Term 4 Week 6 - 8	49
SECTION 4: ASSESSMENT	53

SECTION 1:

INTRODUCTION:

1. Requirements for Wholesale and Retail as a subject

1.1. Time Allocation

The total number of hours allocated for the subject in a five-day cycle is 13½ hours. Sufficient time must be allocated in the school timetable for the practical work required to be done.

1.2. Resources

1.2.1. Human resources

Wholesale and Retail requires a trained subject specialist. It is preferred that the teacher offering Wholesale and Retail has attended training in this subject. Industry related experience would be an asset. Teachers must build a relationship with managers of both small and large Wholesale and Retail outlets in the area and regularly visit them to keep abreast with the industry

If possible teachers should ask to shadow workers on the floor and in the receiving and cash office areas to get a better understanding of what happens at this level of operation.

Wholesale and Retail teachers are required to:

- Teach the subject content with confidence and flair
- Interact with learners in a relaxed but firm manner
- Manage the SIM (Simulated shop) store fixtures and fittings and stock and conduct stock taking and inventory (where applicable)
- Manage the budget
- Manage the teaching environment
- Plan for practical work
- Plan for theory lessons
- Arrange for learners to visit outlets within the area. This might be able to be done through learners doing this on the own if outlets are within the area and able to be

accessed through public transport otherwise the school should provide transport and arrange outings

- Maintain and prepare the Sim store for all the practical exercises (where applicable)
- Ensure learner safety
- Carry out School Based Assessment (SBA)
- Implement innovative methods to keep the subject interesting
- Be self-motivated to keep her/himself abreast of the latest developments in the industry
- Regularly visit wholesalers and retailers and discuss with management any new innovation within the industry
- Provide students with letters stating they are wholesale and retail students so when they visit outlets to observe and talk to management they will be accepted more readily.
- Where possible and where allowed (taking into account the security requirements of businesses) learners should be encouraged to visit outlets and watch the staff at work to better understand the theory they learn in the classroom.
- In schools that have no, or limited access to computers and the internet, teachers should visit outlets and take photographs that can be used to illustrate concepts.

1.2.2. Learner Resources:

- Text/ resource book
- The internet (where available)
- Pen/pencils
- Wholesalers/retailers in the area
- Magazines.
- Newspapers
- Internet pictures or photographs taken by the teacher
- Calculators

2. Infrastructure, equipment and finances

Schools must ensure that teachers have the necessary infra-structure, equipment and financial resources for quality teaching and learning.

2.1. Infrastructure

- Any school wishing to offer Wholesale and Retail as a subject should try to set up a room to look and operate as a retail store. The requirements of this SIM room, as it is referred to in this document, are as follows;
- The school should try partner with retailers in the area and that will help then get second hand equipment, suppliers promotional stands and ticketing and “stock”
- Schools should ask their local retailers to get empty boxes, cans, bags etc of stock from their suppliers for the shop
- A back area separated from the “shop” that can be used as a stockroom must be made available
- There must be sufficient “stock” to fill the shelves. It is advisable that this stock be empty bottles, boxes, cans, bags etc collected by students and staff. Real stock is prone to theft.
- The “stock” should cover a number of different departments/categories such as (examples only)
 - Tea/coffee/sugar containers
 - Pet food containers
 - Cool drink bottles/cans
 - Men’s toiletries
 - Ladies toiletries
 - Baby products
 - Health foods/medicinal containers
- Empty bags/bottles can be made more realistic by filling them. Examples are
 - Dog food bags with newspaper
 - Ground coffee bags with soil
 - Cool drink bottles with coloured water
- The SIM room needs to be managed and prepared prior to learners doing their practical exercises such as stock counting, shelf filling, tidying etc.

- Electricity supply to the SIM room is crucial, for the operation of the PoS.

2.2. Maintaining the Sim room

- The room must be kept locked at all times when not being used.
- Only limited numbers of people should be allowed access to the keys to the sim room.
- Lecturers or someone tasked with being in charge of the room should be the only ones to have access to the sim room key.
- Students should be used to clean, tidy and sweep the room as part of their training and it should not be necessary for cleaning staff to access the room.
- A regular stocktake of equipment is very important as the tills are computers and prone to theft.
- Only Lecturers or the person tasked with being in charge of the sim room should be given access to the code/password of the Admin level that allows for changes to settings on the PoS

2.3. SIM room equipment

The following is the minimum requirement for a retail SIM store.

Equipment	Requirements
Point of Sale Equipment (Tills) Linked to a computer Back Office System	Scanning Point of Sale hardware
	Minimum of 2 per SIM room, preferably 3 (this is dependent on the numbers of learners)
	The system must allow for a minimum of 4 levels of authority Admin, Supervisor, Office Clerk, Cashier (That can be set under Admin level)
	The system must allow for different tasks to be allocated to these different levels of authority. (That can be set under Admin level)
	The system must allow for each Cashier to cash up – preferably a blind cash up but this is not a must have (This function can be set under Supervisor

	level)
	Show Cashier's overs & shorts after cashing up. (This can be set under Office Clerk level)
	The system must allow the set-up of a float amount (This can be set under Admin level)
	The system must allow the banking to be completed and banked (This can be set under Office Clerk level)
	The system must allow multiple forms of payment and be programmable to visually show the type of payment methods. It must include; ○ Cash ○ Credit card ○ Debit card ○ Coupons ○ Vouchers
	The above tender types must be designed, printed and available for use when the learners use the PoS
	Plastic discs that can be used as coins at the PoS
	The system must allow new products to be added to the system both with and without bar-codes (This can be set under Supervisor level)
Shelf edge label printer	A shelf edge label printer linked to a system that allows labels to be printed from bar code or product code
	Shelf edge label strips on all shelves
Store fixtures and fittings	Supermarket shelving with backboards
	Supplier promotional stands
	Pegboard and pegs
	Clothing rails

Stockroom area	Some shelving which is required to store small and single excess stocks
	Floor space is required to demonstrate building of stacks in the stockroom
	Empty cartons in quantity which should be filled with newspaper and sealed to allow the building of stacks
	Stock
Stock	Preferably empty boxes, bags and cans
	As wide a range of categories as possible
	Carrier bags

NOTE: If the school cannot arrange for computerised tills (PoS) then manual tills or even cash boxes can be used. As long as the learners can process sales and "handle cash and give change"

2.4. Other equipment

- Where possible, learners should have access to a computer that will allow for the design and printing of promotional tickets. (A program such as Word)
- Where this is not available learners can use paper and colored pens

2.5. Consumables

- Printer paper for the printing of promotional tickets
- Shelf edge label paper
- Cash up stationary
- Change requisition slips (These can be requested from many of the banks)
- Cashing up stationary (Designed by the teacher – Example provided)
- Poster paper/board
- Receiving and dispatch stationary (Designed by the teacher - Example provided)
- Banking stationary (Designed by the teacher and from banks)

2.6. Teacher Resources:

- Text book
- Carrier bags/Pictures of logos
- YouTube videos on the Supply Chain (where there is access to the internet)
- PowerPoint presentation to be prepared by the teacher (where there is access to computers)
- YouTube Videos on customer service (where there is access to the internet)
- YouTube videos of Inventory counting (where there is access to the internet)
- Actual products with examples of date coding/sell/use by dates
- Examples of merchandising techniques downloaded off the internet or photographs taken by the teacher
- Products with prices/product codes
- Examples of pricing/codes off the internet or photographs taken by the teacher
- Examples of tickets and promotional tickets/posters from retailers in the area
- Businesses in the area
- Pictures of technology used to receive stock taken off the internet. (where there is access to the internet)
- Pictures of money counting equipment taken off the internet. (where there is access to the internet)
- Explanation by SA Police Services regarding the legal procedures for stopping and searching a shoplifter (Policeman visit the class and discuss)
- YouTube video on visual merchandising. (where there is access to the internet)

2.8. Finances:

Budget and inventory

A budget must be allocated for the subject. The amount will be determined by the number of learners taking the subject across all the years and the nature of the practical work required as

stipulated in the curriculum. The budget needs to be revised annually and must consider all resources needed per year. The funding must make provision for maintenance of equipment and the replacement over the years.

Resourcing could be sub divided into the following categories:

- Hardware and Equipment
- Consumable Materials
- Practical Assessment Task Resources (PAT)
- Teaching and Learning Support Material
- Learner excursions (Petrol)
- Text books, Workbooks and Teachers Guide

3. Field Exercises and Report back.

Retail is a very visual industry and as such learners will be required to visit outlets within the area to identify examples of topics learned through the week.

This might be able to be done through learners doing this on the own if outlets are within the area and learners are able to visit them using public transport.

If this is not an option, the school should provide transport and arrange outings

After field work learners are to make a presentation to the class on their finding.

A minimum of one lesson at the end of each week or the start of the next week must be devoted to the presentations where presentations are required

SECTION 2:

SPECIFIC GUIDE BY WEEK

TERM 1. WEEKS 1 & 2**TOPIC. The Wholesale and Retail Industry:**

Computerisation in the industry

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 1 & 2	Computerization in the industry	The role of computerization Degrees of computerisation in the industry Different degrees of computerisation between a small business and a national chain		Teamwork Presentation		Theoretical explanation Teamwork Presentation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 1: High or low level of computerisation?

In teams of two discuss and decide if you owned a retail business would you implement a high level of computerisation or just a very low level of computerisation or not have computers at all and explain why.

PRESENT YOUR DECISION TO THE CLASS

There is no model answer to this question.

It will depend upon whether they intend opening a spaza shop, a single outlet in a mall or a large business with many outlets

Students need to demonstrate an understanding of the need for some form of computerisation in larger businesses to improve the efficiency of the business but also an understanding of the cost to install computerisation when making their decision

TERM 1 WEEKS 3 & 4

TOPIC. **The Wholesale and Retail Industry:**
Support functions

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 3 & 4	Support functions	Internal support functions at small businesses External support functions for small businesses Internal support functions at large businesses External support functions for large businesses		Teamwork Presentation		Theoretical explanation Teamwork Presentation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 2: Support Functions

In teams of two discuss which of the support functions you would do yourself if together, you owned your own little clothing shop and which external support you would use to help you.

PRESENT YOUR DECISION TO THE CLASS

There is no model answer as learners could choose to do more or less than the norm.

However, their decisions should be based upon those in the text book that point to small independent outlets and *not* large chains

TERM 1 WEEK 5

TOPIC. **The Wholesale and Retail Industry:**
Stakeholders

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 5	Stakeholders	Stakeholders of a wholesale and retail business The role of the different stakeholders		Teamwork Presentation		Theoretical explanation Teamwork Presentation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 3: Stakeholders.

In teams of two discuss who you think would be affected if a business had to close its doors for good.

PRESENT YOUR FINDINGS TO THE CLASS

- The **staff** of the business
- **Suppliers** that sell goods to the outlet
- **Outside service companies** that service the outlet and supply equipment to it
- The **Government** (SA Revenue Services) who get the VAT the business collects as well as the tax the business pays on its profits
- **Customers** who used to shop at that outlet,
- **Banks** who lend the business money and get interest for it and who use the money the business deposit with them to lend to others.
- **Welfare Organisations** would suffer through losing any donations that the business made to them.
- **The community** through social services paid for by the tax and VAT the business paid.
- The **Sector Education and Training Authority (SETA)**
- **Unions** would lose these membership fee

TERM 1 WEEKS 6 – 8**TOPIC. PROFIT**

Preventing shrinkage and losses

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 6 - 8	Preventing internal and external theft	Measures used by the industry to prevent internal theft Measures used by retailers to minimise shoplifting General policies of the wholesale and retail industry in terms of preventing internal theft General policies of the wholesale and retail industry in terms of preventing shoplifting				Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 4: Minimising internal theft.

Identify methods used by the industry to minimise internal theft.

- **Vacuum System** – The vacuum system is a system for controlling access of suppliers and stock items at the receiving and dispatch areas in an outlet. A cage is used where the supplier and the stock has to enter a 'holding area' where the stock is checked before the stock then moved through into the stock storage areas.
- **Declaring incoming goods.** When staff members enter the outlet with goods that the outlet sells they must declare the items on arrival and have it marked by the security.
- **Garbage Out** – A strategy to prevent theft taking place when the garbage is taken out includes having a security guard check the garbage before it leaves the outlet or to make use of see through garbage bags.
- **Security guards** – Outlets make use of external security guards
- **New staff** - Before employing new staff retail businesses need to make sure that thorough reference checks are done on potential employees.
- **Sweet-Hearting at the tills** Supervisors need to keep an eye and ear to listen that every item passed over a scanner is recorded on the PoS by listening for the beep the scanner makes
- **Profit sharing** – some businesses offer their staff a profit sharing scheme where the staff can earn a bonus based on the overall performance of the outlet. The overall performance includes increasing sales, reducing shrinkage and reducing expenses.
- **Anonymous tip off line** – many businesses have introduced a phone line specially to allow staff to phone in without giving their name, and reporting other staff who are stealing.
- **Anonymous undercover agents** –businesses have been known to temporarily employ a security guard who acts as a normal employee and works as a normal employee which allows him/her to work alongside the staff and to hear what is going on in the outlet. Based on his/her report the company will decide on action to take.
- **Searching** – virtually every wholesaler and retailer has a policy of searching staff when

they leave the premises. This takes place at both lunch breaks and at the end of shifts.

Activity 5: Minimising shoplifting.

Identify methods used by the industry to minimise external theft

Change rooms Many retailers make use of a control system where customers are allowed to take a specific number of items into the changing room. This is checked by a customer assistant and when the customer exits the cubicle and returns the corresponding disc, the customer assistant can then cross check this to the clothing brought out of the change room

Blind corners. Outlets use mirrors to monitor these areas.

Customer Returns Customer returns are usually only allowed with a valid till docket.

High Value Inventory (HVI) Regular stock counts and secure storage or display methods are required. Sometimes empty display cases are displayed. In cellular phone outlets an example of the phone models is made available for view on the shop floor but there is a security line that is in place where the item cannot be removed from the outlet because it is connected to a security device?

Security guards walking the floor and at the front door is another deterrent used by retailers. Many retailers have **security tags** on some (or all) of their products and systems at the front door that buzz if someone walks out the outlet with an item with an active security tag. Some retailers also have **cameras** in the outlet which allow a guard to observe suspicious shoppers from a distance

Announcements are made to alert staff to specific security or shoplifting situations in a manner that doesn't alert the thief or upset other customers.

The best method of minimising theft in a retail outlet is for **the staff to make eye contact with every customer** and to smile and greet every customer they come into contact with or walk past. No thief likes to be seen and when a staff member greets someone who is thinking of being dishonest it makes them nervous and less likely to steal. They will rather go to another outlet where they can operate unnoticed.

TERM 2 WEEKS 1 & 2

TOPIC. PROFIT:

Using budgets

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 1 & 2	Using budgets	The concept of budgets How budgets are used in the industry		Compare actual figures to budgeted figures and identify areas requiring improvement		Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 6: Analyse performance to budget

Below is the budget you drew up for the three months just passed as well as your actual figures for this period.

Compare actual figures to budgeted figures and identify where your outlet might be under performing.

	ACTUAL	BUDGET	COMMENT
Sales	2 330 489	2 500 000	This is bad - below budget
Cost of Goods Sold	1 857 844	2 000 000	
Gross Profit	472 645	500 000	This is bad - below budget
Shrinkage	9 903	5 000	This is bad - above budget
True Gross Profit	462 742	495 000-	This is bad - below budget
Expenses			
Staff costs			
- Basic	69 821	70 000	
- Overtime	3 565	2 500	This is bad - above budget
- Casual	3 539	3 000	This is bad - above budget
- Other staff costs	3 496	3 500	
Cleaning	6 000	6 000	
Electricity	10 221	10 000	This is bad - above budget
Water	17 009	18 000	
Packaging & Wrapping	2 409	2 000	This is bad - above budget
Printing & Stationary	3 198	3 000	This is bad - above budget
Refuse collection	1 000	1 000	
Rent	47 110	47 110	
Rates	11 424	11 424	
Repairs	1 073	750	This is bad - above budget
Total Expenses	179 865	178 284	This is bad - above budget
Operating Profit	282 877	316 716	The result is bad - below budget

TERM 2 WEEK 3**TOPIC. CUSTOMER SERVICE****Shopping patterns**

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 3	Shopping patterns	The concept of shopping patterns The impact of shopping patterns on service requirements The concept and use of staff scheduling				Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 7. How shopping patterns affect service requirements

In your own words give 2 examples of different shopping patterns and explain when their busy time would usually be

Shopping Mall shopping patterns

Shopping malls stay open until much later at night, and even later during the festive seasons?

They are particularly busy weekends and public holidays when you often see whole families out shopping together.

City centre shopping pattern

In the city centres, outlets are much busier over the lunch hour when the office staff are on lunch than mid-morning or mid-afternoon.

Convenience stores

Convenience stores, provide convenient shopping so they must be open long past the hours of most outlets many stay open 24 hours a day. They are at their busiest when other outlets are closed.

TERM 2 WEEKS 4 & 5

TOPIC. STOCK:

Perpetual inventory

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 4 & 5	Perpetual inventory	The concept of perpetual inventory The benefits of perpetual inventory Restrictions to implementing perpetual inventory		Group exercise Discussion		Theoretical explanation Group exercise Discussion	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 8: Perpetual Inventory

In your own words explain the term “Perpetual Inventory”

The term **PERPETUAL** means “never ending” and **INVENTORY** is another word for stock on hand in the business.

Perpetual Inventory is knowing what stock on hand is in the business at all times for each and every product stocked.

TEAMWORK

Break the class into teams and have some teams explain why they want perpetual inventory arguing their case against teams NOT wanting perpetual inventory

There is no model answer to this question.

Learners must demonstrate an understanding of the advantages of perpetual inventory but also the cost of implementing it and if they decide their outlet is a one-man outlet then the decision should be **NO** perpetual inventory but if a large outlet with other branches then it would be worthwhile spending the money to implement perpetual inventory

TERM 2 WEEKS 6 - 8

TOPIC. STOCK:

Dispatching

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 6 - 8	Dispatching	Concept of dispatch Reasons for dispatch Impact of dispatching on the business Methods for dispatching in non-computerised outlets Methods for dispatching in computerised outlets		Practical exercise		Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 9: Dispatching

How would you dispatch stock from an outlet so as to minimise losses in a non-computerised outlet?

Ensure your outlet's name and address is recorded on any dispatch documentation.

Record to whom the items are being dispatched

The person contacted at the supplier who gave permission for the return of the goods if the goods are being returned

The full description of each item being returned.

Accurate listing of the quantity being dispatched

The cost price, if this is known at outlet level

The person collecting the goods must sign and write his name on the return document

The registration number of the truck/car of the person collecting should be if possible

Never turn your back on an open dispatch door.

Ensure the person collecting is authorised to collect.

TERM 3 WEEKS 1 - 4

TOPIC. MERCHANDISING:

Pricing

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 1 - 4	Pricing	Different pricing methods. The latest computerised methods for displaying prices The need for customers to know what they are going to pay Manual pricing Tools used to price mark Where you put the ticket is important Pricing for target market		Field work (where possible) Presentation		Theoretical explanation Field work (where possible) Presentation	Text book Actual products with examples of prices/codes PowerPoint presentation Or photos taken by the teacher This is a very visual topic and examples of pricing and pricing methods can be downloaded from the internet to show Local retailers (where possible) Internet (where available)

ANSWERS TO STUDENT ACTIVITIES

FIELD WORK/INTERVIEWS

Identify as many different pricing methods by visiting outlets or accessing the internet or interviewing family and friends

Comment on the accuracy of the learner's information in the Learner's Workbook

TERM 3. WEEKS 5 - 7

TOPIC. MERCHANDISING:

Merchandising different categories of stock

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 5 - 7	Merchandising different categories of stock	Merchandising cold chain products Merchandising fragile items Merchandising hazardous products Merchandising clothing Products with expiry dates Concept of stock rotation				Theoretical explanation	Text book Products with best before or Expiry dates

ANSWERS TO STUDENT ACTIVITIES

Activity 10: Merchandising different categories of stock

List how the given categories of merchandise should be handled

Cold chain products

If cold or frozen foods are not kept at their specific temperature and start to thaw they can go off. Customers who buy food products that have thawed and been re-frozen could get very sick and death has even occurred due to this.

The fridges and freezers have load lines. They must never pack the stock higher than these load lines.

Ensuring stock is taken from back up freezers and fridges or delivery trucks straight to the shop floor cabinets is very important.

Check “use-by” codes and rotate stock on receipt

Food should never be refrozen

Hazardous products

All hazardous material must be handled according to specific handling methods for each product and in some cases special gloves and aprons must be worn.

Clothing

Clothing, towels and other material items are usually received at the outlet, wrapped in plastic or packed in plastic bags to keep them clean.

One of the better ways of merchandising this kind of product is to keep the items in the protective plastic wrapping until they are at the display area and only then take them out. This helps keep the items clean.

Even though these items won't break if they are dropped, they can get very dirty. Customers won't want to buy a new white t-shirt that has dirty marks on it. Merchandisers handling these kinds of products need to make extra effort to ensure that their hands are clean and that the shelves and racks are clean before they place the new items in their display area.

TERM 3. WEEK 8

TOPIC. MERCHANDISING:

Loss prevention while merchandising

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 3 Week 5	Loss prevention while merchandising	Loss prevention when price marking Loss prevention when filling shelves Loss prevention through stock rotation How stock rotation is implemented				Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 11: Preventing losses

Explain how to prevent losses when merchandising

PRICE MARKING

If a product is price marked (or the shelf edge label shows) one price and the item scans at a different price at a till, customers will usually be given the item at the **lowest** price.

So how do losses occur through price marking?

- Team members marking items at the wrong price.
- Not changing prices/shelf edge labels when a product changes in price
- Not removing promotional tickets when the promotion is over.

Staff must ensure they do these things correctly

The single biggest cause of loss when shelf filling is through **damage** to merchandise.

- The team over-filling shelves as discussed earlier in the discussion of the way the honey had been merchandised.
- Trying to squeeze items onto the shelf and they over-lap the shelf.
- Overfilling trolleys of stock when bringing stock from the stock storage areas to the shop floor.
- Overloading shelves that cause products to fall and break

Lost sales.

Sales are lost when staff do not unpack stock and fill the shelves and the stock on the shelf sells out while there is still stock in the stock storage areas. This often happens when the stockroom is so full that the team cannot find the stock they are looking for. That is why it is best to fill the shop floor displays as soon as any delivery is received and why it is so important that stock storage areas are correctly packed and maintained in a neat and clean state.

Not implementing stock rotation

Rotating stock is very important when merchandising. When newly received products are

brought to the shop floor to fill shelves, the older products need to be brought to the front and the newly received products must be displayed behind.

The products that are near the sell-by date would have to be destroyed if the supplier doesn't replace them or sold cheaply to clear them before they are out of date. Products that have gone past the sell by date need to be removed from shelves and cannot be sold resulting in losses to the outlet.

TERM 4 WEEKS 1 & 2

TOPIC. MERCHANDISING:

Customer service while merchandising

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Week 1 & 2	Customer service while merchandising	Ways to minimise disruption to customers		Field work/Interviews Presentation		Theoretical explanation Field work/Interviews Presentation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 12: Customer satisfaction while merchandising

What must staff do when merchandising so as not to make shopping difficult for customers

They must not obstruct customers. They must;

- Keep stock on trolleys
 - Keep trolleys and empty boxes and packaging close to the shelves
 - Make sure there is room for the customer to walk past
-

FIELD WORK

Visit outlets in the area or interview family friends and collect examples where staff are not implementing loss control and customer service while merchandising

Comment on learner's findings in the Learner's Workbook

TERM 4 WEEK 3**TOPIC. PROMOTIONS:**

Promotions in the industry

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 4 Weeks 3	Promotions in the industry	The concept of promotions Promote to clear aged stock, Promote to increase sales, Promote to reach new target markets, Promote to reach new customers, Promote the name of the business How wholesalers promote		Teamwork Presentation		Theoretical explanation Teamwork Presentation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 13: Promotions in the industry

Explain why businesses promote

Businesses can promote for a number of reasons

They promote;

- Their business to get it known in an area
- Increase sales
- Reach new target market
- New products
- Special prices
- Old/dated products to clear
- A service (financial services in supermarkets)

So promotion is the activities which communicate to a targeted audience a product, brand or service **with the aim of making people aware, attracting them and persuading them to buy a product or service.**

Ultimately, promotions are about improving sales.

Activity 14: Promotions by wholesalers

In teams of two discuss and decide how you would promote your wholesale business

Suggestions such as;

- Advertising in trade magazines.
- Having stalls at trade shows
- Contacting existing and potential customers by
 - Phone
 - Sending them flyers
 - Sending reps to see them
- Putting up posters in your premises so customers can see them when coming into the outlet
- Sending out samples

TERM 4 WEEKS 4 & 5

TOPIC. PROMOTIONS:

Reaching target market

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Weeks 4 & 5	Reaching target market	Reach via TV, radio, Reach via magazine, Reach via Knock n drop, Reach via outdoor advertising Electronic communication		Project Class discussion		Theoretical explanation Project	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 15: Communication to the target market

Explain how different target markets are reached using examples

There is no model answer.

Students can use any of the given examples in the text book or similar.

The following are LSM examples;

LSM 1 & 2 Mainly rural No electricity Therefore radio is best

LSM 3 & 4 Here there is more of a choice Radio, TV, Outdoor, Knock 'n Drop

LSM 5 Radio, TV, Newspapers, Magazines, Outdoor

LSM 6 - 9 Radio, TV, Newspapers, Magazines, Cinema, Outdoor

LSM 10 TV, Newspaper, Magazines, Cinema, Outdoor Now radio not as important but these people do listen to radio in their car going to and from work.

Trade magazines where a wholesaler targets a particular trade.

Find examples of advertising using different media and identify the target market

Comment on learner's project in the Learner's Workbook

TERM 4 WEEK 6 - 8**TOPIC. CASHING UP AND BALANCING:****Methods of cashing up PoS**

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources

SECTION 4:

ASSESSMENT

4.1 Assessment

Year 1 Reporting only in the term when the skill is done.

The GETC: Skills and Vocational Qualification at NQF Level 1 is a four-year Learning Programme. In year one a learner is exposed to a number of Vocational Subjects. Each subject is offered over a ten-week period (one term) in Year 1, where the learner is exposed to the basic skills required for the subject. By the end of year 1 the learner will select a minimum of one skill for the qualification.

Year 1	Formal School-Based Assessments
	Learner performance in the Term:
	Practical 75% *
	Theory 25%
Term Report	100%

4.2 Timing of formal assessment
