Term 3 Week 4	50
Term 3 Week 5	52
Term 3 Week 6 - 8	54
Term 4 is given up to revision and preparing the learners for final assessment	
SECTION 4: ASSESSMENT	58

SECTION 1:

INTRODUCTION:

1. Requirements for Wholesale and Retail as a subject

1.1. Time Allocation

The total number of hours allocated for the subject in a five-day cycle is 13½ hours. Sufficient time must be allocated in the school timetable for the practical work required to be done.

1.2. Resources

1.2.1. Human resources

Wholesale and Retail requires a trained subject specialist. It is preferred that the teacher offering Wholesale and Retail has attended training in this subject. Industry related experience would be an asset. Teachers must build a relationship with managers of both small and large Wholesale and Retail outlets in the area and regularly visit them to keep abreast with the industry

If possible teachers should ask to shadow workers on the floor and in the receiving and cash office areas to get a better understanding of what happens at this level of operation.

Wholesale and Retail teachers are required to:

- Teach the subject content with confidence and flair
- Interact with learners in a relaxed but firm manner
- Manage the SIM (Simulated shop) store fixtures and fittings and stock and conduct stock taking and inventory (where applicable)
- Manage the budget
- Manage the teaching environment
- Plan for practical work
- Plan for theory lessons
- Arrange for learners to visit outlets within the area. This might be able to be done through learners doing this on the own if outlets are within the area and able to be

accessed through public transport otherwise the school should provide transport and arrange outings

- Maintain and prepare the Sim store for all the practical exercises (where applicable)
- Ensure learner safety
- Carry out School Based Assessment (SBA)
- Implement innovative methods to keep the subject interesting
- Be self-motivated to keep her/himself abreast of the latest developments in the industry
- Regularly visit wholesalers and retailers and discuss with management any new innovation within the industry
- Provide students with letters stating they are wholesale and retail students so when they visit outlets to observe and talk to management they will be accepted more readily.
- Where possible and where allowed (taking into account the security requirements of businesses) learners should be encouraged to visit outlets and watch the staff at work to better understand the theory they learn in the classroom.
- In schools that have no, or limited access to computers and the internet, teachers should visit outlets and take photographs that can be used to illustrate concepts.

1.2.2. Learner Resources:

- Text/ resource book
- The internet (where available)
- Pen/pencils
- Wholesalers/retailers in the area
- Magazines.
- Newspapers
- Internet pictures or photographs taken by the teacher
- Calculators

2. Infrastructure, equipment and finances

Schools must ensure that teachers have the necessary infra-structure, equipment and financial resources for quality teaching and learning.

2.1. Infrastructure

- Any school wishing to offer Wholesale and Retail as a subject should try to set up a room to look and operate as a retail store. The requirements of this SIM room, as it is referred to in this document, are as follows;
- The school should try partner with retailers in the area and that will help then get second hand equipment, suppliers promotional stands and ticketing and “stock”
- Schools should ask their local retailers to get empty boxes, cans, bags etc of stock from their suppliers for the shop
- A back area separated from the “shop” that can be used as a stockroom must be made available
- There must be sufficient “stock” to fill the shelves. It is advisable that this stock be empty bottles, boxes, cans, bags etc collected by students and staff. Real stock is prone to theft.
- The “stock” should cover a number of different departments/categories such as (examples only)
 - Tea/coffee/sugar containers
 - Pet food containers
 - Cool drink bottles/cans
 - Men’s toiletries
 - Ladies toiletries
 - Baby products
 - Health foods/medicinal containers
- Empty bags/bottles can be made more realistic by filling them. Examples are
 - Dog food bags with newspaper
 - Ground coffee bags with soil
 - Cool drink bottles with coloured water
- The SIM room needs to be managed and prepared prior to learners doing their practical exercises such as stock counting, shelf filling, tidying etc.

- Electricity supply to the SIM room is crucial, for the operation of the PoS.

2.2. Maintaining the Sim room

- The room must be kept locked at all times when not being used.
- Only limited numbers of people should be allowed access to the keys to the sim room.
- Lecturers or someone tasked with being in charge of the room should be the only ones to have access to the sim room key.
- Students should be used to clean, tidy and sweep the room as part of their training and it should not be necessary for cleaning staff to access the room.
- A regular stocktake of equipment is very important as the tills are computers and prone to theft.
- Only Lecturers or the person tasked with being in charge of the sim room should be given access to the code/password of the Admin level that allows for changes to settings on the PoS

2.3. SIM room equipment

The following is the minimum requirement for a retail SIM store.

Equipment	Requirements
Point of Sale Equipment (Tills) Linked to a computer Back Office System	Scanning Point of Sale hardware
	Minimum of 2 per SIM room, preferably 3 (this is dependent on the numbers of learners)
	The system must allow for a minimum of 4 levels of authority Admin, Supervisor, Office Clerk, Cashier (That can be set under Admin level)
	The system must allow for different tasks to be allocated to these different levels of authority. (That can be set under Admin level)
	The system must allow for each Cashier to cash up – preferably a blind cash up but this is not a must have (This function can be set under Supervisor

	level)
	Show Cashier's overs & shorts after cashing up. (This can be set under Office Clerk level)
	The system must allow the set-up of a float amount (This can be set under Admin level)
	The system must allow the banking to be completed and banked (This can be set under Office Clerk level)
	The system must allow multiple forms of payment and be programmable to visually show the type of payment methods. It must include; ○ Cash ○ Credit card ○ Debit card ○ Coupons ○ Vouchers
	The above tender types must be designed, printed and available for use when the learners use the PoS
	Plastic discs that can be used as coins at the PoS
	The system must allow new products to be added to the system both with and without bar-codes (This can be set under Supervisor level)
Shelf edge label printer	A shelf edge label printer linked to a system that allows labels to be printed from bar code or product code
	Shelf edge label strips on all shelves
Store fixtures and fittings	Supermarket shelving with backboards
	Supplier promotional stands
	Pegboard and pegs
	Clothing rails

Stockroom area	Some shelving which is required to store small and single excess stocks
	Floor space is required to demonstrate building of stacks in the stockroom
	Empty cartons in quantity which should be filled with newspaper and sealed to allow the building of stacks
	Stock
Stock	Preferably empty boxes, bags and cans
	As wide a range of categories as possible
	Carrier bags

NOTE: If the school cannot arrange for computerised tills (PoS) then manual tills or even cash boxes can be used. As long as the learners can process sales and "handle cash and give change"

2.4. Other equipment

- Where possible, learners should have access to a computer that will allow for the design and printing of promotional tickets. (A program such as Word)
- Where this is not available learners can use paper and colored pens

2.5. Consumables

- Printer paper for the printing of promotional tickets
- Shelf edge label paper
- Cash up stationary
- Change requisition slips (These can be requested from many of the banks)
- Cashing up stationary (Designed by the teacher – Example provided)
- Poster paper/board
- Receiving and dispatch stationary (Designed by the teacher - Example provided)
- Banking stationary (Designed by the teacher and from banks)

2.6. Teacher Resources:

- Text book
- Carrier bags/Pictures of logos
- YouTube videos on the Supply Chain (where there is access to the internet)
- PowerPoint presentation to be prepared by the teacher (where there is access to computers)
- YouTube Videos on customer service (where there is access to the internet)
- YouTube videos of Inventory counting (where there is access to the internet)
- Actual products with examples of date coding/sell/use by dates
- Examples of merchandising techniques downloaded off the internet or photographs taken by the teacher
- Products with prices/product codes
- Examples of pricing/codes off the internet or photographs taken by the teacher
- Examples of tickets and promotional tickets/posters from retailers in the area
- Businesses in the area
- Pictures of technology used to receive stock taken off the internet. (where there is access to the internet)
- Pictures of money counting equipment taken off the internet. (where there is access to the internet)
- Explanation by SA Police Services regarding the legal procedures for stopping and searching a shoplifter (Policeman visit the class and discuss)
- YouTube video on visual merchandising. (where there is access to the internet)

2.8. Finances:

Budget and inventory

A budget must be allocated for the subject. The amount will be determined by the number of learners taking the subject across all the years and the nature of the practical work required as

stipulated in the curriculum. The budget needs to be revised annually and must consider all resources needed per year. The funding must make provision for maintenance of equipment and the replacement over the years.

Resourcing could be sub divided into the following categories:

- Hardware and Equipment
- Consumable Materials
- Practical Assessment Task Resources (PAT)
- Teaching and Learning Support Material
- Learner excursions (Petrol)
- Text books, Workbooks and Teachers Guide

3. Field Exercises and Report back.

Retail is a very visual industry and as such learners will be required to visit outlets within the area to identify examples of topics learned through the week.

This might be able to be done through learners doing this on the own if outlets are within the area and learners are able to visit them using public transport.

If this is not an option, the school should provide transport and arrange outings

After field work learners are to make a presentation to the class on their finding.

A minimum of one lesson at the end of each week or the start of the next week must be devoted to the presentations where presentations are required

SECTION 2:

SPECIFIC GUIDE BY WEEK

TERM 1. WEEKS 1 & 2**TOPIC. THE WHOLESALE AND RETAIL INDUSTRY:**

Distribution centres

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 1 Weeks 1 & 2	Distribution centers	Why organisations invest in DCs The different operational areas within a DC The difference between a DC and a warehouse Cross docking versus storage		Team discussion Presentation		Theoretical explanation Team discussion Presentation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 1: Investing in DCs.

Explain why retailers invest millions of Rands in DC and how they make up this investment.

Retailers invest in DCs for two main reasons.

1. They receive very large quantities of products from overseas and these cannot all be sent to the outlets immediately. So they go into the DC where they are stored. The Planners distribute quantities to the outlets and then the outlets draw stock as they require.
 2. Retailers can also order smaller quantities of stock because they do not have to order full cases for each outlet. They can break carton lots in the DC and send small quantities to each outlet. This saves the retailer millions of Rands in stock and this is the main reason they can afford to build and run DCs
-

Activity 2: DCs compared to Warehouses

In teams of two discuss the difference between a DC and a Warehouse.

PRESENT YOUR DECISION TO THE CLASS

A warehouse is where stock or raw material is **stored** until it is required

A DC is an area where *some* items may be stored for a period but the majority of the items received are distributed to the business's outlet as soon as possible. The whole idea of a DC is to get stock out as soon as it can.

Activity 3: Cross docking.
Explain how cross docking works.

Cross docking is generally done in 2 ways

1. One way is where the DC gets large quantities from the supplier into the DC, breaks this bulk into smaller lots for the different outlets and sends it out within a few days.
2. The other can be where the supplier does not have a big distribution network so he packages individual outlet orders separately but delivers to the retailer's DC & the DC receives the cartons and sends them straight to the dispatch area to be dispatched to the outlets when the DC next deliver there.

The stock never gets packed onto the DC's shelving and stored but is sent from the receiving bay (or receiving dock as it is sometimes called) straight to the dispatching dock. That's where the term **cross docking** comes from.

The stock goes from the one dock straight across to the other dock.

TERM 1 WEEKS 3 - 5

TOPIC. THE WHOLESALE AND RETAIL INDUSTRY:

Industry legislation

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 1 Weeks 3 - 5	Industry legislation	Legislation applicable to the industry		Verbal or written presentation Access the internet to look up the latest legislation (where available)		Theoretical explanation	Text book Internet (where available)

ANSWERS TO STUDENT ACTIVITIES

Access the internet and look up the latest editions of the legislation.

Did you notice any changes to the legislation?

Comment on the work of the learner in the Learner's Workbook

Activity 4: Industry legislation.

Provide the aims and objectives of the given legislation.

Basic Conditions of Employment	This act helps to lay down the minimum requirements and conditions of employment, protecting the employer and the employee. It covers elements related to working hours, including overtime, leave, as well as remuneration, termination of employment and administrative obligations. This act covers all employers and employees in the industry
Sectoral Determination 9: Wholesale and Retail Sector	This legislation is created to work alongside the Basic Conditions of Employment Act. The Sectoral Determination for the wholesale and retail environment specifies how the sector should handle • Minimum wages • Working hours • Number of leave days • Termination of employees
Labour Relations Act	This law governs labour relations and labour in South Africa. It applies to all employers, workers, trade unions and employers' organisations in South Africa. This act provides a structure for discussion of terms of employment, collective bargaining to determine wages, fair labour practices, dispute resolutions, unfair dismissal and sexual harassment.
Employment Equity Act	The purpose of this act is to protect workers and job seekers from unfair discrimination and provide a framework for implementing affirmative action It

	promotes equity and non-discrimination in the workplace and also includes specifications surrounding affirmative action measures. No person may unfairly discriminate against an employee in any employment policy or practice, on any grounds including race, gender, pregnancy, marital status, family responsibility, ethnic or social origin, colour, sexual orientation, age, disability, religion, HIV status, conscience, belief, political opinion, culture, language, and birth.
--	---

TERM 1 WEEKS 6 & 7**TOPIC. PROFIT:**

Profit versus volume

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 1 Week 6 & 7	Profit versus volume sales	The concept of volume verses profit Outlets that fall into the different concepts		Verbal or written presentation		Theoretical explanation Class discussion	Text book PowerPoint presentation (where possible)

ANSWERS TO STUDENT ACTIVITIES

Activity 5: Profit versus Volume

In the drawing given, fill in examples of retailers or sub-sectors that fall into each quadrant

High Profit

Low Volume	Furniture and jewellery outlets fit here – high profit but they do not sell large volumes	There are not many retailers that make high profit and sell large quantities of items. Examples here would really be of pubs in high tourist areas	High Volume
	No business fits here. Any business that makes very little profit on the items it sells and also sells very few items will go out of business very quickly	Any discount outlet – usually food outlets fit here. They sell very large quantities but do not make a lot of profit on each item they sell	
Low profit			

TERM 1 WEEK 8**TOPIC. PROFIT**

Departmental profit versus volume

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 1 Week 8	Departmental profit versus volume sales	Departments that fall into the different concepts Profit versus Volume in in-store production		Verbal or written presentation		Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

FIELD WORK

Identify departments within a supermarket that fall into the different concepts of profit versus volume.

Comment on the accuracy of the learner's information in the Learner's Workbook

TERM 2 WEEKS 1 - 3**TOPIC. PROFIT:**

Calculate retained income

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 2 Weeks 1 - 3	Categorise expenses Calculate retained Income	The concept of Fixed expenses The concept of Variable expenses The concept of Controllable expenses The concept of Non-Controllable expenses		Calculate the retained income of a business		Theoretical explanation	Text book Calculator. Income statement with certain given figures

ANSWERS TO STUDENT ACTIVITIES

Activity 6: Fixed and variable expenses

Which of the following expenses are fixed and which do you think are variable?

	Fixed	Variable
Staff costs		
- Basic Salaries	✓	
- Overtime		✓
- Casual wages		✓
Cleaning	✓	
Electricity	✓	
Water	✓	
Packaging & Wrapping		✓
Printing & Stationary		✓
Refuse collection	✓	
Rent	✓	
Rates	✓	
Repairs		✓
Telephone		✓
Security guards	✓	

NOTE:

Electricity will be variable if the outlet has a department like a bakery or hot food section as the busier the outlet is the more it must produce. However, if the outlet does not have these departments this will usually not increase according to the sales increase.

Activity 7: Controllable and Non-Controllable expenses

Which of the expenses given do you think the Manager and staff can control and which the owner or Head Office would control.

	Controllable	Non-Controllable
Staff costs		
- Basic Salaries		✓
- Overtime	✓	
- Casual wages	✓	
Cleaning		✓
Electricity	✓	
Water		✓
Packaging & Wrapping	✓	
Printing & Stationary	✓	
Refuse collection		✓
Rent		✓
Rates		✓
Repairs	✓	
Telephone	✓	
Security guards		✓

Activity 8: Calculating Retained Income

Calculate the Retained Income of this business

Income Statement for BZA Trading

	R
ACTUAL SALES	78 000
COST OF GOODS SOLD	72 000
SHRINKAGE & LOSSES	<u>1 500</u>
GROSS PROFIT	4 500
OTHER INCOME	5 000
EXPENSES	<u>6 000</u>
NET PROFIT BEFORE INTEREST	3 500
INTEREST PAID	<u>1 500</u>
NET PROFIT BEFORE TAX	2 000
TAXATION	<u>800</u>
NET PROFIT AFTER TAX	1 200
DIVIDEND	<u>750</u>
RETAINED INCOME	450

TERM 2 WEEK 4 & 5**TOPIC. CUSTOMER SERVICE****Customer queries and complaints**

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 2 Week4 & 5	Customer queries and complaints	Concepts and differences between customer queries and customer complaints The concept of a query The concept of a complaint The concept of levels of authority and how this impacts on decision making when handling customer complaints Examples of levels of authority in retail businesses How to handle customer queries and complaints		Class discussion		Theoretical explanation	Text book

Activity 9: The difference

Class discussion: What is the difference between a customer query and a customer complaint?

A query is when a customer simply wants some information.

A Complaint is when they are unhappy with something and want their problem rectified.

Activity 10: Handling complaints

How would you handle a customer complaint if you do not have the authority to resolve it?

The most important thing to do is to ***listen to the customer without interrupting***. This is especially important if the customer is angry.

Allow the customer to get their anger out of their system.

Always apologies for their feelings and show understanding for their feelings.

This will allow them to cool down.

Then explain whether you can help them and what you are going to do.

If you cannot help the customer explain it is above your level of authority and explain that you will take them to a person who can solve their issue.

Then most of all – do it.

Either solve their complaint or take them to the person who can solve their complaint.

TERM 2 WEEKS 6 - 8**TOPIC. STOCK:**

Receiving stock

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 2 Weeks 6 - 8	Receiving stock	Recap on shrinkage The concept of receiving in the industry so as to minimise losses Receiving in non-computerised business Receiving in computerised businesses Recording discrepancies		Verbal or written presentation		Theoretical explanation	Text book

Activity 11: Receiving deliveries

How would you receive a delivery so as to minimise losses to the outlet in a non-computerised outlet

Ensure the delivery is for YOUR outlet?

Ensure there is an order for the delivery?

Compare the supplier's delivery note to the outlet's order to ensure they are delivering only what was ordered.

Let the supplier bring the goods into the receiving area and compare the actual stock being delivered to the stock the outlet is being charged for on the supplier's delivery note

Do not turn your back on an open receiving door.

Do not let anyone remove the stock until it is checked in.

Date stamp cartons being received

Check expiry dates and check for damaged stock being delivered

TERM 3. WEEKS 1

TOPIC. MERCHANDISING:

Laying out displays

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 3 Week 1	Laying out a display	Planograms Benefits of set layouts Filling displays The 'just in time' concept		Verbal or written presentation		Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 12: Planograms

Explain why chain businesses have set layouts

Every chain, irrespective into which sub-sector it falls has an image it wants to promote. An image it believes will attract the target market it is aiming for.

They plan very carefully what products go near the front doors, where their fridges go, which departments go next to which departments.

They promote their most profitable departments and products but at the same time must ensure they have the items that draw customers into their outlet in a prominent place.

They need to draw their customers through their outlet so the customer gets to see as much merchandise as possible and might be tempted into an impulse buy.

The only way chain businesses can control that every single outlet is merchandised as it should be is to have set layouts

Activity 13: “Just in time” deliveries

Explain your understanding of this concept and why it is important

Carrying a lot of stock is very costly to a business.

Outlets should carry as little stock as possible but just enough to ensure they never sell out.

“As little as possible” means carrying just enough stock to cover sales until the next delivery is received

This is the concept of getting the delivery “**just in time**”

So where FMCG outlets are in town centres near their DC and get deliveries daily from their DC they should only carry about 2 or 3 day’s stock at any time.

If an outlet is far from their DC and only gets a delivery once a week then it should carry about a week and a half’s stock.

In other words, the next deliver arrives “**just in time**” so the outlet does not sell out.

This is important because it means;

- smaller stockrooms and lower rents.
- displays are filled mainly on the day the DC delivers as there is very little back-up stock to fill shelves on other days and this allows the manager to schedule staff to come in on the day of the DC delivery.

TERM 3. WEEK 2

TOPIC. MERCHANDISING:

Housekeeping

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 3 Week 6	Housekeeping	Explain "housekeeping" as used in the industry The concept of housekeeping Cleaning Prices, shelf edge labels, ticketing Tidying Damages Items moved by customers		Verbal or written presentation Team discussion and exercise		Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 14: Implementing housekeeping

In teams of two list everything you will do when housekeeping your department.

PRESENT YOUR LIST TO THE CLASS

Housekeeping is the process of cleaning and tidying display areas and stock

You should begin at one end of your section and work your way to the other end.

You must;

- Make sure that every item has a shelf edge label and it correspond to the stock that is on the shelf.
- Remove all dirty or damaged shelf edge labels and replace them.
- Remove any damaged, soiled or expired stock from the shelf.
- It is sometimes useful to use a ruler to tidy items like deodorants, into straight lines.
- Fixtures and stock (where applicable) must be dusted.
- Items in the wrong place must be taken to the correct place

In clothing outlets, as part of housekeeping, staff should ensure all styles are grouped and sizes grouped.

If the hangers have size indicators staff should check the item on the hanger is the same size as the size indicator on the hanger

They must check no item is damaged or dirty

TERM 3 WEEK 3**TOPIC. MERCHANDISING:**

External merchandisers

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 3 Week 3	External merchandisers	Explanation of the external merchandising organisation Why businesses use external merchandisers Their role in the industry Pros & Cons to using external merchandisers				Theoretical explanation	Text book

Activity 15: External merchandisers

Why do you think a supplier would want to pay someone to go around to the retailers and fill the shelves for them.

External merchandisers are usually contracted to merchandise products that are fast moving and because of this we often find that they sell out very quickly and the retailer's staff do not have the time to keep the shelves full.

Sometimes the stock is lying in the retailer's stockroom and not on the shelf and when not on the shelf the customer cannot buy it and if the customer is not buying the product the supplier loses out.

It is usually the supplier and not the retailer that loses out because the customer often has a competitor's product she could buy.

So some suppliers find that it is money well spent, to pay an external merchandising company to check that all their products are on the shelf or even have a dedicated merchandiser in the supermarket continually making sure that their products are well stocked and available for customers to buy

Activity 16: External merchandisers

Explain the role of the external merchandiser in the industry.

The external merchandiser's role is to merchandise specific products for a specific or a few specific suppliers in retailer's outlets.

He/she must ensure there is stock on the shelves of the outlet and the shelf edge labels are on display.

If there is no stock available the merchandiser must tell the manager and often he/she can take an order from the outlet

TERM 3 WEEK 4**TOPIC. MERCHANDISING:**

Visual merchandisers

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 3 Week 4	Visual merchandising	The concept and aim of visual merchandising When visual merchandising is appropriate Visual merchandising methods for different merchandise The difference between Visual Merchandising and merchandising in outlets where stock is replenished		Verbal or written presentation		Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 17: Visual Merchandising

Explain why retailers display their merchandise visually.

Visual merchandising is the activity of promoting the sale of goods by presenting them in an appealing way to the customer in retail outlets.

It is a creative display, intended to attract a potential customer

Attractive displays get customers to come into the outlet and there is an obvious increase in opportunity to improve the sales figures of the retail outlet.

By implementing visual merchandising, retailers aim to attract customers to the outlet, come in and be interested in a display, eventually making a purchases and thereafter becoming a loyal, regular customer who comes back again and again.

Activity 18: The difference

Explain the difference between visual merchandising and merchandising in outlets where stock is replenished.

Where stock is replenished, like in supermarkets and other FMCG stores, items are not displayed in a visual manner. Each item has a place on the fixtures and the stock is replenished regularly.

Stock is grouped in a way to promote sales but not in a visual manner.

Visual merchandising is used in outlets that sell fashion/clothing where ranges and stock changes regularly and the visual merchandising methods are used to promote sales

TERM 3 WEEK 5

TOPIC. PROMOTIONS:

Ticketing and display methods

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 3 Week 5	Ticketing and display methods	Merchandising and ticketing for high end outlets Merchandising and ticketing for lower end outlets Merchandising and ticketing of different products Ticketing in small outlets compared to chain outlets		Verbal or written presentation		Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 19: Promotional ticketing and displays

Explain how promotional displays and ticketing differ depending upon the target market of the outlet and the size of the business

High end outlets aimed at the very wealthy do not promote price. Rather a lifestyle and quality product.

Outlets aimed at the lower LSM groups need to shout about the promotions and display as much stock in as small a space as possible

FMCG outlets and discount outlets shout about price with large tickets and displays

Buying and printing promotional ticket can be very expensive and you cannot expect the owner of a small shop to be able to afford the same ticketing as a large national chain.

So the owner of a single outlet will have to be creative in designing ticketing to highlight promotional products and very often they will be simple, small hand written tickets or tickets printed off a computer in the outlet or owners home.

National chains can afford neat and large printed tickets to promote either price or a range of products or new lines

TERM 3 WEEK 6 - 8**TOPIC. CASHING UP AND BALANCING:**

Methods of balancing and banking daily takings

Insert date	Topic(s)	Theory	Date completed	Practical	Date completed	Activities	Resources
Term 3 Weeks 6 & 7	Methods of balancing and banking daily takings	Preparing the deposit of cash in outlets without drop safes Preparing the deposit of cash in outlets with drop safes The concept of • Bankable • Non-bankable • Already Banked • Invalid tender Separating and preparing other forms of tender handed in Finalising non-bankable tender Safety when depositing cash		Verbal or written presentation		Theoretical explanation	Text book

ANSWERS TO STUDENT ACTIVITIES

Activity 20: Takings types

Give 1 example of each of the following;

Already banked

Non-bankable

Invalid tender

Already banked:

- Debit cards
- Credit cards
- EFT payment
- Buy Aid

Non-bankable:

- Gift vouchers
- Coupons
- Loyalty vouchers

Invalid tender:

- South African bank notes stained with pink dye.
 - Foreign currency (coins or notes)
 - Another retailer's coupon
-

Activity 21: Deposit takings

Explain how to prepare a deposit for a small outlet that is not computerised and a national computerised chain outlet and how to handle bankables

Small outlets

In the small one-man business, the owner would usually do the banking.

Some still take their day's deposit in a carrier bag or briefcase to the bank and collect change from the bank while there.

He/she simply makes a note of the actual notes being deposited and takes that, along with the account number of the business as well as some form of identification, to the bank.

The bank teller checks the money being deposited, records it on the computer and gives the owner a printout which is proof of the deposit.

In slightly larger outlets where there are a few Cashiers and a drop safe there is more control in place

Medium non-computerised outlets

To prepare the day's cash deposit – the Bankables, the Cash Clerk will total all the cash on his/her desk and check it balances with the amount shown on the cash reconciliation sheet as Total for Cash Handed In for the day

Outlets depositing larger amounts of cash can ask the bank for a deposit book and can prepare their deposit in the outlet.

They would list all the cash being deposited

Large, computerised outlets

In outlets with a drop safe there is nothing the Cash Clerk can do to prepare the actual cash. It is already in the safe.

A deposit slip listing the total being deposited will still be completed.

Sometimes this is completed by hand as for non-computerised outlets but in many computerised outlets this is automatically generated by the outlets cash up computer system once cash up is completed.

In larger organisations that have computerised cash systems they usually have a lot more money to deposit than a small one-man business.

Nearly all these outlets pay a cash collection company to come and collect the outlets cash and

take it to the bank.

The cash collection company would take the deposit slip and all the cash, which is in the drop safe, to the bank and the following day return with the signed outlet copy of the deposit slip.

SECTION 4:

ASSESSMENT

4.1 Assessment

Year 1 Reporting only in the term when the skill is done.

The GETC: Skills and Vocational Qualification at NQF Level 1 is a four-year Learning Programme. In year one a learner is exposed to a number of Vocational Subjects. Each subject is offered over a ten-week period (one term) in Year 1, where the learner is exposed to the basic skills required for the subject. By the end of year 1 the learner will select a minimum of one skill for the qualification.

Year 1	Formal School-Based Assessments
	Learner performance in the Term:
	Practical 75% *
	Theory 25%
Term Report	100%

4.2 Timing of formal assessment

Suggested Program of Assessment for Wholesale and Retail

YEAR 4					
Term	Content/ concept/skill	Activities	Forms of Assessment	%	FATs based on activities in CAPS: TO
Term 1	- Understanding the Wholesale & Retail Industry - Plan to improve the profit of a wholesale or retail business	Activity 1 Practical exercise	Practical exercise	40%	FAT 1
		Activity 2 Practical exercise	Practical exercise	35%	
		Activity 2 Respond to questions	Pen and paper test (Oral or written)	25%	
Term 2	- Plan to improve the profit of a wholesale or retail business - Understanding the Wholesale & Retail Industry - Explain the importance of stock control and receive and dispatch stock	Activity 1 Analyses exercise	Practical demonstration	25%	FAT 2
		Activity 2 Complete paperwork	Practical exercise	50%	
		Activity 4 Respond to questions	Pen and paper test (Oral or written)	25%	
Term 3	- Explain how different categories are merchandised - Explain why businesses promote and identify how they reach their target	Activity 1 Respond to questions	Pen and paper test (Oral or written)	100%	FAT 3

	markets and display promoted items in their stores Record sales, process payment, cash up tills and bank takings according to the equipment used in the store				
Term 4	This term is given over to revision of the year's work and preparation for final assessment				FAT 4
