Term 3

Learner Book

South African Sculptures

Name and Surname: _____

Class: _____

Elements of Art

Color

The hue that is produced when light reflects off an object.
An example of a hue is red, green or yellow.

Line

A continuous mark used in a work of art.

Shape

An outlined area.

Texture

The way a surface feels or how it looks like it would feel.

Value

The quality of lightness or darkness of a color.

space

- 1) The illusion of depth on a flat surface.
- 2) An area that has height and width (2D).
- 3) An area that has height, width and depth (3D).

Form

A 3-Dimensional shape (having width, height and depth).
Some examples are a cylinder, cube and sphere.

Expressive Monkey

Principles of Design

Balance 	Balance is the visual weight of objects in your image. If the design was a scale, these elements should be balanced to make the design feel stable. • In symmetrical balance, the elements used on one side of the design are like those on the other side. • in asymmetrical balance, the sides are different but still look balanced. • In radial balance, the elements are arranged around a central point and may be similar.
Pattern 	Pattern is the organised/ uniform repeating of an object or symbol all over the work of art. Repeating the elements of art.
Proportion 	Proportion is the feeling of unity created when all parts (sizes, amounts, or number) relate well with each other. When drawing the human figure, proportion can refer to the size of the head compared to the rest of the body.
Emphasis and Contrast 	Emphasis is the part of the design that catches the viewer's attention. Usually the artist will make one area stand out by contrasting it with other areas. The area could be different in size, colour, texture, shape, etc.
Unity and Variety 	Unity is the feeling of harmony between all parts of the work of art, which creates a sense of completeness. Variety is the use of several elements of design to hold the viewer's attention and to guide the viewer's eye through and around the work of art. Too much unity is boring and too much variety is chaos, you need balance.
Rhythm 	Rhythm is created when one or more elements of design are used repeatedly to create a feeling of organized, but not uniform, movement. Rhythm creates a mood like music or dancing. To keep rhythm exciting and active, variety is essential.
Movement 	Movement is the path the viewer's eye takes through the work of art, often to focal areas. Such movement can be directed along lines, edges, shape, and colour within the work of art.

South African Sculptures

Teachers Notes:

Hand out visual diaries.

Have a look at student's old word.

Discuss with them what a Marquette is.

Look at and discuss the examples and incorporate the art and design elements and principles that are visible in each.

How the use of this make these sculptures better.

At the end of this lesson the student must be able to make a Marquette (drawing) of a sculpture.

By the end of this activity learners will be to:

- Identify and know what the use of a Marquette is.
- Identify art elements and design principles that are used in making Marquette's.

A Marquette (French word for scale model) is used to visualize and test forms and ideas without the effort of making a full-scale piece. Marquette's are small clay or wax models.

It is used to show a person what your sculpture will look like.

Have a look at the (number) different statues and sculptures of Nelson Mandela. They are all different and unique in their own way. Each one of them had a Marquette done before the final sculpture was mad.

Have a look at the following Marquette's

by Alison Murry Wells

by Marco Cianfanelli and Jeremy Rose

by Andre Prinsloo and Ruhan Janse van Vuuren

by Kobus Hattingh and Jacob Maponyane

Teachers Notes:

Hand out visual diaries.

Students will do the whole of the following activity in their visual diaries.

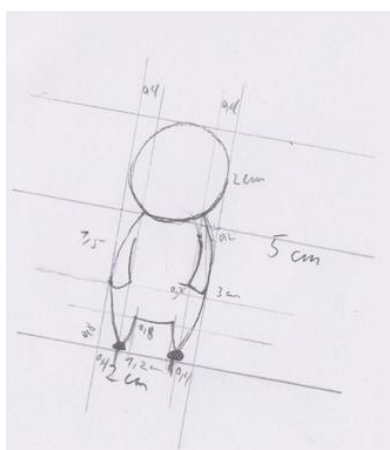

By the end of this activity learners will be able to:

- Make a Marquette for a sculpture that you designed.
- Use your visual diary for this activity.
- Pretend that you are a sculptor who must design a sculpture for the opening of a new building in your city.
- In your visual diary, identify the reason for this sculpture (place it will stand and what it will represent). Name the theme and why you have decided to use this theme.
- Also, make small sketches of possible ideas, from multiple angles.
- By the end of this lesson you must be able to make and identify a Marquette (drawing) of a sculpture.

Example

Kung Lao - Mortal Kombat

by Sebastian Stober

Teachers Notes:

Hand out visual diaries.

With the use of the work done in activity 1, students will develop their sketches and make a final Marquette.

By the end of this lesson each student must be able to make a Marquette of a sculpture of their own design.

Create in 2D

South African Sculptures

Assessment 1 Formal activity

Start Date: _____

End date: _____

By the end of this activity learners will be able to:

- Use art elements and design principles.
- Use drawing techniques to deepen and extend tone value and shading.
- Illustrate and express personal interpretation.
- Place emphasis on the observation of a still life to make a public comment.

Resources

- A3 white paper.
- Pencils 2/3B available variety soft and hard, charcoal or drawing medium that you are comfortable with.

Instructions

- You will now make the final drawing (Marquette) of your sculpture.
- You need to indicate the dimensions of the sculpture and where it will stand.
- By the end of this lesson you must be able to make a Marquette drawing with scale incorporated and be able to make a sculpture with the drawing as reference.

✓ **Rubric**

Assessment criteria	Marks allocated	Marks received
Elements of Art:		
1. Use all the art elements learned throughout Year 1-3 to the benefit of the drawing. (1 mark for each element used successfully)	7	
Principles of Design:		
1. Use all the principles of design learned throughout Year 1-3 to the benefit of the drawing. (1 mark for each principle used successfully)	7	
Drawing: Medium used was used with skill and a variety of shades and shadows are evident. (whites are white, and blacks are black and appropriate greys in between)	3	
Emphasis on observation of reference and execution.	3	
Planning was done in visual diary and a unique personal interpretation is clear and executed with thought and intent.	3	
Theme and dimensions shown in drawing.	2	
TOTAL	25	

Reflection (Use visual diary for reflection)

1. Was this activity enjoyable?
2. Did you learn something new, if yes, what?
3. What was your motivation in choosing your sculptures theme?

Teachers Notes:

Hand out visual diaries.

Students will reflect on previous activity, build on it and do planning in their visual diary.

This activity will follow and incorporate with the 2D activity.

Teachers resources at the end of Visual Literacy.

By the end of this activity each student must be able to make a 3D sculpture out of a chosen sculpting medium.

Create in 3D

South African Sculptures

Assessment 2 Formal activity

Start Date: _____

End date: _____

By the end of this activity learners will be able to:

- Use art elements and design principles.
- Apply construction and modelling techniques, good craftsmanship, unfamiliar and familiar techniques used in Year 1-3
- Consciously aware of working with shape in the construction or modelling process.

Resources

- Papier-mâché, off cut cardboard, clay, soap and any other medium the learner is confident using.
- Glue
- Craft knives.

Instructions

- Sculpt/ build the Marquette drawing you made into the finished sculpture.
- The finished sculpture should be between 15cm - 30cm.
- By the end of this activity you should be able to make a 3D sculpture out of your chosen medium.

Example

Resources

2 cups of soap flakes (you can grate your own if needed)

½ cup hot water.

Powder paint (optional - for colour)

Aluminium foil.

Mixer (hand or electric).

Instructions

Step 1

Add hot water to the soap flakes.

Be responsible when working with hot water.

Mix the mixture until stiff.

It will cool down during the mixing process.

If you want a colour, add the powder paint in this step.

wikihow.com

Step 2

Place a bowl of warm water close to where you are working.

You will need to keep dipping your hands into the bowl of warm water during the sculpting.

Step 3

Lay down foil for the surface.

This makes it easier to work with your soap sculpting medium.

wikihow.com

Step 4

Sculpt away using your fingers.

Mould and make your sculpture according to your drawings.

You can use a clay knife if you need to smooth out any parts or you could just use your fingers for most of the sculpting.

You will be able to add fine detail once the sculpture has dried, using a sculpting knife.

wikihow.com

Step 5

Once you are done, leave to dry.

Add the small details like facial features or textures when the sculpture is completely dry.

✓ **Rubric**

Assessment criteria	Marks allocated	Marks received
Elements of Art:		
2. Use all the art elements learned throughout Year 1-3 to the benefit of the drawing. (1 mark for each element used successfully)	7	
Principles of Design:		
2. Use all the principles of design learned throughout Year 1-3 to the benefit of the drawing. (1 mark for each principle used successfully)	7	
Construction: Medium used was used with skill and a variety of textures and forms. Able to manipulate the medium to the best of your sculpture.	3	
Spatial awareness: Viewable from multiple angles.	3	
Planning was done in visual diary and a finished sculpture matches the planning in general shape and dimensions.	3	
Theme and dimensions 15cm -30cm meet the brief.	2	
TOTAL	25	

Reflection (Use visual diary for reflection)

1. Have you ever used the sculpting medium you used for this activity?
2. What do you like/ dislike about using this medium?
3. Are you happy with the finished product that you made?

Teachers resource

How to make paper clay

1. **Gather your supplies.** To make paper clay, you'll need toilet paper as well as a few supplies you can find at the hardware store. This recipe results in a smooth, malleable clay you can mould over any type of prepared form. It dries into a hard surface to which you can apply paint or varnish. Here's what you need:
 - 1 roll of single ply toilet paper (not the kind with lotion, scent or colour added)
 - 1 cup premixed joint compound (do not buy it in powdered form; get "regular")
 - 3/4 cup PVA glue (white school glue)
 - 2 tablespoons mineral oil
 - 1/2 cup white flour
 - 2 large bowls
 - Electric mixer
 - Measuring cups
2. **Remove the toilet paper from the roll.** It's less messy to slip the entire roll of paper off of the cardboard roll at once, rather than unwinding the paper entirely. Place the toilet paper in one of the bowls.
3. **Fill the bowl with water.** Pour it over the toilet paper until it's completely saturated. Push the toilet paper down into the water to make sure it all gets wet.
4. **Squeeze out the toilet paper and place the pulp in a separate bowl.** Tear it off in smaller chunks (1 inch or less) so you can squeeze out as much water as possible. Place the pulpy chunks in a separate bowl so you can mix them with the other ingredients. Keep going until you've squeezed out all the toilet paper.
5. **Measure 1 1/2 cups of toilet paper pulp.** One roll of plain toilet paper typically equals a cup and a half of pulp. If your brand of toilet paper makes very small or large rolls, you might end up with less or more pulp than you need. Make more toilet paper pulp or discard the excess as needed, so you have 1 1/2 cups of pulp in the bowl.
6. **Add the remaining ingredients.** To the bowl with the pulp, add a cup of premixed joint compound, 3/4 cup white school glue, 2 tablespoons mineral oil, and 1/2 cup white flour.
 - Do not substitute these ingredients. Different types of glue, oil, flour, and so on will change the consistency of the paper clay and may not produce the results you want.
7. **Mix up the clay until smooth.** Use your electric mixer to beat the clay at a high speed. The paper fibres will break down and blend with the joint compound, glue, oil and flour until it takes on a smooth, dough-like consistency.
 - If you want a thicker clay, mix in an extra half cup of flour.
 - For a thinner consistency, add an extra half cup of glue.

How to make clay

Ingredients

Flour and Salt Clay

- 4 cups (480g) of all-purpose flour
 - 1.5 cups (417g) of salt
 - 1.5 cups (350ml) of water
1. **Mix 4 cups (480 g) of flour and 1.5 cups (417 g) of salt in a large bowl.** Add both dry ingredients to a large mixing bowl. Then, use a big plastic or wooden spoon to stir the dry ingredients until they are thoroughly mixed.
 - Make sure the flour and salt are **mixed well before you add the water** because it will be harder to redistribute one of the ingredients once the clay starts to form.
 2. **Add 1.5 cups (350 mL) of water gradually as you stir the mixture.** Pour small amounts of water into the bowl at a time, stirring between pours. Blend the mixture as well as you can before you add more water. By the time all of the water is added to the bowl, your clay should be forming a ball.
 - It should get harder to stir each time you add more water.
 3. **Knead the clay until it reaches an even consistency.** Take your clay out of the bowl and place it on a flat surface, like the kitchen counter. Use your hands to push and pull the clay to work it into a nice consistency.
 - You can also pick up your clay and throw it down on the counter to work out any air bubbles that might be present. This will help your clay stay moist longer.
 4. **Sculpt the clay as you desire.** Now that your clay is ready, you can mould it into a figure, create ornaments, or just play around. Use it as you would use a store-bought clay.
 - This kind of clay can make great keepsakes. For example, press your child's foot or hand into the dough until there is an imprint, then let the mould harden to make a gift.

Tip: Use cookie cutters or a glass to cut out shapes, if you like. Start by rolling your clay out flat using a rolling pin. Then, cut your clay into shapes using a cookie cutter or a drinking glass, which can make circles for ornaments. If you wish to hang the shapes as ornaments, poke a hole near the top of the shape using a drinking straw or a toothpick.

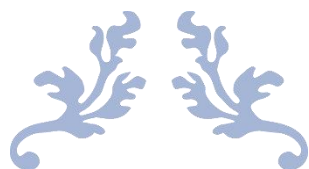

5. **Allow the clay to air dry for 2 days to preserve your model.** If you want to create a sculpture or keepsake, you'll need to let your clay dry. This kind of clay dries out quickly, but it's best to leave it untouched for at least 2 days to make sure it's fully dry.

Variation: If you need to speed up the drying process, bake your clay at 100 °C for 3 hours. If it still feels soft after 3 hours, you can put it back in the oven for up to 2 more hours.

6. **Store unused clay in an airtight container.** You can preserve your clay for a few weeks by keeping it in an airtight container. Make sure you leave the clay in the container whenever you're not playing with it, as it will dry a little bit whenever it's exposed to the air.
- For instance, you can use a plastic bag with a zipper or a Tupperware container. For extra longevity, place the clay in the refrigerator.

PERFORMING ARTS

Year 4 Term 4

CREATIVE ARTS: PERFORMING ARTS -YEAR 4

TOPIC: WARM UP & PLAY

30 minutes

The purpose of this section is to help learners understand and do vocal warmups using voiced consonants and vowels.

These kinds of warmups help with clarity of voice and diction.

Play the following videos on how to improve diction using consonants and challenge learners to do the same exercises as demonstrated in the videos and with increasing speeds. Learners need to importantly, note that making clear articulation of consonants requires them to say them *louder or longer*. Saying your consonants clearly help with both style and technique when you sing or speak. They act as a spring board for the voice and help you to keep the momentum.

<https://youtu.be/uOoYURjPB2k>

<https://youtu.be/gNPTV09L-rQ>

https://youtu.be/Hs8-5q_L8T0

<https://youtu.be/PhRKGxqG7Oo>

<https://youtu.be/HXLZPvGWNeE>

Activity 1

Why do we need to warm up our voices?

We warm up our voices so we can keep them healthy, sound our best and protect against damage. Warming up your voice will allow you to sing better and extend your range comfortably. It is absolutely necessary to always warm up before singing.

<https://www.schoolofrock.com/resources/vocals/9-best-vocal-warm-ups-for-singers>

What are some of the ways one can warmup their voices? Mention at least 9.

1. Yawn-sigh technique

For this quick vocal exercise, simply yawn (take in air) with your mouth closed. Then, exhale through your nose as if you are sighing. This will help relax your voice and improve its range.

2. Humming warm-ups

Humming is one of the best vocal warm-ups because it doesn't put a lot of strain on your vocal cords. Place the tip of your tongue behind your bottom front teeth and hum up and down the major scale while keeping your mouth closed. Each note should sound like "hmmm" — including the "h" sound is less taxing on your voice.

3. Vocal straw exercise

To perform the vocal straw exercise (also known as straw phonation), take a straw and hum through it. Start at the bottom of your range and slide up to the top slowly and evenly.

Then, hum your favourite song through the straw. You can also place the straw in a partially full glass of liquid and blow controlled bubbles in the glass.

4. Lip buzz vocal warm-up

As far as vocal warm-ups go, lip buzz (or lip trill, as it is sometimes called) is very simple. The goal is to make a motorboat sound by making your lips vibrate as you blow air through your mouth and nose. You can incorporate pitch slides as well.

5. Tongue trill exercise

The tongue trill vocal exercise is difficult for some singers. It involves curling your tongue and rolling your R's as you go through your range from low to high.

6. Jaw loosening exercises

When singing, you want to drop your jaw lower than when you are just talking. With your finger, trace back along your jawline from your chin to your ear. That curved space between your jaw and your ear is where you want to drop your jaw.

Pretend you are yawning with your mouth closed and feel where your jaw drops. Avoid just dropping your chin.

7. Two-octave pitch glide warm-up

For this easy vocal warm-up, make an “eeee” or “ohhhh” sound and gradually glide through the chromatic notes of a two-octave range. Glide up and then back down. This will transition from your chest voice to your head voice.

8. Vocal sirens exercise

Much like the pitch glide, the siren exercise takes an “oooo” sound and gradually goes from the lowest note of your range to the highest and back down, like a siren for an emergency vehicle. The sound is continuous and covers the tones between the notes.

9. Vocal slides technique

This technique is also known as a portamento, which is Italian for “the act of carrying.” Much like the siren exercise, you slide from one note to the next in your range, but you don't sing the in-between notes.

<https://www.schoolofrock.com/resources/vocals/9-best-vocal-warm-ups-for-singers>

What does diction mean?

Refers “to the style of enunciation in speaking or singing. It is the accent, inflection, intonation, and speech-sound quality manifested by an individual speaker or singer, usually judged in terms of prevailing standards of acceptability; enunciation”.

Activity 2

Learners need to be cognisant of the fact that vocal warmups go hand in hand with breathing warmups.

What breathing techniques do you know?

1. Flower and candle technique

This technique starts by one picking up a flower and must then smell it and then blow out a candle gently. See the video below for guidance

<https://youtu.be/Wc9pBYI1-Mk>

2. Bubble breathing technique

This kind of breathing technique helps with focusing and controlling the breathing out airflow. This is done by having the learner to blow bubbles or imagining to do so.

3. Amygdala breathing technique

This technique is done by breathing to the head and thus calming you down and thus you relax and sing comfortable.

4. Diaphragmic breathing

This technique is focused on the learner breathing into the diaphragm and fill up the lungs from the bottom

TOPIC: INTERPRET & PERFORM

Play the following videos on how to improve your singing using vowels. Challenge learners to do the same exercises as demonstrated in the videos and with increasing speeds.

Learners must be made aware that vowel placement is important as it aids resonance, flexibility, accuracy, pitch and extension of the vocal range. The mouth must not move a lot when one does vocal exercises with a focus on vowels.

<https://youtu.be/QREIsiCVWWI>

<https://youtu.be/q4UT7D4kieY?list=RDQREIsiCVWWI>

<https://youtu.be/QREIsiCVWWI?list=RDQREIsiCVWWI>

Activity 3

The learners need to review their term 1&2 for physical and body warmups and must combine them with vocal warmups as in the attached video below. These exercises can be done in groups and as individuals. Emphasise for learners that by now you hope they have learnt that warming up is a ritual for performers in all the arts.

They must note that it is important to realise that though the warmup rituals may seem boring and a waste of time; they are important for growth of all muscles needed for dance, speaking and singing as oxygen is for breathing. Their effect is noticeable only in the long run and only if one is consistent with them just as brushing your teeth may seem unhelpful in one instance, but critical to keep your teeth healthy over the long haul. Thus, warming up your body and voice should be done even if one is not in class.

<https://youtu.be/tnJW-8a26OA>

<https://youtu.be/8-gcnRZYxx4>

TOPIC: INTERPRET & PERFORM

2 hrs

The teacher must show learners the following linked video to use as inspiration to develop their own music and dance presentation using the knowledge of body percussion learnt in term 1 to create ambience and story.

<https://youtu.be/dGxg3aoJxQ0>

Activity 4

The learners must choose a theme, choreograph dance moves and create different sounds using body percussion using at least two traditional songs. Learners need to use dynamics in singing as in the video linked below:

<https://youtu.be/wXqV47Fsxg0>

Learners can choose two cultural songs such as “Nguban’obethe sizolala” using dynamics, call and response and harmony. Also look at songs such as “AsipheleInga” performed recently by Vusi Nova https://www.youtube.com/watch?v=g8a0_j1Gle4.

Another song having all these elements is “Plea for Africa” by John Knox Bokwe as attached in this following link: <https://youtu.be/d2q9X4Z9oOo>

Learners can even do a medley of the above-mentioned songs. You may also look at a Capella groups such as Soil for inspiration as in these linked videos:

<https://youtu.be/8UJEH4GbtQk>

<https://www.youtube.com/watch?v=FrAsP6tZLYA>

2 hrs

Learners must divide into groups of 8 or more to plan their dance routines while practicing their two cultural songs of choice to present in class. The following criteria will be used for assessment: Choreography, Fluency and discipline in terms of dance routines and rhythm and musicality, creativity and South African authenticity and fluency in music. Two marks will be added as a bonus for all participating learners

Rubric to assess dance sequence

Criteria	Level 4	Level 3	Level 2	Level 1
	8 marks	6 marks	4 marks	2 marks

Choreographic devices.	Four choreographic devices added to the sequence.	Three choreographic devices added to the sequence.	Two choreographic devices added to the sequence.	One choreographic device added to the sequence.
Quality of dance sequence.	Sequence flows well and is confidently executed.	Sequence flows and is well executed.	Sequence does not flow very well and is not well executed.	Sequence does not flow at all and is poorly executed.
Learner discipline.	Able to work independently and concentrate and focus on own development.	Mostly able to work independently and concentrate fairly well on own development.	Unable to work independently and cannot focus on own development.	Unable to work independently and is easily distracted from the task.
TOTAL MARKS				24 MARKS

Rubric to assess the music presentation

Criteria	Level 4 – 8 marks	Level 3 – 6 marks	Level 2 – 4 marks	Level 1 – 2 mark
The Songs are delivered with rhythm and sense of musicality.	Outstanding and creative use of the songs and musicality.	Good use of the songs and musicality.	Satisfactory use of the songs and musicality.	The songs and musicality not used well.
Presentation is creative and traditionally South African.	Creative use of traditional SA elements in the songs.	Good use of traditional SA elements in the songs.	Satisfactory use of traditional SA elements in the songs.	Poor use of traditional SA elements in the songs.
Presentation is polished and well prepared.	Polished and well prepared.	Fairly well rehearsed and prepared.	Satisfactory rehearsal and preparation.	Poor rehearsal and preparation.
TOTAL MARKS				24

TOTAL TASK MARKS: 50 MARKS
