Safety questions

1. What is the first thing you should do in case of a fire?

- a) Call 10111 or 112
- b) Evacuate the building
- c) Use a fire extinguisher
- d) Check for trapped individuals

2. What does the acronym “PPE” stand for?

- a) Personal Protection Equipment
- b) Proper Precautionary Equipment
- c) Potential Protective Equipment
- d) Primary Prevention Equipment

3. What colour is typically used for indicating caution or warning?

- a) Red
- b) Blue
- c) Yellow
- d) Green

4. What should you do if you witness someone experiencing an electrical shock?

- a) Pour water on them
- b) Touch them to provide first aid

- c) Call for medical help immediately
- d) Ignore the situation

5. What is the purpose of a safety data sheet (SDS)?

- a) To track employee attendance
- b) To provide instructions for product use
- c) To record workplace accidents
- d) To maintain office supplies

6. Which of the following is an example of a physical hazard?

- a) Noise pollution
- b) Chemical fumes
- c) Slippery floors
- d) Poor lighting

7. What is the correct way to lift heavy objects?

- a) Bend your back while lifting
- b) Use your leg muscles and keep your back straight
- c) Twist your body while lifting
- d) Lift with one hand only

8. Which type of fire extinguisher is suitable for extinguishing electrical fires?

- a) Class A
- b) Class B
- c) Class C
- d) Class D

9. What should you do if you come across a damaged power cord?

- a) Repair it yourself
- b) Ignore it and continue working
- c) Report it to the maintenance department
- d) Throw it away in a regular trash bin

10. What does the acronym “OSHA” stand for?

- a) Occupational Safety and Health Administration
- b) Office for Safety and Hazard Awareness
- c) Organization for Safe Handling of Accidents
- d) Operational Security and Health Assessment

11. Which of the following is an example of a personal protective equipment (PPE)?

- a) Hard hat
- b) Coffee mug
- c) Cell phone
- d) Stapler

12. What does the “R” in the acronym “CPR” stand for?

- a) Restoration
- b) Resuscitation
- c) Recovery
- d) Reanimation

13. What should you do if you discover a fire extinguisher that is not in proper working condition?

- a) Keep it for emergencies anyway

- b) Paint it a bright colour for easy identification
- c) Remove it from service and notify the appropriate personnel
- d) Use it as a doorstop

14. Which of the following is an example of an ergonomic hazard?

- a) Toxic fumes
- b) Excessive noise
- c) Poor lighting
- d) Awkward postures

15. What should you do before using any power tool?

- a) Read the instruction manual
- b) Start using it immediately
- c) Test it on your hand
- d) Share it with your co-workers

16. What is the purpose of a lockout/tagout procedure?

- a) To secure valuable equipment
- b) To tag personal belongings
- c) To prevent unauthorized access
- d) To protect against unexpected startup of machinery

17. Which of the following is a potential hazard associated with using headphones at high volume?

- a) Reduced productivity
- b) Ear damage or hearing loss
- c) Increased focus and concentration
- d) Enhanced communication with others

18. What should you do if you witness someone having a seizure?

- a) Restrain the person to prevent injury
- b) Put a spoon in their mouth to prevent biting their tongue
- c) Time the duration of the seizure
- d) Clear the area around the person to prevent injury

19. What is the correct way to handle broken glass?

- a) Pick it up with your bare hands
- b) Dispose of it in regular trash
- c) Use a broom and dustpan or gloves to pick it up
- d) Leave it for someone else to clean up

20. What should you do if you smell gas in your workplace or home?

- a) Light a match to identify the source of the gas
- b) Ignore it and hope the smell goes away
- c) Open windows and doors to ventilate the area
- d) Seal off the area and wait for help to arrive

21. What should you do if a chemical splashes into your eyes?

- a) Rub your eyes vigorously
- b) Rinse your eyes with running water for at least 15 minutes
- c) Apply eye drops or ointment immediately
- d) Ignore it and continue working

22. What should you do if you encounter a “Wet Floor” sign in a public area / part of area in your classroom?

- a) Ignore the sign and continue walking normally
- b) Take an alternate route to avoid the wet area

c) Move the sign to a different location

d) Step on the wet area carefully

Electrical Safety Questions

1. What is the purpose of grounding electrical systems?

- a) To provide a path for current to flow
- b) To protect against electric shocks
- c) To reduce electrical resistance
- d) To increase energy efficiency

2. Which of the following is a common cause of electrical fires?

- a) Overloading circuits
- b) Proper grounding
- c) Regular maintenance
- d) Low voltage

3. What should you do if you experience an electrical shock?

- a) Pour water over the affected area
- b) Apply a burn ointment immediately
- c) Remove the person from the electrical source
- d) Do nothing; it will subside on its own

4. What does the term “overloading” mean in electrical safety?

- a) Using too many electrical devices simultaneously

- b) Using energy-efficient appliances
- c) Overcharging a battery
- d) Insulating electrical wires

5. Which of the following is NOT a recommended practice for preventing electrical accidents?

- a) Avoiding the use of extension cords
- b) Regularly inspecting electrical equipment
- c) Using damaged electrical cords
- d) Keeping electrical devices away from water sources

6. What does the abbreviation “PPE” stand for in electrical safety?

- a) Personal Protective Equipment
- b) Proper Power Efficiency
- c) Protective Power Equipment
- d) Professional Protection Evaluation

7. Which of the following should NOT be used near electrical equipment?

- a) Water
- b) Fire extinguisher
- c) Metal tools
- d) Insulated gloves

8. What is the purpose of a circuit breaker in an electrical system?

- a) To regulate the flow of electricity
- b) To prevent overloading and short circuits
- c) To increase energy efficiency
- d) To generate electricity

9. What is the colour coding for the ground wire in electrical systems?

- a) Red
- b) Black
- c) Green
- d) Yellow

10. Which of the following should be done before working on electrical equipment?

- a) Wear insulated gloves
- b) Use a metal ladder
- c) Keep the equipment plugged in
- d) Stand on a wet surface

11. Which type of fire extinguisher is suitable for electrical fires?

- a) Water-based extinguisher
- b) Foam-based extinguisher
- c) CO2 extinguisher
- d) Powder extinguisher

12 What should you do if you notice frayed or damaged electrical cords?

- a) Continue using them until they completely fail
- b) Repair them with tape or insulation
- c) Replace them with new cords
- d) Ignore the damage as long as they still work

13. What is the purpose of an electrical lockout / tag-out procedure?

- a) To secure electrical equipment during maintenance or repair

- b) To prevent unauthorized access to electrical systems
- c) To increase energy efficiency
- d) To regulate the flow of electricity

14. Which of the following should be used to disconnect power to electrical equipment before servicing?

- a) Screwdriver
- b) Pliers
- c) Circuit breaker
- d) Hammer

15. Which of the following is a safe practice for storing flammable materials near electrical equipment?

- a) Keeping them in close proximity for easy access
- b) Storing them in a separate, designated area
- c) Ensuring they are properly labelled
- d) Using metal containers for storage

16. What is the purpose of regular electrical equipment inspections?

- a) To increase energy efficiency
- b) To ensure compliance with safety regulations
- c) To generate electricity
- d) To reduce the risk of electrical fires

17. Which of the following is NOT a recommended practice for electrical safety?

- a) Keeping electrical devices away from water sources
- b) Reporting any electrical hazards or malfunctions immediately
- c) Using damaged electrical equipment

d) Following manufacturer's instructions for electrical devices
