Questuion:1

1. Name three types of Blowers.

1.1 _____

1.2 _____

1.3 _____

2. Names three parts that accumulates dust and debris most

2.1 _____

2.2 _____

2.3 _____

3. Name two kinds of power that are used in Blowers.

3.1 _____

3.2 _____

4. Which materials are used to clean or wipe dirt on dust coverings?

4.1 _____

4.2 _____

Safety clean and maintenance on a Lawn Mower

Types Lawn Mowers

1. Electric lawn mowers
2. Gas powered lawn mowers (2 and 4 stroke engines)

Maintenance

Step 1 : Empty the gas tank.

- Unused gas left get stale over the winter period inviting rust.

Step 2 : Disconnect the spark plug

- To prevent the lawn mower from kick-starting accidentally.

Step 3 : Remove the blade, clean the under side of the mower.

- To make it easier to change the oil and clean the other side of the lawn mower.

Step 4 : If it's a 4 stroke engine, change the oil.

- .

Step 5 : Clean the undercarriage.

- Use putty knife and wire brush to scrape off grass and mud cakes on the mower deck.

Step 6 : Change the air filter.

- A dirty filter keeps the engine from burning gas efficiently .

Step 7 : Replace the spark plug.

- A new spark plug will perform better and ensures a smooth start come spring,

Step 8 : Refill the gas tank and start the mower

- For 4 stroke engine you just refill the gas but for 2 stroke you mix with gas or fuel

2. Demonstration

Question:1

1.Name two types of lawn mowers.

1.1 _____

1.2 _____

2. Give the name of the liquid that has to be mixed with 2 stroke oil.

2.1 _____

3. Why the dirty air filter is removed?

3.1 _____

4. Name two tools that are used to scrape off grass and mud caked on the decker of a mower.

4.1 _____

4.2 _____

5. Why is the disconnection of spark plug is essential during maintenance?

5.1 _____

6. In which season of the year is the lawn mower serviced?

6.1 _____

7.Why is the gas tank made empty during maintenance?

7.1 _____

8. What is the purpose of replacing spark plug?

8.1 _____

Cleaning And Maintain Body Of A Vehicle

Exterior Maintenance

Step 1 : Organise cleaning materials.

Step 2 : Fill up one of the buckets with soap water.

Stage 3 : Apply solution to the car.

Stage 4 : Rinse off bubbles

Stage 5 : Buff the car dry.

Stage 6 : Apply polish for extra shine and protection.
