Chapter 1

Visual Literacy

Dear Learner

At the end of this activity you will be able to:

- Recognize art elements and design principles in different artists' paintings
- Answer the questions in your learner's book
- Reflect on the basic types of art: Landscape, Seascape, Cityscape, Still Life, Portraits, Murals and Sculptures.
- Understand the value of a Mural and explore some opportunities to work as a Mural artist.
- Reflect on different styles of art

Please do not write in this book.

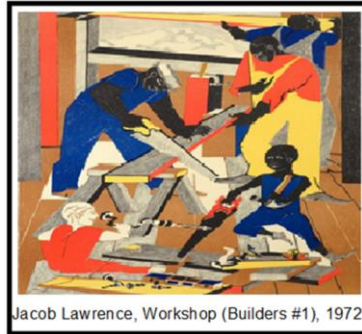

Activity 1

Your teacher will give you a hand out to complete and paste in your workbook.

Using the Elements of art and Designing principles:

Let's investigate Colour

Jacob Lawrence, Workshop (Builders #1), 1972

Please do not wright in this book.

1. Name the primary colour that Jacob Lawrence used in his Workshop painting.
2. What is the mood that a person can see in this painting?
3. What has been emphasized in this painting?

➤ Complementary Colours

- To find a pair of complementary colours, simply draw a line across from one colour to another on the colour wheel.
- Complementary colours are called that because, when placed side by side, they are pleasing to the eye.
- They create an appealing contrast in artworks. Some of the basic complementary colour pairings are red and green, purple and yellow, and orange and blue.

➤ Analogous Colours

- To find a pair of analogous colours, simply choose two colours that are touching on the colour wheel.
- Analogous colours create harmony and unity in art because they are made of the same hues. Some of the basic analogous colour pairings are blue and green, red and orange, and yellow and green.

- In this example of analogous colours in art, Vincent van Gogh uses colours next to one another on the colour wheel—blue, green, and yellow.

4. Name the cold colours that has been used.
5. Which effect does these colours give?

➤ Line

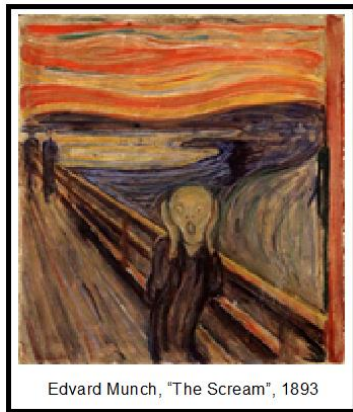

- Line is an element of art defined as the path of a point moving through space.
- There are many types of line in art. Lines may be continuous or broken, and can be any width or texture.
- The great variety of line types make them an especially useful tool in artworks.

○ Direction of line

- The direction of a line can dramatically alter an artwork.
- Diagonal lines create movement and energy.
- Horizontal and vertical lines add stability and strength to an artwork.

○ Contour lines

- Contour lines form the outside edge of a three-dimensional shape and clearly defines the area it occupies.
- Gesture lines are lines that show movement, particularly of characters in an artwork.
- **Expressive lines**
 - Lines that show feeling and emotion are called expressive lines.
 - In this example of expressive lines in art, Edvard Munch uses wavy lines in contrast with a strong straight diagonal line to convey anxiety.

Edvard Munch, "The Scream", 1893

Please do not write in this book.

Dear Learner

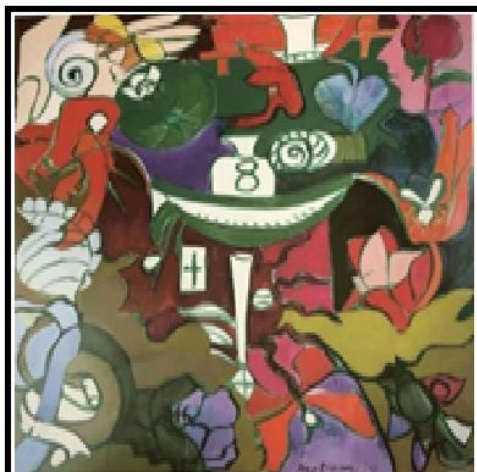

Your teacher will give you a copy to past in your workbook.

Activity 2

1. Which lines do you recognize in "The Scream"?
2. Which colours do you see?
3. How does Edvard use lines in his painting?

➤ Organic / free-form shapes

- Organic shapes are complex and imprecise.
- They give works of art a natural feeling.
- In this artwork, Grace Hartigan uses a variety of examples of organic and free-form shapes.

Grace Hartigan, The Year of the Cicada, 1970

Activity 3

1. Name the geometric shapes that you see in this painting of Grace Hartigan and where do you see it.
2. Which lines did Grace used?

➤ Tone / Value

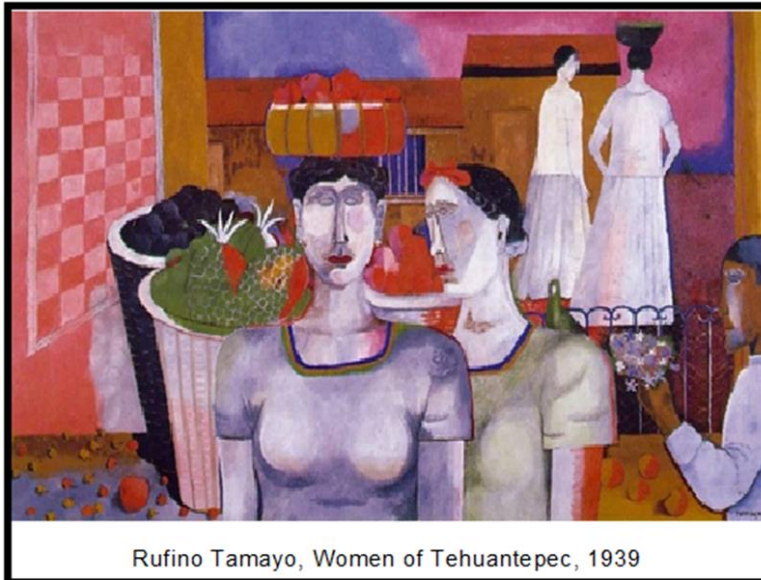

3. Describe the contrast in the painting.
4. Name the colours that has been used in the painting.

➤ Value

- Value in art refers to the lightness and darkness of colours and is often described in varying levels of contrast.
- White is the lightest value while black is the darkest.
- To create a tint of a colour, the artist adds white. To create a shade, the artist adds black.

- In this example of value in art, Rufino Tamayo adds white to a colour to create a tint in the clothes of the women, one of the baskets, and in the checkerboard on the wall.

Rufino Tamayo, Women of Tehuantepec, 1939

Activity 4

1. Explain where tonal colours have been used.
2. Why do you think the figures in this painting of Rufino Tamayo is painted lightened?

Activity 5**Artefacts**

At the end of this activity you will be able to:

- Take note of different artefacts
- Appreciate different colours in the artefacts
- Answer questions related to artefacts in your learner book
- Appreciate artefacts of different cultures

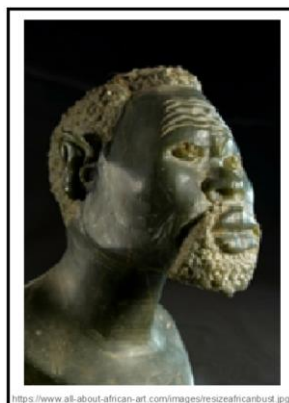

1. Where do you usually see these artefacts (painting)?
2. Name the important element and principal in this painting?

3. Why is line so important in this painting?

4. What kind of art form did the artists use?

5. What kind of artefact is this?

6. Describe the texture the artist used in this artefact.

7. How did the artist use line effectively in the sculpture?
8. Which medium did the artist use?
9. Why is the sculpture overall standing out?

10. Name the artefact in the photo.

11. How did the crafter use line?

12. Is colour important in these artefacts?

13. Which culture group do you think this artefact belongs to?

14. Why does pattern play an important role in the artefact?

Reflection on the basic Types of Art:

1. Still life

- A still life is a painting featuring an arrangement of everyday objects,
- A still life is basically "anything that does not move or is dead.
- A still life can be realistic or abstract,

2. Landscape

- It is a natural scenery such as mountains, valleys, trees, rivers, and forests, especially where the main subject is a wide view—with its elements arranged into a coherent composition.

3. Seascape

- A seascape is a painting, which is an example of marine art.
- It is an actual view of the sea itself which sometimes include some land or even a boat or ship.

4. Cityscape

- Within the context of art, a cityscape is a work that showcases aspects of cities.
- Cityscapes reflect various aspects of cities including (but not limited to) buildings, urban parks, city skylines, and city streets.

5. Portraits

- The intent of a Portrait painting is to represent a specific human subject.

6. Sculptures

- A sculpture is a three-dimensional artwork that may be created from various types of materials like stone (rock or marble) or wood, ice, clay, or by casting metal or plaster.

Activity 6

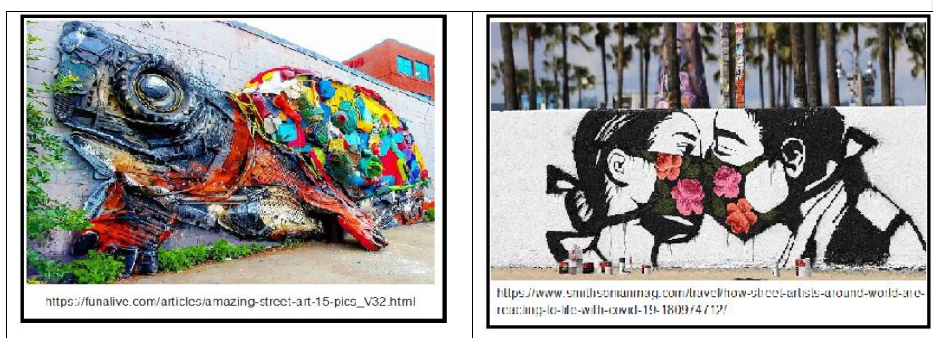

Here are some art done by different artists. Indicate in which type of art the artists did the artworks and give a brief description of each type of art:

Pictures	Names	Descriptions
		
		
		

JOB OPPORTUNITIES: MURAL ARTIST

World famous mural artists

Contemporary murals from around the world.

Advantages of being a Mural Artist

As a mural artist you could make R200- per hour painting murals, and you make the sale before you ever pick up the brush. One of the great things about a mural-painting business is that you can run it just on weekends and otherwise work it around your current schedule.

Another advantage is...

Low Start-up Costs

Depending on the types of murals you do, you could start with as little as R1000 for tools and materials. Typically, customers pay you half upfront for a job, so you can use that advance to buy your paint. To keep start-up costs low, just buy tools as necessary. For example, a step stool may be sufficient for painting bedrooms, and you can buy a ladder from your profits later, when you get jobs involving higher walls.

Contemporary Mural Artist: Banksy

Learning to Paint Murals

For certain paintings, you don't even need to be an artist. For example, paint-by-number mural kits. These patterns come with complete instructions, and as you get better you can alter the designs.

For other types of jobs, you might consider any of the many mural stencils sold online. There are some great designs for living rooms.

Divide the design into squares and then draw the same number of squares on the wall. Fill in the drawing in the squares and then paint the drawing.

A mural painting workshop can provide training and a certificate, but you can also learn from mural painting videos on YouTube. If you are already painting on canvas, this might be all you need to get started on wall murals. Practice freehand work on the walls at home. (Get permission first!!!)

David Alfaro Siqueiros

<https://www.robertharding.com/preview/817-178993/mural-painting-david-alfaro-siqueiros-ciudad-universitaria-ciudad/>

Mural Artist: David Alfaro Siqueiros from Mexico (1896 – 1974)

Where to Sell Your Murals

Once you develop enough word-of-mouth exposure, clients may come to you. In the meantime, look for a good place to put a mural, and ask the owner if she's interested. Here are some of the places murals are found:

- Old buildings
- Children's bedrooms
- Living rooms
- Bars
- Restaurants
- Garages
- Garden sheds
- Schools
- Libraries
- Airports
- Government departments

Eduardo Kobra

<https://findmaza.com/artwork/660b1c6a>

Judy Baca

<https://horizonskyline.net/au/great-wall-of-la/>

Contemporary Mural Artist: Eduardo Kobra from Brazil and Judy Baca from the USA.

Surfaces to Paint on

Most of the time you'll paint walls (inside or outside), but you can also find murals on ceilings, floors and even roofs. For example a painted mural / logo on the roof of a building, visible from other buildings.

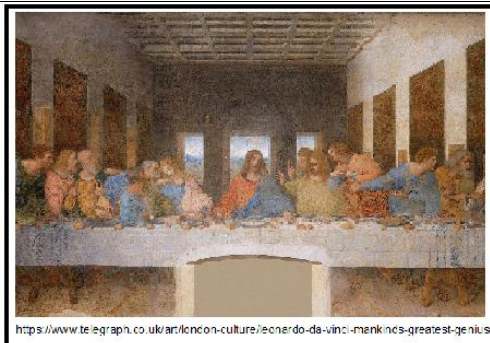

Michelangelo

<https://www.widewalls.ch/magazine/michelangelo-artwork>

Leonardo da Vinci

<https://www.telegraph.co.uk/art/london-culture/leonardo-da-vinci-mankinds-greatest-genius/>

Historical Mural Art from around 1400 – 1500

TIPS FROM A "PRO"

1. Got to get good. You have to practice and develop your skill as a mural artist.
2. Focus on your online persona... Facebook, Instagram, You Tube and other social media. Post your art online. Keep your private photos and posts on a separate account.
3. Get your first mural by any means. Once you've started more work will follow and now you have an example of your work to show prospective customers.
4. Connect to your nearest big city and interact with the art scene.... Often references and commissions will come out of this interaction.
5. Be professional. Be dependable. Make proper fore-sketches and preparations. Communicate via e-mail for record purposes. Give proposals, price and time lines.

(Watch the artist TEN HUNDRED on You Tube. Search for: 5 tips on how to get mural jobs posted by Ten Hundred and search Mural ideas on Pinterest)

Contemporary Mural Art from South Africa

How to Become a Mural Artist

by Irene A. Blake

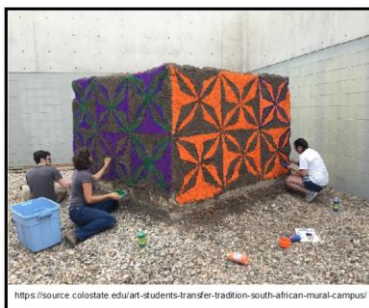

A mural artist produces a work of functional or decorative design, such as abstracts, company logos, advertisements, landscapes or portraits, on walls or ceilings. Muralists are often fine art painters and tile artists.

1. Study art history and art basics, such as composition, perspective and colour usage. Although you do not need a high school diploma to become a mural artist. It also will provide you with some basic knowledge and skills mural artists need in order to succeed.
2. Pursue advanced academic study of artists and types of fine art or mural art that interest you. Study online or in a library.
3. Acquire hands-on experience as a mural artist by working as a helper, intern or apprentice under a professional mural painter, or a tile artist or setter who has experience designing tile murals. Use the experience to learn the tricks of the trade, such as ways to estimate the quantity and cost of materials needed for a project, and to gain job hunting or business start-up advice.
4. Practice sketching mural art designs, or creating them using computer software, to help you improve your skills and find your style. Additionally, practice with various tools and materials commonly used in mural art. For example, you might practice working with indoor and outdoor paints; or practice cutting and shaping tile or attaching tiles to different types of wall or ceiling surfaces.
5. Create offline and online portfolios that feature your mural designs and, if possible, videos of murals you have created or murals you have worked on with professional muralists. Show off your best work, as employers and potential clients want to see proof of your artistic ability and skills even if you don't have paid experience.
6. Search for art jobs via online job boards and networking sites, such as LinkedIn. Offer your services as a muralist to decision makers at organizations and business that often use murals, such as local museums, hospitals, zoos, theatres, advertising agencies, construction companies and restaurants.

Tips

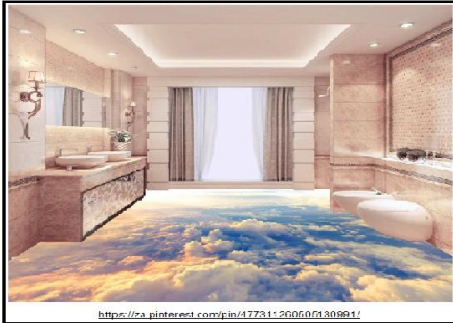

- If you plan to work as a self-employed muralist, take business classes to help you learn record keeping or tax filing.
- If your budget allows, advertise in local newspapers, on billboards and on the side of one or more buildings. If you advertise on the side of the building, create the advertisement yourself to show off your work to the public.

More Contemporary Mural Art from South Africa

Examples of Mural Art for a lounge or bedroom

Dear learner

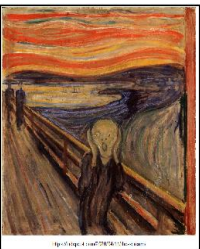

Your teacher will give you a copy of the work to past in your workbook.

Please do not write in this book,

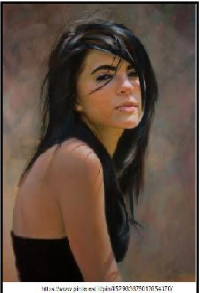

Activity 7 CAREERS IN MURAL ART

1. Name 2 mural artists from the Renaissance era.
2. Name 3 advantages of being a mural artist.
3. When learning to paint murals one can use 4 different methods. Name all 4 the methods.
4. Name at least 10 places where one can sell a mural:
5. What surfaces can a mural be painted on?
6. You have been a mural artist for a while and a newcomer to the scene asks you for tips on how to become a professional mural artist. Write a paragraph explaining to the newcomer some of the tips of the trade.
7. Name 6 factors that can help you become a better mural artist:
8. You have been commissioned to make a mural for a teenagers' room. Make a drawing to show your proposal for the wall in the space below. Please use full colour.

Styles of Art (Reflect on Year 3)

Pictures	Styles	Descriptions
1 	1. Pop Art	1. Pop art can be any, every day item that is drawn together in a colourful way. Pop Art is short for Popular Art. It is inspired by comic strips, advertising, and popular entertainment.
2 	2. Abstract	2. Abstract artists do not try to show people, animals, or places exactly as they appear in the real world. They mainly use colour and shape in their paintings to show emotions or just to have fun with Art.
3 	3. Expressionism	3. In Expressionist Art, the artists are more concerned with having their paintings express a feeling than in making the painting look exactly like the object they were painting. They mostly use colour to set a mood or to express a feeling.
4 	4. Impressionism	4. The paintings are usually in bold colours and do not have a lot of detail. The paint is basically just blobbed down in a quick manner, but if you look from a distance, it will give the impression of the object the artist is creating.

5		5. Cubism	5. Cubism is modern art. The paintings are not supposed to look real. The artist uses geometric shapes to show what he is trying to paint. Cubism was the beginning of the Abstract style.
6		6. Surrealism	6. Surrealistic paintings are generally based on dreams. Their paintings are filled with familiar objects which are painted to look strange. They hope their odd paintings would make people look at things in a different way.
7		7. Baroque	7. The Baroque style is characterized by exaggerated motion and clear detail used to produce drama and grandeur in sculpture, painting, architecture, literature, dance, and music. Most of the time it has a religious theme with angels in the scenes.
8		8. Assemblage	8. Assemblage is an artistic form that consists of three-dimensional elements placed in a way to stand out. It is similar to collage, a two-dimensional medium.
9		9. Pointillism	9. In Pointillism, the artist uses small dots or strokes of paint to make up the pictures. From far away, these dots blend together to form the picture and give the impression of different colours as they blend together.

10		10. Realism	10. Realism is the art style most people regard as "real art", where the subject of the painting looks very much like it appears in real life.

Abstract art

Dear Learner

At the end of this activity you will be able to:

- Recognize art elements and design principals in different artists paintings
- Answer the questions in your learner's book

Different types of Abstract art

- The Impressionists were excited by contemporary developments in colour theory which helped their search for a more exact analysis of the effects of colour and light in nature. They abandoned the conventional idea that the shadow of an object was made up from its colour with some brown or black added. Instead, they enriched their colours with the idea that the shadow of an object is broken up with dashes of its complementary colour. For example, in an Impressionist painting the shadow on an orange may have some strokes of blue painted into it to increase its vitality.
- Impressionism was a style of painting that used a more scientific analysis of colour to capture the effects of light in nature.
- The Impressionists painted with small strokes of pure colours which mixed in the eye of the spectator when viewed from a distance.
- The Impressionists were the first group of artists to embrace painting 'en plein air' (painting outside).
- The Impressionists had to paint quickly to capture the atmosphere of a particular time of day or the effects of different weather conditions on the landscape.
- The speed of the Impressionists' painting technique forced them to sacrifice accurate line and detail in favour of atmospheric effect.
- The subject most suited to the Impressionist technique was landscape, but they also painted portraits, still life's and figure compositions.
- Impressionism is now seen as the first movement in modern art and had a huge influence on the development of art in the 20th century.
- Surrealism
- Surrealism was the 20th century art movement that sought to liberate creativity from the limitations of rational thought.
- Surrealism explored the hidden depths of the 'unconscious mind'.
- The interpretation of dreams was a source of inspiration for many Surrealist artists.

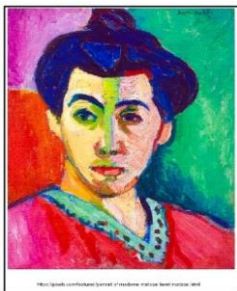

- Salvador Dali was the master of hallucinatory dreamscapes.
- This illusionistic realism could subvert your senses and open your mind to the irrational.
- There is long list of Surrealist techniques that were devised to tap into the 'unconscious mind' and most of the artists explored a range of these in their work.
- Fauvism was a style of painting developed in France at the beginning of the 20th century by Henri Matisse and André Derain. The artists who painted in this style were known as 'Les Fauves' (the wild beasts)
- Les Fauves believed that colour should be used to express the artist's feelings about a subject, rather than simply to describe what it looks like.
- Fauvist paintings have two main characteristics: simplified drawing and exaggerated colour.
- Cubism was a revolutionary new approach to representing reality invented in around 1907–08 by artists Pablo Picasso and Georges Braque.
- They brought different views of subjects (usually objects or figures) together in the same picture, resulting in paintings that appear fragmented and abstracted.

Activity 9

RENÉ MAGRITTE, The Son of Man, 1964

1. Which abstract style did René Magritte use in this painting?
2. What makes this painting of René Magritte not realistic?

Henri Matisse, Madame Matisse, 1905

3. Which abstract style did Henri Matisse use in this painting?

Chapter 2

Creating in 2D

At the end of these lessons you need to know how to:

- Be able to apply proportion, colour, tone, texture and line into a portrait.
- Be able to experiment with art elements and design principles in various aspects of a portrait.
- Draw different aspects of a portrait: eyes, nose, ears, hair, mouth and the shape of the face.
- Be able to recognize proportion in your art piece you created.
- Research portraits to gather information on how you want to create a Portrait.
- Do a Pop Art Mona Lisa painting.
- Apply the practiced skills to create your own portrait.
- Working with paint and different paint brushes to create a portrait.

i A Portrait:

- A portrait is an artistic representation of a person, in which the face and its expression is predominant.
- The intent is to display the likeness, personality, and even the mood of the person.
- Before the invention of photography, a painted, or drawn portrait was the only way to record the appearance of someone.
- But portraits have always been more than just a record.
- They have been used to show the power, importance, virtue, beauty, wealth, taste, learning or other qualities of the sitter.

Activity 10

Look at these two portraits:

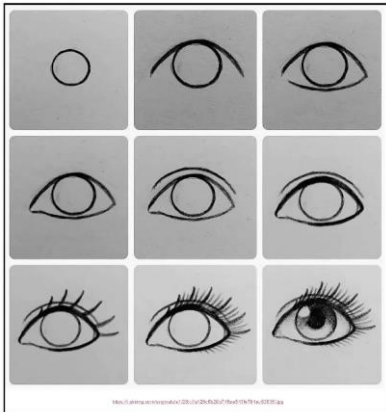

Answer the following questions in your learner book before you start on your portrait.

1. What do these two paintings have in common?
2. Which important role does the colour present in the second painting? Name 2

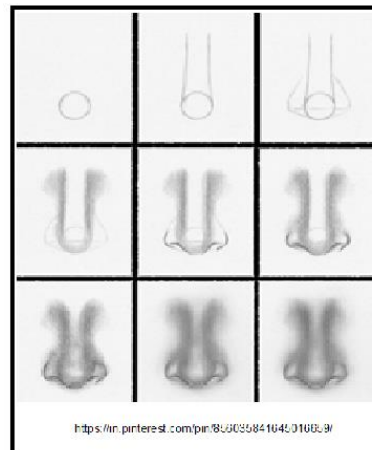

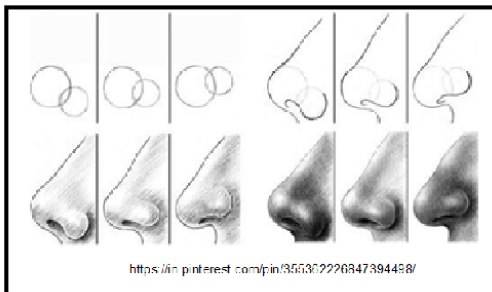

Research:

Look in magazines or collect photos of people where you can see the features of the face clearly. Study the eyes, nose, mouth, ears and the shape of the faces intently. Look for different tones (from where the light is falling on the faces) and lines. Keep it as reference for later. Practise the following features:

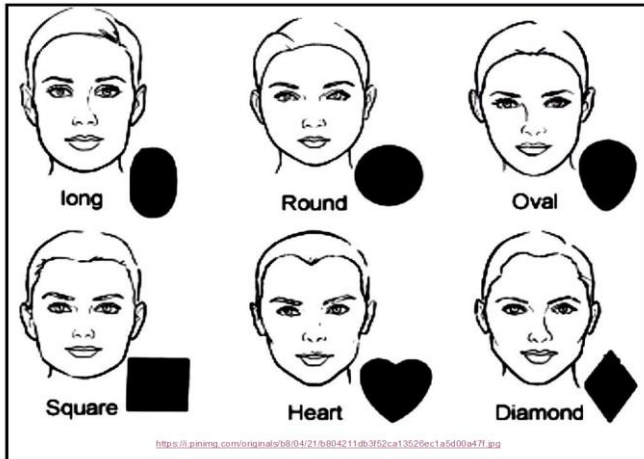

Eyes:

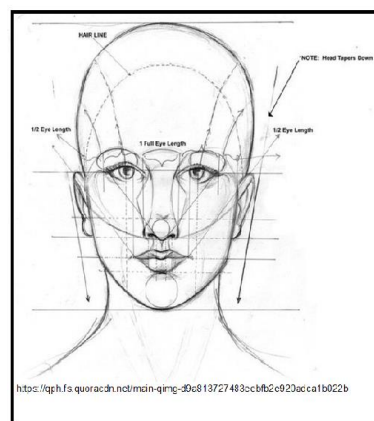

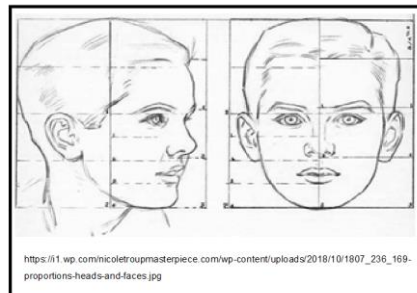

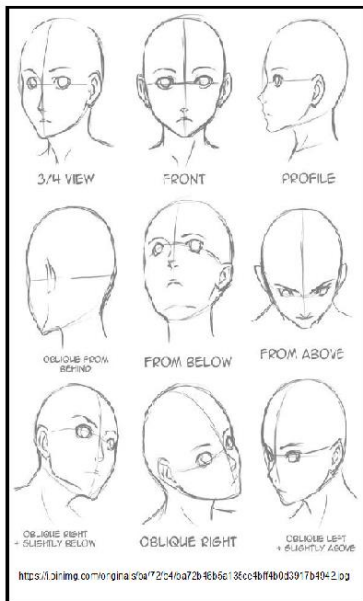

Nose:

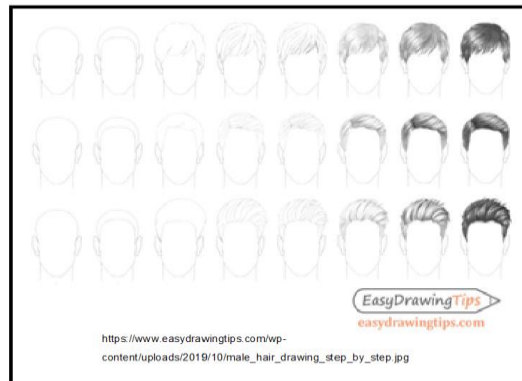

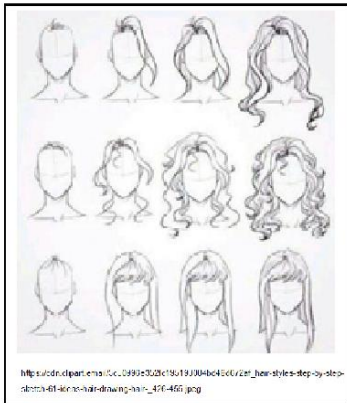

Shapes of the face:

Views:

Hair:**Dear Learner**

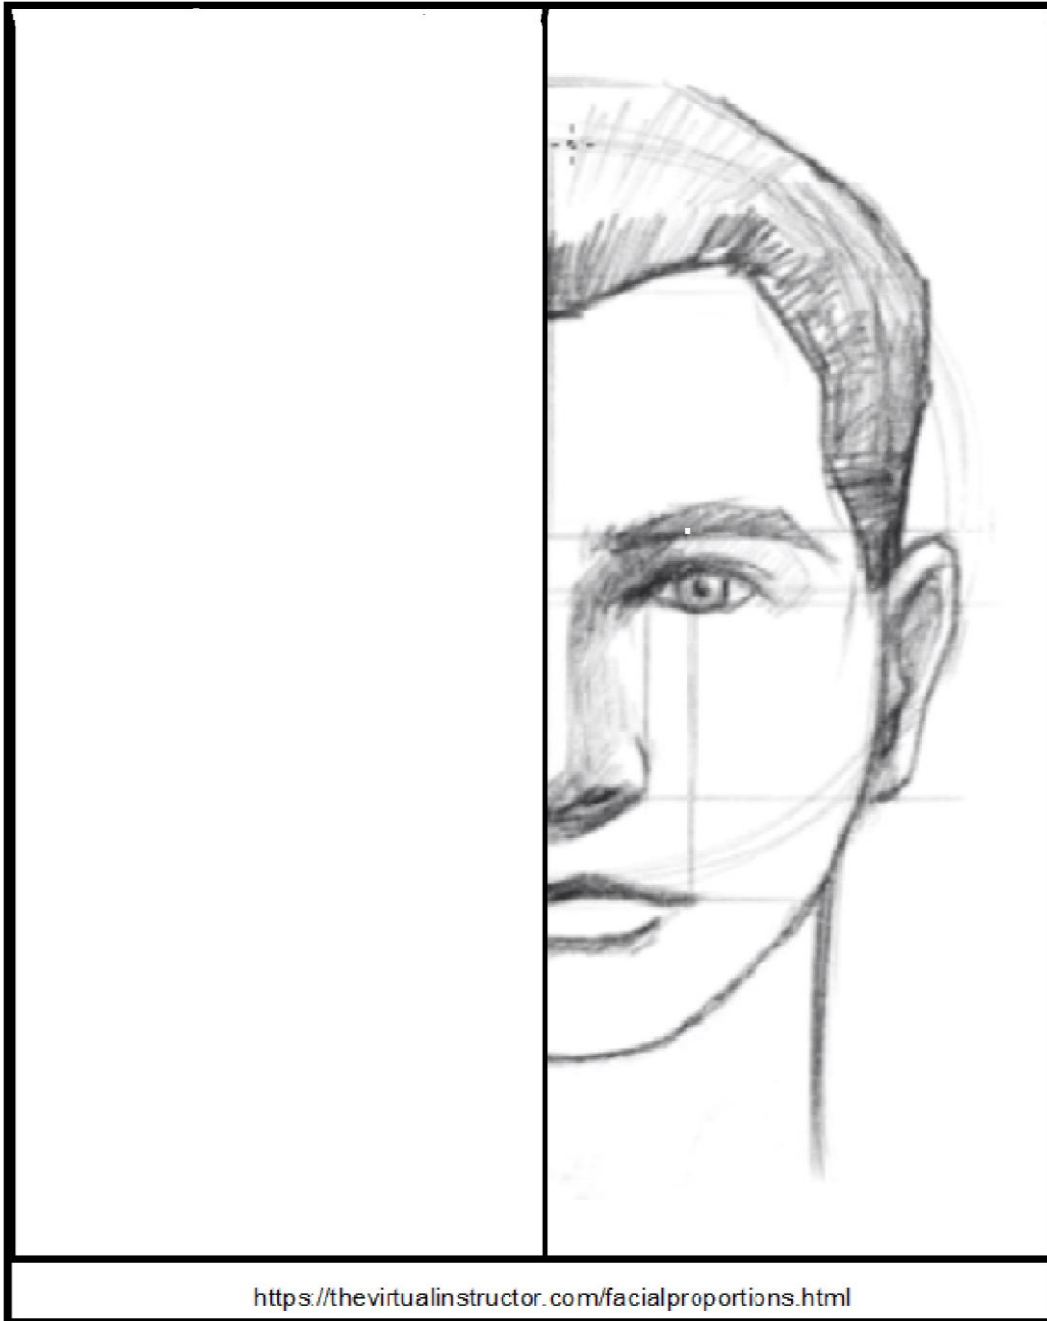

Your Teacher will give you a copy to paste in your visual diary. Copy the face on the other side to complete the picture.

Activity 11**Proportion**

Proportion is the principle of art that refers to relative size.

Most, if not all of the principles of art deal with how the elements of art are arranged in a work of art. Copy the face on the other side to complete the picture:

Please do not draw in this book.

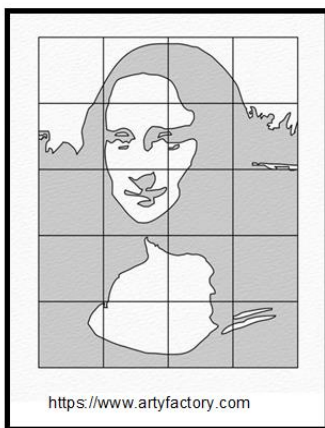

<https://thevirtualinstructor.com/facialproportions.html>

Dear Learner

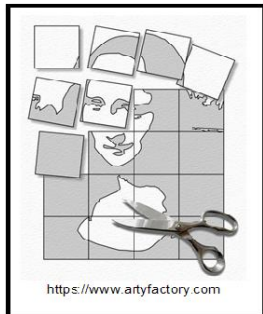

Your teacher will give you a copy of the template to make your puzzle. Work in groups of 2-4. Use colour pencils, paint, ect to colour you're your puzzle sections.

Activity 12**Creating a Puzzle****Step 1 - Creating a Template**

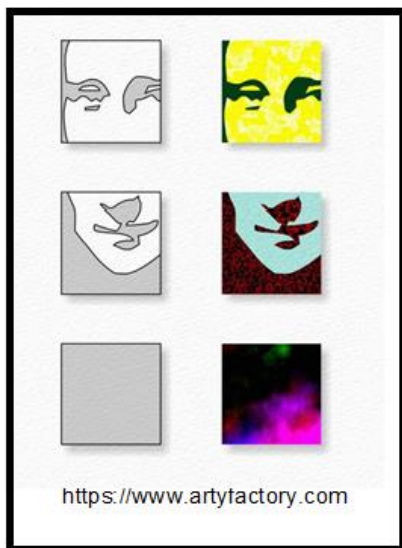

You start the project by creating a template image.

**Step 2****Cutting up the Template**

Next, you cut out the individual square sections of the template drawing and distribute them among the group.

Step 3 - Colouring the Sections

Each person then takes their individual template section and creates a colour version.

Note: It is important to use bright colours, patterns or textures for the light tones, and dark colours, patterns or textures for the dark tones. Sticking to this rule will help you to keep a unified tone throughout the work and keep the image recognizable.

The completed portrait can be a product of either design or change:

- Instructions or restrictions on the use of media or choice of colours can be agreed by the group in advance to creatively control the design of the final work.
- However, the change effects of random combinations of colour, pattern and texture can also produce unpredictably good results.

Step 4 - Reconstructing the Image

When all the individual sections are completed, they are arranged to reconstruct a colourful and surprising interpretation of the portrait.

Step 5 - The Final Image

Dear Learner

Choose a face from a magazine or book and create your own template to make a A4 Pop Art artwork. Your teacher will provide you with A4 paper or you can do it in your visual diary. Make use of Primary and Secondary colours, Texture, Tone and Patterns.

Activity 13

2D Sample lesson

Pop Art

Step 1

- 1.1 Choose a face that you would like to create.
- 1.2 The following lesson is based on the Mona Lisa but you must use your own picture as it is described with the help of the teacher.

Start with a photocopy or photograph of the image you wish to use for your Pop Art Portrait.

For this demonstration we chose the "Mona Lisa" created by Leonardo da Vinci.

Use black and white images.

These images need to have a strong contrast between their areas of dark and light.

The proportions of your image need to be divided into squares.

Step 2

Outline the Areas of Dark and Light

Draw an outline to simplify and separate the main areas of dark and light in the image. It is best to keep the outline strong and simple without too much detail.

Step 3

Trace and Transfer

Trace and transfer your outline drawing onto a fresh sheet of paper. You can do this by using tracing paper or a lightbox.

Step 4

Adding Tone

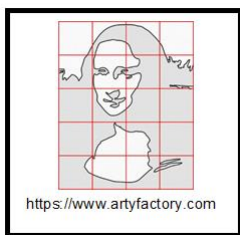

Shade in the dark areas of your drawing to re-establish the basic tones of the original portrait. This will help you when it comes to selecting appropriate tones, colours, patterns and textures for your image.

Step 5

Making a template Image:

Finally, draw a square grid over the image. This will help you transfer your drawing section by section to any scale that you require. On completion you can erase the grid lines.

Your drawing is now ready to use as a template to produce a range of Pop Art Portraits using colour, tone, pattern and texture as illustrated in our examples below.

Samples on how our lady could look like:

Using Primary and secondary colours:

In this example, our Pop Art Portrait was created by colouring the template drawing with primary and secondary colours. Try to select the brighter colours for the lightest tones and darker colours for the darkest tones. If you are not careful in balancing the tones and colours, the image may lose some impact or even look like a negative.

Using Patterns:

In this example, our Pop Art Portrait was created by filling sections of the template drawing with different patterns. The central area of the face and the small details were filled with single colours to make them more visible against the strong pattern. Too much pattern has the effect of camouflaging the image. Care has also been taken over the tonal composition, being careful to select brighter patterns and colours for the lighter tones.

Using Tone:

In this example, our Pop Art Portrait was created by filling marked sections of the template drawing with graduated colours. Using a soft colour medium like pastels which you can blend with a tissue is a good dry method of creating graduated colours.

Using Texture:

In this example, our Pop Art Portrait was created by shading the different tonal sections of the work with fluid transparent dyes.

- First, light colours were applied at random over the whole drawing and allowed to bleed together.
- Next, the light areas of tone were masked.
- Finally, darker transparent colours were applied to the exposed areas resulting in a flowing watercolour effect.

**Formal assessment****2D Portrait**

You will receive a canvas to create your end product.

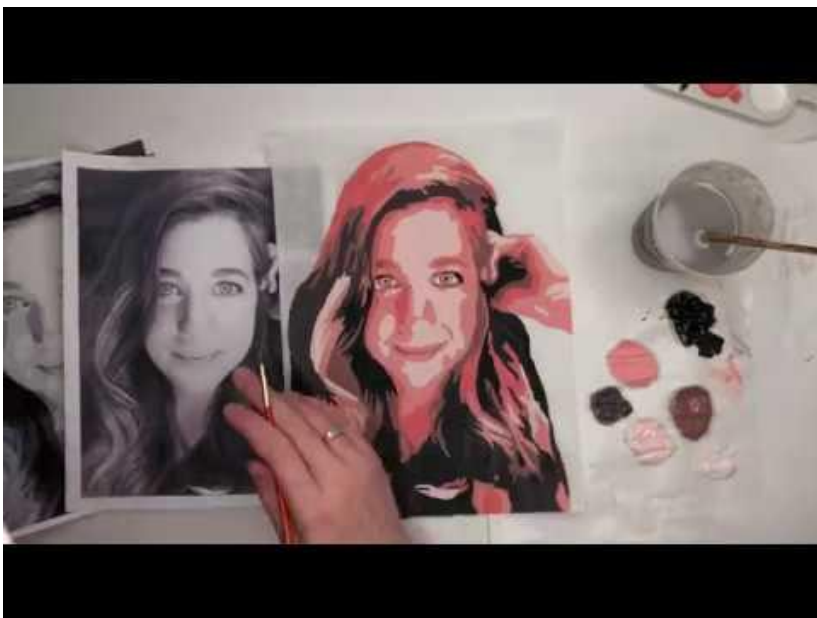

Materials needed:

- A3 white canvas board
- Various sizes and kinds of paint brushes
- A container for washing your paintbrushes
- Paper towel or old rag that you can wipe your paintbrushes clean with.
- Primary colour paints
- White and black paint
- A piece of paper to mix colours on or a pallet or a plastic lid.

Instructions: You have had lots of practice to do a portrait. Now it is time to paint your very own portrait. You must do it in the Pop Art style. It needs to be your own work and not a copy of somebody else's work. Be creative and have fun.

Watch this YouTube video on "How to do a Pop Art Portrait painting"

Formal Assessment

2D Portrait

Rubric

Requirements	Mark allocation	Learners marks	Tick list
Planning on canvas: learner drew on the canvas light with a pencil or chalk	2		
Background: The background is done creatively	2		
Background tints and shades were done to indicate where the light is coming from	2		
Learner used the pallet to mix the paints and did not waste paint.	2		
Colour: Primary, Secondary and Tertiary colours were used	9		
Line: Clear lining techniques were used to create the portrait	4		
Texture: Several types of textures were placed in the painting	2		
Tints and shading techniques were clearly defined and noticeable	4		
Proportion is correct: eyes, nose mouth, face	4		
Brushstrokes: Different kinds of paint brushing techniques and paintbrushes were used for effects.	2		
Time: Used time well and completed the painting	2		
TOTAL	35		

Chapter 3

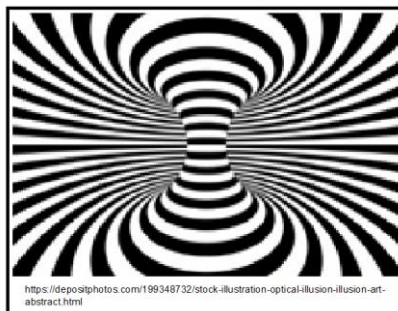

Creating in 3D

At the end of these lessons you will be able to:

- Do an exercise to show optical illusion – contour drawings.
- Create a page in your visual art diary where you will collate ideas on how to do an Assemblage art product.
- Make a 3D art piece in the Assemblage style that would sell on a market.
- Collect all the materials that you will need to create your artwork.

What is an Optical Illusion?

Optical illusions can use colour, light and patterns to create images that can be deceptive or misleading to our brains. The information gathered by the eye is processed by the brain, creating a perception that in reality, does not match the true image. Perception refers to the interpretation of what we take in through our eyes. Optical illusions occur because our brain is trying to interpret what we see and make sense of the world around us. Optical illusions simply trick our brains into seeing things which may or may not be real.

Contour drawings:

Activity 14

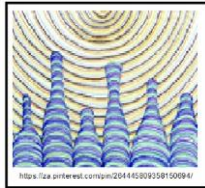

Learning Objectives:

Upon completion of this lesson, students will be able to:

- explain what contour drawing is
- compare and contrast the two techniques for creating contour drawings
- create two contour drawings

3D Paper contour drawings

Look at these contour drawings:

Discussion Questions

- What are the appeals of contour drawing for the artist?
- How are contour drawings different from other types of drawings?
- Sharp point crayon. (colouring pencils)

Dear Learner

Make two contour drawings using pencils and colour pencils in your visual diary.

Drawing a Hand:

Objectives

- Define what Optical illusion is
- Review the line quality
- Use line to create the illusion of depth
- Identify complementary colours

Materials :

White drawing paper

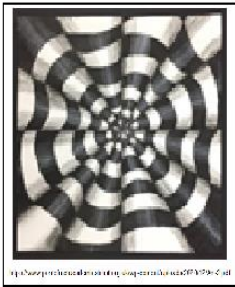

Pencil

Markers

Instructions

1. Using a pencil, trace hand and part of arm at the edge of the paper
 2. Choose a pair of complementary coloured markers + black
 3. Use these 3 colours of markers to draw a straight line from edge of the paper to the contour line of the hand. From that point, draw the line curved to make the hand look as if it is popping out and then return to a straight line on the other side.
- The colours could be drawn in a pattern or random

3D Paper Cone Drawings:

Step 1

Draw six straight lines that intersect at the same spot.

You need to do this drawings with a pencil and ruler.

Create 12 slices on your A4 paper

Step 2

Learners draw a series of concentric (like in a circle) curved lines alternating the direction of the curve within each slice.

Step 3

Learners label every other slice with a “B” and reduces any potential mistakes while using markers.

Step 4

After step 3 learners start to trace over the smallest slices labelled “B” in the centre using an extra fine point marker and fill in the space. (This can also be done in coloured pencil)

The colours must be a primary and secondary complementing each other if colour is used.

As the area gets larger, you need to work with a fine point marker or a very sharp pencil.

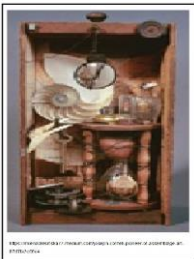

3D Formal Activity

Assemblage / Mixed Media:

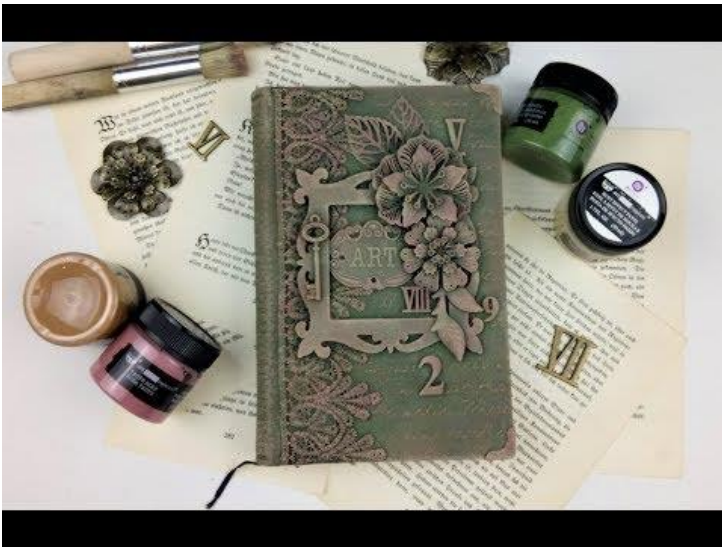

Assemblage is an artistic form or medium usually created on a defined foundation that consists of three-dimensional elements projecting out of or from the foundation. It is similar to collage, a two-dimensional medium. It is part of the visual arts, and it typically uses found objects, but is not limited to these materials.

Watch the following YouTube Videos of how to do Assemblage / Mixed Media artworks:

Formal assessment

3D Assemblage Art

You will need to collect all the materials that you will need to create your end product.

Materials needed:

- A base for your artwork. (canvas / box / old book / wooden planks / etc.)
- All materials that you will need to assemble your artwork.
- Various sizes and kinds of paint brushes.
- Art gel medium.
- Paint.
- Glue.
- Varnish / Sealer

Instructions:

- Prepare your base to your preferred method.
- Get all the bits and pieces that you are going to use.
- Pack it out to see how you want to assemble it.
- If you are satisfied, paste it on the base.
- Paint and highlight it in any way you want.
- Varnish or seal the end product.
- Make sure your end result is neatly rounded off and that it is a product that will sell on a market.
- Have fun and create something special.

Formal assessment 3D Assemblage Art

Criteria	Excellent 10-8 pts	Good 7-5 pts	Fair 4-3 pts	Poor 2-1 pts
Creativity	Entirely original design, no element is an exact copy of designs seen in the source material	Most of the product's elements are unique, but 1 element may be copied from the source.	Some aspects of the product are unique, but several elements are copied from source or other classmates.	The product is an exact copy of the source material or one made by another student. No original design was put into the product.
Details	The product details are all easily viewed and identifiable from across the classroom.	Most of the product details are easily viewed and identifiable from across the classroom.	Most of the product details are easily identified when the product is seen close-up.	Many of the product details are too small even when viewed close-up or are not clear.
Attractiveness/ Craftsmanship	The product shows that the creator took great pride in his/her work. The design and construction look carefully planned. The item is neat (free of unwanted bumps, drips, marks, and tears).	The product shows that the creator took pride in his/her work. The design and construction look planned. The item has a few flaws (unwanted bumps, drips, marks, tears), but these do not detract from the overall look.	The design and construction were planned. The item has several flaws (unwanted bumps, drips, marks, tears), that detract from the overall look.	The product looks thrown together at the last minute. It appears that little design or planning was done. Craftsmanship is poor

Time and Effort	Class time was used wisely. Much time and effort went into the planning and design of the product. It is clear the student worked at home as well as at school.	Class time was used wisely. Student could have put in more time and effort at home.	Class time was not always used wisely, but student did do some additional work at home.	Class time was not used wisely and the student put in no additional effort.
