Question:1

1. Identify the following common building methods.

1.1 _____

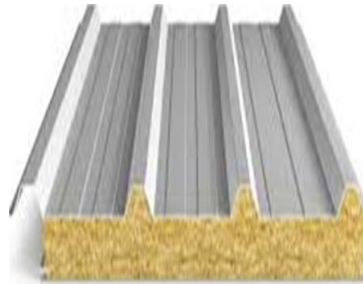

1.2 _____

1.3 _____

1.4 _____

1.5 _____

1.6 _____

Worldwide need to build economically and to conserve.

- Natural resource are simply fundamental raw material that supplies basic substances to be manufactured. There will be technically nothing to depend on if there is no presence of natural resources. The African economic sector, to a big extent relies on agriculture and raw production.

The need to correct mortar mixtures and difference in strength.

- If you do not get the ratio correct, then it can have negative consequences for your construction. For example if you add too much water to the mortar mix then it will not properly glue the bricks together. Then overtime the mortar will crumble and not withstand bad weather conditions.
