Question :1

1. Stages of preparing different surfaces before tiling can start.

Step 1 : _____

Step 3 : _____

Step 5 : _____

Step 2 : _____

Step 4 : _____

Step 6 : _____

The Use Of An Angle Grinder

- Ensure you cut exactly where you intend to cut, is to draw a line or carve in the tile lightly then follow that line. Using the weight of the machine, oscillate up and down through the tile. Don't push the cutting disc through using force, let it do the cutting.
