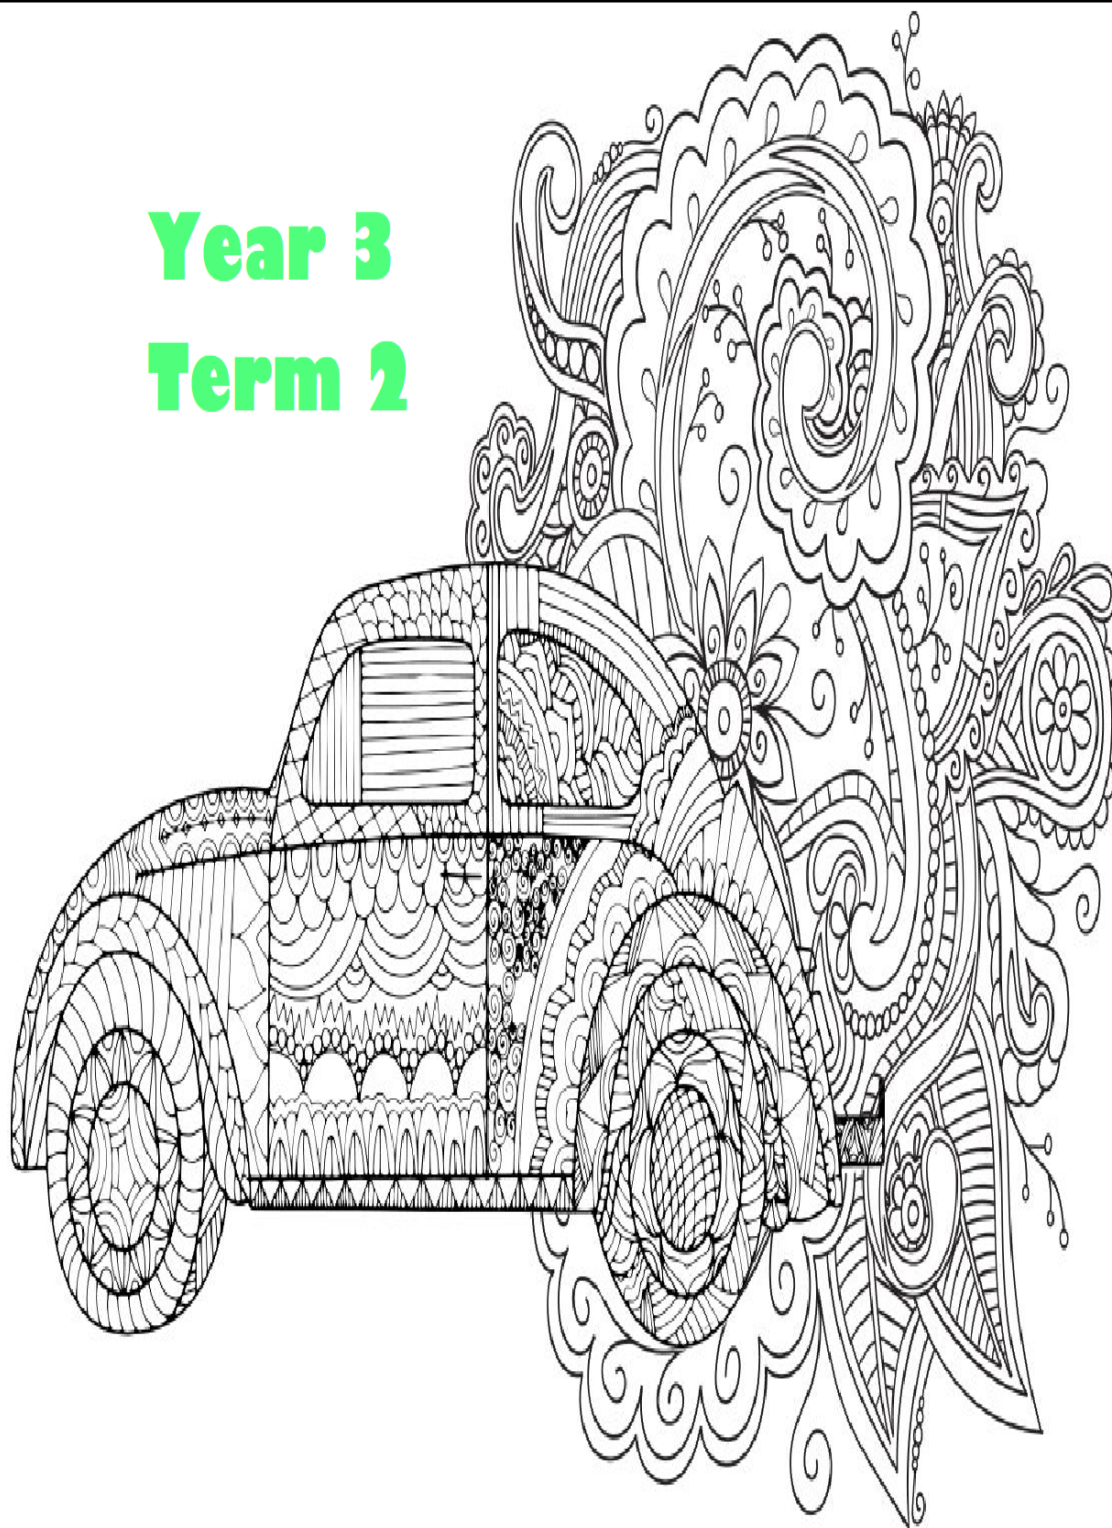

Cost on Time spent to create your product	Cost of suppliers where you bought products one by one	Total costing

Learners notes:

- Your teacher will hand this picture out to you.
- Colour the picture and paste on the next clean page of your art workbooks so that it will divide term 1 and 2 work from each other.
- If you did not finish the picture in the right time frame your teacher will give this to you for homework

Year 3

Term 2

Chapter 1

Visual Literacy

1. **Safety measures in and around the classroom**

Refresh the basic rules of the classroom and safety measures from term 1 and 2.

2. **Safety Reflection on basic types of art**

At the end of this lesson, you will be able to:

Understand what a still life, landscape, seascape, cityscape portrait, sculptures and portraits are

Discuss and identify different types of art is.

Compare art with each other using art elements and design principles.

1.2 Still life

- A still life is a painting featuring an arrangement of everyday objects.
- A still life is basically "anything that does not move or is dead."
- A still life can be realistic or abstract.

2.2 Landscape

- It is a natural scenery such as mountains, valleys, trees, rivers and forests especially where the main subject is a wide view—with its elements arranged into a coherent composition.

2.3 Seascape

- A seascape is a painting, which is an example of main art
- It is an actual view of the sea itself which sometimes include some land or even a boat or ship.

2.4 Cityscape

- Within the context of art, a cityscape is a work that showcases aspects of cities.

- Cityscapes reflect various aspects of cities including (but not limited to) buildings, urban parks, city skylines, and city streets.

2.5 Portraits

- The intent of a Portrait painting is to represent a specific human subject.

2.6 Sculptures

- A sculpture is a three-dimensional artwork that may be created from various types of materials like stone (rock or marble) or wood, ice, clay, or by casting metal or plaster.

3. Art Elements

3.1 Line

- **The Visual Element of Line** is the foundation of all drawing.
- It is the first and most versatile of the visual elements.
- Line in an artwork can be used in many different ways.
- It can be used to suggest shape, pattern, form, structure, growth, depth, distance, rhythm, movement and a range of emotions.

3.1.1 We have a psychological response to different types of lines:

- **Curved lines** suggest comfort and ease
- **Horizontal lines** suggest distance and calm
- **Vertical lines** suggest height and strength
- **Jagged lines** suggest turmoil and anxiety

3.1.2 The way we draw a line can convey different expressive qualities:

- **Freehand lines** can express the personal energy and mood of the artist
- **Mechanical lines** can express a rigid control
- **Continuous lines** can lead the eye in certain directions
- **Broken lines** can express the ephemeral or the insubstantial
- **Thick lines** can express strength
- **Thin lines** can express delicacy

The selection of artworks illustrated below have been chosen because they all use line in an inspirational manner. Every illustrated picture was analysed each of these to demonstrate how great artists use this visual element as a creative force in their work.

Line as Tone and Form

Line as emotion

Image by <https://www.artfactory.com/>
PABLO PICASSO (1881-1973)
Weeping Woman.

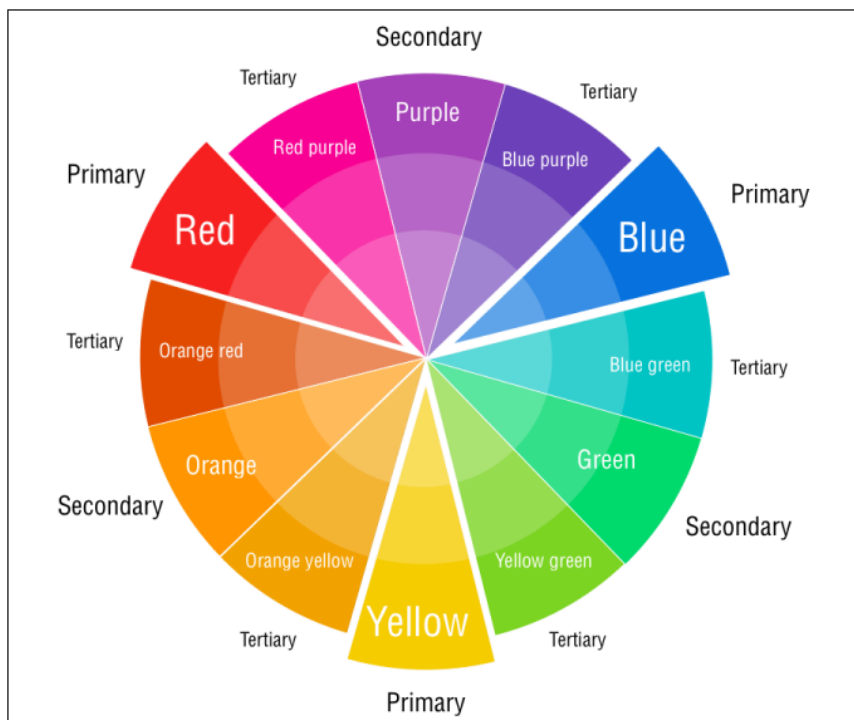

Activity 1

Learners:

- Do this activity in your learner workbooks.
- The activity sheet will be handed out to you so please work on it and not in the textbook.
- After completing the activity worksheet, paste the worksheet into your workbooks.
- Hand in your work on time.

Study the pictures and analyse them according to the following art elements				
	Line	Colours used	Patterns used	Emphasis
				
				
				

4. Colour

Activity 2

Brief

1. Collect pictures of primary, secondary, tertiary and monochrome colours.
2. Go to the art dairy / portfolio
3. Create 4 pages each with a heading of the above concepts
4. Create an information page on each of the concepts, and what moods it creates within you.

Primary colours	Secondary colours	Tertiary colours	Monochrome colours

5. Create a landscape or sea scape or still life using one range of colours e.g. monochrome , primary, secondary, warm / cold colours etc.

5. Art and emotions

At the end of this lesson , you need to :

Understand the type of feelings Picasso had when painting a war scene.

see where the emphasis in a painting and how colour was used to enhance this aspect.

recognise the proportions used in the art piece.

take note of how contrast are used, the usage of pattern and overlapping of body parts

- What would be the best way today to protest a war?
- How could you influence the largest number of people?
- In 1937, Picasso expressed himself in painting a painting of war that were happening in *Guernica*.
- He was furious and sad at the same time because he felt war is not the answer to everything and that people and animals suffer the most in a war
- This artist work named Guernica, has become one of the most famous work of art protesting against war.

Image by <https://www.khanacademy.org/>

Pablo Picasso, Guernica, 1937, oil on canvas, 349 cm × 776 cm. (Museo Reina Sofia. Madrid)

- Much of the painting's emotional power comes from its overwhelming size, approximately eleven feet tall and twenty five feet wide.

- The figurines used in this painting show that the animals and people are shot and that body parts are scattered all over the place.
- This painting of Picasso's painting is based on the events of April 27, 1937, when Hitler's powerful German air force, bombed the village of Guernica in northern Spain, a city of no strategic military value.
- *Guernica* is his visual response, his memorial to the brutal massacre.

What emotions did Picasso capture?

- This painting is not easy to interpret
- . Everywhere there seems to be death and dying.
- As our eyes adjust to the frenetic action, figures begin to emerge. It speaks of the horror of death and pain.

The colours used in this painting

- Picasso chose to paint *Guernica* in a in a monochromatic palette of grey, black and white.
- The painting creates the illusion of newsprint.
- The sharp alternation of black and white contrasts across the painting surface also creates dramatic intensity, movement and a cry for help.

Visual complexity

- The space is compressed.
- Image's overlap.
- Bodies are distorted and semi-abstracted.
- Picasso balances the composition by organizing the figures into three vertical groupings moving left to right, while the centre figures are stabilized within a large triangle of light.

Activity 3

At the end of this activity, you need to be able to:

- Recreate a picture of a famous artist.
- Choose colours that makes you feel comfortable.
- Have a feeling on what emotions you went through creating the picture.
- Analyse the painting and the colours you used.
- Complete this activity in your art dairies.

Brief

This artwork need to be done in your art dairy / portfolio fie

Research the artist and the work done by Pablo Picasso and create a mood page where you paste in your findings.

Create pre drawings on how you want your artwork to look like

Use your emotional feelings to create the painting of Guerinic.

You can make a modern painting or use any other method of redrawing the picture, but you need to change about 60 % of the original painting so it becomes part of your own interpretation of this famous work of art.

Use the art elements and design principles you have learned from term 1-2 to create this artwork

Colour and or paint or use pastels to create your artwork with.

After you finished this activity, write a paragraph on your own feelings when creating the artwork and why / when you used the art elements and principles of design.

Here follows a few samples of how original work of art have been changed to suit other artists works.

6. Styles of art

Artists use many different styles of art creating their works of art.

We will look at a few common styles of art that one sees on a daily basis around us e.g., television, magazines, pamphlets, murals etc.

6.1 Pop art

Roy Lichtenstein was the founder of the movement in the U.S., and his works were influenced by American comic books.

Pop artists used bold, flat colours and hard-edge compositions adopted from commercial designs like those in newspapers, murals, magazines, and billboards.

The artwork had:

- Clear lines
- Sharp paintwork
- Realistic representations of objects
- Bold colours
- Large scale

6.2 Abstract art

This is sometimes distorted art.

This means art products does not look like original shapes etc.

The colours and shapes used in this paintings shows emotions and the artist just want to have fun with art.

6.3 Expressionism

Feelings are usually the main objectives on how the artist creates their work of art.

Colour is mostly used to set a mood or to express feelings.

Pointillism

Formal Activity : Written test
