REMEDIAL WORK (p.1)

NOTE for teachers: If errors show definite patterns, then the following remedial exercises may be used. Emphasis is on adjacent-finger errors and errors involving the correct finger but the wrong hand. Choose from the exercises below those that match your errors and type these repeatedly.

a (s or 'n instead of a)

Malan played a great and grand dart game at that gala match.
Hannah was amazed at Pat's lack of grace and charm at table.

s (a, d or l instead of s)

Miss Tess Sims stops Sue Moss singing Irish songs in spurts.
Tess saw six calves with sleek skins taste the frosty grass.

d (s, f or k instead of d)

Ed would do a double dance when not allowed to dawdle round.
Don did his Dad a good deed and dug him a ditch in the yard.

l ('n, k or s instead of l)

The old mill at Lupalo belonged to a girl called Jill Allen.
Nell Lyall tells tall tales and delights all small children.

k (l, j or d instead of k)

Cook bakes Kate a sticky, tacky cake to take back to Franks.
Ken Cockram took the broken bucket back to the black shacks.

q (w or p instead of q)

quick quiet query quoth quest quirk quaint quinces quizzical
Quinn was quick to query those quorums quoted by the Quaker.

w (q, e or o instead of w)

What did Walt want with that watch which Wanda was whirling?
Wee Willie Winkie, who was in a warm gown, went up and down.

e (w, r or i instead of e).

Etta Shelley gets the men to set the pet level on the stage.
Even Ethel Rees sees these men are the meanest she ever met.

p (o or q instead of p)

Pip Pape picked up a pretty paper packet packed with apples.
Peter Panda placed a piece of paper pulp on top of the post.

Personal Finance

Page 16

Needs are items that you need to survive. These are things like food, shelter and clothing. They are the essentials. Needs can also be expanded to included things like utility bills (so that you have heat, etc. for your shelter) and even minimum debt payments if you are in debt.

Wants are items that are nice to have. They are not things that you need to survive. Sometimes needs turn into wants when you take your needs beyond the basics: for example, if you buy a home that is larger than you can afford.

How to tell needs and wants apart

Financial needs are expenditures that are essential for you to be able to live and work. They're the recurring expenses that more likely than not eat up a large chunk of your paycheck — think mortgage payment, rent or car insurance.

Here's a short list of some common expenses that fall under needs:

- Housing
- Transportation
- Insurance
- Gas and electricity
- Food

Wants are expenses that help you live more comfortably. They're the things you buy for fun or leisure. You could live without them, but you enjoy your life more when you have them. For instance, food is a need, but mochas and lattes are likely more of a want.

Wants typically include things such as:

- Travel
- Entertainment
- Designer clothing
- Gym memberships
- Coffeehouse drinks

PO Box 123, 204 RANSKIN STREET, PRIMROSE RIDGE 1401

Dear Mrs Watson

TOUR: BRITISH ISLANDS

Thank you for your enquiry regarding our tours of the British Islands. To ensure that you receive a true ***value-for-money package***, the following points are brought to your attention.

1. The true cost of your holiday is often not the price you pay when you book! Costs also include everything you pay for along the way, so first check precisely what your tour price includes and what it excludes!
 - 1.1 Our agency guarantees centrally located hotels in most cities and towns. Taxi fares alone could cost you *R200,00 each way.
 - 1.2 We include much more. If the highlights sightseeing/excursions are not included in your itinerary, you could pay as much as *R100,00 per person on entrance fees alone.

Does the tour price include dinner arrangements and entertainment? Our tour price includes excellent dinners as well as performances of several popular local artists. If these were not included, you would pay *R250+ for each

- 1.3 optional excursion. We also include full English breakfasts in London.
 - 1.4 The unique transfer of the London airport service is also included.
2. Our popular "extras" will save you hundreds of rands.

Add up all the advantages and you will see why Comfort Tours are renowned as the best value-for-money in Europe.

We also enclose the list of European Holidays requested by you.

* *Average prices – often even more!!*

Yours faithfully

S ROBERTS
MANAGER

Week 5-6**How Personal Budgets Work**Personal Income and Expenses

Only include fixed earnings like pay checks from your job. Don't bank on uncertain income like raises or bonuses.

Tracking your income is the easy part of creating a budget. It's much harder to pinpoint your spending.

- Fixed expenses
- Discretionary spending

Fixed expenses are those expenses that stay the same every month. Not everyone has the same fixed expenses, but here are a few of the most common examples:

- Mortgage or rent payments
- Loans (student loans, car loans, home equity loans)
- Insurance (car insurance, health insurance, life insurance)
- Daycare
- Tuition
- Utilities

Discretionary spending is a broad category that includes every expense that changes each month. Not all discretionary spending is unnecessary. Take a look at the following examples:

- Groceries
- Eating at restaurants
- Clothing
- Entertainment
- Travel
- Hobbies
- Gifts

In addition to using personal finance software, it might also be helpful to carry a small notebook with you to track your cash expenses. This can be especially helpful if you find yourself taking money out of the ATM more than once a week. Every time you use cash to buy a newspaper, pay a toll or buy lunch, make a note of it.

Now that you've created a detailed worksheet of your income and expenses, you're ready to analyse the data and start drafting a better budget.

WORKSHEET

What is the difference between fixed expenses and discretionary spending?

Fixed expenses:

Discretionary spending:

Good principles for drawing up a personal budget

A good budget is the foundation of any strong financial plan. Without a good budget that you can actually follow, your chances of succeeding at any financial goal are very slim. Taking control of your money may seem like a huge undertaking, but if you follow the three principles of Budget Ease, you'll be well on your way in no time. The three principles of budgeting are:

PRINCIPLE 1: DON'T SPEND MONEY YOU DON'T HAVE.

PRINCIPLE 2: PLAN AHEAD FOR ALL EXPECTED EXPENSES.

PRINCIPLE 3: BUILD A CUSHION FOR THE UNEXPECTED.

WORKSHEET / WERKKAART

Name three good principles to draw up a personal budget.

1. _____
2. _____
3. _____

12 Steps for How to Make a Budget – Personal Budgeting Tips for First-Timers

Creating your first budget can be extremely overwhelming. But it's worth the effort. Developing a budget that you can maintain over the long term has been definitively linked to building wealth, while simultaneously helping you get out of debt and cut expenses.

1. Decide to Start a Budget

2. Know How Much You Have

If you have savings, checking accounts, investment accounts, or any other financial instruments, you will want to know how much money is in each account as well as the interest rates and expenses of each one. Make note of this information as it will become important in determining your net worth and the best use of your capital in the future.

3. Know How Much You Make

People on a salaried pay scale can easily find their monthly income. The most important consideration, is to determine the average monthly amount of income that you receive.

4. Know What You Owe

Determining your monthly recurring debt payments should be your next step. This should be fairly simple to do, as long as you have stopped incurring additional debt in the short term. If you haven't been able to break your dependence on credit cards, that's okay, as building a budget will act as a first step for your next financial priority which should be getting out of high interest consumer debt.

To find out what your monthly recurring debt payments are, calculate the total amount owed on each debt account as well as the minimum monthly payment. This includes car loans, mortgages, credit card debt, student loans, and all other debt that your family pays on a monthly basis. This will provide you with the first few line items in your budget, and will allow you to determine your net worth.

5. Determine Your Net Worth

Once you know how much money you have and how much you owe, you can easily determine your net worth. Just subtract what you owe from what you have, and you will derive a number. This number will tell you the value of your financial resources.

6. Determine Your Average Recurring Monthly Expenses

The best way to determine your monthly expenses is to make a stack of household expenses for a month. Keep your receipts, your utility bills, and any other expense that arises during a one month period.

7. Enter this Information into a Database

Voer hierdie Inligting in 'n Databasis

8. Look at the Bottom Line

After entering all of the above information, you will discover the most important number in your budgeting process – the bottom line. This number will tell you whether you are overspending or underspending. Ideally, during this step you will find that you are living within your means, and maybe will even have a little left over on a monthly basis. On the flip side, you may determine you must make adjustments to your monthly expenses in order to live within your means.

9. Make Adjustments Accordingly

If the bottom line of your budget proved that you are overspending your monthly income, you will come to the most difficult step – making cuts to your monthly expenses.

10. Adjust Categories Based on Reality

Life is full of surprises. Food gets more expensive, gas prices rise, and rent can get hiked when you least expect it. Each time you notice inflation creeping up on your expense categories, get a raise at work and begin to earn more money, or worse, suffer a financial setback like a pay cut or job loss, you must adjust your categorical expenses based on the realities of the world around you.

11. Pay Yourself First

Depending where you are in your budget, based on your bottom line, you may want to add a few extra line items to your monthly expenses. These may be monthly dispersals to a savings account or other savings vehicle. Moving money into savings and treating it like a recurring expense will allow you to slowly build up your savings without feeling like you must make these deposits from what is left at the end of the month.

12. Track, Monitor, and Be Disciplined

Keeping track of your budget takes an hour or so a week. But this will save you a lot of time in the long run. Once you have an established budget, you will want to keep it in check. The discipline and associated knowledge that you are making good long term and short term financial choices will provide you with a great deal of comfort, and will take you from living pay check to pay check to being able to see the long term results of your disciplined savings and financial planning.

Cash vs credit purchases

Pros and Cons of Cash

Pros / Voordele	Cons / Nadele
There's no denying the convenience of cash: although there are rare occasions where businesses won't take cash, nearly every retailer accepts it.	Cash is by far the most vulnerable to theft. If you lose your wallet, there's little chance of it being returned with the money untouched. To be safe, those who rely on using cash should deposit it in the bank and make regular withdrawals to pay for their purchases.
If you only spend the cash you have, you can't carry a balance and won't pay interest on purchases.	It's harder to be prepared for an emergency. If you need to drop \$500 on a last-minute plane ticket or car repair, chances are you don't have the cash on hand to cover it.
Tangible currency can be easier to manage. Some people feel that the act of counting their money and handing it over gives them a better appreciation for their savings and makes them less likely to overspend.	Some people say they are more likely to overspend when they have cash in their wallet because it makes them "feel rich."

Pros and Cons of Credit

Pros	Cons
Using a credit card can be a more convenient method of payment than using cash. Credit card users are protected from fraudulent transactions by the <u>Fair Credit Billing Act</u> , which limits their fraud liability to \$50. ¹ Yet in practice, most card issuers waive that requirement by offering a zero dollar fraud liability policy meaning that consumers are not responsible for unauthorized purchases on the credit card account. Credit card users are even protected when a charge is authorized, but the goods or services purchased are not delivered, or what is delivered is not as described. In these cases, cardholders can <u>file a dispute</u> against the merchant, an option that is not available to users of cash, checks, or even debit cards.	Credit cards require discipline. If you don't pay your entire statement balance in full and on time every month, you will be charged interest on your purchases. And if you miss a payment, you can incur late fees. Successfully taking advantage of the many conveniences credit cards offer requires savvy money management.

Credit card users are also able to conduct transactions online and over the phone, and hotel and rental cars are much easier to reserve with a credit card than they are with cash.	
You may <u>earn cash rewards</u> just by making purchases. Many cards offer travel and cash back rewards, not to mention purchase protection benefits.	
You're covered in an emergency. Did your fridge break? You can get a new one without having 100% of the money in the bank.	

What's the difference between a cash and credit transaction?

The only difference between cash and credit transactions is the timing of the payment. A cash transaction is a transaction where payment is settled immediately. On the other hand, payment for a credit transaction is settled at a later date.

Try not to think about cash and credit transactions in terms of how they were paid, but rather, when they were paid. For example, you may buy some groceries at your local shop and pay for them in cash there and then, that's a cash transaction. However, what if you paid by card rather than cash? That can also be classified as a cash transaction because you paid immediately.

On the other hand, credit transactions are paid at a later date than when the exchange of goods or services took place and almost all of the time an invoice for the transaction is issued. The time period before payment can vary depending on the types of businesses or even the industry in which the transaction is taking place. Once again, when payment is finally settled for the invoice, it may be done with cash or card, or any other payment method but it is still a credit transaction.

Agenda:

Datum: _____

1. Verwelkoming

2. Bywooning:

- a. M. van Deventer: _____
- b. A. Thorpe: _____
- c. A. Burgoffer: _____
- d. C. Muller: _____
- e. E. Orlandini: _____
- f. E. Terblanch: _____
- g. L. Bond: _____

3. Subject Policies

- a. Public Comments is in, wag vir terugvoering
- b. Workshops sal gedurende die kwartaal bygewoong word. Datums sal volg.
- c. Ander: _____

4. Voorraad

- a. Afrolwerk moet afgehandel wees
- b. Merk alle nuwe voorraad
- c. Kontroleer voorraad so gereeld moontlik
- d. Klerebank: Me. Lamprecht en Me C. Muller
- e. Ander: _____

5. Vakorganisasie

- a. Annual Teaching Plan & Work schedule
- b. Lesson Plans (getik)
- c. Moeilikeids graad moet verskil van die vlakke
- d. Bywoning van opleiding (plaas in lêer)
- e. Begroting van elke opvolgende jaar in leer
- f. Ander: _____

6. Assessering

- a. Deurlopende assessering moet asb gedoen word, moet alles los tot op die laaste nie. Kontrole sal gedoen word hiervan

Example of Minutes of meeting

Datum: 8 January 2019

1. Verwelkoming
2. Bywooning:
 - a. M. van Deventer: ✓
 - b. A. Thorpe: ✓
 - c. A. Burgoffer: ✓
 - d. C. Muller: ✓
 - e. E. Orlandini: ✓
 - f. L. Bond: ✓
3. Subject Policies
 - a. Public Comments is in, wag vir terugvoering
 - b. Workshops sal gedurende die kwartaal bygewoong word. Datums sal volg.
4. Voorraad
 - a. Afrolwerk moet afgehandel wees
 - b. Merk alle nuwe voorraad
 - c. Kontroleer voorraad so gereeld moontlik
 - d. Klerebank: Me. Lamprecht en Me C. Muller
 - e. Ander: **Newsletter will state the time when learners will be able get new clothes**
5. Vakorganisasie
 - a. Annual Teaching Plan & Work schedule
 - b. Lesson Plans (getik)
 - c. Moeilikheds graad moet verskil van die vlakke
 - d. Bywoning van opleiding (plaas in lêer)
 - e. Begroting van elke opvolgende jaar in leer
6. Assessering
 - a. Deurlopende assessering moet asb gedoen word, moet alles los tot op die laaste nie. Kontrole sal gedoen word hiervan
 - b. Aanbevellings? **Geen**
 - c. Spesifikasies van opstel van vraestelle? Linda skryf oor elke onderwerp 'n klein klastoets en tel hulle saam vir punt uit 25 of 50 (soos siklustoets)
 - d. Toetse moet asb op tyd ingehandig word vir moderering (pre- en post-).
 - e. Toets, memo en studienotas moet gelyk ingehandig word vir moderering.
 - f. Dui asb duidelik op puntestate watter punte is vir teorie en watter vir prakties asb asook die gewigte wat dit tel (verkil soms van kwartaal tot kwartaal, raadpleeg assessment policy)
 - g. Annelise van toetse. (elkeen gebruik asb die opgestelde een, eenvormigheid) verander die totale net, verslag word dan voltooi, plaas in assessering leer en stuur afskrif na my vir HOD leer asb.
 - h. Pas asb die formele assessering op, indien daar enige navrae is
7. Algemeen: **Attendance registers must be send to Mrs van Deventer every Friday**
Hairdressing: clients from old age home: Bond and Orlandini to organize

Timetable stays the same, no periods to be moved without permission from Mr Thrope and Mrs van Deventer
18 September: Host the festo. Will decide whether to cater ourselves or get someone to cater for us
Market: 1 & 2 November. Ideas are welcome.

Mrs. Van Deventer
Mr Thorpe

Week 7-8

Banking services

Savings, cheque and credit card accounts

ATM use

EFT

Savings Account

This offers you a basic banking service with which you can make purchases and withdrawals. Usually you can also access your savings account using the bank's smartphone app or website.

The name "savings account" is a misnomer. It pays very low, and in some cases zero, interest. The interest rate is usually lower than the inflation rate, so money is actually losing value in a savings account.

Cheque Account

The distinguishing feature of a cheque account is that it comes with a cheque book. Usually, in order to get a credit card, you would need to open a cheque account first. Like credit cards, cheque accounts also usually provide a credit or overdraft facility.

Because of the credit facility that comes with a cheque account and a credit card, these accounts are required to build a credit record.

Usually you earn zero or close to zero interest on a cheque account.

Credit card account

The ideal is to pay your monthly expenses on your credit card and pay off the debt completely before you have to start paying interest (usually 30 or 60 days). Transaction fees are sometimes a little less than with a cheque or savings account – but there are annual card fees.

Interest rates on credit cards are much higher and can vary.

Benefits

- You can use a credit card everywhere, especially overseas, but make sure you know what fees are involved.
- Credit cards facilitate purchases on the phone or online.
- In emergencies a credit card serves as a financial catching net (when you have unexpected health-care expenses, lose your job or have to repair your car, for example).
- You can buy things and pay off the cost monthly. Certain shops even offer a discount and you often get points or money back as a reward. You can use points to buy air tickets, for example.
- How you manage your credit card helps build up a credit history which is necessary if you later want to borrow money to buy a house or car.
- If you faithfully pay off your credit card debt you could later borrow money at a lower rate of interest. Check your credit score at mytransunion.co.za
- Credit cards enable you to keep a record of your expenses and help to better monitor your financial behaviour because you must continually keep in mind your credit limit and how much interest you'll have to pay on it.
- Credit cards help in cases of a dispute over mistakes in your account or faulty goods because through your card you can arrange to withhold payment days later. This is possible because it takes a while for the funds to be paid by the company to the shop or service station.

Drawbacks

- Some users spend more if they have credit cards.
- You don't stick to your monthly budget.
- If you don't make your payments in time every month, penalties and interest can pile up and put you deeper into debt.
- If you have a number of credit cards in your name this could frighten off potential money lenders.
- Too many credit cards can affect your credit worthiness.
- Studies show that credit cards play a significant role in consumers' bankruptcy.
- Credit card fraud can be a source of many headaches.
- The credit-card contract is binding and if you don't read it carefully before you sign it you can be held responsible for the debt for many years.

Don't use your credit card to

- Pay off other debts.
- Improve your standard of living.
- Buy things that aren't in your budget.
- Buy something you could save for and pay for in cash.
- And finally, don't have your salary paid into your credit card account (the cost of each transaction can add up fast).

Automated teller machine

An **automated teller machine (ATM)** is an electronic telecommunications device that enables customers of [financial institutions](#) to perform [financial transactions](#), such as cash withdrawals, deposits, transfer funds, or obtaining account information, at any time and without the need for direct interaction with bank staff.

On most modern ATMs, customers are identified by inserting a plastic [ATM card](#) (or some other acceptable payment card) into the ATM, with authentication being by the customer entering a [personal identification number](#) (PIN), which must match the PIN stored in the chip on the card (if the card is so equipped), or in the issuing financial institution's database.

Using an ATM, customers can access their bank deposit or credit accounts in order to make a variety of financial transactions such as [cash](#) withdrawals, check balances, or credit mobile phones. ATMs can be used to withdraw cash in a foreign country. If the currency being withdrawn from the ATM is different from that in which the bank account is denominated, the money will be converted at the financial institution's [exchange rate](#).

What Are the Advantages of an Electronic Funds Transfer?

There are a few advantages of an electronic funds transfer (EFT), including less "float" time, meaning the time it takes for a paper check to clear the federal reserve. It is less labour intensive on the banking side, and it ensures that consumers receive funds sooner. EFT also renders mailing payments obsolete.

Eliminating float time can save consumers money in overdraft fees because the money from an EFT will be immediately available in most cases. Also, it generally won't be placed on hold as a check can be, which delays the receiving of funds. On the consumer side, it is reassuring to have access to funds immediately, and on the banking side, it is ideal to have funds confirmed and available in a timely manner.

What Are Disadvantages of Electronic Funds Transfer?

A disadvantage of electronic funds transfer (EFT) is that the process cannot be reversed if a sender should enter an incorrect account number.

The EFT system is being used more frequently for paying bills online due to the ease and convenience of the transactions. The process may save money on the costs of checks, envelopes, paper billing and stamps. Therefore, the administrative costs are reduced and banking is facilitated with a greater amount of security and efficiency.

These 3 alternatives are cheaper than using cheques

Mobile banking is just one way to transact that is not only safer but are far cheaper than using a cheque.

The advance in technology has rendered the use of a cheque as a payment method archaic. Cheques are an expensive form of payment and over time, have become most susceptible to fraudulent activity. To this end, there are far more effective means to transact that are not only safer but are far cheaper.

Three alternatives that businesses can use instead of cheque payments:

Online Banking – Online Banking provides the ability for businesses performing functions with cheques to manage mandates, through a doer and checker process while also enabling electronic payments at a reduced time and increased safety.

Mobile payments – Another use-case is using cheques to pay wages or making payments to individuals that don't have a bank account. Most of the banks have functionalities that enable one party to pay another using only their cellphone number.

Mobile Banking Apps – The use of mobile apps is growing and financial service providers see mobile apps as the main gateway into a range of solutions. Moving away from cheques as a means of receiving or making payment altogether can go a long way to reduce costs and increase convenience for businesses.

Options for EFT Payments

There are various circumstances where you need to make Rand payments internally within South Africa, whether it's from your bank account to another person's account with the same bank, or to someone at a different bank. But did you know that there are actually three different options available to you.

1. Normal EFT Payments: batch payments overnight up to R5 000 000

This is cleared overnight, even if it's done from one bank to a different bank, but then backdated to the same day, as long as the payment is made before 2:30pm. Note that this applies if the payment is made during the working week, i.e. from Monday to Friday.

2. Real time clearing (RTC): individual real time payments generally not larger than R20 000

Real time clearing is typically used by individuals and means that the funds are cleared immediately, sometimes within a few minutes. In exchange for this convenience, you'll pay a higher fee for it. This service is available 24 hours a day and 365 days a year (even on weekends).

Bear in mind that some banks have security measures in place with real time clearing, especially if you are paying a new beneficiary, where they may wait for two hours before clearing the money. This is because you could be the victim of fraud and be coerced into making a transfer using your Internet banking.

3. Same day (NPS) payments

With this option, the money is credited to your account by the end of the business day, rather than immediate clearance like option 2 above. Again, you'll pay a higher price than if you were doing a standard EFT, because you're paying for the convenience.

All payments greater than R5 000 000 are paid through this method. Businesses usually utilise this option, as often they are paying larger amounts and for security and fraud reasons, they don't want the funds cleared immediately. These are also only performed on weekdays, which suits businesses, as they don't typically need funds transferred on a weekend day.

Let's talk about money

Money can be

or

which are

But also with cheques or even virtual.

If I travel all over the world, I will need to get some foreign money or

When I give too much money in a shop, the assistant will give me back some change with my.....(proof of payment) .

If I am satisfied of the service, I will let the waiter a

If I need more money to buy a house for example, I go to the bank to get a, which means I will have to pay

Of course I will have to pay back this money, because Iit from the bank.

If I have enough money, I will be able to buy a car, too , but if I don't , maybe I can buy it on -
.....

The best solution for me would be tothe money , but I don't want anyone to die!

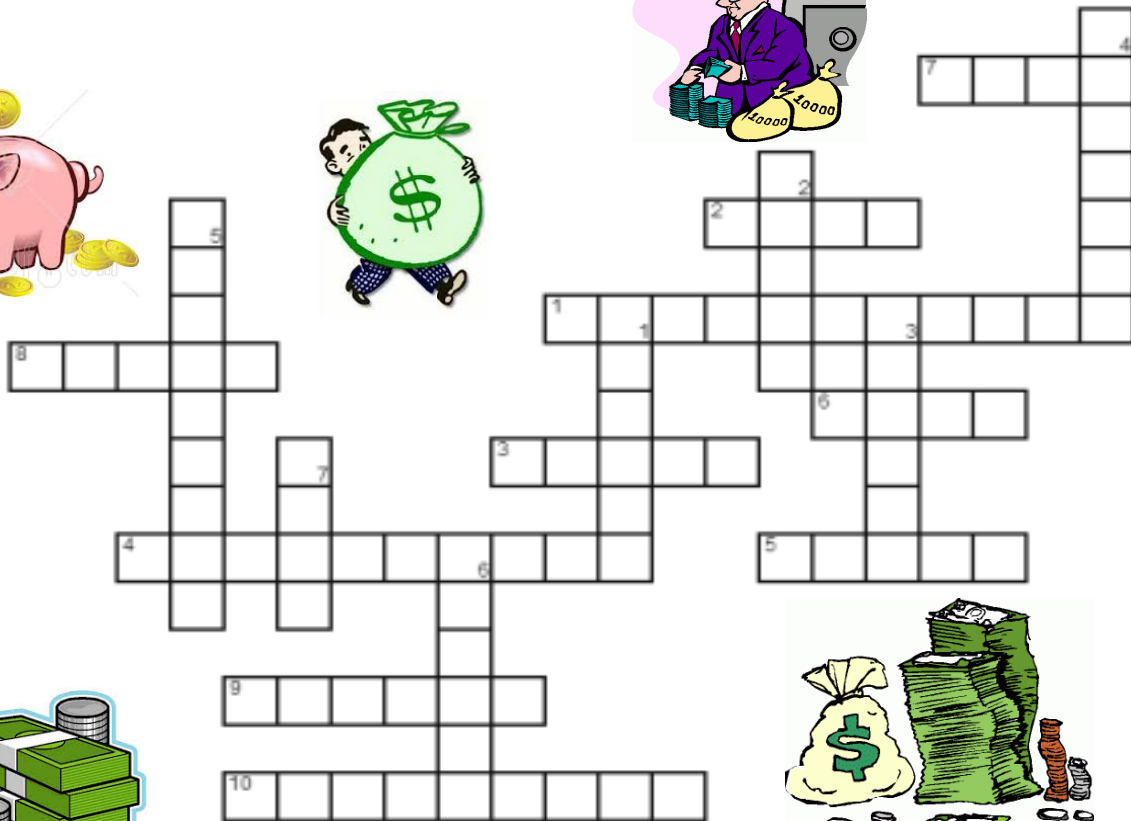

Another solution would be to write a bestseller , so I would get enoughto buy anything I want.

Because I must admit that the money you get in exchange for work or(verb) , or(noun) is harder to get than the money you get by chance = (verb)

If I had a lot of money, I wouldit in a company, so I would become a , I would owe parts of the company's and receiveback.

The problem is that I do not know anything about money, so if I wanted to go the-(place where you can shares) , I would need some advice.

MONEY, MONEY,

1. When you put your money in a bank you put it in your _____ (bank account)
2. To give something away and get money in exchange (**sell**)
3. To have no money (**broke**)
4. When something costs more than what you think it should cost (**overpriced**)
5. Something does not cost a lot (**cheap**)
6. You do not spend money, you _____ it by keeping it safe in a bank (**save**)
7. You have to pay money as a punishment for breaking the law, like for example speeding. (**fine**)
8. The money that is made on paper is called bank _____ (**notes**)
9. You carry this around with you every day and keep your money in it. (**wallet**)
10. A plastic card with which you can pay; this holds within it the money you have saved up in your bank account. (**debit card**)

Down

1. When you are able to buy something (**afford**)
2. When you give back the money that you borrowed (**repay**)
3. The extra money you get back if you give the shopkeeper more money than the item costs. (**change**)
4. To put money in the bank (**deposit**)
5. Something costs a lot of money. (**expensive**)
6. When you put your money in the bank for a period of time in order for the sum of money to grow (**invest**)
7. You _____ money by getting a job and working hard for it. (**earn**)

Vocabulary

Match the words on the left with the words on the right:

1. well-trained	a. money
2. training	b. centre
3. main	c. company
4. retail	d. course
5. save	e. staff
6. potential	f. customer
7. competitive	g. fair
8. trade	h. outlet
9. current	i. account
10. parent	j. price

Complete the sentences with the words from the list. There are four extra words:

*appointment assembly bill diary efficient lower plant
purchasing raise salary sign target turnover wholesaler*

- The company's last year was 2 billion.
- I have to fix a(n) with an important client.
- Please your name in the visitors' book.
- A(n) manager buys all the things that the company needs.
- One of the robots on the line has stopped working.
- A(n) stores products in a warehouse.
- You write down your appointments in a(n)
- At a hotel, you get a(n) when you leave.
- A(n) person does not waste time at work.
- Our products are too expensive. We must the prices.

Benefit

When you get a loan to buy a house, it is called a

Cash

You received a _____ in the mail for your birthday.

Cheque

If you borrow money, you must _____ it.

Credit

A _____ of loans and credit cards is that you have more time to pay for goods and services.

Credit bureau

A history of your behaviour with loans and credit is found in a _____

Credit report

A bank card that subtracts or deducts money directly

Debit card from your checking account is a _____

Mortgage You are less likely to _____ if you pay for a
purchase with _____

Overspend

Repay

ACTIVITY

Find out what you need to open a bank account and complete the following Account Application Form.

Week 7-8

Computer Application

Insert worksheet containing the following

- **Insert simple animation to text and graphics-click or timed**
- **Insert automatic slide transition**

ACTIVITY 1**POWERPOINT****YEAR 3****INSTRUCTIONS**

- Create a **PowerPoint Presentation** by using the **Topic: Needs and Wants**.
- Choose a Design that suits the Topic.
- Choose a Font type and colour that is easy to read.
- Insert suitable pictures from ClipArt or from Files in each slide.
- Add the Animation > swivel to each picture.
- Use a different Transition for each slide.
- Print handout style hard copies.

TOTAL 25

TOTAL 25

Element	Excellent / Good 4-5	Average 2-3	Poor / Inadequate 1	Total 25
Theme	Content: covers the theme well. Evidence of extra effort and pride in work	Content averagely covers theme.	Content is incomplete. No effort to produce high quality slide show.	
Font: Style, size, colour, typing errors	In good taste, easy to read. Colour, size & style contribute to overall success of presentation. No typing errors.	Font is readable. Colour, size & style might be too much and not in good style. Some typing errors.	Little or no font changes. Many typing errors.	
Slide layout & background	Correct number of slides. Background as requested and suitable to theme.	Correct number of slides. Background average or not complementing the theme.	Too few slides. No or unacceptable background.	
Graphics, clipart, shapes	Required amount and suitable to theme. Extra effort with manipulation & placement. Contribute to overall success of slide.	Required amount. Manipulated but needs more attention. Not quite fitting the theme.	No or only limited graphics used. Not relating to theme. Not manipulated or poorly placed.	
Animation and/or slide transition	Required amount of animation. Contribute to overall success of slide show.	Required amount of animation. Averagely fitting theme.	No or too few animations. Not suited and distracting.	

FORMAL ASSESSMENT

ACTIVITY 2

POWERPOINT

YEAR 3

INSTRUCTIONS

- Create a **PowerPoint Presentation** using the Terminology from the **Topic: Banking Services**.
- Add a suitable background colour to your slides.
- Insert suitable pictures from ClipArt or from Files in each slide.
- Add a different Animation to each picture.
- Add the Animation > Spin to each Term, for example to the word “Credit”, “Debit”.
- Use a different Transition for each slide.
- Print handout style hard copies.
