

KWA THEMA SKILLS

What is office administration?

It covers a basic knowledge of administrative and client services, communication skills and competency in computer typing, crucial to the successful functioning of any office or business environment. Without it, the office will have no structure and balance. The person responsible has an important role in answering the phone, taking messages, typing email or agendas, taking minutes and keeping all the paperwork and files up to date.

What will I learn?

- * Office Etiquette
- * Personal Finance
- * Values & Ethics
- * Rights & Responsibilities
- * Customer Services
- * Hygiene
- * Computer Care
- * Office Equipment
- * Mailing
- * Safety
- * Reception Area
- * Storage Area
- * Filing
- * Health/Environmental Issues
- * Keyboard Techniques
- * Word Processing
- * Business Documents
- * Word Processing & Editing
- * Internet & E-Mail
- * Job Application

Career Opportunities

- * Office manager
- * Secretarial Services
- * Reception Services
- * Switchboard Operator
- * Filing, Mailing or General Office Assistant
- * Typing &/or Data Capturing
- * Shop Assistant
- * Cashier & Stock Controller Assistant

Week 1-2

Office equipment and mailing systems

Handling mail

1. POLICY BACKGROUND:

Mail must be dealt with in a manner which promotes the efficient and confidential handling of all incoming and outgoing mail.

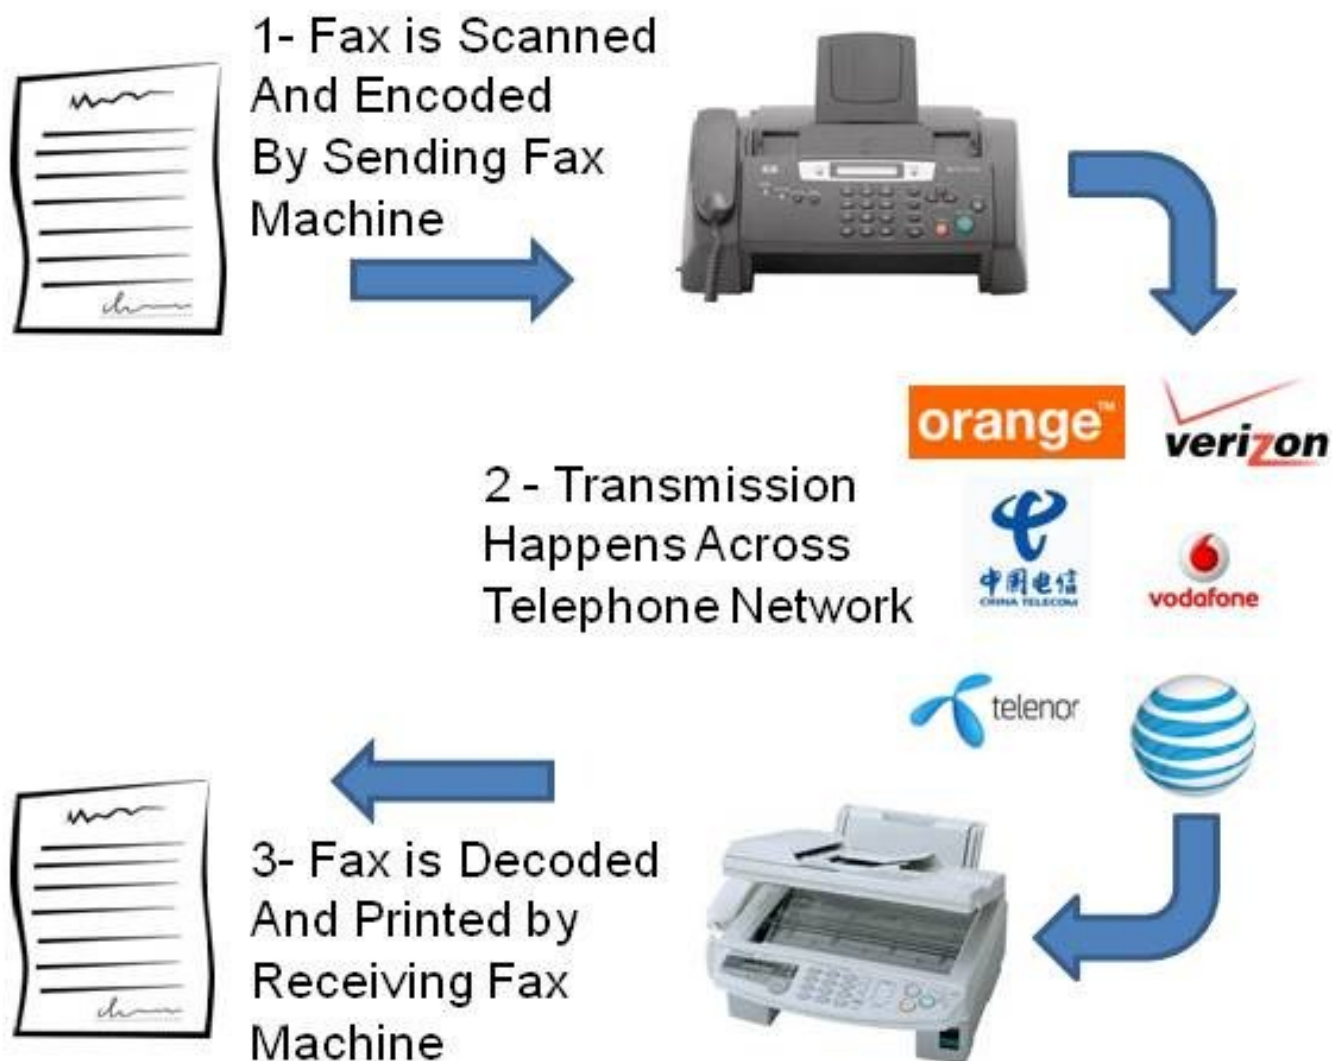

2. POLICY PROVISIONS:

Definitions:

Incoming Mail is all correspondence, facsimiles faxes, magazines, circulars, advertising material, copies of emails and packages received.

Outgoing Mail is all correspondence, facsimiles faxes, magazines, circulars, advertising material, copies of emails and packages sent.

Sending a Fax

Week 1-2

Office equipment and mailing systems

A fax machine

Although they aren't used as frequently today, a fax machine is still an important device for transmitting important documents, forms, and hand-written notes quickly and efficiently, particularly in an office setting. A fax machine uses an active telephone landline to send and receive documents, and using one is as easy as dialling a telephone number. Once you properly set up your fax machine and familiarize yourself with the methods for sending and receiving a fax, you'll be sending documents with ease in no time!

A facsimile machine incorporating a telephone that sends and receives documents via a telephone. The fax machine incorporates the following useful functions:

- telephone
- input scanning
- copying
- plain-paper pri

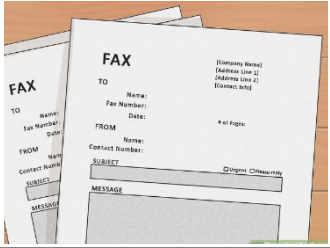

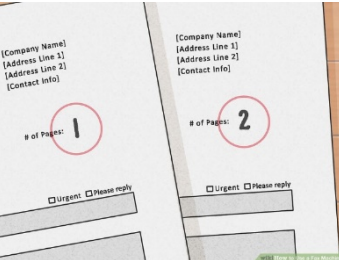

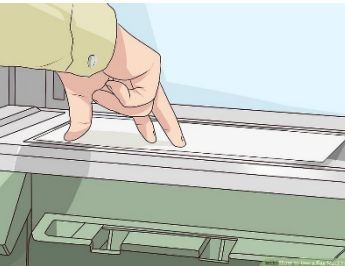

Setting up your fax machine

	Position the fax machine Place the fax machine on a flat surface close to power outlets and a telephone jack. Be sure that the paper feed is facing outward.
	Connect to the power source Plug the fax machine into the nearest wall outlet.
	Secure a phone line A fax machine uses a telephone line to send and receive data to create and print documents.
	Connect the phone cable A standard phone cable should be connected into the fax machine's phone jack.
	Add paper and ink The fax will require a supply of paper and ink to create and print the incoming documents.
	Check the connection

Be sure you have these supplies on hand.

- Before inserting the paper, fan or flip through the paper stack to make sure they do not stick together. This will help prevent paper jams.
- Each machine will house a certain type, size, and number of ink cartridges. Be sure to review the machine's instructions to decide what ink best works with your machine.

Sending a fax

	Turn on the fax machine
	Use a cover sheet A cover sheet is a great way to guarantee that your document gets to the correct person.
	Order the documents properly Be sure to add page numbers and to put the document's pages in the order that you wish for them to be received.
	Insert the documents in the scanner / place the documents in the feeder
	Dial the recipients fax number
	Send the documents Hit the "send" or "start" button to transmit the document.

Activity 1

1. Give a short description of a fax machine.

2. Name 6 steps on how to send a fax.

3. Go to the admin office of the school and study the following functions of the fax machine

- ✓ Automatic dial and redial functions
- ✓ Store- and forward function for off peak periods
- ✓ Broadcasting function
- ✓ Voice function
- ✓ Automatic answering function
- ✓ Speed dial function
- ✓ The conformation function to confirm successful transmutation of message

Use two colours highlighters to indicate the functions you observe.

Week 3-4

Mailing systems Posstelsels

Handling mail is a process of receiving, recording and dispatching the receiving and sending letters and documents in properly. The incoming mail is received and recorded by the office in the entry book or register book. The outgoing mail is drafted by the office in the dispatch book. This outgoing mail is dispatched by the office through the post office or messenger. Handling mail is also known as 'Darta Chalani'. Handling mail is one of the important routine functions of every office which should be performed by the office assistant efficiently.

Incoming mail

Incoming mail Mail items sent to the organisation through the post office or delivered by hand (messenger or courier) at the organisation.

Handling of incoming mail is of paramount importance because improper handling of data create various problems. Hence the mail should be handled with speed and accuracy. Efficient handling of mail requires establishment of a definite procedure which are termed as steps of handling of mail. These steps are:

1. Receiving the mail.
2. Sorting the mail.
3. Opening the mail.
4. Scrutiny of the contents.
5. Date stamping.
6. Recording the mail.
7. Distribution of mail.
8. Follow up action.

Receiving the Mail

Generally mails are received once or twice a day delivered by the postman. When the volume of correspondence is large, a post box or post bag is hired in the post office and an office peon is required to collect the mail from the post office. Sometimes letters are received through the messengers of other offices.

Sorting the Mail

Sorting of letters means grouping of letters on definite order. The letters are grouped either on the basis of their nature or destination or contents. Sorting of letters may be done before opening of letters or after opening of letters. When it is undertaken before opening, private and confidential letters are separated from the ordinary letters.

Opening the Mail

In small organization letters are opened by the officer or head clerk. When the volume of letters are large, these are opened by mail-opener. In a large organization mails are handled by a mailing department and a clerk is engaged in opening of letters. Till the date of receipt of letter is

recorded, the envelopes detached from the letters should be kept. When the letters are marked private, these are opened by the concerned person.

Scrutiny of Contents

After the letters are opened, the contents are removed from the envelopes and are scrutinised. The purpose of scrutiny is to ascertain the department to which the letter relate. Any enclosures of the contents should be properly verified and noted.

Stamping the Mail

After proper scrutiny, the date stamping of letter is done. Sometimes the date and time of receipt is stamped on the letter. For stamping of letters, a stamp is prepared which contains the serial number, the date of receipt and time of receipt if necessary. A reference stamp is attached if the letters relate to a number of departments.

Recording the Mail

After the stamping work, letters received are recorded in inward mail register or letters received book. Before recording of letters in the register, the contents are scrutinized properly so as to ensure the department to which it belongs. The inward mail register contains serial number, date of receipt, senders name and address, nature of contents, subject of the letter in brief, remarks and initials of the officer with date.

Distribution of the Mail

This is the last step in the inward mailing routine. In this stage letters are handed over to the concerned department. The letters are distributed through messengers or sometimes with the help of mechanical devices like conveyor-belt or pneumatic tube.

Follow up Action

Follow up action is very important because it is concerned with keeping track of mail. This stage makes on enquiry whether the letter is replied or not.

Importance of effective mail procedure

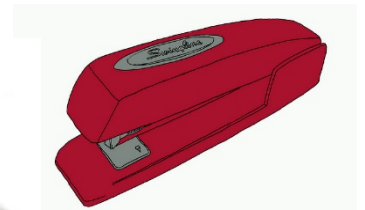

- ✉ When incoming mail is opened, processed and distributed quickly
 - ✓ orders can be executed
 - ✓ complaints can be resolved and
 - ✓ answers to enquiries can be provided

Types of incoming mail

- ✉ Letters
- ✉ Correspondence marked confidential and private
- ✉ Invoices
- ✉ Receipts
- ✉ Quotations
- ✉ Advertisements
- ✉ Newspapers
- ✉ Magazines
- ✉ Parcels

Items required for handling incoming mail

- a large table or desk for opening and sorting of the mail
- a letter knife or electric letter opener
- a date rubber stamp or date and time rubber stamp or date and time machine with the date set for the particular day
- a stapler and stapler remover
- Incoming Mail Register (for the recording of important mail)
- Remittance Register (for money received)
- Routing Slips
- Sorting trays
- Pen, pencil and ruler

[See more photos](#)

1. Make a list of incoming mail items _____

2. What is needed for opening mail items?

3. How is mail handled when arriving at the company?

Confidentiality and security

The clerk or other person responsible for the handling of all mail has access to the contents of all the incoming (and outgoing) mail, with the exception of mail marked as 'private' or 'personal'. It is therefore important that this official knows the requirements for and observe confidentiality and security of all information that comes to her or his knowledge in the course of this duty.

This implies that:

- he or she would never divulge to anybody the confidential information acquired in this position, even after she or he has left the employment of this organisation.
- he or she vouch for the security of all incoming mail and money received.

The official that fills the positions of mail clerk normally has to sign an agreement or undertaking to abide by the code of confidentiality and security applicable to this position.

INSTRUCTIONS

1. Type the following paragraphs neatly and correctly on A4 portrait.
2. Keep the default margins and type in Ariel 12pt.
3. Content line-spacing 1.15.
4. The main heading should be u/c and centred.
5. Add the words [This has not happened.] after the first sentence in the first paragraph.
6. The sub-heading (Statistics) should be u/c.
7. The amount 88 million should be bold.
8. The word [Internet] in the last paragraph must be in italics.

More paper-based documents created than ever before.

A few years ago, the prophets of doom foretold that one of the most important results of new technology would be a paperless office. No-one could have predicted that more documents would be created and printed than ever before.

Statistics

Research has brought the following facts to light:

An average enterprise spends between 1% and 3% of their turnover on office-related printing costs.

A corporative business with a turnover of more than one billion dollars uses about 88 million pages every day.

The paper use of enterprises grows annually between 6% and 8%.

A study conducted by Lexmark found that an average of 17% of everything printed was considered waste, i.e. pages the user didn't want.

E-mail has increased the printing of documents by 40%.

Employees print out an average of 33 Internet pages per day.

TYPE TODAY'S DATE

INSTRUCTIONS

1. Type the following paragraphs neatly and correctly on A4 portrait.
2. Keep the default margins and type in Ariel 12pt.
3. Insert open lines as shown in the text below.
4. The main heading should be u/c, centred and 16pt.
5. The sub-headings should be u/c.
6. Under the sub-heading MOTOR OIL the Jeyes Fluid should be italics.

Hints for removing stains and marks

General

A large variety of stains on material can be removed with a household cleaner containing ammonia.

Blood

Soak the article immediately in cold water. Add bleach with chlorine if the material allows. Try ammonia on old stains.

Glue

Soak white latex glue in water and rub the material until the glue peels off. Superglue can be treated with nail varnish remover.

Grass and flowers

Sponge the material with white spirit. Dilute the latter with water if you are using it on synthetics.

Chewing gum

Rub an ice block over the mark to harden the chewing gum and scratch off as much as possible. Remove the rest with paraffin.

Motor oil

Cover with Jeyes Fluid and leave it to stand for a while and then scrub the mark.

Rust

Treat rust marks on colour fast fabrics with a strong solution of salt and lemon juice. Prevent rusting of small metal objects by painting them with colourless nail varnish

Outgoing mail

Outgoing mail comprises similar mail items as what an organisation can receive, but now the items are sent out, for e.g.

- invoices for goods bought by customers
- statements of account for debts owing by customers
- receipts to customers for debts paid
- cheques sent to suppliers of goods and services

The outgoing mail task will also be the responsibility of a mail clerk in a medium to large organisation, while it normally is the responsibility of the receptionist in a small organisation.

Outgoing mail procedures

- The mail clerk has to gather all mail items intended for external dispatch.
- Inspect each mail item.
- Make copies of all outgoing mail for filing purposes.
- All letters, documents and parcels must be prepared for mailing according to the requirements of the Post Office or courier.
- Fold and insert mail into addressed or window envelopes.
- Envelopes are sealed, by either moistening the gummed edges or removing the self-seal strips.
- The contents of parcels need to be packed and wrapped securely and a completed parcel label affixed to it.
- Each parcel is weighed on a manual or electronic letter scale to determine the required postage.
- The correct amount of stamps is affixed.
- All the outgoing mail that needs to be posted is now recorded in the Postage Book or Outgoing Mail Register then placed in the mailbag and the bag is locked.
- The mailbag is taken to the Post Office at a fixed time every day.

Activity 3

Date: _____

1. List a few outgoing mail items.

2. Find and paste pictures of various envelopes and parcels that could be mailed

Outgoing mail register

Look at the following outgoing mail register and answer the questions.

No.	Date	Name & Address of Sender	Nature of content.	Subject	To whom referred	Date of Reply	Initial of Officer
1	2011 3 rd March	Photo Litho Jullundur	Payment by cheque	Full and final settle- ment	Accoun- ts Manag- er	13 March 2011	
2	2011 3/3	Sachin & Co., Amritsar	Intimation about payment	Purcha- se Order No.	Purcha- se Manag- er	10 March 2011	

3. How many items are being dispatched that day?

4. Write the Name & Address of sender from no.1.

5. What is the Nature of Content from no. 2?

6. Give the subject of the post that is being dispatched from no. 1 & 2

7. What is the difference between the Date and the Date of Reply?

8. In what year was this recorded?

Activity 4

Date: _____

Prepare an envelope and a parcel for posting

Your teacher will discuss the organisation that you work for and provide you with details of various mail that need to be posted.

- ☐ Organisation / company name you work for
- ☐ Items that need posting
- ☐ What type of posting will be needed (e.g. envelope, parcel)
- ☐ Receiving company
- ☐ Address of the receiving company

Take notes down for your information to complete the task.

Postal code book

South African post codes consist of four digits. Mail may be delivered either to the physical address or to a PO Box, particularly in rural areas where no street delivery is available. In addition, many large organisations may use Private Bag addresses, with mail dispatched to the holder by a mail contractor.

In the case of cities and large towns, however, the last two digits of the postcode indicate the mode of delivery. The digits "01" indicate a street address and "00" a PO Box or Private Bag address, with addresses in Port Elizabeth, for example, using the following format:

300 Kempston Road
Port Elizabeth
6001
PO Box 1840
Port Elizabeth
6000

In Pretoria, however, a different format is used, with "02" indicating a street address, and "01" indicating a PO Box or Private Bag address:

370 Church Street
Pretoria
0002
PO Box 427
Pretoria
0001

A feature of South African postal addresses, also common to Australia, is that it is only necessary to include the suburb, not the city, for example, in the case of Yeoville in Johannesburg:

43 Cavendish Road
Yeoville
2198

WEEK 7 & 8

Health and Safety Regulations and Law

Lifting and handling of heavy objects Save Your Spine: 8 Tips for Lifting Heavy Loads Safely /

Improper lifting techniques are a common cause of back pain and back injuries.

It is important to remember that a lifting injury can happen at any time,

- ✓ not just at work but also at
- ✓ school,
- ✓ home
- ✓ or even in public spaces.

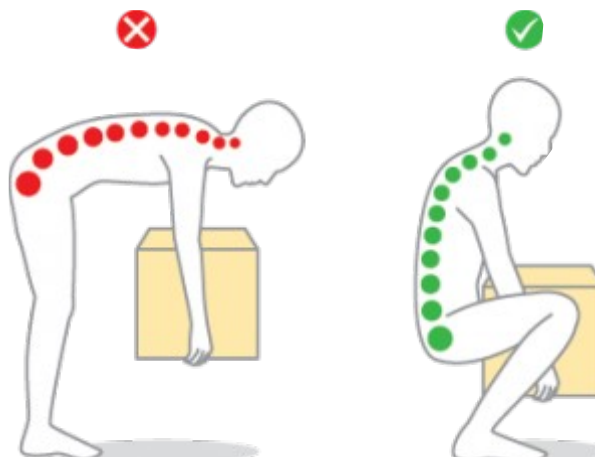

Asses the weight of the object, test the load by pushing on it lightly with your hands or feet. How easy it moves tells you how heavy it is.

Do not try to carry a big load alone; always ask for help.

Here are some quick tips on how to do manual lifting safely:

1. Wide Base of Support

- ✓ Square up to the load with feet placed shoulder-width apart,
- ✓ one foot slightly ahead of the other

2. Squat, Don't Bend

- ✓ Never bend over when picking up a heavy object. Always bend at the knees and keep your back straight.
- ✓ Squat down, only bending at the hips and knees.

3. Maintain Good Posture

- ✓ Look straight ahead and keep your back straight.
- ✓ Push your chest out and pull your shoulders back, this will help you maintain the correct posture.

4. Lift

- ✓ Slow and smooth; Maintain good posture while using your arms, legs, and core body (abdominal muscles) to lift.

5. Never Use Your Back

- ✓ Neither for lifting nor carrying, never use nor bend your back.

6. Avoid Awkward Load Positioning

- ✓ Hold the load close to your body at the level of your belly button. Lead with your hips as you change direction.
- ✓ Keep shoulders in line with hips as you move.

7. Put Down

- ✓ Put your load down carefully, squatting down with hips and knees only. Remember: *DO NOT* bend your back. **Take a Break**
- ✓ After lifting a heavy load take some time to rest and have a glass of water. This gives your back a chance to recover and reduces the chance of injury.

Fire Extinguishers

Introduction

Fire extinguishers are only one element of a complete fire survival plan. Only use your extinguisher after making sure:

- All residents of the home have been evacuated to safety
- The fire department has been notified
- There is a clear exit behind the person using the extinguisher
- Use your extinguisher only to keep a small self-contained fire from growing, only when the room is not filled with smoke, or to create a safe pathway out of the home.

Read the instructions and become familiar with your fire extinguisher's parts and operation

- BEF
- * Kom tot by die voorwerp
- The
- * Handskoene kan help
- CI
- * Is die voorwerp lig
- CI
- * Probeer om nie van die grond af te lig nie

asses of residential fire extinguishers from which to choose:
ing ordinary combustibles such as wood, cloth, paper, rubber and

ing flammable liquids such as gasoline, oil, solvents and oilbased paint.
ing energized electrical equipment such as wiring, fuse boxes, circuit
nery and appliances.

Remember the “PASS” word. Stand 2m – 2.5m away from the fire and follow the four-step PASS procedure for knocking down fire with an extinguisher:

- P—Pull the pin and hold the extinguisher with the nozzle pointing away from you;
- A—Aim the extinguisher at the base of the fire;
- S—Squeeze the lever slowly and evenly to discharge the extinguishing agent; (When the agent first hits the fire, the fire may briefly flare up. This should be expected.)
- S—Sweep the nozzle from side to side, moving carefully toward the fire. Keep the extinguisher aimed at the base of the fire.

HOW TO USE A FIRE EXTINGUISHER

Remember the Phrase **PASS**

1 Pull
the pin

2 Aim at
the base
of the fire

3 Squeeze
the handle

4 Sweep
from side
to side

Activity 6

Date: _____

Illustrate and write the four-step PASS procedure for knocking down fire with an extinguisher.

Main types of portable extinguishers, their uses and colour coding

WATER For wood, cloth, coal, plastics, paper, textile, and other solid material fires.	POWDER For solid material, liquid, gas, and electrical fires.	FOAM For solid material and liquid fires.	CARBON DIOXIDE (CO₂) For liquid and electrical fires.	WET CHEMICAL For fires that involve cooking oils and fats.
				
NOT SUITABLE FOR all other types of fires.	NOT SUITABLE FOR chip or fat pan fires or metal fires (unless it is M28 or L2)	NOT SUITABLE FOR gas, metal, electrical, or chip and fat pan fires.	NOT SUITABLE FOR gas, metal, or chip and fat pan fires.	NOT SUITABLE FOR other types of fires (use a more appropriate extinguisher).

The contents of an extinguisher is indicated by a zone of colour on the red body.
 Halon extinguishers are not shown since no new Halon production is permitted in the UK.

Type Fire Extinguisher	CLASS A	CLASS B	CLASS C	CLASS D	Electrical	CLASS F	Comments
	Combustible materials (e.g. paper & wood)	Flammable liquids (e.g. paint & petrol)	Flammable gases (e.g. butane and methane)	Flammable metals (e.g. lithium & potassium)	Electrical equipment (e.g. computers & generators)	Deep fat fryers (e.g. chip pans)	
Water	✓	✗	✗	✗	✗	✗	Do not use on liquid or electric fires
Foam	✓	✓	✗	✗	✗	✗	Not suited to domestic use
